Statistics on Program Results

Interpreting the Statistics

The following shows statistics relating to JICA's operations in FY2023.

The methods of calculation and the range of figures are as follows.

1. When categorized according to region, figures for bilateral cooperation are classified into the following six regions.
 - (1) Asia (including Central Asia and the Caucasus, excluding the Middle East);
 - (2) Pacific;
 - (3) North America and Latin America;
 - (4) Middle East (west of Iran and north of Sahara except Sudan);
 - (5) Africa (excluding the Middle East);
 - (6) Europe (including Türkiye)
2. Technical Cooperation program results by number of participants are classified into the following five types.
 - (1) Acceptance of training participants;
 - (2) Dispatch of experts;
 - (3) Dispatch of study teams;
 - (4) Dispatch of Japan Overseas Cooperation Volunteers (JOCVs);
 - (5) Dispatch of other volunteers
3. All other data in connection with JICA's operations and performance together with revisions and updates of achievements and results not appearing in this report shall be posted on JICA's website in a timely and appropriate manner.

Consulting Services		For consulting services, the interest rate will be minimal (0.40%) and the repayment, grace periods and conditions for procurement will be the same as those for main components.						
Options for Program Type Japanese ODA Loans		In case of co-financing, it is possible to apply the same repayment terms as co-financer’s lending while maintaining the concessionality of Yen loans.						

- *1 For Low-Income LDCs, three-year transition period will be granted to recipient countries that will move from the category of Low-Income LDCs, and, during the period, the terms and conditions for Low-Income LDCs will be applied to the projects of the countries.
- *2 Preferential Terms for High Specification will be applicable to projects promoting quality infrastructure. The applicability of the terms will be decided on a case-by-case basis.
- *3 Preferential Terms are applied to the following sectors and fields to all countries (except Low-Income LDCs):
- (i) Issues on Global Environmental and Climate Change
 - (ii) Health and Medical Care and Services (including Stand-by Credit for Urgent Response to Epidemics (Stand-by CURE))
 - (iii) Disaster Prevention and Reduction
 - (iv) Human Resource Development
- *4 The base rate of floating rate is the value of the 6-month TORF, and the fixed spread remains constant over the life of the loan. If the base rate plus fixed spread is lower than 0.1%, the interest shall be 0.1%.
- *5 Special Terms for Economic Partnership (STEP) is extended to the projects for which Japanese technologies and know-how are substantially utilized, based on the recipient countries' request to utilize and transfer excellent technologies of Japan. Countries (except LDCs), which are eligible for tied aid under Arrangement on Officially Supported Export Credits issued by OECD, are eligible for STEP terms.
- Note 1: Irrespective of the income category, the term and condition of 0.40% interest rate and 40-year repayment period including 10-year grace period are applied to projects assisting recoveries from disasters, including Stand-by Emergency Credit for Urgent Recovery (SECURE). For Stand-by Emergency Credit for Urgent Recovery (SECURE), the term and condition of 20-year repayment period including 6-year grace period, or 15-year repayment period including 5-year grace period are also available, in order to apply Currency Conversion Option.
- Note 2: For Contingent Credit Enhancement Facility for PPP Infrastructure Development (CCEF-PPP), only floating rate will be applied irrespective of income category. The terms on conditions are individually set within the following range of interest rate as well as repayment period (In the case of short term financial support, however, the repayment period is 10 years).
- Interest rate: TORF + 35 ~55bp
 - Repayment period: maximum 40-year (maximum 30-year drawdown period plus 10 year)
- cf.
- Under the EPSA (Enhanced Private Sector Assistance for Africa) initiative, the loan for projects co-financed with the AfDB are extended using "Preferential Terms," according to each income category; in the case for Low-Income LDCs, the term and condition of 0.4% interest rate and 40-year repayment period including 10-year grace period are applied.
 - For countries complying with ongoing IMF-supported programs or receiving grants from IDA, it is possible to modify the terms and conditions of the ODA Loans so as to meet the IMF's concessionality criteria.
 - For General terms and Preferential terms, fixed rate for all countries (except Low-Income LDCs) will be revised on a regular basis so that its concessionality will be equal to that of floating rate.
 - For Upper-Middle-Income Countries and Uppermost-Middle-Income Countries, floating rate will be applied in principle, although fixed rate could be applied.

For Low-Income LDCs, three-year transition period will be granted to recipient countries that will move from the category of Low-Income LDCs. For Haiti, Guinea and Zambia, the terms and conditions for Low-Income LDCs will be applied to the projects of the countries.

