5	Maya Brennan-Jacot	WSP	Maya.BrennanJacot@wsp.com

ITEMS DISCUSSED	ACTION BY
1 CONTEXT OF THE MEETING	
As the intermediate official contact for the Soysambu Private Reserve (there is currently a change of CEO in the process), WSP sent a request for access to Soysambu during their preliminary reconnaissance survey in November 2020. Unfortunately, because of the change in administration and the fact that Mr. Hunter was not aware of the project, access was not granted. A courtesy visit was thus planned during the preliminary reconnaissance visit of WSP members. Mr. Pothier attended this visit.	
2 PROJECT INTRODUCTION	
Mr. Pothier gave an overview of the project and of WSP's foreseen activities in the up-coming month to Mr. Hunter, who was satisfied with the information received.	

ITEMS DISCUSSED	ACTION BY
3 INFORMATION OBTAINED FROM MR. HUNTER	
<p>During the discussion following Mr. Pothier’s presentation, Mr. Hunter shared the following information:</p> <ul style="list-style-type: none"> – The existing road has been in place for over 30 years and the reserve has adapted to its presence. There is approx. 900 ha of reserve land to the north of the road. No significant fauna is present in this area and no specific conservation effort was made for this portion. Conservation activities are concentrated to the south. – There is a circulation corridor below the road between the two sections. – The Nakuru National Park (NNP) is present along part of the southern border. A fence separates the two conservation areas which are both self contained. There are currently discussions about creating fauna passage across the fence. However, Soysambu is afraid that the oversize population of buffalo present in the NNP, migrate into large numbers in Soysambu perturbing the existing ecological balance. On the other side, the NNP is afraid of the zebra population of Sosambu which seems to be also somewhat oversized. – The Soysambu reserve is currently owned by one of the royal families of England (the Delamere) and some fear exists of the future of the reserve once the current title holder (who’s in his eighty’s) passes away. – Most of Lake Elementaita surroundings is protected by Soyasambu (western side) and by other private tourist lodges (northern half of the eastern side). However, significant concerns have been raised about the southern half of the eastern side). 	
4 REQUESTS AND AGREEMENT	
<p>The following request was made by Mr. Hunter:</p> <ul style="list-style-type: none"> – Obtain clarification as to why there is interest in visiting the border between the NNP and Soysambu, which is many kilometers away from the road and is currently fenced (no communication between the two)? 	WSP/FFMES
<ul style="list-style-type: none"> – To be kept informed about our access requirements for January/February and March/April so that required assistance can be ensured to facilitate access. Mr. Hunter also mentioned that by the time the first official biological survey is out, the new administration will be in place and that it should be easier to delegate someone to give access. – To let them know in advance for the installation of any survey equipment (camera trap, sound meters, air quality sampling kits) and approximate location selected. This is so they are aware and should also help in their protection against removal or damage. 	WSP

ITEMS DISCUSSED	ACTION BY
– To justify any requirement for site access which is not in the immediate perimeter of the road. They simply want to understand, it does not mean they will not accept.	WSP/FFMES
– He will be sending most recent fauna surveys available by email.	Mr. Hunter
<p>Mr. Hunter is favourable about our team to investigate within Soysambu in January/February and March/ April but is not able to coordinate access at this time for the current visit.</p> <p>He also does not foresee any significant problems in relation to the current road enlargement as long as there are no alignment changes. He hopes that the current design will ensure the preservation of their underground passage (link between north and south part) and that it could be widened.</p>	

These minutes are considered to be an accurate recording of all items discussed. Written notices of discrepancies, errors or omissions must be given within seven (7) days, otherwise the minutes will be accepted as written.

NEXT MEETING

An invitation will be issued if an additional meeting is required.

