DEPARTMENT OF PUBLIC WORKS AND HIGHWAYS JAPAN INTERNATIONAL COOPERATION AGENCY

Project: Central Mindanao High Standard Highway Construction Project

Subject : Just Compensation Appraisal of Properties

Gentlemen:

INSTRUCTIONS

We have been engaged to estimate the market value of the land that shall be affected by the proposed Central Mindanao High Standard Highway Construction Project of the Department of Public Works and Highways.

As requested, we confirm that we have conducted an appraisal as of **10 April 2022**, made enquiries and searches and have obtained such further information as we consider necessary for the purpose of providing you with the **just compensation** of the properties that shall be affected by the proposed project.

The appraised properties consist of *land only*, located within Cagayan de Oro City and Municipality of Tagoloan in the Province of Misamis Oriental; and Malaybalay City and Municipalities of Manolo Fortich, Impasug-ong and Sumilao in the Province of Bukidnon.

This valuation was performed in accordance with the Philippine Valuation Standards (2nd Edition)-Incorporating the International Valuation Standards (IVS) 2017.

PURPOSE OF APPRAISAL

The purpose of this appraisal is to determine the just compensation of the properties based on market value.

Just Compensation, in condemnation, is defined as the amount of the loss for which a property owner has established a claim to compensation. It is the payment of the Market Value of that which was taken. In a strict sense, the term is synonymous with indemnity, that is, a payment, no more and no less than sufficient to make good the loss. (Appraisal Terminology and Handbook, 4th Edition, American Institute of Real Estate Appraisers, Copyright 1962, Pages 104 to 105)

Market Value is defined as the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently, and without compulsion. (International Valuation Standards 2017, IVS 104, Bases of Value, Paragraph 30.1)

Norviendo S. Ramos, Jr., Licensed Civil Engineer (License No. 0070795) and Licensed Real Estate Appraiser (License No. 0000735) Address: Block 17 Lot 8 Narra Avenue Palmera Woodlands, Barangay Cupang, Antipolo City 1870 Contact Nos. +639088879537 and +63284636455

VALUATION METHODOLOGY

As provided in Section 5 of Republic Act No. 10752, an act facilitating the acquisition of right-of-way site or location for National Government Infrastructure Project, the implementing agency may offer to acquire, through negotiated sale, the right-of-way site or location for national government infrastructure project, under the following rules:

The implementing agency shall offer to the property owner concerned, as compensation price, the sum of:

- 1. The current market value of the land,
- 2. The replacement cost of structures and improvements therein; and
- 3. The current market value of crops and trees therein.

Just Compensation for Land

The Encyclopedia of Real Estate Appraising, revised and enlarged (1968), defined "Highway Taking" as the acquisition of private property by the government for construction of a highway or toll road, or for widening of an existing highway.

In highway takings, the whole or part of the owner's property can be subject to a just compensation.

The amount of just compensation is the market value of the owner's property partly taken and, if any, the damage to the remainder of this property, known as severance damage. The term *Severance Damage* is defined as the decrease in market value of the remaining property of an owner caused by the taking of the part of his property. The amount of just compensation is equivalent to the market value of the property before the taking, less the market value of the remaining area after the taking.

The market value of the land was estimated by using the *Market Approach*. The *Market Approach* provides an indication of value by comparing the asset with identical or comparable (that is similar) assets for which price information is available. (International Valuation Standards 2017, IVS 105, Valuation Approaches and Methods, Paragraph 20.1)

QUALIFICATIONS

Our valuations have been made on the assumption that the owner(s) sells the property on the open market in their existing state without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the property.

While we have taken every reasonable care both during inspecting the information provided to us and in making relevant enquiries, we have not scrutinized the original documents to verify the correctness of the information or to ascertain subsequent amendments, if any, which may not appear on the copies handed to us. We have no reason to doubt the truth and accuracy of the information. We are also advised that no material facts have been omitted from the information provided.

We have not sighted joint venture agreement(s) and have assumed that there are no terms and conditions contained therein (unless otherwise stated in the report) which would materially affect the value of the property.

