Graduate School of Business Sciences, Humanities and Social Sciences, University of Tsukuba

JICA Development Studies Program (JICA-DSP)

Various universities, in collaboration with JICA, have established JICA-DSP among the graduate school degree courses they offer. JICA-DSP consists of class subjects pertaining to the development experience of modern Japan (including the experience of Japan's own development and of its cooperation with other countries through ODA). This program offers JICA scholars a chance to deepen their understanding of Japan's development experience in the respective academic fields.

Degree Programs in Humanities and Social Sciences, Graduate School of Business Sciences, Humanities and Social Sciences

Graduate School of Business Sciences, Humanities and Social Sciences of University of Tsukuba aims to build a solid foundation of specialized knowledge and skills that fit the challenges of the globalized world. The program adopts a multi-disciplinary approach that caters to the needs of a rapidly changing regions.

PROGRAM OUTLINE

This program offers classes on Japanese economic history and on Japanese financial history, banking system and more, providing students with a framework for comparative analyses. Furthermore, it aims to share the knowledge and lessons learned from the Japanese experience of institutional development and implementation, reviewing how we have tried to resolve problems encountered along the way.

COURSE SUBJECTS

Japanese Economy

- Basic history of the Japanese economy
- Empirical and theoretical analysis of the Japanese economy and comparison with USA

Economic Development of Japan

- Transformation of the Japanese economy
- Transformation of the Japanese society in the global economy within the context of economic development in Japan

The academic course, 'Economic Development of Japan' is a very useful tool not only for those within the field of economics and public policy studies but also for people from different fields, particularly from developing countries. I would highly recommend because it expands your understanding of the Japanese way of thinking and philosophy that shaped the rising development journey vis-à-vis the other global powers and determinant global economic phenomena over the centuries.

Carmen Maria Julio Pereira

Innovation Specialist at United Nations Population Fund (UNFPA)
Mozambique

The International Public Policy program under the JICA scholarship showed me a different perspective on my work and developed my research skills. I gained an appreciation for global partnership and networking and learned the importance of the Japanese government's role in other countries' development, like the Philippines. This program helped me realize my potential in contributing to the attainment of the objectives under the SDGs Global Leadership Program and become an effective agent of change.
