

11-1

Multiplication-2

Multiplication Facts of 6 (1)

Example There are 6 lemons on one plate. There are 3 plates. How many lemons are there altogether? Write a math sentence and find the answer.

Math sentence $\boxed{6} \times \boxed{3} = \boxed{18}$

There are 6 chocolates in one box. Write multiplication math sentences and find the answers.

1  1 box $6 \times \square = \square$

2  2 boxes $\square \times \square = \square$

3  3 boxes $\square \times \square = \square$

4  4 boxes $\square \times \square = \square$

5 There are 6 chocolates in one box. There are 5 boxes. $\square \times \square = \square$

6 There are 6 chocolates in one box. There are 6 boxes. $\square \times \square = \square$

7 There are 6 chocolates in one box. There are 7 boxes. $\square \times \square = \square$

8 There are 6 chocolates in one box. There are 8 boxes. $\square \times \square = \square$

9 There are 6 chocolates in one box. There are 6 boxes. $\square \times \square = \square$

×	1	2	3	4	5	6	7	8	9
6	6	12	18	24	30	36	42	48	54

Can you say the multiplication facts of 6 from $6 \times 9, 6 \times 8 \dots$?

11 - 2

Multiplication-2

Multiplication Facts of 6 (2)

Example There are 6 donuts in one box. There are 3 boxes. How many donuts are there altogether?

Math Sentence

$$6 \times 3 = 18$$

Answer

18 donuts

Read the following questions. Write the math sentences and find the answers.

1 There are 6 eggs in one package. There are 5 packages. How many eggs are there altogether?

Math Sentence

Answer

eggs

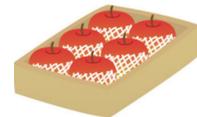

2 There are 6 apples in each box. There are 7 boxes. How many apples are there altogether?

Math Sentence

Answer

apples

3 Six students make one group. There are 8 groups. How many students are there altogether?

Math Sentence

Answer

students

4 There are 3 children. Each child has 6 pieces of candy. How many pieces of candy are there altogether?

Math Sentence

Answer

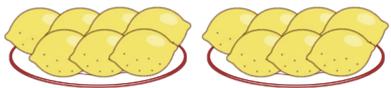

pieces of candy

11 - 3

Multiplication-2

Multiplication Facts of 7 (1)

Example There are 7 lemons on one plate. There are 2 plates. How many lemons are there altogether? Write a math sentence and find the answer.

Math sentence $7 \times 2 = 14$

Seven pens are sold in one set. How many pens are there? Write multiplication math sentences and find the answers.

1  | set $7 \times \square = \square$

2  2 sets $\square \times \square = \square$

3  3 sets $\square \times \square = \square$

4  4 sets $\square \times \square = \square$

5 There are 5 sets. How many pens are there altogether? $\square \times \square = \square$

6 There are 6 sets. How many pens are there altogether? $\square \times \square = \square$

7 There are 7 sets. How many pens are there altogether? $\square \times \square = \square$

8 There are 8 sets. How many pens are there altogether? $\square \times \square = \square$

9 There are 9 sets. How many pens are there altogether? $\square \times \square = \square$

×	1	2	3	4	5	6	7	8	9
7	7	14	21	28	35	42	49	56	63

Let's have a problem with friends, like "what is the answer to 7×8 ?"

11 - 4

Multiplication-2

Multiplication Facts of 7 (2)

Example There are 7 marbles in each bag. There are 3 bags. How many marbles are there altogether?

Math Sentence

$$7 \times 3 = 21$$

Answer

21

marbles

Read the following questions. Write the math sentences and find the answers.

- 1 There are 7 fish in each tank. There are 8 tanks. How many fish are there altogether?

Math Sentence

Answer

fish

- 2 There are 7 pieces of cakes in each box. There are 4 boxes. How many pieces of cake are there altogether?

Math Sentence

Answer

pieces of cake

- 3 There are 7 mangoes in each basket. There are 5 baskets. How many mangoes are there altogether?

Math Sentence

Answer

mangoes

- 4 There are 3 fishing boats. Seven fishermen are in each fishing boat. How many fishermen are there altogether?

