

Let's subtract big numbers.

$$38 - 15$$

There are numbers of both “t” and “o”.

First, subtract the numbers of “o”.

$$38 - 15$$

subtract

Because

$$8 - 5 = 3$$

the number of

is 3.

Next, subtract the numbers of “t”.

Because

$$3 - 1 = 2$$

the number of

is 2.

$$38 - 15 =$$

23

Good!

subtract

Example Write the answer in the .

$$38 - 15 = \boxed{23}$$

Good!

Exercise Write the answer in the .

① $65 - 23 =$

② $49 - 34 =$

③ $45 - 12 =$

④ $57 - 33 =$

⑤ $58 - 25 =$

⑥ $64 - 42 =$

Exercise Write the answer in the .

⑦ $62 - 22 =$

⑧ $88 - 45 =$

⑨ $56 - 34 =$

⑩ $55 - 23 =$

⑪ $78 - 66 =$

⑫ $86 - 51 =$

⑬ $97 - 73 =$

⑭ $67 - 35 =$

⑮ $94 - 61 =$

⑯ $89 - 17 =$

Let's write the numbers vertically as we did in addition.

$$38 - 15$$

	t	o
38		
— 15		
<hr/>		

We subtract the number below from the number above.

We subtract the numbers of “t” and “o” respectively.

$$38 - 15$$

	t	o
38		
— 15		
<hr/>		
	2	3

The “t” is $3 - 1$ and the “o” is $8 - 5$.

Good!

Let's calculate $38 - 6$. Where should we write 6?

$$38 - 6$$

t	o
---	---

38

$$\begin{array}{r} \\ - \\ \hline \end{array}$$

6 does not have anything at the “t”.

We write 6 at the “o”.

We right subtraction align to the right as well.

$$38 - 6$$

t	o
---	---

38

$$\begin{array}{r} \\ - 6 \\ \hline \end{array}$$

$$38 - 6$$

t	o
---	---

38

$$\begin{array}{r} \\ - 6 \\ \hline \end{array}$$

Good!

$$\begin{array}{r} \\ - 6 \\ \hline 2 \end{array}$$

We can just subtract the number below from the number above in the same way.

Example Tick the correct answer.

Let's do a subtraction whose subtrahend is big.

$$34 - 18$$

The calculation at the “o” is $4 - 8$. We can't subtract.

When we can't subtract at the “o”, we borrow 10 from “t”.

$$34 - 18$$

We can subtract 8 from 10 which is borrowed.

Then, subtract at the “o”.

$$34 - 18$$

We subtract 8 from the borrowed 10.

$$10 - 8 = 2$$

We add the remainder 2 and 4. $2 + 4 = 6$

Let's calculate at the “t”. The “t” of 34 after we borrow 10 is 20.

$$34 - 18 =$$

16

“t” becomes $2 - 1$.

Good!

Let's calculate $34 - 18$ by vertical method subtraction.

$$34 - 18$$

t	o
---	---

$$\begin{array}{r} 34 \\ - 18 \\ \hline \end{array}$$

We have to borrow 10 from the “t”, because we can't subtract $4 - 8$ of “o”.

We borrow 10 from “t”, so cross out the 3 of 34 and write 2 above.

The number of “o” increases by 10, cross out 4 of 34 and write 14 above.

$$34 - 18$$

t	o
---	---

2	14
---	----

$$\begin{array}{r} 214 \\ ~~34~~ \\ - 18 \\ \hline \end{array}$$

The line which we use to cross out 3 and the number above 3 means that 3 has changed to 2.

Let's calculate "o" first.

$$34 - 18$$

t	o
2	14
3	4
— 1	8
<hr/>	
	6

$$14 - 8 = 6$$

We don't use the 3 and 4 which we have crossed out.

Next, let's calculate "t".

$$34 - 18$$

t	o
2	14
3	4
— 1	8
<hr/>	
1	6

$$2 - 1 = 1$$

$$14 - 8 = 6$$

Good!

