Preface

Japan International Cooperation Agency (JICA) has launched ‘JICA Partnership Program (JPP)’ since 2002 and the JPP started in Nepal since 2003. This purpose is to support Japanese groups (NGOs, local governments, and Japanese Universities etc.) to utilize their accumulated knowledge and experience in assistance activities for developing countries through Official Development Assistance (ODA).

During 2003 to 2024, total 40 projects had completed in Nepal and 11 projects have been on-going as of July 2024. Fields of project are varied such as agriculture, health, education, improvement of income etc and aim to contribute Nepalese people and society at grass-root level.

NGO-JICA Japan Desk Coordinator (NGO Desk) is located within JICA Nepal Office. It has been providing information about current situation and legal matter of NGO activity in Nepal. Moreover, NGO Desk has been coordinating between Japanese NGOs and Nepalese NGOs to work together effectively under JPP. NGO Desk is ready to support international cooperation at grass-root level so everyone can contact freely.

JICA Partnership Program (JPP)

The Japanese government offers various assistance programs to meet the diverse needs of developing countries through ODA. In international cooperation, the role of NGOs and local governments has become more important, both in Japan and in developing countries.

The JICA Partnership Program (JPP) was introduced in 2002 to support and cooperate with the implementation of projects formulated by Japanese NGOs, Japanese local governments, and Japanese universities to utilize their accumulated knowledge and experience in assistance activities for developing countries.

JPP is a technical cooperation program implemented by JICA to contribute to the social and economic development of developing countries at the grass-roots level in collaboration with "Partners in Japan," such as NGOs, universities, local governments, and public corporations.

The main objectives of JPP

1. Meeting the diverse needs of developing countries by utilizing the knowledge and experience of Partners in Japan for international cooperation activities
2. Strengthening collaboration between communities in both developing countries and Japan by promoting the participation of Japanese citizens in international cooperation activities
3. Encouraging local citizens in Japan to employ their knowledge, experience, and technologies for international cooperation activities, which in turn revitalize Japanese communities

The target countries are those that have approved the acceptance of JPP and where JICA overseas offices or JICA. JPP is implemented by JICA in collaboration with Partners in Japan based on proposals submitted by the Partners. The recipient government's approval is necessary prior to implementation of the program or individual projects, in accordance with the procedures agreed upon between the two governments. Because JPP is not based on official requests from the recipient government, there is no requirement for an international agreement between the governments of the recipient country and Japan.

The recipient government is not required to grant any special privileges, such as tax exemptions, to Partners in Japan. However, the recipient government is expected to accord the same privileges, exemptions, and benefits as those accorded to any third-country organization or international organization performing similar missions in the recipient country.

JPP can be applied by Japanese organization only. Japanese organization should have established good relationship with Nepali NGO before applying JPP.

Type of JPP

JPP has three types depend on nature of Japanese group, its experience and size of project.

Partner Type

Group Japanese NGO, universities, groups holding its Japanese corporate status and have international cooperation experiences in developing country more than 2 years.

Budget	Duration	Application
JPY 100,000,000.	3 years	1 time/year

Support Type

Group Japanese NGO, universities, groups having international cooperation experiences in developing country or Japan more than 2 years.

Budget	Duration	Application
JPY 10,000,000.	3 years	1 time/year

Local Government Type

Group Japanese Local Governments (In case of implementing, designated group by the government is eligible to implement.)

Budget	Duration	Application
JPY 60,000,000.	3 years	1 time/year

JPP LIST (2003–2024)

Support Type

Duration	Institute name	Location
	Project name	
2004 Oct – 2007 Sep	Center for Nepal Environmental and Educational Development (CENEED)	Kathmandu
	Completion of Swayambhu Environmental Park, Nepal and the Basic Preparation for Environmental Education of Nepal by Supporting Group for Center for Nepal Environmental and Educational Development	
2005 Aug – 2008 Jul	Fukuoka Nepal Children Education Promotion Committee	Kaski
	Agricultural Development through Coffee Cultivation in Nirmalpokhari Village, Kaski District	
2012 Jun – 2015 Mar	Kobe Tokiwa University	Kaski
	Life Improvement in Dhital Village Development Committee of Kaski District, Nepal –Supply Promotion of Safe Water–	
2015 Feb – 2017 Mar	Research Group for Agricultural Development (RGAD)	Kathmandu
	Technical Assistance for Optimal Use of Agricultural Chemicals in Sankhu, Nepal	
2016 Oct – 2019 Sep	Japan Nepal Female Education Association (JNFEA)	Dhading Kaski kapilvastu
	The Project of Introducing Female Teacher Training System in Nepal	
2016 Oct – 2019 Sep	IRUKA, Center for Independent living Okinawa Japan	Kathmandu Pokhara
	Empowerment and Mainstreaming of the Earthquake Affected People with Disabilities in Nepal	
2016 Nov – 2018 Oct	Shinshu University	Mustang
	Project on Enhancement of Agricultural Education in Higher Secondary School	
2017 Jan – 2018 Jan	Plus Arts	Kathmandu
	School Based Sustainable Disaster Risk Reduction Education and Material Development Project	
2017 Aug – 2020 Aug	Technical Cooperation to Nepal, Higashikagawa Japan	Dhading
	Women Livelihood Project to Connect Higashikawaga and Nepal	