Math Sentence

Answer

fishermen

11 - 5

Multiplication-2

Multiplication Facts of 6 and 7

1 The following tables show the multiplication facts of 6 and 7. Write the numbers in the .

×	1	2	3	4	5	6	7	8	9
6		12			30				
7			21				49		

Example Calculate the following multiplications.

1 $6 \times 3 =$

2 $7 \times 4 =$

2 Calculate the following multiplications.

1 $6 \times 3 =$

2 $7 \times 4 =$

3 $6 \times 7 =$

4 $7 \times 1 =$

5 $6 \times 5 =$

6 $7 \times 5 =$

7 $6 \times 2 =$

8 $7 \times 7 =$

9 $6 \times 1 =$

10 $7 \times 2 =$

11 $6 \times 6 =$

12 $7 \times 6 =$

13 $6 \times 8 =$

14 $7 \times 3 =$

15 $6 \times 4 =$

16 $7 \times 9 =$

17 $6 \times 9 =$

18 $7 \times 8 =$

You can do 1, 3, 5... If you practice them repeatedly, you will surely be able to say them smoothly.

11 - 6

Multiplication-2

Multiplication Facts of 8 (1)

Example There are 8 carrots in one basket. There are 2 baskets. How many carrots are there altogether? Write a math sentence and find the answer.

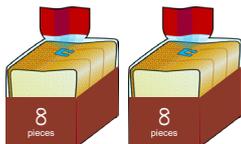

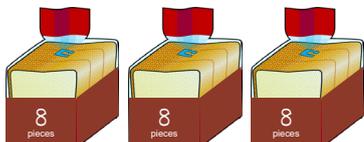

Math sentence

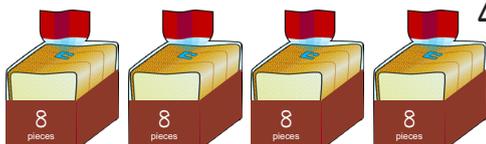

$$\boxed{8} \times \boxed{2} = \boxed{16}$$

There are 8 pieces of bread in one package. How many pieces of bread are there? Write multiplication math sentences and find the answers.

1  1 package $8 \times \square = \square$

2  2 packages $\square \times \square = \square$

3  3 packages $\square \times \square = \square$

4  4 packages $\square \times \square = \square$

5 There are 5 packages. How many pieces of bread are there altogether? $\square \times \square = \square$

6 There are 6 packages. How many pieces of bread are there altogether? $\square \times \square = \square$

7 There are 7 packages. How many pieces of bread are there altogether? $\square \times \square = \square$

8 There are 8 packages. How many pieces of bread are there altogether? $\square \times \square = \square$

9 There are 9 packages. How many pieces of bread are there altogether? $\square \times \square = \square$

×	1	2	3	4	5	6	7	8	9
8	8	16	24	32	40	48	56	64	72

Let's have a problem with friends, like "what is the answer to 8×5 ?"

Multiplication Facts of 8 (2)

Example There are 8 cans of juice in one box. There are 3 sets. How many cans of juice are there altogether?

Math
Sentence

$$8 \times 3 = 24$$

Answer 24 cans
of juice

Read the following questions. Write the math sentences and find the answers.

- 1 There are 8 buttons in one package. There are 6 packages. How many buttons are there altogether?

Math
Sentence

Answer

buttons

- 2 There are 8 pencils in each case. There are 5 cases. How many pencils are there altogether?

Math
Sentence

Answer

pencils

- 3 There are 8 photos on each page of the album. This album has 7 pages. How many photos are there in this album altogether?

Math
Sentence

Answer

photos

- 4 There are 4 boats. Eight people are in each boat. How many people are on the boats altogether?

Math
Sentence

Answer

people

11 - 8

Multiplication-2

Multiplication Facts of 9 (1)

Example There are 9 carrots in one basket. There are 2 baskets. How many carrots are there altogether? Write a math sentence and find the answer.

Math sentence $9 \times 2 = 18$

There are 9 chocolates in one box. How many chocolates are there? Write multiplication math sentences and find the answers.