Example

Write the answer in the .

Cross out the number when it changes.

$$34 - 18$$

2-1	3	4	14-8
-	1	8	

$$34 - 18$$

⑯ $45 - 27$

	t	o
—		
—		

⑰ $63 - 27$

	t	o
—		
—		

⑱ $92 - 34$

	t	o
—		
—		

Let's solve $42 - 35$.

	t	o
4	2	
-	3	5

We borrow 10 from the "t" because we can't subtract $2 - 5$.

	t	o
3	12	
4	2	
-	3	5

0	7	

$3 - 3 = 0$

$12 - 5 = 7$

The number of "t" became 0.

This means $42 - 35 = 7$.

Good!

Let's solve $34 - 6$.

	t	o
34	-	6
—		

We borrow 10 from the "t" because we can't subtract $4 - 6$.

	t	o
34	-	6
—		

	2	14
3	4	6
—		

	2	8

$2 - 0 = 2$

$14 - 6 = 8$

The subtrahend, 6, is the number of "o".

The "u" does not have subtrahend, so $2 - 0 = 2$.

Good!

Example Tick the correct answer.

$$74 - 5$$

⑮ $70 - 44$

	t	o
—		

Let's write how to read the number.

There are

1 , 2  and 5 .

Good!

125 is made of
100 and 25.

125

*One hundred
twenty five*

We read the numbers from 101 to 199 as 100 and something.

125 *One hundred twenty five*

145 *One hundred fifty five*

165 *One hundred sixty five*

185 *One hundred sixty five*

195 *One hundred ninety five*

199 *One hundred ninety nine*

We know how to read the numbers from 101 to 199 if we know how to read from 0 to 100.

Let's look at how to write a number which is one more than 199.

199

The number of “o” increases by one.

The number of “t” becomes 10, so the number of “t” is 10.

The number of at “t” increases by 1.

The number of at “t” becomes 10 and carry to the “h”.

200 is a number which has two at the “h”.

“o” means ●, “t” means ×, “h” means ○.

Let's look at numbers when the number of  at “h” increases by one.

100

200

300

The number of “h” increases by one.

The number of “h” is up to 9.

400

700

500

800

600

900

Let's read 200.

200

Two hundred

Two hundred

We read 201 as 200 and 1.

Two hundred one

201

200

1

Two hundred one

We read in the same way as 101.

The numbers from 202 also increases by one.

Two hundred two Two hundred three

202

203

200

2

200

3

Two hundred two Two hundred three

Let's read the number from 300 to 900.

300

Three hundred

400

Four hundred

500

Five hundred

600

Six hundred

700

Seven hundred

800

Eight hundred

900

Nine hundred

The numbers from 301 also increases by one.

Three hundred one Three hundred two

Three hundred one Three hundred two

The numbers from 101 and 201 also increased by one.

Let's look at numbers which ends with '1' from 999.

We read some hundreds and one same as we read 101 like 100 and 1 or 900 like 900 and 1.

1	<i>one</i>
101	<i>One hundred one</i>
201	<i>Two hundred one</i>
301	<i>Three hundred one</i>
401	<i>Four hundred one</i>
501	<i>Five hundred one</i>
601	<i>Six hundred one</i>
701	<i>Seven hundred one</i>
801	<i>Eight hundred one</i>
901	<i>Nine hundred one</i>

“o” means ●, “t” means ×, “h” means ○.

Let's look at how to write the number more than 999.

999

The number of at increases by one in 999. So move s to .

The number of at increases by one. So We move them to .

th

The number of below becomes 10, so we make a new place of .

1 0 0 0

One thousand

1000 is a number which has below . There is 0 below , and .

We read 1000 as 'thousand' and call new place 'th' as the thousand digit.

“o” means ●, “t” means ×, “h” means ○.

Let me introduce signs that show which number is greater.

$$71 > 66$$

71 is **greater** than 66.

$$66 < 71$$

66 is **less** than 71.

The number on the open side is greater.