2017 Sep – 2019 Aug	Morinomiya University of Medical Sciences Activities for Nutritional Improvement and Lifestyle-related Diseases Prevention in Dhital Village, Kaski District	Kaski
2017 Nov – 2019 Nov	e-Education Digital Math Education Project for Vulnerable Students in Remote Areas in Nepal	Kavre Makwanpur
2019 Jan – 2020 Feb	Plus Arts Project to Promote School Club Activities on Disaster Risk Reduction	Kathmandu
2020 Jan – 2025 May	Hiroshima University Hospital of Epilepsy Center Act on Ability Upskilling to Make an Epilepsy Diagnosis and Enhancement of Regional Cooperation for the Treatment in Kathmandu and its Periphery	Kathmandu Pokhara Chitwan
2022 Jan – 2024 Dec	All Japan Association of Hard of Hearing and Late-Deafened People (Zennancho) Pilot Project of Accessible Communication Support for Hard of Hearing Patients in Kathmandu Hospital	Kathmandu
2023 Oct – 2025 Oct	Participatory Evaluation Center Nepal Mountain Village Livelihood Improvement Project aiming to make Potatoes and Kiwis to be Local Specialities through Strengthening Capacity to Access to Local Government Services	Myagdi

Background of Organization

AMDA-MINDS endeavors to support individuals in impoverished and socially marginalized regions through mid-/long-term humanitarian and social development assistance, with the goal of empowering them to establish a nurturing environment conducive to "Today's family life with hope for a better tomorrow." Additionally, we aspire to share the knowledge and expertise acquired from these efforts with Japanese society and foster bilateral international cooperation initiatives.

Collaboration		
Period	Fund	Project
Mar 2023– Mar 2026	MoFA	Project For Promoting Safe Pregnancy and Delivery In Rural Remote Areas of Far-Western Nepal
Mar 2024– Feb 2027	JPP	Project for Enhancing Small-Holder Farmers' Action (Pesha)

SUMMARY OF PROJECT

“If I can make a living through farming, I want to live in the village with my family.” quietly voiced a young man on the brink of departing abroad for work. It was with the aspiration to materialize these sentiments that this project took root.

Despite over 60% of Nepal’s population being engaged in agriculture, the sector contributes only about 30% to the country’s GDP. This indicates that agriculture has not fully developed as a national industry, resulting in a serious migration from hillside villages. In the project area, while more than 90% of residents rely mainly on agriculture for their livelihoods, only 60% of households can sustain themselves through subsistence farming throughout the year. Furthermore, in over half of these households, at least one family member seeks employment as a migrant worker either domestically or internationally.

Given the unsuitability of large-scale mechanized farming in the target hillside region, the project focuses on generating cash income by integrating the cultivation and commercialization of vegetables, fruits, and cash crops like coffee, leveraging the local terrain and climatic conditions. Specifically, the project aims to improve the livelihoods of small-scale farmers through the production and marketing of vegetables and coffee. This involves: 1) training young leaders in the agriculture sector and building cooperation among stakeholders, 2) improving cultivation techniques and establishing stable production systems, and 3) developing a profitable sales network while considering market linkages. The project will work with 900 farming households in these endeavors.

The goal of this project is to enable as many farmers as possible to proudly declare, “I am a professional farmer, and agriculture is my vocation,” rather than saying, “I’m only doing agriculture because I can’t do anything else.”

Project Location	Pokhara, Kaski
Other SNS	【Facebook】 Maternal and Child Health Project for Safe and Secure Delivery in Pokhara

Background of Organization

Pokhara City and Komagane City are international friendship cities established to promote activities at the citizen level. Through "people-to-people cooperation", we are working towards building strong ties between Nepal and Japan. In Pokhara City, in particular, we are focusing on activities in the field of maternal and child health to ensure safe and secure childbirth for pregnant women.

Collaboration		
Period	Fund	Project
May 2011–Apr 2012	Embassy of Japan (GGP)	Construction of Mother–Child Friendship Hospital (now named Matrishihi Miteri Hpospital)
Mar 2015–Mar 2017	JPP	Maternal and Child Health Project for Safe and Secure Delivery
Jun 2017–May 2021	JPP	Sustainable Maternal and Child Health Project
Apr 2020–Mar 2022	CLAIR	Capacity Building Program for the Raining Center
Jan 2023–Jun 2025	JPP	Project for Continuum of Care for Maternal and Child Health

SUMMARY OF PROJECT

We have been working for improving maternal and child health since 2008. Initially focusing on providing ambulances, medical equipment, and supporting construction of hospital. From 2015, we launched a JICA Partnership Program (JPP), enhancing health education and capacity building for healthcare providers.