- 1  1 box $9 \times \square = \square$
- 2  2 boxes $\square \times \square = \square$
- 3  3 boxes $\square \times \square = \square$
- 4  4 boxes $\square \times \square = \square$
- 5 There are 5 boxes. How many chocolates are there altogether? $\square \times \square = \square$
- 6 There are 6 boxes. How many chocolates are there altogether? $\square \times \square = \square$
- 7 There are 7 boxes. How many chocolates are there altogether? $\square \times \square = \square$
- 8 There are 8 boxes. How many chocolates are there altogether? $\square \times \square = \square$
- 9 There are 9 boxes. How many chocolates are there altogether? $\square \times \square = \square$

×	1	2	3	4	5	6	7	8	9
9	9	18	27	36	45	54	63	72	81

In the group, let's have a problem. Who can give the correct answer fast?

11 - 9

Multiplication-2

Multiplication Facts of 9 (2)

Example There are 9 sweets in one box. There are 3 boxes. How many sweets are there altogether?

Math Sentence

$$9 \times 3 = 27$$

Answer sweets

Read the following questions. Write the math sentences and find the answers.

- 1 Nine people are lined up in each row. There are 2 rows. How many people are there altogether?

Math Sentence

Answer

people

- 2 There are 9 marbles in each package. There are 5 packages. How many marbles are there altogether?

Math Sentence

Answer

marbles

- 3 There are 9 students in each group. There are 6 groups. How many students are there altogether?

Math Sentence

Answer

students

- 4 There are 4 boats in the sea. Nine people are on each boat. How many people are there on the boats altogether?

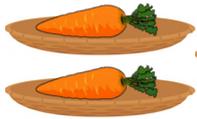

Math Sentence

Answer

people

Multiplication Facts of 1

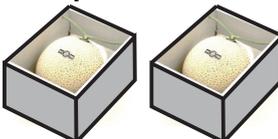

Example There is 1 carrot on one plate. There are 3 plates. How many carrots are there altogether? Write a math sentence and find the answer.

Math sentence $1 \times 3 = 3$

There is 1 melon in one box. Write multiplication math sentences and find the answers.

1  1 box $1 \times \square = \square$

2  2 boxes $\square \times \square = \square$

3  3 boxes $\square \times \square = \square$

4  4 boxes $\square \times \square = \square$

5 There is 1 melon in one box. There are 5 boxes. $\square \times \square = \square$

6 There is 1 melon in one set. There are 6 boxes. $\square \times \square = \square$

7 There is 1 melon in one set. There are 7 boxes. $\square \times \square = \square$

8 There is 1 melon in one set. There are 8 boxes. $\square \times \square = \square$

9 There is 1 melon in one set. There are 9 boxes. $\square \times \square = \square$

×	1	2	3	4	5	6	7	8	9
1	1	2	3	4	5	6	7	8	9

The multiplication facts of 1 is very easy, isn't it?

11 - 11

Multiplication-2

Multiplication Facts of 8 and 9

1 The following table shows the multiplication facts of 8 and 9. Write the numbers in the .

×	1	2	3	4	5	6	7	8	9
8					40				
9			27				63		

Example Calculate the following multiplications.

1 $8 \times 3 =$

2 $9 \times 5 =$

2 Calculate the following multiplications.

You can do 1, 3, 5... Let's practice them many times.

1 $8 \times 3 =$

2 $9 \times 4 =$

3 $8 \times 7 =$

4 $9 \times 1 =$

5 $8 \times 5 =$

6 $9 \times 5 =$

7 $8 \times 2 =$

8 $9 \times 7 =$

9 $8 \times 1 =$

10 $9 \times 2 =$

11 $8 \times 6 =$

12 $9 \times 6 =$

13 $8 \times 8 =$

14 $9 \times 3 =$

15 $8 \times 4 =$

16 $9 \times 9 =$

17 $8 \times 9 =$

18 $9 \times 8 =$

11 - 12

Multiplication-2

Multiplication Facts of 7 and 8

1 The following table shows the multiplication facts of 7 and 8. Write the numbers in the .

×	1	2	3	4	5	6	7	8	9
7				28			49		
8					40				

Example Calculate the following multiplications.