Let's write $>$ or $<$ to show which is greater.

$$34 \square 25$$

$$18 \square 56$$

We compare 34 and 25 and 18 and 56, and decide the signs.

Good!

$$34 > 25$$

$$18 < 56$$

34 is greater than 25 and 18 is less than 56.

Example Write the sign of $>$ or $<$ in the .

What is the number indicated by ↓ ?
Fill in the missing number.

There are 100 units between 100 and 200.
So, 1 unit means 1.

We sometimes change the length of vertical lines, so that we can easily find out the numbers we want. In this number line, the vertical line which shows 100 and 200 are the longest.

What is the number indicated by ↓?
Fill in the missing number.

We can find out by checking the length of vertical lines.

In this number line, the second longest line are there every 10 units, which means 110, 120, 130, 140, 150, 160, 170, 180, 190, 210, 220.

The third longest lines are there every 5 units, which means 105, 115, 125, 135, 145, 155, 165, 175, 185, 195, 205, 215.

The shortest lines are there every 1 unit.

120

155

188

What is the number indicated by ↓ ?
Fill in the missing number.

There are 10 units between 100 and 200.
So, 1 unit means 10.

↓ indicates the second longest line.
This line shows 50 units.

The shortest lines show 10 units.

There is no line which shows 1 unit.

10

and

1

is 408.

Let's add numbers which are 0 at the "o".

How many sets do each number have?

$$50 + 70$$

5

7

It is 12 sets of 10.

50 consists of 5 sets of 10.

70 consists of 7 sets of 10.

If we add the sets of 10, How many sets of 10 are there?

$$50 + 70$$

5

7

5 + 7 is the same calculation as we add 50 + 70 without 0.

$$5 + 7 = 12$$

It is 12 sets of 10.

Sets of 10

It is easy to calculate if we think them as sets of 10.

$$50 + 70 = 120$$

5

7

5 + 7 is the same calculation as we add 50 + 70 without 0.

$$5 + 7 = 12$$

Good!

Sets of 10

Example Write the answer in the .

$$50 + 70 = 120$$

There are 5 + 7 sets of 10.

Good!

Exercise Write the answer in the .

① $80 + 40 =$

There are 8 + 4 sets of 10

② $40 + 60 =$

There are 4 + 6 sets of 10

③ $50 + 90 =$

There are 5 + 9 sets of 10

④ $60 + 60 =$

There are 6 + 6 sets of 10

⑤ $60 + 80 =$

There are 6 + 8 sets of 10

⑥ $90 + 60 =$

There are 9 + 6 sets of 10

⑦ $70 + 40 =$

There are 7 + 4 sets of 10

⑧ $70 + 70 =$

There are 7 + 7 sets of 10

⑨ $90 + 20 =$

There are 9 + 2 sets of 10

⑩ $80 + 50 =$

There are 8 + 5 sets of 10

Let's add numbers which are 0 at the "t" and "o". How many sets do each number have?

$$300 + 400$$

3

4

300 consists of 3 sets of 100.

400 consists of 4 sets of 100.

If we add the sets of 100, How many sets of 100 are there?

$$300 + 400$$

3

+

4

=

7

Sets of 100

It is 7 sets of 100.

It is easy to calculate if we think them as sets of 100.

$$300 + 400 = 700$$

3

+

4

=

7

Sets of 100

3 + 4 is the same calculation as we add 300 + 400 without 00.

Good!

Example Write the answer in the .

$$300 + 400 = 700$$

There are $3 + 4$ sets of 100.

Good!

Exercise Write the answer in the .

① $400 + 200 =$

There are $4 + 2$ sets of 100

② $500 + 300 =$

There are $5 + 3$ sets of 100

③ $100 + 500 =$

There are $1 + 5$ sets of 100

④ $500 + 500 =$

There are $5 + 5$ sets of 100

⑭ $200 + 400 =$

⑮ $700 + 200 =$

⑯ $300 + 300 =$

Let's add numbers which are 0 at the "o".
How many sets of 10 do each number have?

$$350 + 20$$

35 sets of 10

2 sets of 10

350 consists of 35 sets of 10.
20 consists of 2 sets of 10.