Phase 3 of JPP started in 2023, we are focusing on two main activities.

1) utilize of the maternal and child health handbook (MCHHB) to implement continuum of care from pregnancy to infancy. This allows healthcare providers and mothers to share information and provide high-quality health guidance. The MCHHB is recognized positively by healthcare providers as an essential tool for mothers to manage their and their children's health, and has gained support from Pokhara City, Kaki District and Gandaki Province.

2) to support breastfeeding through breast care. In particular, the Kawate Breast Massage (KBM), devised by the midwife Kawate from Komagane City, is an effective massage technique that improves milk flow, and has been well-received by mothers treated by trained healthcare providers.

Additionally, we annually host trainings from Pokhara City to Komagane City, facilitating exchanges at the citizen level and gifting handcrafted items to mothers in Pokhara. These efforts have increased happiness and created a cycle of goodwill beyond mere support.

Other SNS	【Twitter】@eedu_jp 【Instagram】eedu_jp 【Facebook】 http://www.facebook.com/eedu.jp

Background of Organization

With the mission of "Best Education to edge of the World," we at e-Education have continued to support education for children in the least developed countries (LDCs) through the use of technology since our founding in 2010. We have produced more than 4,000 videos for children (mostly middle and high school students) in 14 countries, providing quality education to more than 30,000 students without access to the Internet. Our YouTube videos have grown into an educational infrastructure that is viewed by over 1.5 million people annually.

Collaboration		
Period	Fund	Project
Nov 2017– Nov 2019	JPP	Digital Math Education Project for Vulnerable Students in Remote Areas of Nepal
Dec 2021– May 2025	JPP	Digital Math and Science Education Project for Vulnerable Teachers and Students in Remote Areas of Nepal

SUMMARY OF PROJECT

Support for Video Education Specializing in Science and Mathematics and Implementation of Workshops for Teachers

In addition to the creation of new video materials, the project is implementing activities aimed at improving education at schools by creating manuals for using the video materials and holding workshops for teachers to actually use the materials in the classroom. In some of the pilot schools using the video materials, remarkable results have been achieved, such as an increase in the number of students passing the Secondary Education Examination (SEE) from 15% to 50%, and the demonstration project is currently being implemented in 10 pilot schools. In addition, in order to strengthen ICT support to each school by the local government, we are working on the creation of a local government-level training program to train "ICT Facilitators," which is based on the ICT support staff that supports the GIGA School Program in Japan.

	Gorkha

Background of Organization

With the goal of protecting lives and infrastructure from frequent river flooding, improving the living environment, and reducing poverty, the project aims to promote the use of strong, low-cost gabion revetments that utilize traditional Japanese knowledge and promote river disaster mitigation measures with the participation of local residents in Gorkha District.

Collaboration		
Period	Fund	Project
Mar 2017- Feb 2020	JPP	Project for Penetration in Nepal of Local Adaption-based Gabion Techniques for both Disaster Management and Environmental Protection.
Aug 2021- Aug 2024	JPP	Project for Support to Develop Low-cost Gabion Embankment and River Disaster Prevention with Local Partners

SUMMARY OF PROJECT

Kochi University, as an implementing organization of the Grassroots Technical Cooperation Project, has been transferring the traditional Japanese "gabion" technology to the Nepalese government and other organizations through counterparts in Nepal since FY2016. This project is a step-up to the more technically challenging river disaster countermeasures.

Nepal experiences river overflows almost every year due to torrential rains during the rainy season, and many people are killed because they are unable to escape the floods. The project site, Gorkha District, is surrounded by mountainous terrain with heavy rainfall, but the residents' awareness of disaster prevention is low and the riverbanks are not well maintained, resulting in water-related disasters that threaten lives and livelihoods every year. In collaboration with local governments and residents, we will transfer technology for low-cost gabion revetments through demonstration construction. In addition, we will support river disaster prevention activities from the viewpoint of "soft" disaster prevention as well as "hard" disaster prevention, for example, by preparing flood hazard maps and conducting early evacuation drills.

Project Location	Kavre
Website	https://www.lovegreenjapan.org/wp/
Other SNS	【Facebook】 https://www.facebook.com/profile.php?id=100081222045777

Background of Organization

Love Green Japan was an NPO founded by eight Japanese volunteers in Japan in 1991 to contribute to reforestation and environmental conservation. At the same year with similar objectives, the Nepalese volunteers founded Love Green Nepal in Nepal. Since then, we have expanded the scope of our activities and implemented projects collaboratively in Nepal.

