

The 4th Supporting committee of Banjir Bandang Disaster Mitigation Management

Directorate of water resources, Ministry of Public Works cooperate with JICA (Japan International Cooperation Agency) has conducted the 4th Supporting committee of Banjir Bandang disaster management (21/6) at Jakarta. This meeting was opening by Director General of water resources, Mr. Moch. Amron, attended by the representative of operation and maintenance Directorate of River and coastal, Directorate of planning and programming, BBWS Brantas of Directorate General of water resources.

The 4th Supporting committee was also attended by the representative of BNPB, Research and development institution, water resources bureau, University, Indonesian Red Cross of Jember, east Java which also become the member of the committee. This event is belonging to the technical assistance since November 2008 and the 3rd supporting committee had been done on last July, 2010.

The purpose of the supporting committee is to have information between local resident and government about banjir bandang and things which related to the project. During the meeting we discussed about project application, project activity in Jember, Manual and action plan for banjir bandang, and guideline in making the hazard map for landslide and banjir bandang, guidelines for forecast system, early warning and evacuation system for banjir bandang and the action plan for enhancing disaster mitigation management for banjir bandang.

The main purpose of this project is to enhance the capability of banjir bandang disaster mitigation management between Ministry of Public Works and local institution at the hazard area. More over, the next activity from July-November 2011 in this supporting committee is to make manual draft about early warning and evacuation system, training or simulation based on manual draft, making an SOP, and installing the early warning system of banjir bandang.