MINUTES OF MEETING

3 Loise Kioko (LK) Associate ESIA Expert	Norken	+254 (0) 719335653	lkioko@norken.co.ke

ITEMS DISCUSSED	ACTION BY
1 INTRODUCTION	
<p>The meeting kicked off with an introduction of all members present.</p> <p>ED presented an overview of the proposed project. He noted that the Government of Kenya through KeNHA intends to enhance capacities of the Nairobi-Nakuru-Mau Summit road which is a section of the A8 highway and Rironi- Mai Mahiu-Naivasha road A8 South through a PPP framework.</p> <p>Project works will follow current alignment, within the current Right of Way corridor. It involves widening of A8 highway and improvement of A8 South.</p> <p>The project was awarded to Rift Valley Highway Limited (RVH) which is owned by VINCI Highways S.A.S., VINCI Concessions S.A.S., Meridiam Infrastructure Africa Fund and Meridiam Infrastructure Africa Parallel Fund to Design, Build, Finance, Operate, Maintain and Transfer (DBFOMT).</p> <p>WSP Canada Inc. (WSP), along with Flora, Fauna and Man Ecological Services (FFMES) and Norken International Ltd (Norken) will act as representatives of RVH during the preparation of the ESIA.</p> <p>Construction work will be done in sections including sections 1 through 6. Some sections will be handled concurrently.</p> <p>Construction work will take place over a period of 3.5 years.</p> <p>ED informed the meeting that KeNHA was issued with a NEMA license for an ESIA that was done according to National standards. The present exercise is meant to upgrade the ESIA to meet international standards.</p>	
2 FIRST ROUND OF PUBLIC CONSULTATIONS	
<p>ED requested the CC to assist in mobilization of stakeholders come January when stakeholder engagement exercise kicks off. The stakeholder engagement activities will be conducted in three phases as follows:</p> <ul style="list-style-type: none"> - 1st round – informative (January) - 2nd round – To obtain opinions and views of the stakeholders (May) - 3rd round – present the draft ESIA and seek acceptability/Approval including obtaining consent of the VMGs (August) <p>The CC pledged his support and added that he would be available for consultation where needed. The team was advised to write an Email to the CC requesting mobilization addressed to countycommkiambu@yahoo.com</p>	
3 PROJECT AFFECTED COMMUNITIES	
<p>CC explained that according to the project alignment, the sub counties that will be affected are Limuru and Lari.</p>	

ITEMS DISCUSSED	ACTION BY
4 COMPENSATION	
<p>The CC sought clarification on whether the process of compensation had been completed along the project Right of Way.</p> <p>ED explained that KeNHA was in charge of compensation. He added that the team had only observed temporary small business structures that will be easy to move once notice to vacate is issued.</p>	
5 USEFUL CONTACTS	
<p>The CC shared the following useful contacts:</p> <p>Wilson O. Wanyanga, MBS Kiambu Commissioner Kiambu Phone Number - 0722766344</p> <p>Lepar Morijo Nyandarua County County Commissioner Phone Number – 0722241481</p> <p>Erastus Mbui Nakuru County Commissioner Phone Number - 0721368939</p>	
6 CONCLUSION	
<p>The CC welcomed the project, citing that it has become increasingly tiresome to drive along the existing A8 due to heavy traffic. He highlighted that the proposed project would ease traffic and thus reduce time taken to travel from Nairobi to Nakuru.</p>	

NEXT MEETING

An invitation will be issued if an additional meeting is required.

9 Maya Brennan- Jacot	WSP		Maya.BrennanJacot@wsp.com

ITEMS DISCUSSED	ACTION BY
1 CONTEXT OF THE MEETING	
<p>The meeting was a courtesy visit to confirm initiation of the final study stage of the Nairobi-Nakuru-Mau Summit Highway project. The main objectives were to briefly present the project, establish contact with officials and discuss the next steps with special focus on the upcoming organisation of the socio-economic surveys and public consultations.</p>	
2 INFORMATION OBTAINED FROM MR. MBUI	
<p>During the discussion following the project's presentation, M. Mbui shared the following information:</p> <ul style="list-style-type: none"> - The county has various issues with the Ogiek in relation to forest management. - There will be many expectations to be managed with the upcoming highway enlargement (Passage points, informal markets, etc.). - He could not think of any sensitive areas. - Recommended to go through Naivasha administration to arrange a meeting with Massai representatives (+254 0724 432 085) (through the deputy commissioner in Navaisha for Maasai). - Separate animal passage from road. - Ensure paying a just price to owner for land needed. - The are issues with people using the ROW, favors quickly became claims (favors because people were allowed to use the ROW, claims because people requested compensation for being displaced outside of the ROW). It is important to have a careful approach when conducting social surveys, and that people are reassured of the compensation process. - M. Mbui highlighted the fact that they are locally available to work on the Project. - M. Mbui mentioned that the heavy traffic is currently impacting farmers and trucks using side road. 	
3 PUBLIC CONSULTATIONS	
<p>M. Mbui stressed that every resident of Nakuru is a stakeholder. The CC will be able to mobilize residents. People are anxiously anticipating the start of this project because commuting is difficult, and the road is jammed.</p> <p>M. Mbui is required to be advised at least two weeks in advance for public consultations to invite Chiefs.</p>	<p>A letter has to be sent to the CC two weeks prior to PC. The letter shall include the dates, the list of Stakeholders to meet, etc.</p>

NEXT MEETING

An invitation will be issued if an additional meeting is required.

