African Regional Corridors

The survey covered the three key corridors as well as the North-South and the Central corridor.

Environmental Changes in African Regional Corridor Development

The environment surrounding the development of corridors in Africa has changed significantly, and future development and implementation of corridor development strategies should take them into account.

“...industrial and agrarian revolutions always go together ... economies in which agriculture is stagnant do not show industrial development.”

W. Arthur Lewis, “Economic Development with Unlimited Supplies of Labour”, 1954

Various donors implement similar projects/programs

Feature of JICA's technical cooperation (Capacity Development)

Promoting "Farming as a Business"

Sharing information among market actors & farmers for improving efficiency of local economies (Mitigating the **asymmetry of information**)

Market actors

- Retailers, middlemen
- Agricultural inputs companies (seed, fertilizers, etc.)
- Agricultural product processors

Producers

Developing and motivating people by effective activity designs and "tips"

Raising intrinsic (internal) motivation for continuous activities implementation (Self-determination Theory)
-Three psychological needs to motivate people-

-  **Autonomy**
People need to feel in control of their own behaviors and goals
-  **Competence**
People need to gain mastery of tasks and learn different skills
-  **Relatedness**
People need to experience a sense of belonging and attachment to other people

SHEP's original activities (ex. Market survey, Crops selection, Stakeholder Forum etc.) raise farmers' intrinsic motivation and mitigate the asymmetry of information.
