Mangrove for All,
 All for Mangrove !

Toward the Co-existence of Local Communities and
 Mangrove Forests

The Integrated Mangrove Rehabilitation and
 Management Project through Community
 Participation in the Ayeyawady Delta

エーヤーワディ・デルタ住民参加型マングローブ
 総合管理計画プロジェクト

Background

The Reserved Forests of Ayeyawady Delta is one of the seriously degraded forest areas, where decades of extensive expansion of agricultural land, unsustainable forest use, and more recently, increase of aquaculture activities have severely damaged the remaining mangrove forests.

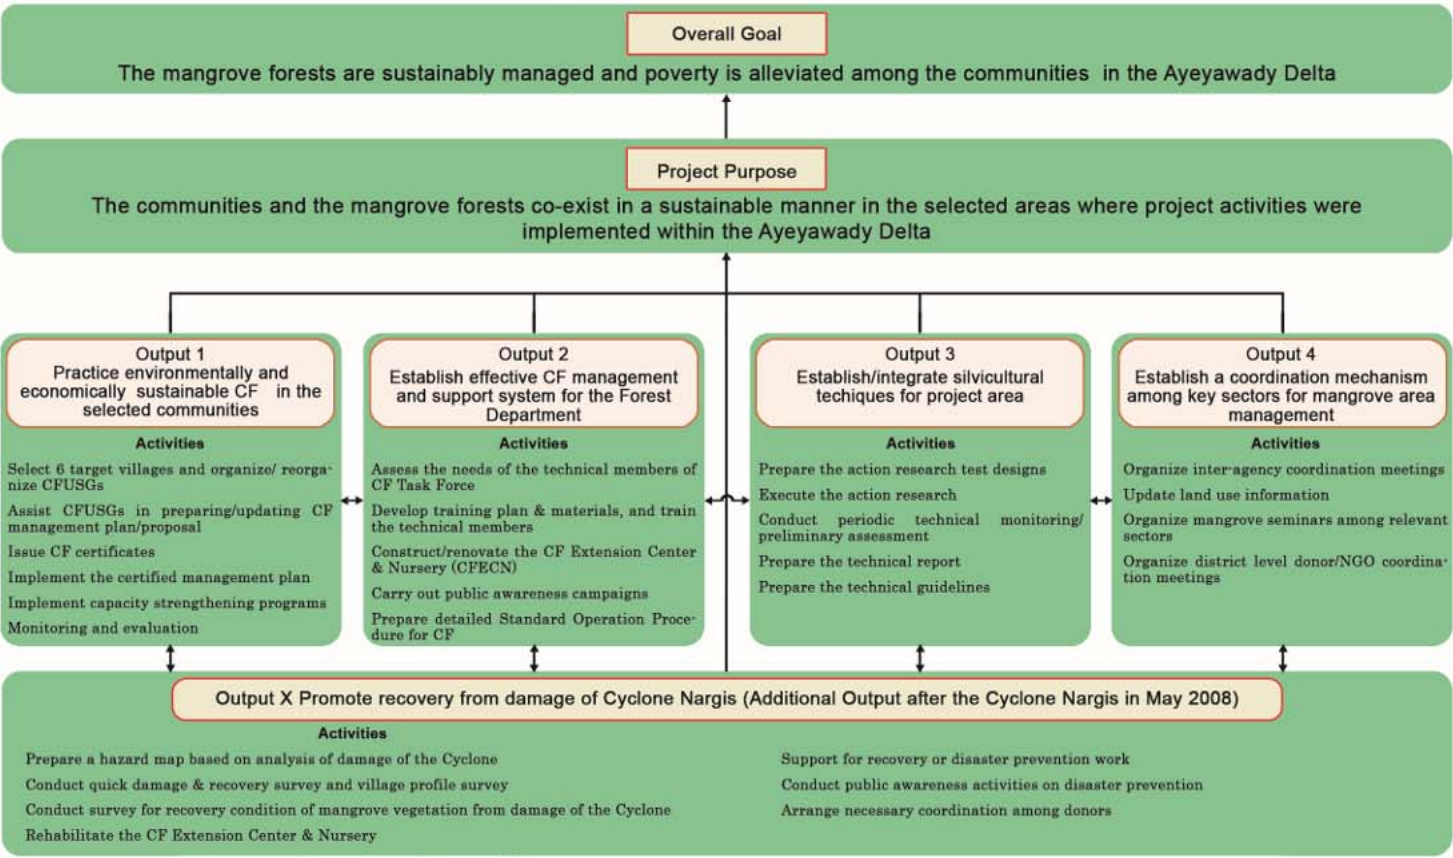

In view of the significance of managing the forest resources in the Ayeyawady Delta, “the Integrated Mangrove Rehabilitation and Management Project through Community Participation in the Ayeyawady Delta Project” (hereinafter referred to as “the Project”) was launched for a five-year period starting from April 2007.

However, in May 2008, Cyclone Nargis struck Myanmar and caused great damages to the Project area and project activities. In January 2009, PDM (Project Design Matrix) was modified as PDM version 1 being added various recovery activities and the Project duration was extended for one more year until March 2013.

Through the mid-term review conducted during February and March 2011, the Project was reviewed. As the result, activities of four original Outputs were reorganized and the aforementioned various recovery activities were consolidated as the fifth Output in addition to the existing four Outputs. Including this modification, the PDM version 1 was modified as PDM version 2 and was approved in 5th Joint Co-ordination Committee (JCC) meeting held on 14 July, 2011.

In order to achieve these five Outputs steadily and realize the Project Purpose, “the co-existence between communities and mangrove forests in a sustainable manner”, JICA Expert Team and Myanmar counterparts are aiming to conduct their tasks efficiently in the remaining two fiscal years of the Project.

Summary of Project Framework

Based on PDM version 2 approved in 5th JCC Meeting (14 July 2011)