7 Loise Kioko (LK)	Norken International Ltd Associate EIA Expert	+254 (0) 719335653	lkioko@norken.co.ke

ITEMS DISCUSSED	ACTION BY
1 INTRODUCTION	
<p>The meeting kicked off at 1100hrs. All members present introduced themselves by name and role in the project.</p>	
<p>The Government of Kenya through KeNHA intends to enhance capacities of the Nairobi-Nakuru-Mau Summit road which is a section of the A8 highway and Rironi-Mai Mahiu Naivasha road A8 South through a PPP framework.</p> <p>Project works will follow the current alignment, within the current Right of Way corridor. It involves widening of A8 highway and improvement of A8 South.</p> <p>The project was awarded to Rift Valley Highway Limited (RVH) which is owned by VINCI Highways, VINCI Concessions, Meridiam Infrastructure to Design, Build, Finance, Operate, Maintain and Transfer the project (DBFOMT). It is a PPP arrangement between RVH and KeNHA (the contracting authority).</p> <p>WSP Canada Inc. (WSP), along with Flora, Fauna and Man Ecological Services (FFMES) and Norken International Ltd (Norken) will undertake the ESIA. WSP is the lead consultant for the entire mandate.</p> <p>Construction works will be done in sections, including sections 1 through 6. Some sections will be handled concurrently.</p> <p>Construction work will last 3.5 years.</p> <p>KeNHA was issued with a NEMA license for an ESIA that was done according to National standards (the Preliminary ESIA, 2016). This mandate is meant to upgrade the ESIA to meet international standards (mainly the IFC Performance Standards), to design operational action plans. It is key to avoid a generic approach to the ESIA.</p>	
2 MOBILIZATION FOR THE FIRST ROUND OF PUBLIC CONSULTATIONS	
<p>ED requested the DCC to assist in mobilization of stakeholders come January when stakeholder engagement exercise kicks off. The stakeholder engagement activities will be conducted in three phases as follows:</p> <ul style="list-style-type: none"> - 1st round – informative (January) - 2nd round – To obtain opinions and views of the stakeholders (May) - 3rd round – present the draft ESIA and seek acceptability/approval including obtaining consent of the VMGs (August) <p>The DCC pledged his support and added that he would be available for consultation where needed. He also advised that the information disclosed to the public will determine the kind of feedback given.</p> <p>DCC explained that two weeks prior to engagements, a representative should visit the CC office with a letter of invitation in order to kick-start the mobilization process. This meeting will also enhance logistical arrangements for the public meetings such as hiring tents and chairs.</p> <p>Communication to County officials should be done through the County Commissioner’s office</p>	<p>A letter has to be sent to the CC two weeks prior to PC. The letter shall include the dates, the list of Stakeholders to meet, etc.</p>

ITEMS DISCUSSED	ACTION BY
3 PROJECT AFFECTED PERSONS	
DCC explained that according to the project alignment, the areas that will be affected are Soko Mjinga and Soko Mpya markets that fall within Nyandarua County.	
4 USEFUL CONTACTS	
The CC shared the following useful contacts: 1 Benson Laparmorijo (County Commissioner) – 0722241481 2 Gideon Oyagi (DCC Nyandarua Central) – 0726279579 3 Geoffrey Taragon (DCC Nyandarua West) – 0725500200 4 E.K. Chabari (DCC Kipipiri) – 0723431609 5 Joseph K. Ngeny (DCC Mirangine) – 0721606330 6 Kalume K. Nzovu (DCC Kinangop) – 0722679614 7 Walter Ngaira (DCC Nyandarua North) – 0722591142 8 Lilian Njagi (DCC Aberdares) – 0723417711 9 James M. Wanyoike (DCC Gathanji) – 0720794674	Coordinate with Kalume K. Nzovu (DCC Kinangop) – 0722679614 for Soko Mjinga and Soko Mpya markets
5 CLOSURE	
The meeting was adjourned at 11:30am	

NEXT MEETING

An invitation will be issued if an additional meeting is required.

MEETING NOTES

10 Maya Brennan-Jacot	WSP		Maya.BrennanJacot@wsp.com

ITEMS DISCUSSED	ACTION BY
1 CONTEXT OF THE MEETING	
<p>The meeting was a courtesy visit to confirm initiation of the final study stage of the Nairobi-Nakuru-Mau Summit Highway project. The main objectives were to briefly present the project and the ESIA and establish first contact with county officials.</p>	
2 COUNTY GOVERNMENT OPINION ON THE PROJECT	
<p>Several people from the Nakuru County Government were present during the meeting. Unfortunately, due to time limitation and delays, all names and coordinates could not be collected.</p> <p>Members of the county government who participated were already aware of the Project and had prepared a list of grievances regarding the Project. Each person presented how the Project could be improved. Most of the grievances were similar to those collected in the previous public consultations with the Nakuru government (in the framework of the preliminary ESIA).</p> <p>Overall, the county government has several grievances on the Project layout where the road crosses the city of Nakuru.</p> <p>With regards to technical aspects, participants highlighted that the Project shall be adapted from its current design when crossing Nakuru town:</p> <ul style="list-style-type: none"> - Participants wished that the road be without any tolls. - Participants wished that streetlights be designed to fit with the spirit of the town (have the shape of pink flamingos). <p>With regards to environmental and social aspects, participants highlighted that the Project will lead to several E&S impacts in the city of Nakuru:</p> <ul style="list-style-type: none"> - Participants highlighted that truck driver rest areas are leading to many social and environmental problems, rest areas should be better designed to avoid social impacts (i.e. more public toilets, etc.). - Participants highlighted that the road leads to surface water pollution. - Participants highlighted that there are many vulnerable people, including street vendors and children; safety of these people is a key concern. - Sufficient passage for pedestrians should be developed. <p>Allan Munyua provided many answers to the grievances collected.</p> <p>Unfortunately, the meeting was interrupted due to time limitation. The following are the key grievances that were collected. Eric Deneut kindly reminded participants that the meeting was a courtesy visit and that discussions on grievances and opinions on the Project can continue during the first round of public consultations.</p>	

ITEMS DISCUSSED	ACTION BY
3 PUBLIC CONSULTATIONS	
Nakuru County Government will be met during the rounds of public consultations.	