Central Mindanao High Standard Highway Construction Project (Cagayan De Oro – Malaybalay Section)

LIMITING CONDITIONS

We made no investigation of and assume no responsibility for titles to or liabilities against the appraised properties.

All existing liens and encumbrances, if any, have been disregarded and the property is appraised as though free and clear under responsible ownership.

The valuer, by reason of this appraisal, is not required to give testimony or attendance in court or to any government agency with reference to the subject property unless arrangements have been previously made.

This appraisal report is invalid unless it bears the service seal of the valuer.

Erasure on appraisal date and value invalidates this valuation report.

Neither the whole nor any part of this report and valuation, nor any reference thereto, may be included in any document, circular or statement without our written approval or the form and context in which it will appear.

Possession of this report or a copy thereof does not carry with it the right of publication, nor may it be used for any purpose by anyone, but the client for whom it was made, without the written consent of the appraiser or of the client.

VALUATION CONCLUSION

Based on the foregoing and as supported by the accompanying narrative report, it is our opinion that the just compensation (based on market value) appraised as of 10 April 2022, of the properties that shall be affected by the proposed Central Mindanao High Standard Highway Construction Project of the Department of Public Works and Highways is reasonably represented in the amount of EIGHT HUNDRED FORTY-SEVEN MILLION NINE HUNDRED SIXTY-SIX THOUSAND NINE HUNDRED (PHP847,966,900) PESOS.

WE CERTIFY that we have neither present nor prospective interest on the appraised properties or on the reported value.

Respectfully submitted,

ENGR. NORVIENDO S. RAMOS, JR., I.P.A.

Licensed Real Estate Appraiser PRC Reg. No. 0000735 Licensed Civil Engineer PRC Reg. No. 0070795

VALUATION REPORT

GENERAL

This report covers an appraisal of certain properties located within Cagayan de Oro City and Municipality of Tagoloan in the Province of Misamis Oriental; and Malaybalay City and Municipalities of Manolo Fortich, Impasug-ong and Sumilao in the Province of Bukidnon. The appraisal was made for the purpose of expressing an opinion on the *just compensation* of the properties as of *10 April 2022*.

The term *Just Compensation*, in condemnation, is the amount of the loss for which a property owner has established a claim to compensation. It is the payment of the Market Value of that which was taken. In a strict sense, the term is synonymous with indemnity that is a payment, no more and no less than sufficient to make good the loss.

Market Value is defined as the estimated amount for which a property should exchange on the date of **valuation between a willing buyer and a willing seller in an arm's**-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently, and without compulsion.

In each definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. The price which the property would fetch if offered for sale in the open market, would undoubtedly be affected, should the sale be on terms, whether favorable or unfavorable.

It is further assumed that the titles to the properties are good, marketable and free from liens and encumbrances; and that fee simple ownership is transferable.

The rights appraised in this report are the property rights in fee simple, free and clear. *Fee Simple* refers to the "bundle of rights" or attributes which are inherent or appurtenant to ownership, without any limitation or restriction other than those imposed by law or contract. The bundle of rights includes the right to use, to possess, to the fruits, to dispose, and to vindicate or recover.

Limitations to Bundle of Rights

Legal or Governmental Limitations:

- a) Zoning refers to land use classifications and the allowable utilization under each classification.
- b) Taxation the power of the government or any of its political subdivisions to impose charge or burden upon persons, property or property rights for the use and support of the government.
- c) Eminent Domain the power of the State or any of its instrumentalities to take private property for public use and payment of just compensation.
- d) Other provisions of law such as legal easement, the requirement of legitime in succession, prohibition against sale and encumbrance of property acquired by patent, rent control, laws on subdivision development, urban and agrarian reform, etc.

Contractual or Voluntary Limitations – Those imposed by the grantor of the property to the grantee, either by contract (e.g. donation), or by last will; or those imposed by the owner, himself such as voluntary easement, mortgage, lease, use restrictions in subdivision contracts, etc.

