- Ex-Barclays IB Analytics

BBVA

backed by  Combinator

GETTING INSIGHTS FROM DATA IS A TIME-CONSUMING PROCESS

- Long turnaround time
- Manual analytics/spreadsheet routines
- Modelling and forecasting
- Reports, visualizations
- Barriers to access data on demand

AI ERA IN ENTERPRISE DATA AND ANALYTICS

1. Manual / Code-based / Excel
2. Low-Code and automation
3. AI analysts and Agents

The Solution:

Virtual AI Analyst

As easy as asking a question and as powerful as code, designed to analyze and automate insights, reports and data processes.

THE SIMPLEST WAY TO DO AI-POWERED ANALYTICS WITH DATRICS

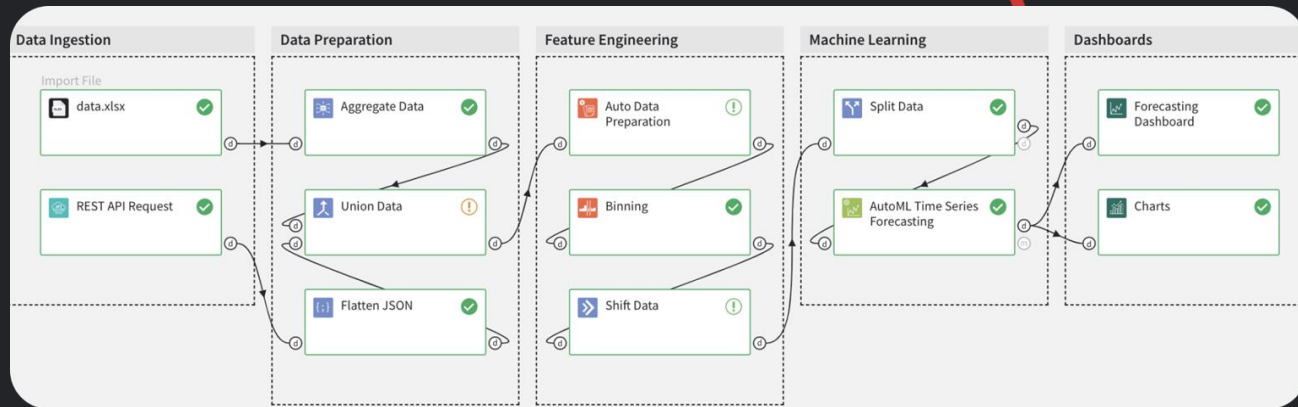

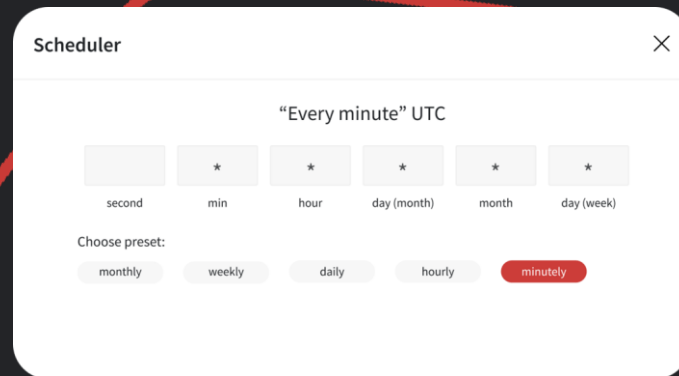

everything through the
web & chat UI

1. DATA: upload spreadsheets or connect datasources
2. PREPARE AND DEPLOY^g: join, clean and transform with a drag-n-drop or conversational UI
3. GENERATE INSIGHTS: ask question in the chat to get live data reports, visualizations, APIs, pivot tables and forecasts

Datrics supercharges business teams and analysts to do exploration, insights and create data/AI apps without coding

We empower Analysts to do what the team of Data Engineer + Data Scientist + DevOps is required for

DATRICS CHAT INTERFACE: AI AGENT

- Prompt UI for data tasks
- Insights for everybody - answer your data questions without chasing data teams
- Immediate interface for C-level, Business Unit heads, Budget owners.
- Governance and access management

OUR CLIENTS

Kraft*Heinz*

After working with Daticrs for more than four months, it's obvious we made the right choice in data analytics partner.

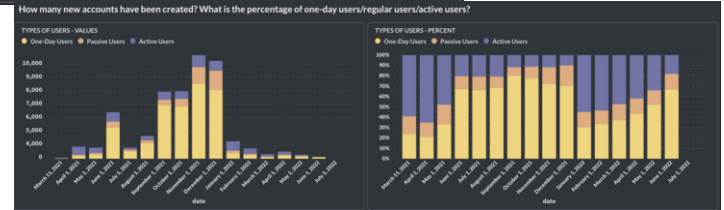

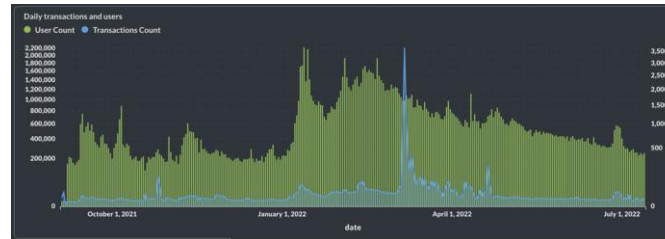

We are doing day-to-day analytics almost without involving engineering teams, completed LTV modeling project in just 6 weeks.

Petr Baron

CEO TBI Bank

Datrics for Reporting Automation

Steps:

- **1 - Gathered data** from multiple sources
 - Open banking API
 - Transactions from a DB
 - Data provided in XMLs
- **2 - Automated data extraction, cleansing and aggregation** data with no manual involvement
- **3 - Generated reports and chat interface:** interactive and shareable on a daily basis

Outcomes

- Custom data connectors and parsers collect data in a centralised data storage - **days**, not weeks or months.
- Data is transformed, metrics and KPIs calculated and stored in a consumable format.
- Scoring model is applied, resulting in automatically generated reports and population of dashboards.
- Integration with email and Slack allow prompt notifications and access to results.

WHAT ARE SOME REAL PROBLEMS WE ARE SOLVING?

CUSTOMER'S SUCCESS STORIES

*We Increased sales team efficiency by identifying **75% more leads** with conversion prediction and also our **churn rate decreased 15%** by using Datrics' solution*

Retail & Ecommerce Teams

*With Datrics, we have a chat-based CFO co-pilot giving insights on KPIs and performance . LTV model was delivered in 6 weeks, **saving 60h+ / week** of manual work*

Financial Services & Banking

*We were able to **double data and AI experiments** with the same team and resource, also **70% time savings** on data processing and maintenance, **reducing reporting time** with automated data preparation, improving ROI on analytics*

Product & Data Analytics

Looking for Partners: Banks, Enterprises and Consultancies to...

- Achieve clear ROI on AI investments and create value together
- Automate spreadsheet and manual work
- Innovate on data&AI capabilities for FP&A, RevOps, Retail teams and domain experts without hiring additional teams.

ROI ON YOUR AI INVESTMENTS HAVE LLMs IN PRODUCTION IN ENTERPRISE

- Do 2x more data and AI experiments with the same team and resources! No ownership transition to engineering teams.
- Integrated in your current tech stack and workflows, no vendor lock and no overhead.
- Automation and sharing in a few clicks, **conversational interface** for everything.
- Governance and access management, collaborative work - full transparency and logs