1 $7 \times 5 =$

2 $8 \times 2 =$

2 Calculate the following multiplications.

You can do 1, 3, 5... Let's say them smoothly without looking at the answer.

1 $7 \times 3 =$

2 $8 \times 4 =$

3 $7 \times 7 =$

4 $8 \times 1 =$

5 $7 \times 5 =$

6 $8 \times 5 =$

7 $7 \times 2 =$

8 $8 \times 7 =$

9 $7 \times 1 =$

10 $8 \times 2 =$

11 $7 \times 6 =$

12 $8 \times 6 =$

13 $7 \times 8 =$

14 $8 \times 3 =$

15 $7 \times 4 =$

16 $8 \times 9 =$

17 $7 \times 9 =$

18 $8 \times 8 =$

11 - 13

Multiplication-2

Multiplication Facts of 4 and 7

1 The following table shows the multiplication facts of 4 and 7. Write the numbers in the .

×	1	2	3	4	5	6	7	8	9
4						24			
7			21				49		

Example Calculate the following multiplications.

1 $4 \times 3 =$

2 $7 \times 4 =$

2 Calculate the following multiplications.

You can do **1**, **3**, **5**
... Hide the answers and practice them repeatedly.

1 $4 \times 5 =$

2 $7 \times 4 =$

3 $4 \times 8 =$

4 $7 \times 1 =$

5 $4 \times 3 =$

6 $7 \times 5 =$

7 $4 \times 2 =$

8 $7 \times 7 =$

9 $4 \times 6 =$

10 $7 \times 2 =$

11 $4 \times 1 =$

12 $7 \times 6 =$

13 $4 \times 7 =$

14 $7 \times 3 =$

15 $4 \times 9 =$

16 $7 \times 9 =$

17 $4 \times 4 =$

18 $7 \times 8 =$

11 - 14

Multiplication-2

Multiplication Problems

Example

There are 6 donuts in one box. There are 5 boxes. How many donuts are there altogether?

Math
Sentence

$$6 \times 5 = 30$$

Answer

30

donuts

Read the following questions. Write the math sentences and find the answers.

- 1 There are 8 donuts in one box. There are 6 boxes. How many donuts are there altogether?

Math
Sentence

Answer

donuts

- 2 Six children are sitting on each bench. There are 7 benches. How many children are there altogether?

Math
Sentence

Answer

children

- 3 Each minibus can hold 9 people. There are 4 minibuses. How many people can be held altogether?

Math
Sentence

Answer

people

- 4 There are 7 children. I am going to give 3 pieces of candy to each child. How many pieces of candy do I need?

Math
Sentence

Answer

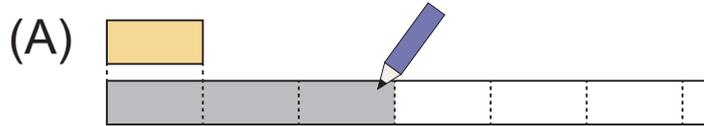

pieces of
candy

11 - 15

Multiplication-2

Times as Much and Multiplication

Example Answer the following problems.

- 1 Colour in the tape so that it is 3 times as long as (A).
- 2 The length of tape (A) is 2 cm. How many cm is the tape that you coloured?

Math Sentence

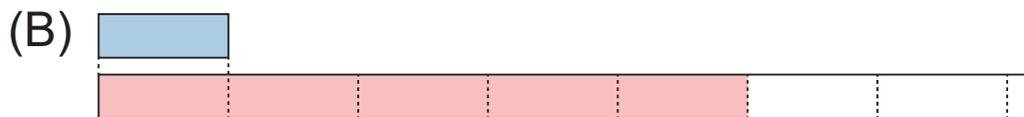

$$2 \times 3 = 6$$

Answer

6

cm

1 Answer the following problems.

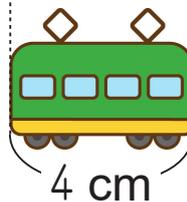

- 1 Colour in the tape so that it is 5 times as long as (B).
- 2 The length of tape (B) is 4 cm. How many cm is the tape that you coloured?

