

Challenges and opportunities of EBPM in Africa's development

Alize le Roux, African Futures and Innovation

Engaging in our future

Index ▲1.56

Constraints in adopting EBPM

- Silo approaches and different viewpoints
- Time intensive
- Data constraints
- Expensive
- Vertical and horizontal misalignment
- Getting buy-in and establishing credibility is hard
- Political will and buy-in necessary
- Communication bridge between science and policy

Innovations in EBPM: African Futures

Forecasting on Africa that is evidence-based |

Translating
Africa's
potential into

This website provides integrated forecasts of Africa's development prospects and potential. Prospects cover 14 sectors for each African country, region, regional economic community and country income groups within the timeline of the African Union's Agenda 2063. Insights are grounded in academic literature, using benchmarks to deliver ambitious but realistic forecasts that are regularly updated.

The African Futures website provides

Evidence that changes futures and informs decision making

Central access point to credible information on Africa's future

Living knowledge platform that enables collaboration and gives access to a wealth of information on Africa's future

Open and freely accessible knowledge that will help shape Africa's development path