1 Sectors and Fields Eligible for Preferential Terms

- Global Environmental and Climate Change
- Human Resource Development
- Disaster Prevention and Reduction
- Health and Medical Care and Services

Notes: 1. To promote the strategic use of ODA Loans for priority issues, assistance for which makes use of Japan's outstanding technology and know-how, JICA reviewed sectors to which preferential terms of assistance are applied in accordance with an announcement made on an improvement in policies to encourage the strategic use of ODA Loans by the Ministry of Foreign Affairs on April 15, 2013.

2. In cases where a part of the project is eligible for preferential terms, the terms can be applied to that part.

2 Enhancement Use of Assistance for Upper-Middle-Income Countries and Uppermost-Middle-Income Countries

JICA promotes its use of ODA Loans in upper-middle-income countries and uppermost-middle-income countries, primarily in fields where Japan's knowledge and technology can be put to good use.

For upper-middle-income countries, besides the current six fields of application (environment, human resource development, measures to reduce disparities, disaster prevention and recovery measures, regional infrastructure and agriculture), JICA will provide ODA Loans for other areas that have strategic significance for Japan, such as making maximum use of Japan's knowledge and technology.

Uppermost-middle-income countries will be eligible for ODA Loans if projects are considered to have strategic significance for Japan until they graduate from being eligible for World Bank assistance (normally about five years).

3 Special Term for Economic Partnership (STEP)

Overview

Special Terms for Economic Partnership (STEP) was introduced in July 2002, with a view to raising the visibility of Japanese ODA among citizens in both recipient countries and Japan through best use of advanced technologies and know-how of Japanese firms.

STEP Recipient Countries

Countries eligible for Japanese ODA Loans and tied aid under the OECD rules.

STEP-Eligible Projects

(1) Projects eligible for STEP are those listed in following sectors and fields; (2) and at the same time, for which Japanese technologies and equipment are substantially utilized.

Sectors and Fields

- Bridges and Tunnels
- Trunk roads/Dams (limited to projects that substantially utilize Japanese anti-earthquake technology, ground treatment technology and rapid construction technology)
- Ports
- Airports
- Urban mass transit system
- Oil/Gas transmission and storage facilities
- Urban flood control projects
- Communications/Broadcasting/Public information system
- Power stations/Power transmission and distribution lines
- Environmental Projects (limited to projects that substantially utilize Japan's air-pollution prevention technology, water-pollution prevention technology, waste treatment and recycling technology and waste heat recycling and utilization technology)
- Medical equipment
- Disaster-prevention system/equipment

Even if a project does not fall into the sectors and fields listed above, application of STEP to the project could be positively considered as long as the project substantially utilizes Japanese technologies and/or equipment.

Interest Rates and Repayment Period

Interest rates and repayment periods are set so as to enable the extension of tied aid under OECD rules.

Procurement Conditions

Primary contracts are tied to Japanese firms, while subcontracts are generally untied. The prime contractor can be a consolidated subsidiary of a Japanese company in a foreign country. A joint venture (JV) composed of a Japanese company or companies and a company or companies in a recipient country may also be the prime contractor on condition that the company is the leading partner. Additionally, if specified requirements are met, a JV composed of a Japanese company and an associated company of a Japanese company in a foreign country may also be the prime contractor on condition that the Japanese company is the leading partner.

Coverage Ratio

STEP loans may be used to finance up to 100% of the total project cost.

Country of Origin Rule

Not less than thirty percent (30%) of the total price of contracts (excluding consulting services) financed by a STEP loan shall be accounted for by either (i) goods from Japan and services provided by a Japanese company, or (ii) goods from Japan only, depending on the nature of the project. If specified conditions are met, the price of major components can be included in the ratio of the goods and services to be procured from Japan.

Category	Examples
(a) Projects in which advanced technologies and/or know-how of Japanese companies are identified in services (e.g. construction methods, etc).	Tunnels, ports, concrete bridges, trunk roads, dams, sewerage systems, urban underground headrace tunnels, public information systems, hydroelectric power, and geothermal power, etc.
(b) Projects, which consists mainly of the installation of goods or plants and in which Japanese technologies can be identified in such goods or plants.	Communications/broadcasting facilities, wind/solar/thermal power generation, oil/gas transmission and storage facilities, waste treatment sites, waste incineration plants, steel bridges, urban mass transit systems, urban flood control projects, power transmission and distribution line, etc.

Procurement Audits

The procurement process is audited by a third party after bidding to ensure fairness, utilizing loan funds or JICA research expenses.

Note: Please refer to page 25 for the classification of principal country income levels.

