

Instruction to cleaners during COVID-19

to prevent infection of Corona Virus

Infectious Waste

Used mask, tissue, Hand gloves, medical waste etc.

For Health Protection

- Use soap & water, sanitizer and liquid disinfectant from ward office.
- If possible, keep hand sanitizer for own health safety.

1

Wear mask, hand gloves, apron, long sleeve clothes, long pants before starting cleanliness work

2

Cooperate conservancy inspector to measure & check body temperature & protective gears during attendance and to record in the register book

3

During Works

- Always use mask & hand gloves and wear apron.
- Wash hands thoroughly before eating or drinking.
- Always maintain physical distance (at least 3 feet) from others.

4

After Works

- Thoroughly wash your both hands and protective gears with soap and water.
- Store disposable protective gears (wrapped by paper) at safe place after regular use.
- Dispose protective gears at designated place or in a bin or at least wrapped by paper.

At least 20 sec.

Follow the above instruction to protect yourself and your surrounding people.
 Motivate other cleaners to follow.
 Your cooperation is highly desired.