 $Appraisal \,Report-Preparatory \,Survey \,for \,Central \,\,Mindanao \,\,High \,\,Standard \,\,Highway \,\,Construction \,\,Project$

PROPERTY LOCATION AND IDENTIFICATION

The subject property consists of *land only* that shall be affected by right-of-way of the proposed *Central Mindanao High Standard Highway Construction Project of the Department of Public Works and Highways*, located within Cagayan de Oro City and Municipality of Tagoloan in the Province of Misamis Oriental; and Malaybalay City and Municipalities of Manolo Fortich, Impasug-ong and Sumilao in the Province of Bukidnon.

Project Description

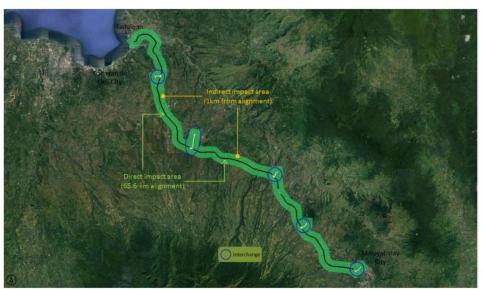

The proposed Central Mindanao High Standard Highway Project (Cagayan de Oro-Malaybalay Section) is part of the Phase II of the Master Plan on High Standard Highway Network Development. The objectives of the plan were to improve the transport efficiency in the region and contribute to enhancing the connectivity between the cities of Cagayan de Oro and Malaybalay as well as the economic development of the surrounding area. The proposed Project will be spearheaded by the Department of Public Works and Highways (DPWH) with the assistance of the Japan International Cooperation Agency (JICA).

The proposed road starts at a point along the Butuan-Cagayan de Oro-Iligan Road in Barangay Casinglot, Municipality of Tagoloan, Province of Misamis Oriental. It then goes southwestwards to Malaybalay City, passing through Cagayan de Oro City, Province of Misamis Oriental and in the Municipalities of Manolo Fortich, Impassing ong and Sumilao in the Province of Bukidnon. The total length is approximately 65.72 kilometers.

The beginning of the project along the Butuan-Cagayan de Oro-Iligan Road is located approximately 35 meters south from the road leading to Petron Tagoloan Terminal; 250 meters southeast from the Petron Tagoloan Terminal; 400 meters southwest from Del Monte Philippines Plant; 800 meters south from Nestlé Tagoloan Warehouse; 1.4 kilometers southeast from PHIVIDEC (Mindanao International Container Terminal); 1.7 kilometers northeast from Sayre Highway; and about 3 kilometers south from the Tagoloan Municipal Hall. The proposed road project terminates along the dirt road in Barangay Kalasungay in Malaybalay City, Bukidnon. It has an access road that connects to Sayre Highway that starts at Kilometer 64+660. The end of the access road along Sayre Highway is located approximately 160 meters northwest from the PMA Pentecostal Church; 1.9 kilometers northwest from the Bukidnon State University; and about 2.5 kilometers northwest from Gaisano Malaybalay.

General Location of the Proposed Central Mindanao High Standard Highway Construction Project

Initial Impact Area Map

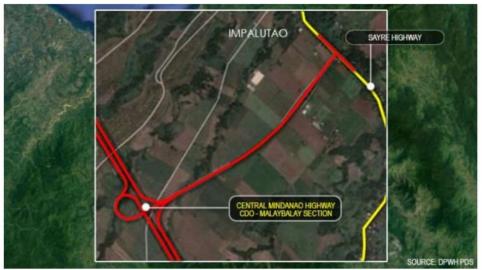

Proposed Site of 5 Interchanges

Balubal-Mambatangan Area Interchange

Diclum Area Interchange

Impalutao Area Interchange

Poblacion-Impasug-ong Area Interchange

Kalasungay Area Interchange

NEIGHBORHOOD DATA

The properties are located in an area where land development is of mixed residential and agricultural use.