Math Sentence

Answer

cm

2 A toy train is 4 cm long.

1 How many cm are 2 trains together?

Math Sentence

Answer

cm

2 How many cm are 3 trains together?

Math Sentence

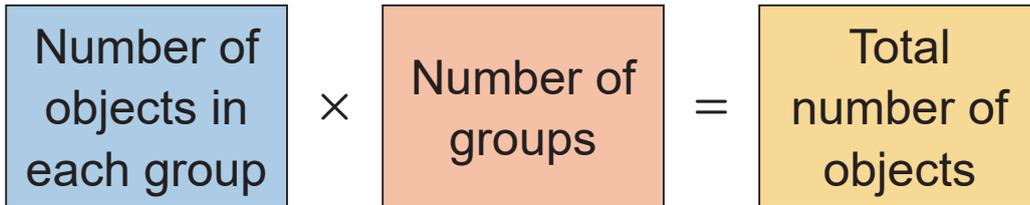

Answer

cm

The Multiplication Table (1)

Instruction

Multiplication Math Sentence:

Write the numbers in the following multiplication table.

You can do the Facts of 1, Facts of 2, Facts of 3....
For example $1 \times 1 = 1$, $1 \times 2 = 2$, $1 \times 3 = 3$,.....

		Multipliers								
		1	2	3	4	5	6	7	8	9
Multiplicands	Facts of 1	1	2	3	4	5	6	7	8	9
	Facts of 2	2	4	6	8	10	12	14	16	18
	Facts of 3	3	6	9	12	15	18	21	24	27
	Facts of 4	4	8	12	16	20	24	28	32	36
	Facts of 5	5	10	15	20	25	30	35	40	45
	Facts of 6	6	12	18	24	30	36	42	48	54
	Facts of 7	7	14	21	28	35	42	49	56	63
	Facts of 8	8	16	24	32	40	48	56	64	72
	Facts of 9	9	18	27	36	45	54	63	72	81

The Multiplication Table (2)

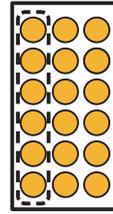

Example Find the multiplication sentences that match 18.

Arrange 18 dots in various ways.

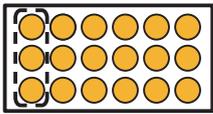

$$2 \times 9 = 18$$

$$6 \times 3 = 18$$

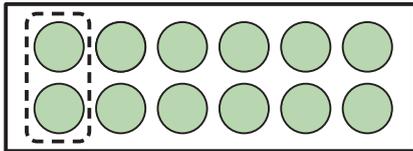

$$9 \times 2 = 18$$

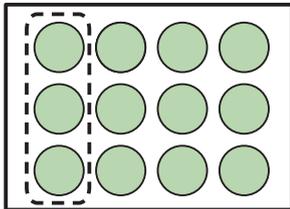

$$3 \times 6 = 18$$

1

Find the multiplication sentences that match 12.

There can be these arrangements. What else are there?

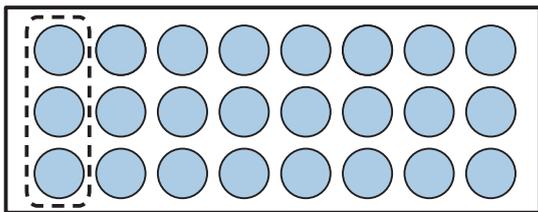

$$\square \times \square = 12$$

2

Find the multiplication sentences that match 24.

There is this arrangement. What else are there?

$$\square \times \square = 24$$

11 - 18

Multiplication-2

Making Multiplication Problems

Example

Look at the picture and make a multiplication problem. Then write a math sentence and find the answer.

Multiplication problem

There are 5 donuts on one plate. There are 3 plates. How many donuts are there altogether?

Math Sentence

$$5 \times 3 = 15$$

Answer

15

donuts

Look at the following pictures and make multiplication problems. Then write math sentences and find the answers.

