Press Release

Flood Mitigation Works in Wat Phnom Area will be conducted on October 4-5, 2017

Phnom Penh Capital City will conduct dredging works in drainage pipes around Wat Phnom area in cooperation with JICA and City of Kitakyushu to mitigate flooding on October 4-5, 2017.

- Nowadays Phnom Penh faces challenges to smoothly discharge rained water through drainage pipes to the river if the pipes are damaged or filled by sludge.
- In order to maximize the function for the drainage pipes, the city is going to implement drainage works and camera investigation to analyze the inside of pipes for flood mitigation.
- City of Kitakyushu, the sister-city of Phnom Penh Capital City, is going to dispatch technical staff from Japan to conduct the works supported Japan International Cooperation Agency (JICA).

1. **Date**: 8:00-12:00 and 14:00-17:00, October 4, 2017