NEXT MEETING

An invitation will be issued if an additional meeting is required.

MEETING NOTES

CLIENT: Rift Valley Highway Limited (RVHL)

PROJECT: Rironi-Nakuru-Mau Summit Highway Project **WSP Ref.:** 201-10312-00

SUBJECT: Courtesy Meeting with Oreste Villa,
Marula Estates **DATE:** November 20, 2020

VENUE: Marula Estate **TIME:** 9 h 00

ATTENDEES – 6 PARTICIPANTS

Name	Corporation	Telephone	Email
1 Oreste Villa General Manager	Marula Estate Ltd	+254-722509748 +254-721787727	marula@marulaestates.co.ke
2 Ghyslain Pothier	WSP	+1 438 341 7923	Ghyslain.pothier@wsp.com
3 Éric Deneut	WSP		Eric.Deneut@wsp.com
4 Loise Kioko (LK)	Norken International Ltd Associate EIA Expert	+254 (0) 719335653	lkioko@norken.co.ke

DISTRIBUTION (As above plus)

Name	Corporation	Telephone	Email
5 Philippe Alary- Paquette	WSP		Philippe.Alary.Paquette@wsp.com
6 Maya Brennan- Jacot	WSP		Maya.BrennanJacot@wsp.com

ITEMS DISCUSSED	ACTION BY
1 CONTEXT OF THE MEETING	
<p>This meeting was a courtesy meeting to present the stage of development of the Project and the ESIA process.</p> <p>M. Oreste Villa had already met with FFMES, the team in charge of biodiversity. Eric Deneut, presented the various activities that will be undertaken as part the ESIA (including the public consultation process).</p>	
2 GRIEVANCES	
<p>Oreste Villa highlighted that the estate is separated in two by the road and that machinery crosses the road (on the road) early in the morning when traffic is low since it cannot pass through the underpasses (too large and too high) except for one. With the widening of the road and the barriers, it will become impossible for machinery to cross and it will be time consuming to reach the only underpass large enough for machinery.</p> <p>M. Oreste Villa requests that large underpasses be installed at a reasonable distance from each other, otherwise the entire business will be affected.</p>	
3 INFORMATION ON THE ESTATE	
<p>Within the estate, there are:</p> <ul style="list-style-type: none"> - 14,000 wildlife animals (they count them) - 3,000 workers, some of which commute by bus from Navaisha, others from Gilgil - 400 families living in the estate - A lot of women are working in the estate <p>The estate is 10,000 ha with 3,000 ha cultivated (pivots, vegetables, flowers for export, cattle for milk, and meat for local markets).</p>	

NEXT MEETING

An invitation will be issued if an additional meeting is required.

MINUTES OF MEETING

CLIENT:	Rift Valley Consortium	WSP Ref.:	201-10312-00
PROJECT:	Rironi-Nakuru-Mau Summit Highway	DATE:	November 20, 2020
SUBJECT:	Courtesy visit with Ogiek Peoples Development Program (OPDP)	TIME:	PM
VENUE:	OPDP office in Nakuru		

ATTENDEES			
Name	Corporation	Telephone	Email
1 Ghyslain Pothier Project manager	WSP	Tél. +1 438-843-8064 Cell. +1 438-341-7923	Ghyslain.Pothier@wsp.com
2 Eric Deneut (ED) Social Project Lead	WSP	WhatsApp: +33-664-52-95-09	eric.deneut@wsp.com
3 Loise Kioko (LK) Associate ESIA Expert	Norken	+254 (0) 719335653	lkioko@norken.co.ke
4 Daniel M. Kobei Executive Director	OPDP	+254-51-221-38-03 +254-722-433-757	Daniel.kobei1 (Skype) dkobei@ogiekpeoples.org dkobei@yahoo.com

ITEMS DISCUSSED	ACTION BY
1 PRESENTATION OF THE PROJECT	
Ghyslain Pothier (GP) briefly presented the Project and the upcoming public consultations that will be held with indigenous communities, including the Ogiek	
Daniel Kobei (DK) was aware of the Project, OPDP was involved in the previous consultation with Ogiek communities in the framework of the Vulnerable and Marginalized Groups Framework (KeNHA, 2019) DK welcomed the initiative to involve Ogiek in the consultation process. According to DK, there are other groups to involve to represent the Ogiek, such as the Ogiek council of elders (they have a Chapter in Nakuru County). The Ogiek council of elders is the entry point for consultation with Ogiek. There are also faith-based groups and other associations.	

