#### Preparatory phase
Before coming to Japan participants are required to write a country report.

#### Program in Japan
1. General information on parasite control-generality, parasitology, stool examination, parasite control (lecture and exercise)
2. Japanese history of public health activities and parasite control through school based approach (lectures and field trips)
3. Planning of parasite control through community based efforts made by tripartite sectors, namely, the administrative authorities, parasitology academia and non-profit organizations
4. Information sharing on the parasite control situation among participating countries and studying the application of Japanese history on each form of domestic parasite control

#### Post-program in Japan
Participants are expected to take action on the plans they designed during the program in Japan.

### Training Institutions
- Japan Association of Parasite Control
- JICA Center
- Tokyo International Center (TIC)