Collaboration		
Period	Fund	Project
Apr 2020– Mar 2023	Japan Fund for Global Environment	Pass Water and Soil Environment in Satoyama Taha Town the Future Generations
Apr 2022– Mar 2023	Aeon Environmental Fundatooon	Greenery Project for Community Forest
Jul 2022– Jun 2023	Green Fund	Making forest in Panchkhal
Oct 2023– Sep 2026	JPP	Revitalization of Agriculture through the Creation of Delivery and Marketing Framework of IPM Products in Suburban Rural Areas

SUMMARY OF PROJECT

The major objective of the project is to further promotion of the IPM (Integrated Pest Management) technology in Panchkhal Municipality, Kavrepalanchok district near Kathmandu, and the marketing of IPM products.

The project encourages the farmers to adopt IPM technology which is an environment-friendly farming method that minimizes the use of pesticides, utilizes organic fertilizers and botanical pesticides, mixes crops, and grows safe products. It also helps to improve the process of producing, shipping, and selling of IPM vegetables. We aim to differentiate IPM products from other agricultural products and sell them in the local market of Panchkhal and Kathmandu.

We form 35 farmer groups in Panchkhal and conduct IPMFFS, conduct market research and market study tours to farmers, and promote to produce the vegetables based on market needs. We provide imperative guidance on production plans and introduce the sales strategies of differentiating the IPM products.

Besides, a vegetable market will be set up in Panchkhal in cooperation with the Panchkhal Municipality Office, with the motive of developing local markets to make it easier for farmers to sell their products. As the Araniko Highway (Kathmandu-Kodari) passes through Panchkhal, the passengers of the highway are targeted as the main consumers whereas local consumers are developed as well. An increasing number of farmers are starting to take on marketing initiatives by themselves by selling IPM products along the highway.

Furthermore, we will also improve the shipping system for farmers and carry out awareness activities to promote a better understanding of IPM products among the producers and consumers.

Project Location	Annapurna, Myagdi
Website	https://pecenter.jimdofree.com

Background of Organization

PEC was established to support nonprofit organizations in Japan and around the world to the develop and improve their projects and to ensure accountability to stakeholders through mainly the evaluation of organizations and projects of nonprofit organizations, promotion of theoretical research, experiential exchange and mutual learning regarding participatory management in planning and implementation, and dissemination of practical methods, development of human resources and actual implementation. PEC aims to contribute to the healthy development of a better regional and global civil society based on independence, mutual understanding, and cooperation.

Collaboration		
Period	Fund	Project
Oct 2023– Oct 2025	JPP	Nepal Mountain Village Livelihood Improvement Project Aiming to Make Potatoes And Kiwis to be Local Specialities through Strengthening to Capacity to Access to Local Government Services

SUMMARY OF PROJECT

This Project aims to create an attractive village that will encourage migrant workers from the target area to return to their hometowns. As major pillars, 1. Enhance ability to access subsidies from local governments, 2. Support villagers to strengthen their sustainable income generation activities through technical support for cultivation and sales of potatoes and kiwis. The Project activities include training and support for agricultural accounting records for villagers, consulting for villagers to acquire skills to apply for agricultural subsidies, training for villagers on potato cultivation (disease control) and kiwi cultivation skills and marketing.

Background of Organization

Our organization was established with the aim of revitalizing the fields of disaster prevention, urban development, and international cooperation and solving social issues by introducing artistic ideas and the unconventional creativity of artists.

Collaboration		
Period	Fund	Project
Jan 2017– Jan 2018	JPP	School Based Sustainable Disaster Risk Reduction Education and Material Development
Jan 2019– Feb 2020	JPP	Project to Promote School Club Activities on Disaster Risk Reduction
Aug 2022– Aug 2025	JPP	School Club Based Resilient Community Model Project

SUMMARY OF PROJECT

The major earthquake that occurred in April 2015 caused a large number of deaths and injuries in Nepal. Many Nepalese people lack awareness of daily self-help and mutual-help, and have little experience in participating in disaster drills, which resulted in extensive damage. After the earthquake, the importance of and need for disaster prevention education in school education in Nepal increased.

Since 2015, Plus Arts has continuously supported the dissemination of disaster education in Nepal. Since 2017, within the framework of the JICA Grassroots Technical Cooperation Project, we have been working on training teachers of both public and private schools in five cities in the Kathmandu valley and creating a system of sustainable disaster education within schools.

In the first phase (2017–2018), we conducted teacher training and workshops to develop original disaster education programs, and conducted disaster prevention events for students in model schools.

Since club activity initiatives are well established in Nepalese elementary school, in the second phase (2018–2019), we established "DRR Education Club" and produced materials for club activity in order to create a sustainable disaster prevention education system at each school. In addition, in 2019, the Mitra DRR Learning Center was established in partnership with various stakeholders including with Plus Arts.

In August 2022, the third phase of the project began, with the goal of expanding and spreading "DRR Education Club" to neighboring schools of the model school, and forming a model of a local community that utilizes club activities.

