

Project Outline

- **Duration:** 1985 ~ Ongoing
- **Sector:** Multisector as trend of JICA Cooperation
- **Name of Counterpart Institution:** Government/Universities/Private sector/NGO's/etc.
- **Type of ODA:** Technical Cooperation (Training)
- **Project Overview:** A core program carried out in Japan, by inviting an average of 10,000 officials from developing countries every year and with cooperation from domestic partners, to provide technical knowledge and practical solutions for development issues in participating countries.

Development Issues / Background

- Mozambique has challenges to address on human resource development and multisector development issues;
- JICA has maintained the approach of building reciprocal relationships with developing countries in which both sides learn from each other and grow and develop together;
- JICA carries out innovative and quality program that can accommodate both the development needs of developing countries and Japan's policy challenges.

Expected Impact on the Education Sector

- Participants reexamine issues and challenges of their home countries, and tackle various development issues with a different perspective;
- Utilization of Japan's development experience and know-how, by applying Japan's advanced technologies and skills, through adapting them to each partner country; and
- Contribution on promotion of human resource development and to solve development issues in partner countries.