If we add the sets of 10, How many sets of 10 are there?

$$350 + 20$$

35 sets of 10

2 sets of 10

$$\textcircled{35} + \textcircled{2} = \boxed{37}$$

We add 50 from 350
and 20 without 0.

Sets of 10

It is easy to calculate if we think them as sets of 10.

$$350 + 20 = \boxed{370}$$

35 sets of 10

2 sets of 10

$$\textcircled{35} + \textcircled{2} = \boxed{37}$$

35 + 2 is the same
calculation as we add
350 + 20 without 0.

Good!

Sets of 10

Example Write the answer in the .

$$350 + 20 = 370$$

35 sets of 10

2 sets of 10

⑬ $500 + 50 =$

⑭ $20 + 400 =$

⑮ $700 + 80 =$

⑯ $90 + 300 =$

Let's subtract numbers which are 0 at the "o".

How many sets of 10 do each number have?

120 consists of 12 sets of 10.
30 consists of 3 sets of 10.

If we subtract the sets of 10, How many sets of 10 are there?

It is 9 sets of 10.

Sets of 10

It is easy to calculate if we think them as sets of 10.

12 - 3 is the same calculation as we subtract 120 - 30 without 0.

Good!

Sets of 10

Example Write the answer in the .

$$120 - 30 = \boxed{90}$$

There are 12 - 3 sets of 10.

Good!

Exercise Write the answer in the .

$$\textcircled{1} \quad 140 - 80 = \boxed{}$$

There are 14 - 8 sets of 10

$$\textcircled{2} \quad 130 - 60 = \boxed{}$$

There are 13 - 6 sets of 10

$$\textcircled{3} \quad 150 - 90 = \boxed{}$$

There are 15 - 9 sets of 10

$$\textcircled{4} \quad 160 - 70 = \boxed{}$$

There are 16 - 7 sets of 10

$$\textcircled{5} \quad 170 - 80 = \boxed{}$$

There are 17 - 8 sets of 10

$$\textcircled{6} \quad 180 - 90 = \boxed{}$$

There are 18 - 9 sets of 10

$$\textcircled{7} \quad 120 - 70 = \boxed{}$$

There are 12 - 7 sets of 10

$$\textcircled{8} \quad 110 - 20 = \boxed{}$$

There are 11 - 2 sets of 10

$$\textcircled{9} \quad 130 - 90 = \boxed{}$$

There are 13 - 9 sets of 10

$$\textcircled{10} \quad 140 - 50 = \boxed{}$$

There are 14 - 5 sets of 10

Let's subtract numbers which are 0 at the "t" and "o". How many sets do each number have?

$$500 - 300$$

5

3

500 consists of 5 sets of 100.
300 consists of 3 sets of 100.

If we subtract the sets of 100, How many sets of 100 are there?

$$500 - 300$$

5

3

$$= 2$$

It is 2 sets of 100.

Sets of 100

It is easy to calculate if we think them as sets of 100.

$$500 - 300 = 200$$

5

3

$$= 2$$

5 - 3 is the same calculation as we add 500 - 300 without 00.

Good!

Sets of 100

Example Write the answer in the .

$$500 - 300 = 200$$

There are 12 - 3 sets of 10.

Good!

⑮ $770 - 60 =$

⑯ $990 - 90 =$

“o” means , “t” means , “h” means .

Let’s add numbers whose sum of the “t” is more than 9. First, we add the numbers of “o”. $2 + 3 = 5$. How about the sum of “t”?

$$72 + 63$$

$$7 + 6 = 13$$

h	t	o
	7	2
+	6	3

13 of the “t” means that there are 13 sets of 10 which is equal to 130. Carry 100 to the “h”.

$$72 + 63$$

h	t	o
	7	2
+	6	3

“o” is 5 by $2+3$.
“t” is 3 of 13. So, the answer is 135.

