

# Introduction of External Evaluators

## All project evaluations are undertaken by external evaluators.

From the standpoint of fulfilling JBIC's responsibility for accountability, JBIC commissions external evaluators to conduct the evaluations and ratings for all individual projects, which they do by conferring with the developing countries' governments and the executing agencies, collecting data from the beneficiaries, and conducting assessments of the projects based on objective standards. The following persons are the external evaluators who conducted the FY2004 individual project evaluations.
