| 16. Message to Prospective International Students | |
| Message from University | Our department is one of the best and most diverse programs in this research field worldwide. Based on cutting-edge technologies, we tackle actual environmental problems with a strong emphasis on field work as well as theoretical studies to find practical solutions. Oftentimes our approach to these problems breaks the border between disciplines. That is, interdisciplinary approach is a key feature of this program. We are proud of |