Claims probable in bankruptcy, claims probable in rehabilitation, and other	87,063	87,063
Total	327,505	314,066

Note: The allowance for claims on debtors who are legally bankrupt ("Bankrupt borrowers") or substantially bankrupt ("Substantially bankrupt borrowers") is provided based on the outstanding balance of loan claims after the deductions of the amount expected to be collected through the disposal of collateral and execution of guarantees, or the same amount is written off directly. The allowance for claims on debtors who are not legally bankrupt, but are likely to become bankrupt ("Potentially bankrupt borrowers") is provided based on an overall assessment of the solvency of the debtors after the deductions of the amount expected to be collected through the disposal of collateral and the execution of guarantees, or the same amount is written off directly. There were no write-offs from the above-mentioned outstanding balance of loan claims.

The allowance for claims on debtors other than Bankrupt borrowers, Substantially bankrupt borrowers, and Potentially bankrupt borrowers is provided primarily based on default probabilities, etc. based on analysis of rating transitions during a certain period in the past. The allowance for possible losses on specific overseas loans is provided based on the expected loss amount taking into consideration the political and economic situation of these countries.

All claims are assessed initially by the operational departments (including regional departments) based on internal rules for self-assessment of asset quality, and an allowance is provided based on the results of the assessments. Internal audit department, which is independent from the operational departments, reviews these self-assessments.

Information on the Quality of Assets of Japan International Cooperation Agency (JICA) Finance and Investment Account

While the Banking Act and Act on Emergency Measures for the Revitalization of the Financial Functions of 1998 (the “Financial Revitalization Act”) do not apply to JICA, JICA has been pursuing its efforts to enhance disclosure on its asset quality and improve the internal management of credit risks by making periodical self-assessments of the quality of its assets.

One notable characteristic of JICA’s operation is that a considerable portion of its loans is official credit for the governments of developing countries. Thus, when an indebted country is temporarily unable to service debt due to economic difficulties, debt rescheduling will sometimes take place, based on an international agreement among the creditor countries (a Paris Club agreement, etc.), in order to ensure sustainable debt service.* A debtor country receiving such temporary support for overcoming the liquidity problem will implement economic restructuring programs agreed upon with the IMF to acquire sustainable debt service capacity.

The loans rescheduled under a Paris Club agreement, etc., have a high probability of repayment, because, unlike loans provided by private financial institutions, their nature as official credit provides an asset-securing mechanism under the above international framework. Nonetheless, to facilitate comparison with private financial institutions, JICA, in principle, discloses the loans rescheduled in the Paris Club and whose debtor countries are categorized as “needs attention” (or “special attention”) in its self-assessments of asset quality, as loan assets require to be disclosed classifying them as “Special Attention Assets” (or “Restructured Loans”).

* When a debtor country becomes temporarily unable to service its debt due to deterioration in its balance of payments, its creditor countries discuss to support liquidity of the debtor country and make an international consensus on rescheduling the debt at the creditor nation conference (Paris Club Meeting). In conjunction with this temporary liquidity assistance, debtor countries will implement an economic reform program agreed upon with the International Monetary Fund (IMF), making it possible for the country to continue to service its debt obligations.

Of the foreign government debts held in JICA’s Finance and Investment Account, the principal amount of those which have been agreed on by the Paris Club and otherwise, and also whose debt deferral contract has been concluded, was ¥466,728 million at the end of FY2024. This amount includes debts for which JICA and the debtor countries have concluded debt rescheduling contracts under a rescheduling agreement with the Paris Club based on the Debt Service Suspension Initiative announced in the G20 Finance Ministers and Central Bank Governors Meeting Communiqué in April 2020 (as well as based on extensions agreed to in October 2020 and re-extensions agreed to in April 2021).

Loan Assets under the Banking Act and the Financial Revitalization Act*

The following tables show the classification of loans based on the self-assessments of asset quality in accordance with the disclosure standard of loans (under Article 19-2, paragraph (1), item (v), (b) of the Regulation for Enforcement of the Banking Act, as well as Article 4 of the Regulation for Enforcement of the Financial Revitalization Act).

(1) Bankrupt or De Facto Bankrupt Assets

“Bankrupt or De Facto Bankrupt Assets” are loans and other credits to debtors who have begun proceedings under the Bankruptcy Act, the Corporate Reorganization Act, the Financial Revitalization Act and other similar laws of Japan and have financially failed. In the asset quality self-assessments, these loans are loans to debtors who are legally or substantially bankrupt.

(2) Doubtful Assets

“Doubtful Assets” are loans and other credits to debtors whose financial and operational conditions have deteriorated and who have a possibility that payment of principal and/or interest will not be made on a contractual basis; they are not categorized as “Bankrupt or De Facto Bankrupt Assets.” In the asset quality self-assessments, these loans are loans to the debtors who are likely to become bankrupt.