Background of Organization

Sapporo Waterworks was established in 1937. For more than 80 years, it has fulfilled its mission of providing safe and reliable water to its users. Today, with a population of 1.96 million and a water supply penetration rate of nearly 100%, Sapporo Waterworks has become an indispensable lifeline that supports the activities of citizens and the city.

In order to further develop Sapporo Waterworks and pass it on to future generations, we will continue to make continuous efforts to achieve a strong and sustainable water supply system. Our employees will work together to move forward so that users can feel secure and satisfied.

Period	Fund	Project
Feb 2016– Dec 2018	JPP	Cooperative project to support the improvement of water supply and distribution functions in Ulaanbaatar
Feb 2022– Jan 2025	JPP	Technical cooperation project for systematizing water service and distribution management in Pokhara city

SUMMARY OF PROJECT

The objective of this project is to ensure that the work required to maintain and manage the quality and quantity of water supply is carried out systematically and continuously in the water supply and distribution pipe network in the model area in Pokhara City, Nepal, with the following outputs

- 1 Leakage response is implemented by Nepal Waterworks Corporation in the model area based on the developed SOPs (Standard Operating Procedures).
- 2 To review the water quality management plan centering on the water supply and distribution network, and to implement daily water quality management operations by Nepal Waterworks Authority in the model area.

The local organizations involved are Nepal Water Supply Corporation (NWSC) and Love Green Nepal (LGN), the contracting organization is Hokkaido International Exchange and Cooperation Center (HIECC), the implementing organization is Sapporo Waterworks Bureau, and the cooperating organizations are Sapporo Water Service Association, Sapporo Pipe Construction Cooperative Association, and Ltd. as cooperating organizations in addition to the Sapporo Waterworks Bureau.

Background of Organization

Food production in Nepal supported by diverse agricultural environment. Recently, there is a serious shortage of young farmer in rural Nepal. To solve this issue, Nepal government has launched a plan to establish Agri- high school to strengthen education in rural areas in 2014.

Collaboration		
Period	Fund	Project
Nov 2016– Oct 2018	JPP	Project on Enhancement of Agricultural Education in Higher Secondary School
Feb 2022– Feb 2025	JPP	Strengthen Agriculture Education in Secondary School in Nepal
Aug 2023– Mar 2024	Nagano Prefecture	Human Resource Development Project through High School-University Collaboration

SUMMARY OF PROJECT

"Strengthening Agricultural High School Education in Nepal Project"2016-2018, We collaborated with KAHS (Kami-ina Agricultural High School) in Nagano to conduct a baseline survey and identify issues using Kobang SS (Secondary School) in Mustang District (about 2600 m above sea level) as a model school to collect fundamental information.

The stakeholders learned about Japanese agricultural education methods at KAHS through training in Japan 2017.

In Phase 2, two agri-schools with different climates and agricultural vegetation will be selected as new target schools, modeled after the Kobang SS that preceded it, to establish educational systems and methods and create supplementary teaching materials while taking advantage of the environmental characteristics of each region. (Banepa SS: 1500m Kavre District; Ratnanagar SS: 150m, Chitwan District)

In this phase, teachers from the three target schools visited each other, deepened their understanding of KAHS's practical agricultural education methods through training in Japan, and developed action plans. In order to realize the same kind of collaboration in Nepal as in Japan's FFJ (future farmers of Japan) in Jan.2024, the first FFN (Future farmers of Nepal) Essay Contest was held.

The program also conducted online exchanges and study sessions in the classrooms of agricultural high schools in both Nepal and Japan and provided global-local education to teachers and students.KAHS students presented this exchange at the Nagano International Education Research Council and received the President's Award in 2022.

Finally, this project aims to strengthen agricultural education in rural areas of Nepal by developing and enhancing practical agricultural education systems, teaching methods, and teaching materials suited to Nepal's regions.

Background of Organization

SHRUTI, established in 2012 as an organization of personal disabilities by people affected by hearing loss, aiming to provide a unified platform and voice for the hard of hearing and deafened (HOH/d) community in Nepal. Registered with various governmental bodies and affiliated with international organizations like APFHD and IFHOH, SHRUTI actively advocates for the rights and empowerment of HOH/d people, addressing communication and cultural barriers they encounter. With a vision of fostering an inclusive society where the rights of HOH/d people are upheld, SHRUTI's mission revolves around ensuring their access to communication, quality education, and social and economic opportunities. The organization's objectives include promoting accessibility, enhancing member capacity, advocating for early intervention, and establishing rehabilitation and resource centre to support the HOH/d community.

