

## Instruction to Driver & Helpers during COVID-19 to prevent infection of Corona Virus

### Infectious Waste

Used mask, tissue, hand gloves, medical waste etc.

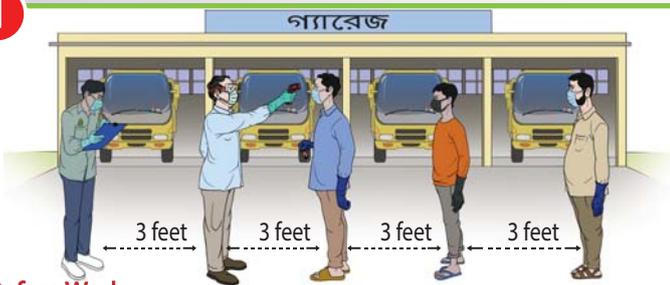

### For Health Protection

Keep Soap, water, Hand Sanitizer and liquid disinfectant inside the vehicle

1

### Before Work

- Wear mask, hand gloves, long sleeve clothes
- Cooperate to measure & check body temperature & protective gears.

2

Keep windows open as much as possible during driving for airflow.

4

Maintain minimum physical distance from each other during loading and unloading of waste.

3

Properly Wash your both hands with soap and water before taking any food.

5

- If any infectious waste is seen scattered or improperly managed, inform Conservancy inspector immediately.
- do not touch infectious waste in bare hand in any circumstances

6

Frequently Wash your hands with soap and water or use sanitizer properly.

**Without being scared of Corona Virus, follow the above measures for safety of yourself & your family as well inspire your colleagues to follow.  
Your cooperation is highly expected.**
