

Cambodia JICA Project for Strengthening Human Resources Development System of Co-Medicals

The Project for Strengthening Human Resources Development System of Co-medical

A News Letter from JICA HRD Project No. 3

September 2010

Counterpart training in Japan

The project team sent three of the project counterparts (CP) in order to attend the CP training in Japan. H.E. Dr. Thir Kruey, Secretary of State, and Ms. Keat Phuong, Director of HRD attended the training from MOH and H.E. Dr. Oum Sophal, Rector of UHS

also attended the training. The learning topics were "Teachers training system", "Licensing system" "Transition of developing regulatory framework of human resources" at cooperating institutions (National Center for Global Health and

Medicine, National College of Nursing, Japanese Nursing Association) and Ministry of Health, Labor and Welfare. The trainees will report their training in Japan at the 1st JCC meeting organized in Oct 2010.

Snapshot of CP training

National Board Quarterly Meeting

There are many meetings existing concerned human resource development activities which are organized or co-organized by Human Resources Development Department (HRDD), MOH, Cambodia.

Among them, National Board Quarterly Meeting is one of important regular meetings. The meeting is chaired by HRDD director and all of RTC's managers and chiefs of technical offices attend the meeting. In addition, international donors (JICA, UNFPA, GTZ) contributing to human resource development issues attend the meeting. Besides it, there are two regional meetings which are

focusing on human resource development issues. One is named "Technical Board Meeting" for discussing issues of clinical practice between RTC and Referral Hospital (RH)s. Another is "Regional Meeting" for reviewing a variety of trainings implemented in previous quarter between RTC and provincial health department (PHD).

National Quarterly Meeting was organized on 20, 21 Sep. at MOH and Technical Board Meeting and Regional Meeting was carried out on 22, 23 Sep. in Svay Rieng province. In the National Quarterly Meeting, the following topics were discussed; explanation

of new JICA-HRD project, report of core competency of midwife by UNFPA, data management of questionnaire of AND, and schedule of national exit exam of AND. In the meeting in Svay Rieng, the participants raised some issues of clinical training at RHs. The project is mainly carried out at MOH, and the project has some distance from clinical site. Therefore, we think it is important opportunity for the Project to understand current issues that RTC and hospitals are facing and to feed back to the Project from clinical side to consider project input. The project team hopefully attend the meeting regularly as much as possible.