Collaboration		
Period	Fund	Project
2022 Jan- 2024 Feb	JPP	Pilot Project of Accessible Communication Support for Hard of Hearing Patients in Kathmandu Hospital

SUMMARY OF PROJECT

The Pilot Project of Accessible Communication Support for Hard of Hearing Patients at Kathmandu Hospital, is being implemented by SHRUTI and ZENNANCHO since January 2022 for three years under the JPP. Its aim is to establish communication support services for hearing loss patients at TUTH's ENT-HNS Department. Key project outputs include developing communication tools and guidelines for healthcare professionals and patients, fostering sustainable communication support between hearing loss patients and hospital staff, and promoting the adoption of the communication support model in other hospitals in Kathmandu. At the end of the project, the TUTH would have trained health professionals and its own communication resources to ensure sustainable accessible communication support for hearing loss patients, facilitating barrier-free access to healthcare services.

Initially, SHRUTI's instructors received a training from the ZENNANCHO. A three-day training session concluded at TUTH's ENT-HNS Department, drawing 46 participants from diverse roles including Residency Doctors, Nurses, Audiologists, Speech Language Therapists, Technicians, and Hospital Administration staff. The curriculum was developed through collaboration with TUTH and ZENNANCHO. The participants shared insights of the training and expressed appreciation for the invaluable experiences and knowledge gained. The participants anticipate that the training will significantly enhance future communication with hearing loss patients, underscoring its importance.

Activities and Outcomes of the Project:

Earmark development: The project has developed an Earmark which serves as a vital tool for identifying people with hearing loss, indicating areas with accessibility supports, and fostering inclusivity and independence to hearing loss people in public places. The earmark is widely used, visually appealing, and easily recognizable. The mark is implemented in various forms such as cards, badges, stickers, and nameplates, and used by people with hearing loss, supporters, and in places with improved accessibility.

Guidebook for Healthcare Services: A comprehensive guidebook has been developed to guide the health professionals such as doctors, nurses, health technicians and staff with valuable insights and strategies to enhance inclusive healthcare services for patients with hearing loss.

Communication Tools: Communication tools such as writing board, signages, figure-pointing pictograms, etc. have been developed to facilitate effective communication between healthcare professionals and patients with hearing loss, thereby enhancing the quality of care and patient experience.

Address in Japan	〒 734-8551 1-2-3 Kasumi, Minami-ku, Hiroshima TEL: 082-257-1719 Email: himaki6@hiroshima-u.ac.jp Contact: Ms. Maki Hirabara
Address in Nepal	Maitighar 11, Kathmandu TEL: 9801203340, 9840060295 Email: sharad2005@hotmail.com Contact: Dr. Sharad H. Gajuryal ✓Nepali ✓English
Project Location	Kathmandu, Pokhara, Chitwan
Website	http://annapurnahospital.com.np/

SUMMARY OF PROJECT

The number of epilepsy patients in Kathmandu valley is estimated 150,000, of which the majority up to 70% have been under disease burden because of treatment gap. In this project, we aim to improve the treatment gap such as poor accessibility of adequate health care provision, availability of specialist doctor, unavailability of anti-seizure medicines, lack of affordable treatment, lack of awareness of epilepsy, and so on.

Activities

1. Epilepsy workshop and seminar for medical doctors/co-medical staff
2. Free epilepsy medical camp and advice about epilepsy diagnosis/treatment for health providers in local areas
3. Training for medical doctors and co-medicals in Hiroshima University

Background of Organization

Maya-Prem Memorial Trust (MPMT), registered NGO in Gorkha District, has been working since 2012 in Southern parts of Gorkha, aiming to improve the socio-economic well-being of grassroots communities. MPMT's mission contribute to sustainable development of backward communities through leveraging local resources and skills in areas such as agriculture, education, health, and youth empowerment.

Collaboration		
Period	Fund	Project
Mar 2024 - Feb 2027	JPP	Project for Empowering the Small- Holder Farmers' Action (PESHA)

SUMMARY OF PROJECT

As the name of the project “PESHA”, which means “profession” in Nepali, shows, we aim for supporting small holder farmers being commercial farmers through producing several high value crops in the target area. The project focuses on the method of “layer-farming” which grow different crops in same lands such as coffee, fruits, vegetables, and other high value crops to improve their agricultural income.

The project will approach to 600HH of coffee farmers and 300HH of vegetable farmers as direct beneficiaries to whom trainings for skill and knowledge enhancement regarding farming and processing will be provided along with some material supports.

The project also addresses ensuring market with increasing additional values of products, promoting direct negotiation to buyers, and enhancing knowledge of profit loss account and planned farming.

We believe that youth involvement and empowerment in the agricultural sector are essential so that local communities will be sustainable, for which the project is going to coordinate with local secondary schools having an agriculture course and provide an OJT opportunity to students.

