I. Outline of the Collaboration Program:

1. Japanese enterprises possess technological resources in various fields that may assist in fulfilling societal needs and have a positive impact on the social welfare of a country. JICA, as the implementing agency of the Official Development Assistance of Japan, has introduced a Collaboration Program to utilize these technologies.
2. “Collaboration Program with the Private Sector for Disseminating Japanese Technology” is one of JICA’s public-private partnership program which aims to demonstrate Japanese enterprises’ technologies that respond effectively to specific development challenges. The goal of this Collaboration Program is to disseminate Japanese enterprises’ technology, knowledge and system to enhance development in the developing countries.
3. In preparation for the Collaboration Program, JICA invites proposals from Japanese enterprises. Successful proposals must indicate a workable plan to utilize proponent’s technologies in order to respond to the development challenges of the developing countries selected. The proponents who submitted successful proposals will be engaged as members of the Collaboration Program team (hereinafter referred to as the “JICA Collaboration Program Team”).
4. The JICA Collaboration Program Team will conduct the Collaboration Program in cooperation with its counterparts of the developing countries and prepare a final report together. The final report will be handed over to the counterpart for any future use, such as baseline information for implementing a similar project of their own.