"o" means , "t" means , "h" means .

Let's solve by vertical addition.

$$72 + 63$$

h	t	o
---	---	---

	7	2
+	6	3
		5

The addition of "t" is $2+3=5$.

$$2 + 3 = 5$$

Next, calculate the "t".

$$72 + 63$$

h	t	o
---	---	---

	7	2
+	6	3
1		3
		5

We get $7+6=13$ by adding at the "t".

$$7 + 6 = 13$$

$$2 + 3 = 5$$

We write the 1 of 13 at the "h".

Solve.

$$274 + 9$$

	h	t	o
		1	
	2	7	4
+			9
			3

$4 + 9 = 13$

We write 1 of 13 at top of "t" and 3 of 13 at answer place of "o".

Solve the calculation at "t" and "o".

$$274 + 9$$

	h	t	o
		1	
	2	7	4
+			9
	2	8	3

$4 + 9 = 13$

$1 + 7 = 8$

We write $1 + 7 = 8$ at "t" and same number '2' at "h".

Good!

"o" means , "t" means , "h" means .

Solve.

$$427 + 38$$

	h	t	o
		1	
	4	2	7
+		3	8
-----			5

$7 + 8 = 15$

We write 1 of 15 at top of "t" and 5 of 15 at answer place of "o".

Next, calculate the "t" and "o".

$$427 + 38$$

	h	t	o
		1	
	4	2	7
+		3	8
-----			5
	4	6	5

$1 + 2 + 3 = 6$

$7 + 8 = 15$

We get $1 + 2 + 3 = 6$ by adding at the "t" and write 4 at the "h".

"o" means , "t" means , "h" means .

Let's subtract big numbers at the "t".

$$125 - 73$$

The calculation at the "t" is $2 - 7$. We can't subtract.

First, we calculate at the "o".

$$125 - 73$$

The calculation at the "o" is $5 - 3 = 2$.

When we can't subtract at the "t", we borrow 100 from "h".

$$125 - 73$$

We can subtract 70 from 100 which is borrowed.

"o" means , "t" means , "h" means .

Let's calculate at the "t"

$$125 - 73$$

We subtract 70 from the borrowed 100.

We add the remainder 30 and 20. $20 + 30 = 50$.

$$125 - 73 =$$

52

Good!

"h" becomes $1 - 1 = 0$.

“o” means , “t” means , “h” means .

Let's calculate $125 - 73$ by vertical method subtraction.

	h	t	o
	1	2	5
-		7	3
-----			2

First, we calculate at the “o”.

$5 - 3 = 2$

When we can't subtract at the “t”, we borrow 100 from “h”.
Do not forget the line which we use to cross out the number at the “h” and “t”.

	h	t	o
	1	12	5
-		7	3
-----			52

$12 - 7 = 5$

The “t” becomes $12 - 7 = 5$.

Let's calculate. The number which subtracted at the “o” and “t” are bigger.

$$153 - 69$$

h	t	o
	4	13
1	5	3
-	6	9
		4

We can't subtract 9 from 3 at the “o”. So we borrow from 10 at the “t” and calculate.

$$13 - 9 = 4$$

The number at the “t” become 4. We can't subtract 6 from 4, so borrow 100 from the “h” and calculate.

$$153 - 69$$

h	t	o
	14	13
1	5	3
-	6	9
		84

We write 1 at the top of “t” next to 4. It's become 14.

$$14 - 6 = 8$$

We borrowed 2 times in the one subtraction.

Example Solve.

Cross out the number when it changes.

Let's do subtraction which the “t” of minuend is 0.

$$105 - 78$$

We can't subtract because at the “o” 5-8, and at the “t” 0-7.

First, we calculate “o”. 105 does not have anything at the “t”, so borrow 100 from “h”.

$$105 - 78$$

Now we can borrow 10 from the “t” to “o”.

By borrowing 10, “o” becomes 15, so we can subtract 8 from 15.

