## V. ProSAVANA: Legislation and partnerships models

All private and public investments under the ProSAVANA Program shall respect the existing laws and will privileged the established partnerships models:

land concessions for food crops production, **40%** of the land shall be allocated to local communities for production of food crops in contract basis.

land concessions for production of non food crops, at least **10%** of the land shall be reserved for food crops production and **30%** of the land shall be for direct participation of local communities, in contract of production basis..

Our Challenge is to contribute to fight against poverty!

Our pride is to produce more food and generate more wealth!

Our destiny is to achieve a global food and nutrition security.
