

The Project for Strengthening Capacity for Maintenance of Roads and Bridges
Project News (August, 2016)

The Third Joint Coordination Committee Meeting

The Third Joint Coordination Committee (3rd JCC) meeting among the Ministry of Public Works and Transport (MPWT), Japan International Cooperation Agency (JICA), and other agencies concerned with the project was held at the Conference Room of MPWT on 10th of August, 2016. Discussion and exchange of opinions were made, and resulted in a mutual agreement on several items in the meeting.

The following topics were discussed among the participants after explanation from presenters of MPWT.

1. Output 1: Establishment of Bridge Maintenance Cycle
2. Output 2: Road and Bridge Inspection (Nationwide bridge database, DRIMS, pilot project for overloading control at Tsubasa br.)
3. Output 3: Repair works of road and bridge (bridge crack sealing, ready mix cold asphalt for AC patching)
4. Output 4: Introduction of Road and Bridge Maintenance Cycle to Other DPWTs and Concerning Agencies
