900 shelters

were repaired in educational institutions in Kyiv region

There are more than **1.2 thousand** shelters in schools and kindergartens in the region.

In 2024, it is planned to equip more than **100 new shelters** in educational institutions.

ECONOMIC RECOVERY

KYIV
REGIONAL MILITARY
ADMINISTRATION

THE IMPACT OF THE WAR ON THE ECONOMY

770 enterprises in the region were destroyed and damaged

127
destroyed

643
damaged

More than

400 thousand square metres

of warehouses of the most successful companies in Ukraine were destroyed

20% of the total area of logistics facilities

The most common problems for recovery are:

- Lack of raw materials (its suppliers were in the area of active hostilities for a long time)
- Lack of sufficient financial resources to restart the work of temporarily suspended enterprises
- Problem with employee due to staff outflow, military mobilization of employees, or existing threats risks from missile attacks to property and human life

Economic growth

more than

208 thousand

ENTITIES

over

+13,9 thousand

during 2023

over

550

have moved to the Kyiv region and changed registration since 2022

Economic growth

129
thousand

jobseekers used employment services

at least

12,6
thousand

were unemployed during 2023

14
thousand

jobs were created during 2023

INDUSTRIAL PARKS

12 | industrial parks in
Kyiv region

+1 registered in
February 2024

+13,3
hectares total territory of industrial
plots of industrial parks

650
over workplaces

19,4
million dollars USA the total investment
for the next three years

KYIV
REGIONAL MILITARY
ADMINISTRATION

Principles in the restoration and development of the Kyiv region

Principle I

Sustainability of the solutions

Principle II

Environmental friendliness

Principle III

Energy efficiency

Principle IV

Complexity and comprehensive approach

Principle V

Barrier free

Assistance from Japan

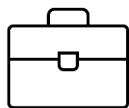

19 of special equipment for recycling construction were units handed over

Implementation of the Demolition Waste Management Pilot Project in Kyiv region, funded by the Government of Japan through the Japan International Cooperation Agency (JICA)

Dimensions of cooperation

Joint business projects on the basis of industrial parks

Expansion of twinning between municipalities and communities

International technical assistance projects

Insurance of investments through of the mechanisms of the Export Credit Agency

Areas of cooperation

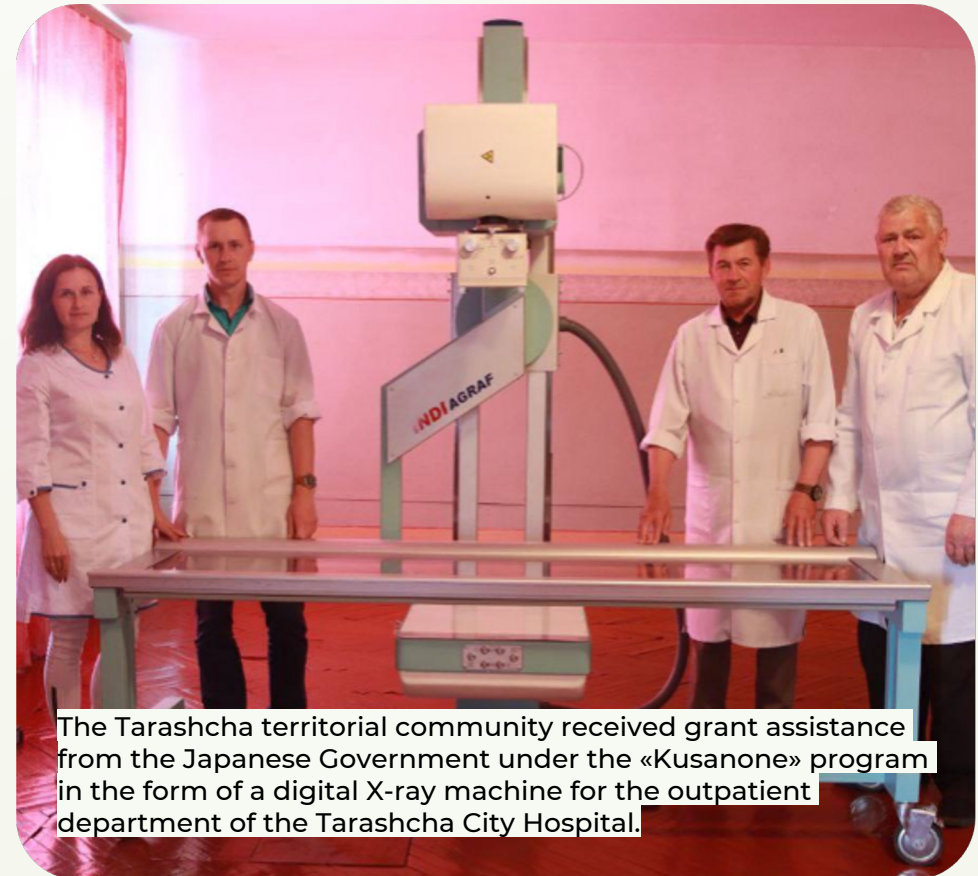

more than
200
thousand medical services to internally displaced persons was provided by healthcare institutions of Kyiv region

