

JICA-DSP

# Graduate School of Agriculture, Ehime University

## JICA Development Studies Program (JICA-DSP)

Various universities, in collaboration with JICA, have established JICA-DSP among the graduate school degree courses they offer. JICA-DSP consists of class subjects pertaining to the development experience of modern Japan (including the experience of Japan's own development and of its cooperation with other countries through ODA). This program offers JICA scholars a chance to deepen their understanding of Japan's development experience in the respective academic fields.

## Graduate School of Agriculture at Ehime University

Ehime University's Graduate School of Agriculture, situated in Tarumi, Matsuyama, offers a unique curriculum based on food, life, and the environment, with three highly specialized departments:

- Food Production Science
- Bioscience
- Science and Technology for Biological Resources and Environment

## Program Outline

The "program of advanced human resource development related to international agriculture, forestry, and fisheries" aims to foster global leaders. To realize this aim, the program offers several courses that help develop an understanding of the issues related to domestic and overseas agriculture, forestry, and fisheries, improving the methods to solve these issues and imparting the skills related to the field study.