Mar 2017– Feb 2020	JPP	Project for penetration in Nepal of local adaption-based gabion techniques for both disaster management and environmental protection.
Aug 2021– Aug 2024	JPP	Project for support to develop low-cost gabion embankment and river disaster prevention with local partners

SUMMARY OF PROJECT

This project was motivated by the fact that, every year the flood in the river damaged the paddy fields and damage other community infrastructure. Hence by protecting the river bank by low-cost gabions are better option to control the damage from the flood. Such gabions not only were deprived of their intrinsic disaster prevention functions but also are still left in a hazardous state. Palungtar Municipality 9, Birdibazar, Gorkha targeted for the project, is a reason where disaster due to flood cases have been high in recent years.

The municipal office of Palungtar Municipality, ward 9, targeted by the proposed project had routinely been receiving many requests from local residents for water related disaster management measures and control flood related risks. Hence Kochi University in partnership with JICA Japan and Green Innovative Research Center Nepal intends to implement "low-cost gabion embankment and river disaster prevention support project, working with locals Protection Project" at Khar Khola area of Paluntar Municipality-9, Gorkha district of Nepal.

Informal Sector Service Center (INSEC)

Chairperson	Dr. Kundan Aryal
Address in Nepal	Ward no.10, Syuchatar, Nagarjun, Kathmandu
	TEL: 01-5218770
	Email: insec@insec.org.np
	Contact: Mr. Bijay Raj Gautam ✓Nepali ✓English
Project Location	Kathmandu, Lalitpur, Bhaktapur, Shankharapur and Chandragiri
Website	www.insec.org.np

Background of Organization

INSEC was founded in 1988 by inexorable HR defender late Prakash Kaphley and prominent HR activist Sushil Pyakurel. Starting with the objective of protecting the rights of people engaged in informal sectors, it has significantly contributed to safeguarding and promoting people's fundamental rights in virtually all sectors. During its early days, the efforts made influential contributions to institutionalizing the democratic polity in the nation from a rights-based approach, both at the policy and grassroots levels, especially after the restoration of democracy in 1990/91. In course of time, INSEC has gradually identified its core competency areas which are organizing campaigns, awareness creation and education programs for making people capable of asserting their civil and political rights and documentation of human rights situation of the country and its dissemination at national and international arenas. As human rights NGO, INSEC is focused towards working with disadvantaged groups. Its targeted working groups have been the agricultural laborers, underprivileged women, and socially discriminated people including Dalits and children.

Jan 2019– Dec 2010	JPP	Promotion of DRR Club Activities at School
Jan 2017– Dec 2017	JPP	School-Based DRR Education Material Development Project

SUMMARY OF PROJECT

The School Club Based Resilient Community Model Project (SCBRCMP) is a collaborative effort between Plus Arts, a non-profit organization based in Kobe, Japan, the CityNet-Plus Arts Center for Creative Partnerships, and the Informal Sector Service Centre (INSEC) based in Nepal. With funding from the Japan International Cooperation Agency (JICA) as a part of the grassroots Technical Cooperation program, the project was initiated in response to the devastating earthquake that struck Nepal in April 2015, highlighting the urgent need for disaster risk reduction (DRR) education in the country.

The primary objective of the current project is to raise awareness about disaster prevention and preparedness among students and communities. Education is critical in building resilient communities that can effectively respond to and recover from natural disasters. The project's objective is to establish resilient community models in close collaboration with the pilot schools, leveraging the activities of the DRR Education Clubs. This ambitious three-year endeavor will cover at least 50 schools across the Kathmandu Valley in the five target municipalities. This project encompasses developing new educational games centered around three key themes: safe housing, infectious diseases, and mental health support.

Period	Fund	Project
Nov 2023 - Oct 2025	JPP	Nepal Mountain Village Livelihood Improvement Project aiming to Make Potatoes and Kiwis to be Local Specialties through Strengthening Capability to Access to Local Government Services

SUMMARY OF PROJECT

IHC Nepal is now engaged on Potato and Kiwi cultivation and management project for 2 year since last November, 2023. Altogether 40 farmers of Annapurna Rural Municipality ward no. 7 Tikot and ward no. 8 Ramche, Myagdi have been selected for this project. Out of 40 farmers, 14 farmers have just plated 5 each kiwi saplings and iron trellis are being fixed. Rest of farmers will plant and install iron trellis next year. Farmers' livelihood improvement through potato and kiwi fruits cultivation and management is the main objective of the project. Making them capable for achieving local government subsidies is secondary objective of the project. Farmers are taught to keep records of agricultural financial transactions as well. Main activities of the project are as follow.

1. Conduct agricultural bookkeeping training for selected farmers and regular follow up.
2. Support farmers group to apply for local governments subsidies.
3. Conduct trainings on potato disease controlling.
4. Conduct trainings on kiwi cultivation and management techniques.
5. Kiwi sapling plantation, purchase materials of iron Trellis (Iron T shape) and install iron Trellis. (Selected farmers will contribute 30 percent of total cost of kiwi saplings, transportation and materials of Iron Trellis.)
6. Support the Farmers groups in conducting fruits market research of potato and kiwi.
7. Regular monitoring and supervision to execute the project activities.