Needs:

Building a network of rehabilitation centers for veterans and the military

- provide Ukraine with remote medical services, which will allow Japanese doctors to provide medical care to victims in Ukraine through digital technologies
- Medical equipment to healthcare institutions
- Repair of hospital premises
- Mental health care system

The Tarashcha territorial community received grant assistance from the Japanese Government under the «Kusanone» program in the form of a digital X-ray machine for the outpatient department of the Tarashcha City Hospital.

Areas of cooperation

Construction of a factory for the production of endoprostheses and exoprostheses

The cost of the project 2 million euros, a payback period of 3 years

Construction of a factory for the production of equipment for light industry

knitting, weaving, sewing machine, auxiliary machinery, machinery for washing, ironing, pressing

Areas of cooperation

Implementation of materials recovery and recycling projects

EXAMPLE: Waste Ukraine Analytics with Japanese companies Marubeni and Groovenauts, Inc.

Creation of plastic tracking systems using digital product passports, textile recycling technologies, waste and recyclable collection routes using the MAGELLAN BLOCKS cloud platform.

Joint scientific research of Japanese and Ukrainian universities in the framework of artificial intelligence

EXAMPLE: Bila Tserkva National Agrarian University and Japanese universities: Tokyo University of Agriculture and Yamaguchi University.

The National University of Food Technologies with the Japanese University of Hokkaido (Sapporo).

Areas of cooperation

JOINT BUSINESS PROJECTS ON THE BASIS OF INDUSTRIAL PARKS OF THE KYIV REGION:

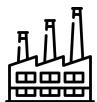

- The construction of a plant for the production of energy storage systems (BESS) on the "Myrotske" IP's territory (the cost of the project 20 million USD)
- The construction of a plant for the production of solar panels on the "Kyivshchyna" IP's territory
- To build a smart shelter with radiation protection on the "Kyivshchyna" IP's territory

Areas of cooperation

Implementation of water supply and drainage restoration projects

Implementation of solid waste management projects

Implementation of projects in the field of housing reconstruction and infrastructure facilities

Expected results for citizens

Improving water supply and conservation of water resources

+ 20,000 cubic meters of water.
Improving the quality of drinking water

Restoration of the forest

+ 41 thousand tons of oxygen. Reduction of mortality from air pollution by 50%.
- 1 million tons of dust per year, climate mitigation

Waste management

+ 300 hectares of land suitable for use.
Saving natural resources. Ecological culture.
Reduction of fires = reduction of diseases

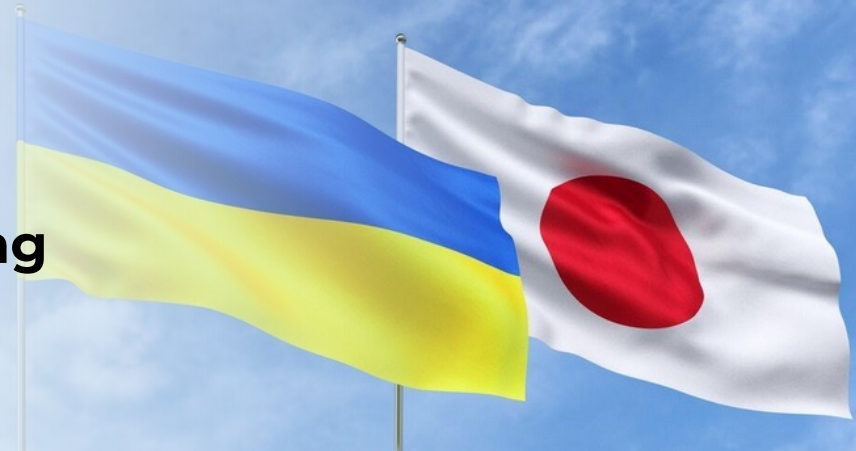

Eco tourism

+ 3 mega parks. 80 thousand tourists.
Environmental education for children

We are grateful to Japan for support of Ukraine:

both in restoring Peace and rebuilding the entire country and Kyiv Region!