(3) Loans in Arrears by 3 Months or More

“Loans in Arrears by 3 Months or More” are loans whose principal or interest is past due three months or more from the date following the contractually scheduled payment date and not classified as “Bankrupt or De Facto Bankrupt Assets” or “Doubtful Assets”

(4) Restructured Loans

“Restructured Loans” are loans whose terms and conditions are modified in favor of the borrowers in order to expedite the borrowers’ business restructuring or support their business operations by, among others, reducing the stated interest rate, deferring interest payments or write-downs, and that are not classified as “Bankrupt or De Facto Bankrupt Assets,” “Doubtful Assets” and “Loans in Arrears by 3 Months or More”

(5) Normally Performing Assets

“Normally Performing Assets” are loans to borrowers with no particular problem in their financial conditions, categorized in the asset quality self-assessments either as “loans to normal borrowers” or “loans to needs attention borrowers (excluding Special Attention Assets, namely “Loans in Arrears by 3 Months or More” and “Restructured Loans”),” but which are not categorized as “Bankrupt or De Facto Bankrupt Assets,” “Doubtful Assets,” “Loans in Arrears by 3 Months or More” and “Restructured Loans.”

* Deferred principal included in loans as shown in the table below accounts for ¥23,217 million of the Doubtful Assets of ¥87,063 million, for ¥403,386 million of the Special Attention Assets of ¥1,130,728 million, and for ¥40,124 million of the Normally Performing Assets of ¥15,498,343 million.

(1)/(3)(%)	7.29	7.49	(0.20)

* Based on JICA’s self-assessments of assets, the difference between the debt exposure to bankrupt debtors and debtors in bankruptcy and the amount recognized as recoverable by means of collateral or guarantees is considered as the projected amount that cannot be collected on, and so is subtracted directly from the total debt exposure. As such, this figure is not included in the table under “Loans Receivable” or “Loan-loss Reserve.”

* Coverage amount refers to the combined total of the loan-loss reserve set aside for each debt and the value of collateral and guarantees, while the coverage ratio represents the ratio of the coverage amount as a percentage of total loans receivable.

Private-Sector Investment Finance Management Account as of March 31, 2024

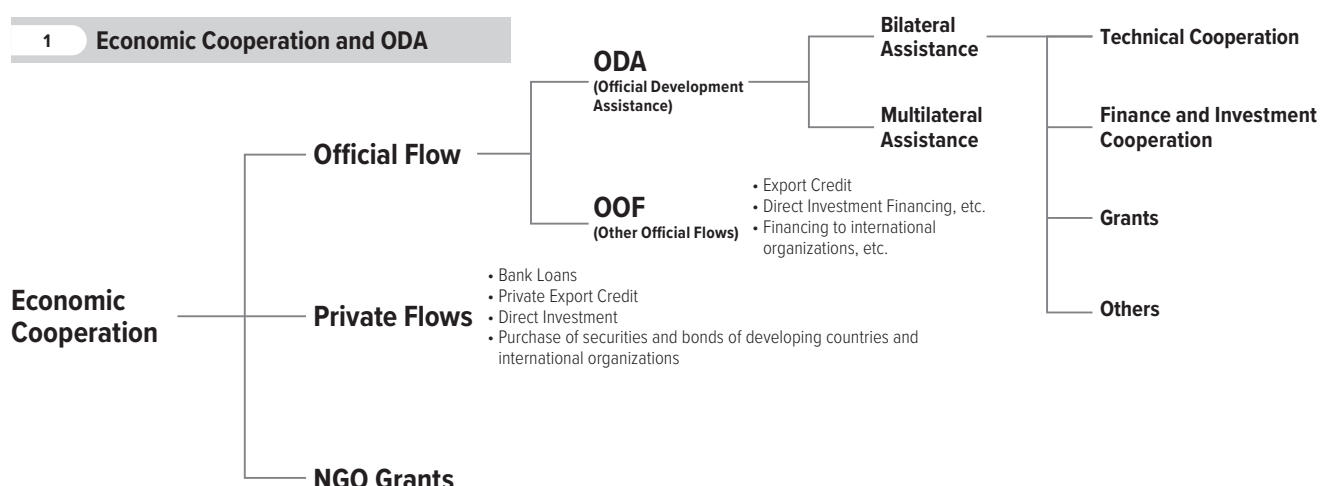

JICA has a management account for Private-Sector Investment Finance (PSIF) operations to manage its portfolio. The management account took over the assets of the PSIF operations as of October 1, 2008, when JICA was established under its current structure. The amounts in the major accounts as of the end of March 2024 are in the table at right. Revenues and expenses not directly related to PSIF operations (depreciation, real estate expenses, personnel expenses, etc.) are not included as revenues or expenses in the management account.