1

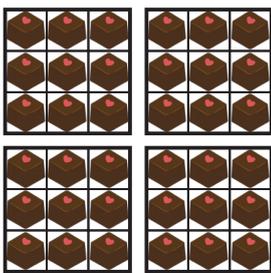

Multiplication problem

Math Sentence

Answer

pens

2

Multiplication problem

Math Sentence

Answer

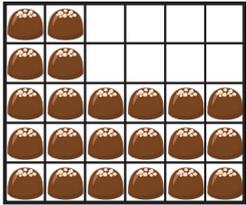

chocolates

11 - 19

Multiplication-2

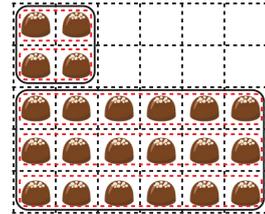

Problems

Example How many chocolates are in the box altogether?
Think about different ways to find the answer.

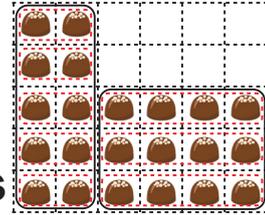

Method 1

2 groups of 2 make 2×2 .
3 groups of 6 make 6×3 .
 $2 \times 2 = 4$ and $6 \times 3 = 18$.
 $4 + 18 = 22$. **22 chocolates**

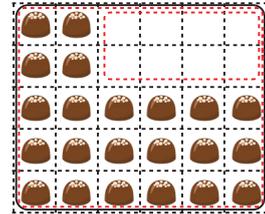

Method 2

5 groups of 2 make 2×5 .
3 groups of 4 make 4×3 .
 $2 \times 5 = 10$ and $4 \times 3 = 12$.
 $10 + 12 = 22$. **22 chocolates**