Background of Organization

Love Green Nepal, established in 1991, is an autonomous Non-Governmental Organization (NGO) registered at District Administration Office in Kathmandu. It holds Permanent Account Number from the Inland Revenue Office and is affiliated with the Social Welfare Council, the umbrella body of NGOs in Nepal.

Collaboration		
Period	Fund	Project
2023 Aug – 2026 July	JPP	Fresh IPM Vegetable Production and Market Promotion Project Counterpart Organization
2022 Jan – 2024 Dec	JPP	Technical Cooperation Project for Systematizing Water Service and Distribution Management Counterpart Organization

SUMMARY OF FRESH IPM VEGETABLE PRODUCTION AND MARKET PROMOTION PROJECT

Love Green Nepal implements a multifaceted strategy to foster sustainable livelihoods among smallholder farmers, emphasizing organic farming, agroforestry, crop rotation, and integrated pest management to enhance soil fertility, conserve water, and minimize external inputs. In addition to the sustainable agriculture, LGN focuses on effective livestock management practices, such as proper nutrition, rotational grazing, contributing to additional income and soil fertility through manure recycling. The integrated approach recognizes the interconnectedness of farming practices and livelihood development, incorporating livestock into crop production systems for enhance productivity and sustainability. Furthermore, LGN invest in capacity building and education programs, including training workshops and farmer field schools, to empower farmers with the knowledge and skills needed to adapt to changing environmental and market conditions. Alongside these efforts, LGN actively promotes the market adoption of vegetables grown using integrated pest management techniques, further reinforcing our commitment to sustainable agriculture and livelihood development.

Major Project Activities

1. Integrated Pest Management Field School
2. Livestock Management Training and Cattle Shed Improvement
3. Market Promotion of Integrated Pest Management Vegetables
4. Capacity Development of Users Group

SUMMARY OF COOPERATION PROJECT FOR SYSTEMATIZING WATER SERVICE AND DISTRIBUTION MANAGEMENT

The sustainable development goal of ensuring access to water and sanitation in Nepal, particularly in cities like Pokhara, faces challenges despite significant population coverage by city water. The Nepal Water Supply Corporation (NWSC) manages water supply. But faces issues with water quality control and high leakage rates, particularly during the rainy season. To address these challenges, NWSC is collaborating with Sapporo Water Bureau (SWB), Japan to enhance technical capacity through training program. These initiatives aim to improve water quality management and reduce leakage, ensuring a consistent supply of safe tap water for domestic use. LGN serves as the intermediary between SWB and NWSC, facilitating coordination and managing training activities in Nepal.

SHRUTI, established in 2012 as an organization of personal disabilities by people affected by hearing loss, aiming to provide a unified platform and voice for the hard of hearing and deafened (HOH/d) community in Nepal. Registered with various governmental bodies and affiliated with international organizations like APFHD and IFHOH, SHRUTI actively advocates for the rights and empowerment of HOH/d people, addressing communication and cultural barriers they encounter. With a vision of fostering an inclusive society where the rights of HOH/d people are upheld, SHRUTI's mission revolves around ensuring their access to communication, quality education, and social and economic opportunities. The organization's objectives include promoting accessibility, enhancing member capacity, advocating for early intervention, and establishing rehabilitation and resource centre to support the HOH/d community.

Jan 2022 - Dec 2024	JPP	Pilot Project of Accessible Communication Support for Hard of Hearing Patients in Kathmandu Hospital

SUMMARY OF PROJECT

The Pilot Project of Accessible Communication Support for Hard of Hearing Patients at Kathmandu Hospital, is being implemented by SHRUTI and ZENNANCHO since January 2022 for three years under the JPP. Its aim is to establish communication support services for hearing loss patients at TUTH's ENT-HNS Department. Key project outputs include developing communication tools and guidelines for healthcare professionals and patients, fostering sustainable communication support between hearing loss patients and hospital staff, and promoting the adoption of the communication support model in other hospitals in Kathmandu. At the end of the project, the TUTH would have trained health professionals and its own communication resources to ensure sustainable accessible communication support for hearing loss patients, facilitating barrier-free access to healthcare services.

Initially, SHRUTI's instructors received a training from the ZENNANCHO. A three-day training session concluded at TUTH's ENT-HNS Department, drawing 46 participants from diverse roles including Residency Doctors, Nurses, Audiologists, Speech Language Therapists, Technicians, and Hospital Administration staff. The curriculum was developed through collaboration with TUTH and ZENNANCHO. The participants shared insights of the training and expressed appreciation for the invaluable experiences and knowledge gained. The participants anticipate that the training will significantly enhance future communication with hearing loss patients, underscoring its importance.

How to Participate

● Membership

● Donation

● Volunteering

● Internship

● Seminar

● Study Tour
