

JICA-DSP

# Graduate Schools of Management, Global Environmental Studies (GSGES), Engineering, Agriculture, and Energy Science, Kyoto University

## JICA Development Studies Program (JICA-DSP)

Various universities, in collaboration with JICA, have established JICA-DSP among the graduate school degree courses they offer. JICA-DSP consists of class subjects pertaining to the development experience of modern Japan (including the experience of Japan's own development and of its cooperation with other countries through ODA). This program offers JICA scholars a chance to deepen their understanding of Japan's development experience in the respective academic fields.

Kyoto University states its mission to sustain and develop its historical commitment to academic freedom and to pursue harmonious coexistence within the human and ecological community on this planet.

Kyoto University's mission on education is as follows:

- Within its broad and varied educational structure, Kyoto University will transmit high-quality knowledge and promote independent and interactive learning.
- Kyoto University will educate outstanding and humane researchers and specialists, who will contribute responsibly to the world's human and ecological community.

For details of each graduate school, please refer to the following URLs.

## PROGRAM OUTLINE

This program aims to build future leaders who can design mutual development in Japan and developing countries based on Japanese experiences in international cooperation. This education program is re-constructed around existing Masters' Programs in Kyoto University with a focus on sustainable development.

## COURSE SUBJECTS

### International Negotiation

- Introduction to fundamental concepts (theory and practice) of negotiation
- Practices of interacting in Japan, internationally, and with international development agencies
- Toolbox of negotiation and practical application skills

### Integrated Approaches for Sustainable Development

- Basic viewpoints and knowledge required for environmental leadership for resolution of environmental issues in developing countries
- Practical case studies of international environmental projects

Through the “Integrated Approaches for Sustainable Development” course, I was able to learn about a range of different environmental and climate issues that humanity is facing. When I graduate from Graduate School of Global Environmental Studies (GSGES) at Kyoto University, the knowledge and experience gained in the course will enable me to work towards sustainable development in my home country.