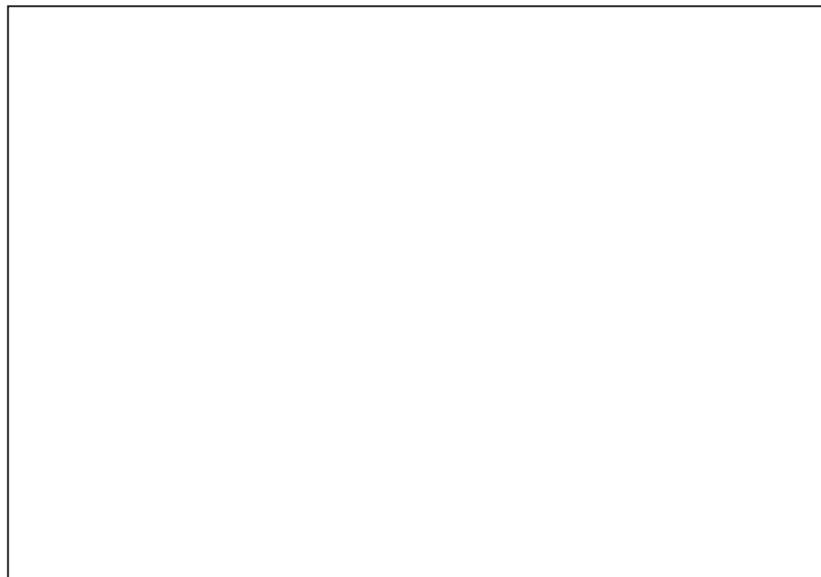

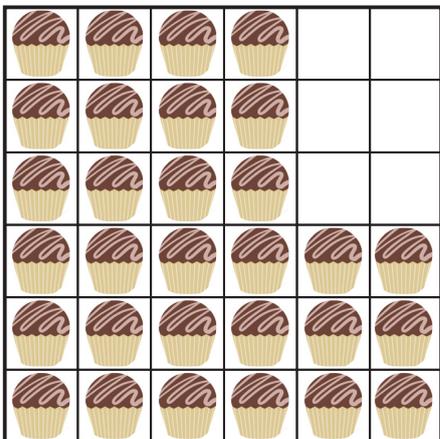

Method 3

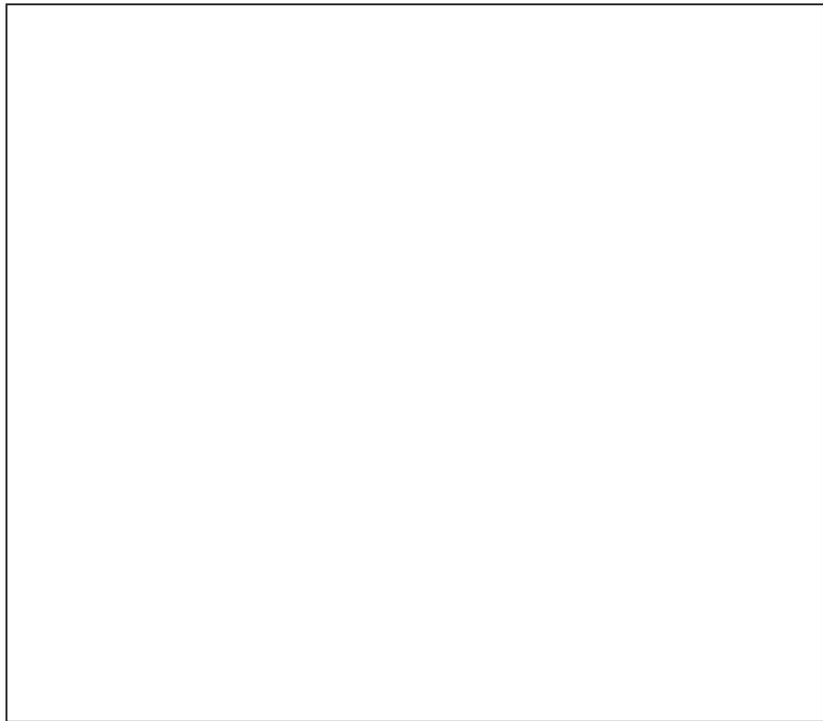

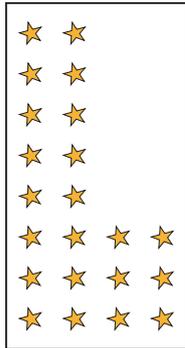

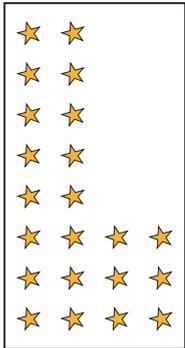

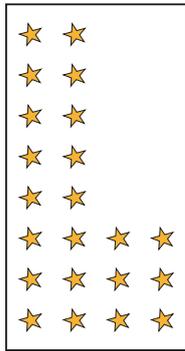

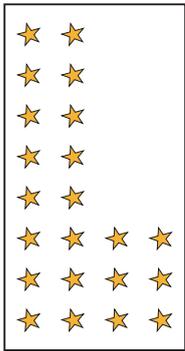

5 groups of 6 make 6×5 .
2 groups of 4 make 4×2 .
 $6 \times 5 = 30$ and $4 \times 2 = 8$.
 $30 - 8 = 22$. **22 chocolates**