ITEMS DISCUSSED	ACTION BY
2 BACKGROUND	
<p>Ogiek are indigenous people according to international lenders definition and are recognized as such by the World Bank, the UN, etc.</p> <p>They have won a case at an African court of justice.</p> <p>Ogiek are custodians of forests.</p> <p>Historically, Ogiek have been pushed away from the road and although not directly linked to the area around the road, they may not be impacted by the road project. However, DK welcomed the initiative to meet with Ogiek during this upcoming first round of public consultations.</p>	
3 CONSULTATION DURING THE FIRST ROUND	
<p>Eric Deneut (ED) asked if special ceremonies have to be held prior to engaging with Ogiek. DK mentioned that there is no special ceremony to arrange. However, when meeting with elders, they will tell us what approach is appropriate for the public consultation.</p>	
<p>Holding public consultations in January will require sending a letter explaining the process in simple language, because elders may not understand why they are consulted for a road project away from their traditional territory. A report was provided to ED delineating the traditional territory used by Ogiek. The closest from the road where Ogiek are present is the Molo and Njoro areas.</p>	<p>A letter will be produced prior to the first round.</p>
<p>DK stressed the fact that FPIC is a good process and needs to be followed for the consultation process. OPDP are well experienced with the FPIC process. Ogiek are custodians of their land and need to give their consent when a project affects them.</p>	
<p>DK stressed the fact that Ogiek have bio-cultural protocols describing how to collect their traditional knowledge and describe ecosystem services.</p>	
4 CONCLUSION	
<p>NA</p>	

NEXT MEETING

An invitation will be issued if an additional meeting is required.

SUBJECT RAISED

1	INTRODUCTION
<p>Introduction of presenters Maya Brennan Jacot, Biodiversity Specialist, WSP; Dr Rodney van der Ree, Road Ecology Expert, WSP; Professor Alex Lechner, Landscape Ecologist, University of Nottingham Malaysia / University of Lincoln; Modelling Team – Darrel Tiang and Michelle Ann, University of Nottingham Malaysia</p>	
2	PRESENTATION OF PROJECT BACKGROUND AND WILDIFE MOVEMENT STUDY OBJECTIVES BY WSP
<ul style="list-style-type: none"> • Project Background • ESIA Process and Timeline • Biodiversity Issues and Baseline Studies • Wildlife Movement Study Objectives 	
3	Q&A ON WILDLIFE MOVEMENT STUDY AND EXISTING INFORMATION
<ul style="list-style-type: none"> • Perhaps you could elaborate on how you identified the priority species? 	

- Priority species (giraffe, buffalo and zebra) were identified because of their conservation status (giraffe) and their susceptibility to roadkill (buffalo and zebra). These are also umbrella species which have large territories.
- Please highlight the areas along the proposed project that you've identified for wildlife crossing.
 - Areas are Kikuyu Escarpment Forest Reserve, Kenya Wildlife Service Training Institute, Soysambu Conservancy, Marula Conservancy and Mount Londiani Forest Reserve (near Molo). – Map was shared at the end of the session.
- Could you elaborate on what the subscription to IFC performance standard 6 means?
 - Essentially, it means we need to assess natural and critical habitat and identify adequate mitigation/offset measures for these. With IFC PS6, no net loss of natural habitats and net gain of critical habitat must be achieved. Any Endangered or Critically Endangered species is considered a “biodiversity value” which’s habitat qualifies as critical habitat, such as the two giraffe species in the study area. Seeing as the main impact on these biodiversity values is the barrier effect of the road which reduces connectivity (no direct habitat loss), measures to mitigate and offset this effect need to be adequately identified – mainly through wildlife crossing. To achieve net gain, the ultimate goal would be to improve connectivity, i.e. that connectivity is better after project implementation, by putting in place adequate wildlife crossings.
- Are we considering domestic animals since we have quite a lot of traffic along the said Highway?
 - Domesticated animals require different mitigation structure so might not be lumped together.
- Have primate species been considered? I saw a dead sykes’ monkey on the road next to Soysambu yesterday. Also seen ground hornbills trying to cross by Marula and have seen dead zebra near the toll station. Colobus are primates that are present, which are very rare. Colobus, Sykes and vervet are primates that are all living on Soysambu.
 - Primates are not specifically taken into account for the wildlife movement study, but they are covered by the biodiversity surveys. We note the comment and will see how to identify adequate mitigation for these species.
- Colobus have recently been reintroduced to Soysambu Conservancy in the acacia forest just to the west of the road. How do we factor in species that aren't currently present but may be reintroduced into the landscape as part of restoration efforts?
 - No easy answer. If you have info on species that are already reintroduced into the area or are very likely to be reintroduced in the near future, then we can consider them. But if that hasn't happened yet, there is too much uncertainty to be able to consider it efficiently.
 - If anyone can provide info on reintroduction projects in the area and wildlife studies/modelling that justify the reintroduction of that species. Please share, it would be interesting to know.
- Support to the previous commenter's report with regards to primate species. At the waybridge / toll station between Gilgil and the North Lake Road there are often roadkill with baboon, vervet and possibly Sykes. There is also a common habitat here for motorists to feed primates, thereby bringing them into the road.
- Species of conservation concern- Endemic wood mouse in Mau Summit and endemic species of rat in Naivasha. Habitats will be disconnected by the road. The rat (or wood mouse, unclear) cannot dig deeper than 1 m hence any underpass that has a concreted base will hinder movement.
 - Small mammals are covered by the biodiversity surveys. We note the comment and will see how to identify adequate mitigation for these species.

