

There are some onions in 2 bowls.

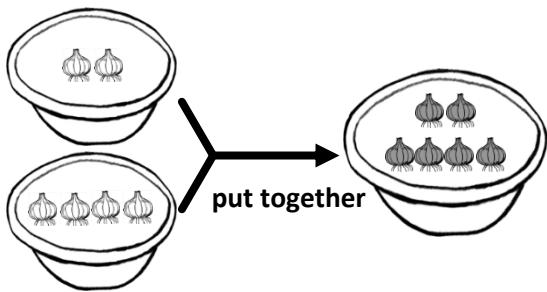

2 onions are in one bowl, and 4 onions are in the other bowl.

If we put these onions together into a big bowl, how many onions are there altogether?

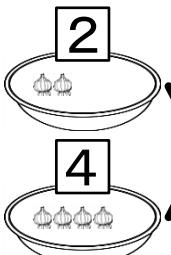

Good!

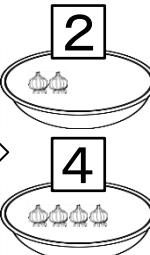

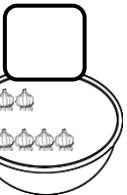

When we put 2 onions and 4 onions together, we have 6 onions!

How many onions are there?

Good!

There are 10!

If we put one more onion here, how many are there?

There is no space. We can't put anymore.

We don't know a larger number than 10!

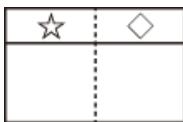

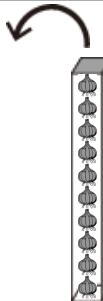

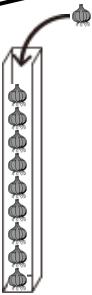

Then, let's look at how to write larger numbers than 10 with this picture.

We can write 9 below the when there are 9 onions in the box.

If we put one more onion in the box, what will happen?

Put an onion in the box.

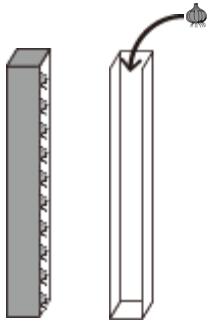

Now the box is full.

There is a box of ten onions on the left, so we write 1 below the and 0 below the .

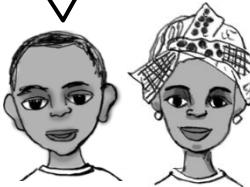

Move it to the left side.

Then, if we put one more onion here, what will happen?

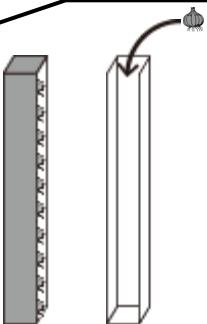

1	0

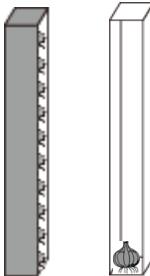

We put an onion into the empty box of . It becomes larger than 10.

We write "11" as one larger number than 10.

1	0

1	1

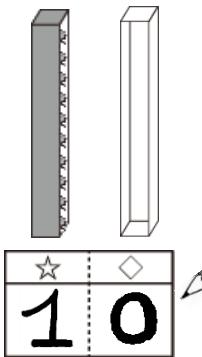

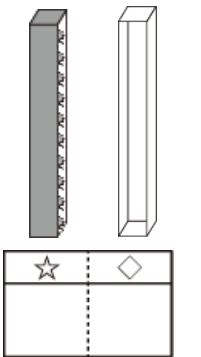

The number which is one larger than 10 is 11.

Put 1 onion to 10 onions.

Now put 1 onion on the right,
so we write 1 below the
and we write 1 in below .
