

## Program Overview (Development Studies Programs Offered by Various Universities)

Name of University	Tohoku University
Name of School	Graduate School of Environmental Studies
Features of School	<a href="http://www.kankyo.tohoku.ac.jp/ielp/ielp/">http://www.kankyo.tohoku.ac.jp/ielp/ielp/</a>
Program Outline	<p>The International Environmental (Energy and Resources) Leadership Program at Tohoku University, Graduate School of Environmental Studies, provides a trans-disciplinary education, combining the humanities and sciences. It is through this context that the program educates both Japanese and foreign exchange students side by side, making use of maximized synergy among participants from multiple countries and placing high emphasis on specialized research in environmental fields (Energy and Resources). Our program fosters a comprehensive way of thinking that is crucial for international environmental leaders. The program seeks to equip students with a sense of internationalism, practical know-how, management capability, and the individual leadership and group-minded orientations inherent in strategic planning.</p>
Outline of Subjects	<p>Energy and Resource Strategies, Remote Sensing for Environment Study, Advanced Environmental Studies, Hydro-Environmental Studies, Water and urban environments</p>