The town propers of Tagoloan, Cagayan de Oro City, Manolo Fortich, Impasug-ong, Sumilao and Malaybalay City serve the immediate marketing and shopping needs of the residents in the project affected areas. These are accessible by public transport from the Butuan-Cagayan de Oro-Iligan Road and Sayre Highway. Other community centers like the post office, public markets, churches/chapels, hospitals/clinics and public and private schools are also accessible from the said thoroughfares.

COMMUNITY FACILITIES AND UTILITIES

Electric power, water supply and telecommunication facilities are available at the inhabited portions of the sites.

Public transportation connecting to various sections of the Provinces of Misamis Oriental and Bukidnon is available along the Butuan-Cagayan de Oro-Iligan Road and Sayre Highway where the proposed project either intersects or connects with. Street lights, garbage collection, foot and mobile patrols of the Philippine National Police Force, and other community facilities and utilities are maintained by the local governments.

LAND DATA

The affected agricultural land consists of about four hundred five (405) lots, with a total affected land area of 3,634,350 square meters, more or less, described as follows:

| Province | City/Municipality | Barangay | Road Frontage | Classification/ Land Use | No. of Affected Lots | Affected Area (sq.m. |

HIGHEST AND BEST USE

Based upon an analysis of the prevailing land usage in the neighborhood and of the property itself, we are of the opinion that the land utilization as specified in the valuation portion of this report would represent the highest and best use of the property.

Highest and Best Use is defined as the most probable use of a property which is physically possible, appropriately justified, legally permissible, financially feasible, and which results in the highest and best use of the property being valued. (International Valuation Standards 8th Edition, 2007, Concepts Fundamental to GAVP, Paragraph 6.3)

VALUATION

As provided in Section 5 of Republic Act No. 10752, an act facilitating the acquisition of right-of-way site or location for National Government Infrastructure Project, the implementing agency may offer to acquire, through negotiated sale, the right-of-way site or location for national government infrastructure project, under the following rules:

The implementing agency shall offer to the property owner concerned, as compensation price, the sum of:

- 1. The current market value of the land:
- 2. The replacement cost of structures and improvements therein; and
- 3. The current market value of crops and trees therein.

Just Compensation of Affected Lots

At the outset, the subject property is identified as the area affected by the right-of-way of the proposed road project and, as such; it is an easement (right-of-way) valuation which conforms to a highway taking.

In highway takings, the whole or part of the owner's property can be subject to a just compensation. The amount of just compensation is the market value of the owner's property partly taken and, if any, the damage to the remainder of this property, known as severance damage. The amount of just compensation is equivalent to the *market value* of the property before the taking, less the *market value* of the retained area after the taking. The market value of the land was estimated by using the *Market Approach*.

The market value of the land was estimated by using the *Market Approach*. The *Market Approach* provides an indication of value by comparing the asset with identical or comparable (that is similar) assets for which price information is available. (International Valuation Standards 2017, IVS 105, Valuation Approaches and Methods, Paragraph 20.1)

Under this approach, the first step is to consider the prices for transactions of identical or similar assets that have occurred recently in the market. If few recent transactions have occurred, it may be also appropriate to consider the prices of identical or similar assets that are listed or offered for sale provided the relevance of this information is clearly established and critically analysed.

Severance Damage is defined as the decrease in market value of the remaining property of an owner caused by the taking of the part of his property. In the absence of a parcellary survey or lots plans, it is assumed that there is no severance damage to the remainder of the land if partly affected.

In the appraisal analysis, it is necessary to consider the market reactions between sellers and buyers, since sellers intend to sell their properties at the highest price, while typical prudent buyers would negotiate for the lowest price.

Considering the foregoing and such factors as the property location, desirability, neighborhood, utility, size and the time element involved, the just compensation (based on market value) of the lots to be affected by the right-of-way of the proposed road construction project is presented as follows:

| Province | City/Municipality | Barangay | Road Frontage | Classification/ Land Use | No. of Affected Lots | Affected Area (sq.m.) | Just Compensation (Market Value) PhP |
|---------------------|------------------------|-----------|------------------|-----------------------------|-------------------------|--------------------------|-----------------------------------------------|