- Could you consider looking into wildlife movement between the Kenya Wildlife Service Training Institute (KWSTI) Campus game sanctuary and the KWSTI Annexe sanctuary next to lake Naivasha along the lower road. Also consider linking the KWSTI Campus game sanctuary to the KWSTI game farm sanctuary across the highway.
 - Yes, noted.
- Very exciting work and refreshing to see this in our landscape. I was wondering if Henry sent you the current research on hyena movements in and out of Soysambu and LNNP? Hope we can catch up soon. Kathryn Combes - Soysambu Conservancy.
 - Not aware of that research. Will contact you to learn more.

4 PRESENTATION OF THE ECOLOGICAL CONNECTIVITY MODELLING

- Introduction to the ecological connectivity modelling
- Species distribution and connectivity modelling methods
- Objectives – two levels of modelling
- Preliminary outputs
- Next steps
- Introduction to Maptionnaire online survey

5 Q&A ON THE WILDLIFE MOVEMENT MODELLING

- What data sets have been used to determine the resistance surface - in terms of human settlement, fences, powerlines etc. ? You may be aware of the recent electrocution event on Soysambu of Rothschild giraffe. Are powerlines going to be included in calculating the resistance surface?
 - Human settlements are covered by habitat mapping. So far, no resistance incurred for fences and powerlines. We are interested in this data. The maptionnaire tool has an entry for fences.
 - We need that as an explanatory variable. We will collect all these suggestions and look at how to potentially model this at a landscape scale or at the smaller site-level scale. Part of it is to understand if this is a key driver or not; one of the challenges. Don't know for sure if power electrocutions are key drivers.
 - We will contact you for further info.
 - Relevant info on the finer scale is being gathered by FFMES baseline study. Habitat mapping capturing road verge vegetation should be completed.
- Private properties will definitely be able to provide fencing data.
- Explanatory variables - what about adding habitat type and/vs road verge vegetation - this may vary depending on presence/absence of a fence. Road verges usually have fences present, vegetation there are very different from the other side (if there is a fence). Wildlife may graze on these verges, as do livestock. Potential solution is to hire someone to drive along these verges and record occurrences and species.
 - Are there existing datasets for these variables? We are currently using NDVI and forest data as proxy, but no specific vegetation layer

- Would be good to find out the width of these road verges.
- Need to ask someone working in the area. Most of it is government land, what is the mandatory width in Kenya? Not sure.
 - 10 m sentinel might be able to capture the verge widths but depends on spectral values. Can try to capture using satellite data and speak to people on the ground regarding widths of road verge areas.
 - Biodiversity surveys will produce detailed vegetation map, 10 km along the road buffer. Can check with client on width of road verges.
 - For modelling, need landscape scale data. Fine scaled field data is good for ground truthing.
- Is it worth factoring in invasive species into the modelling? We have *opuntia stricta* (prickly pear cactus) in the landscape that is being mitigated with biocontrol but may possibly affect suitability in some areas.
 - Two elements: 1. If we should include this as an explanatory variable? 2. Is there data available? It could be included in step 2, i.e. site scale analyses instead of broader scale analysis. If any relevant info, respond in Maptionnaire.
 - Invasive species is an important issue especially when meeting performance standard 6. Invasive species are being covered in biodiversity surveys. Specific mitigation will need to be identified to avoid their dispersal.
- Primates deserve attention starting from the Olive baboon, Bushbaby, syke's monkey, colobus to senegal galago (Bernard NMK)
 - Primates are not specifically taken into account for the wildlife movement study, but they are covered by the biodiversity surveys. We note the comment.
- There is a section of the road (From Mai Mahiu to Naivasha). This part of the road involves many road kills, because this area has high wildlife crossings especially the giraffe. Civet and hyena are species that have been hit. Representative from KWS (not identified) in charge of Hell's gate area- he should have more input regarding this issue
 - Noted. Will try and find out more.
- The maptionnaire survey idea is great! Thanks
- Looks like the corridor from Elementaita/Soysambu to Marula along the west of the highway has not been captured
- We are doing connectivity modelling for lion and Grevy's zebra in northern Kenya. Will share more.
 - Noted, we will contact you for further info.
- How are you calculating specific species' responses to resistance in the landscape? eg giraffe are super cautious
- It'll be THE model for the continent!
- How can we ensure that eg. giraffe will use overpasses? When we don't have precedent for it.
 - Best practice used in design
 - Monitoring program – It will be recommended to use the camera traps to monitor the use of the wildlife crossings once project is implemented.