Next, calculate at the “o”.

$$105 - 78$$

Subtract 8 from 10 which was borrowed and add the remainder.

$$2 + 5 = 7$$

There are 9 sets of 10 at the “t”. We can subtract 7 from 9.

$$105 - 78 =$$

27

Good!

There is nothing at the “h”.

"o" means , "t" means , "h" means .

Let's calculate $105 - 78$ by vertical subtraction.

	h	t	o
	1	0	5
-		7	8

Diagram showing the initial subtraction setup. A pencil points to the '0' in the tens place, indicating a problem with borrowing.

	h	t	o
	1	0	5
-		7	8

Diagram showing the subtraction after borrowing. A '9' is written above the '0' in the tens place, and a '15' is written above the '5' in the ones place. A pencil points to the '15', indicating the new value for subtraction.

We can't subtract 8 from 5 at the "o", but because the "t" is 0, we have to borrow 100 from the "h" and get 10 at the "t".

Then we borrow 10 from the "t", so cross out the small 10 and write 9.

Now we have 15 at the "o" and 9 at the "t". Let's calculate both of them.

	h	t	o
	1	0	5
-		7	8
		2	7

Diagram showing the final result of the subtraction. A pencil points to the '27' in the bottom row. A callout box shows the calculation 9 - 7 = 2, and another callout box shows 15 - 8 = 7.

We need to borrow until we can subtract.

Good!

Example Solve.

Cross out the number when it changes.

$$105 - 78$$

	1	0	5
-		7	8

$$105 - 78$$

Do NOT forget!!

	1	0	5
-		7	8
	2	7	

Exercise Solve.

Cross out the number when it changes.

⑮ $107 - 78$

h	t	o

Let's do subtraction which the "t" of minuend is 0.

$$103 - 97$$

h	t	o
1	0	3
1	0	3
—	9	7

We can't subtract 7 from 3 at the "o", so borrow 100 from the "h" and borrow 10 from the "t".

We cross out 10 at the "t" and write 9.

Let's calculate at the "t" and "o"

$$103 - 97$$

h	t	o
1	0	3
1	0	3
—	9	7
	0	6

The number of the "t" is $9 - 9 = 0$. This means $103 - 97 = 6$.

$$9 - 9 = 0$$

$$13 - 7 = 6$$

Good!

Next, let's subtract the number at the "o".

103 - 7

h	t	o
	9	
	10	13
1	0	3
-		7

We can't subtract 7 from 3 at the "o", so borrow 100 from the "h" and borrow 10 from the "t".

We cross out 10 at the "t" and write 9.

Let's calculate at the "t" and "o".

103 - 7

h	t	o
	9	
	10	13
1	0	3
-		7
	9	6

There is no subtrahend at the "t", so we write 9 as the answer.

$13 - 7 = 6$

Good!

Example

Solve.

Cross out the number when it changes.

$$103 - 97$$

	1	0	3
-		9	7
<hr/>			

$$103 - 97$$

	1	0	3
-		9	7

Let's subtract big number.

$$263 - 9$$

h	t	o
	5	13
2	6	3
<hr/>		
		4

$$13 - 9 = 4$$

We can't subtract 9 from 3 at the "o", so borrow 10 from the "t".

The number at the "t" is 5. The number at the "h" remain as 2.

$$263 - 9$$

h	t	o
	5	13
2	6	3
<hr/>		
2	5	4

We can write the number at "h" and "t". They are still 2 and 3.

Let's subtract big number.

$$263 - 49$$

h	t	o
	5	13
2	6	3
	4	9
<hr/>		
	1	4

We can't subtract 9 from 3 at the "o", so borrow 10 from the "t".

$$5 - 4 = 1$$

$$13 - 9 = 4$$

5-4 at the "t".

The number at the "h" is still 2.

$$263 - 49$$

h	t	o
	5	13
2	6	3
	4	9
<hr/>		
2	1	4

We can write 2 at the "h".
