Health and Medical Care Nursing Management

Ms. Shimizu Naomi has a meeting with a nurse in the National Pediatric Hospital in Phnom Penh. She has a lot of experience in teaching nurses in Asian countries as JICA expert before. Now she works for improvement of nursing management with management staff members for nursing care.

She is talking to a patient with a friendly smile. She always tries to have a good communication with not only nurse but also patient for making them understood symptoms and condition. Health and medical situation in Cambodia is still severe situation especially for pregnant women and children.