6 CONCLUDING REMARKS

- Thanks to all the participants for their questions and input.
- Inviting everyone to complete the Maptionnaire Online Survey.
- The goal is to achieve best possible outcomes for this project and fully identify the potential impacts in a rigorous, objective way.
- Set a standard for future infrastructure projects.
- Wildlife movement study a 1st for Africa, uncommon globally
 - It'll be THE model for the continent!

WLC 1	Underpass	22+825	1 x 5 (W) x 3.5 (H)	Kijabe	Maintain Existing Underpass
WLC 2	Underpass	25+325	1 x 5 (W) x 3.5 (H)	Kijabe	Demolition & reconstruction

Section 1. Wildlife Crossing

WLC 1 & 2

[Location]

Sarah Chiles - I don't think this is an optimal location as it is so close to settlement. There is a section of forest between the two underpasses proposed to connect Kijabe and Kereita Forests that would be better in my view for a crossing(s). Bryan Adkins can advise best here however. Note that there are elephants that come down from the Aberdares into the Kereita Forest, though I am not sure if they have ventured into Kijabe for many years due to various issues. Still, it is worth considering their potential future movement there if the right management was in place and once a crossing structure is in place. In that sense, it would be worth looking at the dimensions of the Mt Kenya elephant underpass here.

[Design]

Sarah Chiles - I am not convinced that the size of these underpasses would be adequate for buffalo, which would be a primary target species in this case. Primates also need to be considered here given this is a forest ecosystem.

[Management]

Sarah Chiles - Proximity to settlement

[Species]

Sarah Chiles - Buffalo, hyena, leopard, small predators, small mammals, primates

WLC 3

[Location]

Sarah Chiles - Yes, likely the right location.

Anonymous - Well located & Very critical crossing point to create connectivity within Naivasha wildlife sanctuary between the Wildlife Research & training institute HQs and the game farm

Juma - The location is fine, but please note that wildlife movement flows from the top side of the road to KWSTI and then to the Lake Naivasha, so there is need to make provision on the lower road (Maai Mahiu - Naivasha) at KWS Hippo campsite just before kihoto settlement. This is a critical provision to aid wildlife access to the lake for watering.

Silas Wanjala - Correct Location that would connect KWSTI Game farm sanctuary to KWSTI Main Campus Sanctuary. I would recommend an overpass for your consideration to accommodate the need for giraffe crossing as underpasses may not offer the best option for giraffes.