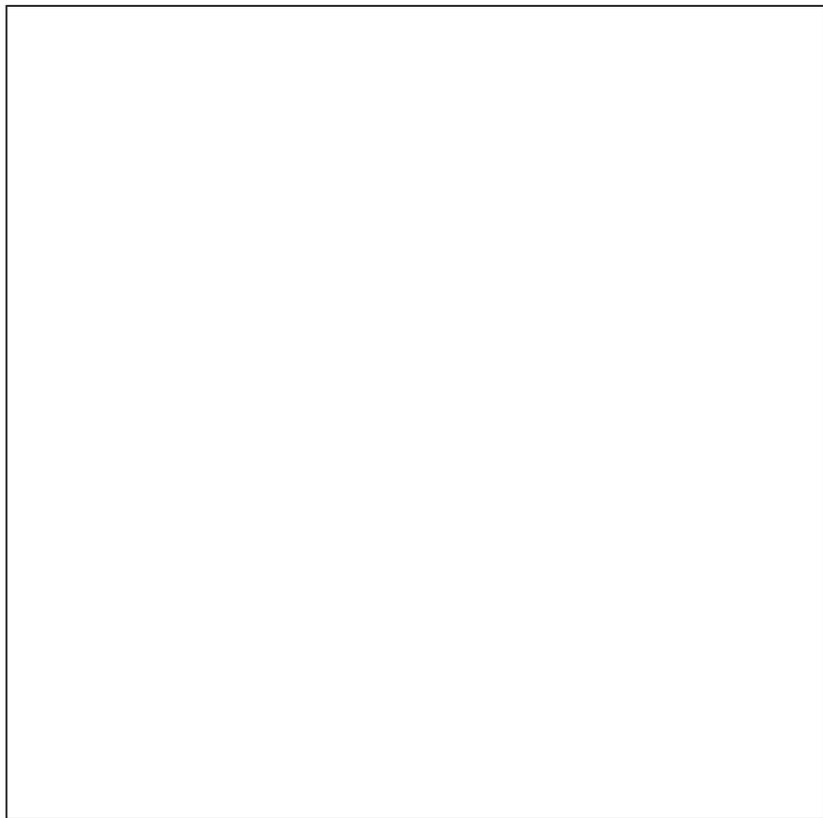

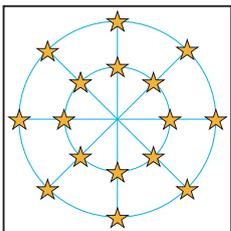

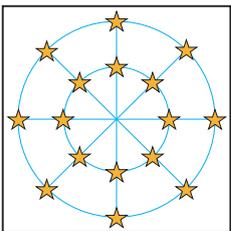

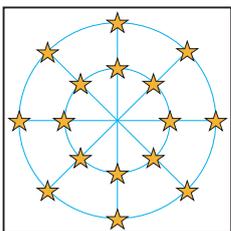

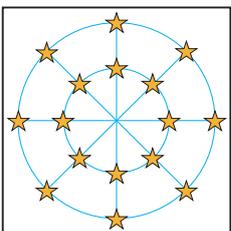

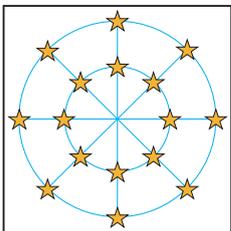

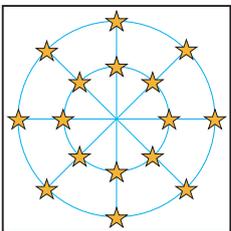

1 How many sweets are in the box altogether?
Think about different ways to find the answer.

2 How many stars (★) are there altogether?
Think about different ways to find the answer.

3 How many star marks (★) are there altogether?
Think about different ways to find the answer.

11-20

Multiplication-2

Review

1 The following is the multiplication table. Write the numbers in the blanks.

×	1	2	3	4	5	6	7	8	9
1									
2									
3									
4									
5									
6									
7									
8									
9									

3 Calculate the following multiplications.

1 $6 \times 3 = \square$ 2 $7 \times 2 = \square$ 3 $9 \times 2 = \square$

4 $8 \times 1 = \square$ 5 $9 \times 4 = \square$ 6 $9 \times 7 = \square$

7 $8 \times 3 = \square$ 8 $6 \times 5 = \square$ 9 $9 \times 8 = \square$

10 $7 \times 4 = \square$ 11 $8 \times 5 = \square$ 12 $7 \times 7 = \square$

13 $6 \times 4 = \square$ 14 $7 \times 9 = \square$ 15 $8 \times 6 = \square$

2 Read the following questions. Write the math sentences and find the answers.

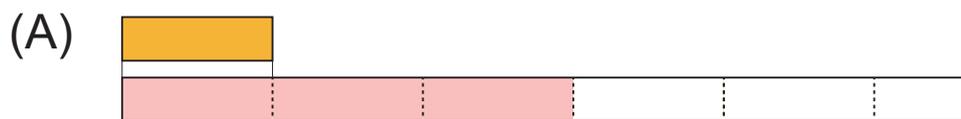

1 There are 7 peanuts in each bag. There are 6 bags. How many peanuts are there altogether?

Math Sentence Answer peanuts

2 There are 6 pens in one set. There are 4 sets. How many pens are there altogether?

Math Sentence Answer pens

3 Answer the following questions.

1 Colour in the tape so that it is 3 times as long as (A).

2 The length of tape (A) is 3 cm. How many cm is the tape that you coloured?

Math Sentence Answer cm

4 How many sweets are in the box altogether?
Think about different ways to find the answer.