WLC 3

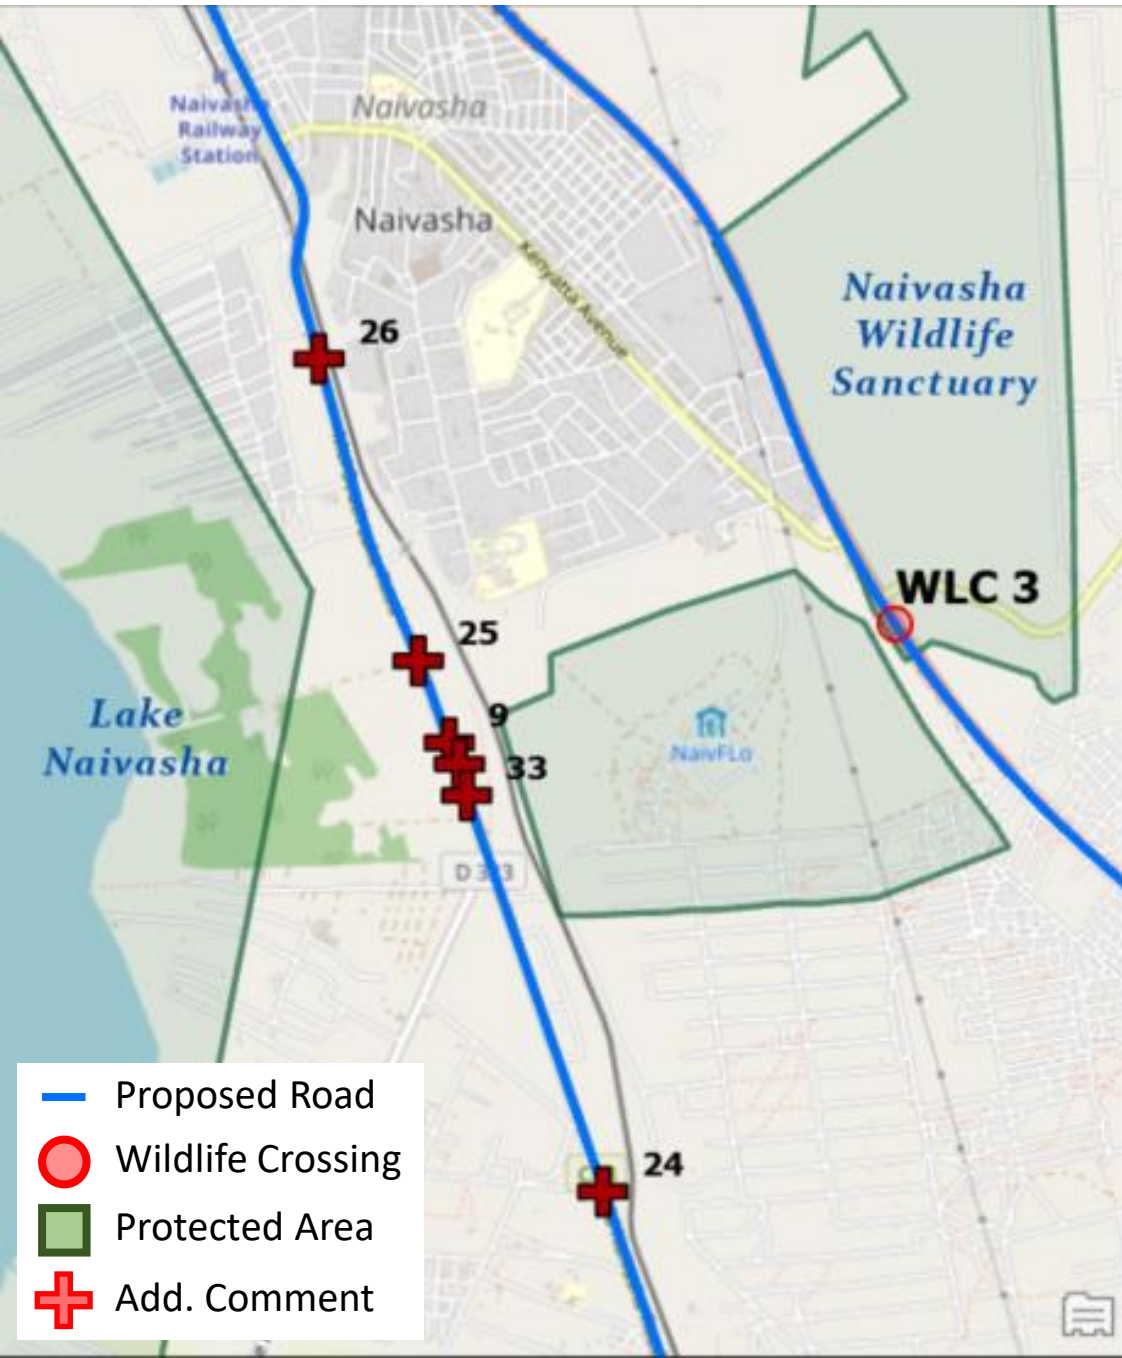

[Design]

Sarah Chiles - There are giraffe here so an underpass is not really suitable. In February 2020, a masai giraffe was electrocuted on a powerline parallel to the road just near the Kenya Wildlife Service training institute.

Anonymous - It can either be an overpass or an under pass depending on the available engineering design solutions. The proposed two underpasses will serve the purpose. Ensure the heights allow giraffe crossing

Juma - The design should consider the plight of Giraffes, therefore I recommend use of overpasses especially for this area there is high population of Giraffes. The use of underpasses will be a disadvantage to the Giraffes height and thus they may not use this infrastructure.

Silas Wanjala - I would recommend you consider an overpass that is atleast 30m wide in the place of the proposed underpass and make it blend with nature.

[Management]

Sarah Chiles - There are powerlines here that pose a risk to the endangered masai giraffe. Their design should be reconsidered as part of the WLC operation.

Anonymous - The longterm plan for the naivasha sanctuary is to create walking trails and connection for wildlife and visitors on either side of the Nairobi-Mau summit road. Visitors should be able to drive through either side of the sanctuary.

Juma - Consider the natural history of the targeted fauna to avoid a scenario where the facility becomes death traps. Carnivores may likely take over the facilities as their preferred hunting spots thereby disadvantaging other fauna, I therefore propose that for all wildlife to be accommodated, let the facilities be as wide as possible so that in the vent of any encounter with carnivores at these locations other fauna can easily find escape routes. In addition the design should also consider providing wildlife security from the threat of poaching, as these areas can easily turnout as poaching hotspots

Silas Wanjala – *Wildlife crossing areas (if not well designed to consider the natural history of the targeted fauna) may result to be death traps as they may either be a preferred location for would be poachers or the predators thereby threatening the targeted fauna. I recommend that the designs ensure security of targeted wildlife to mitigate on the poaching threat and be wide enough to ensure there is ample space for the wildlife movement without harm (accidents) in the event of encounter with carnivores.*

If you go for an underpass, proper lighting is essential and be done in a way that may not scare wildlife from accessing and using the infrastructure. Proper drainage systems be designed in a way that ensures no flooding and clogging. For an overpass, management of vegetation on the infrastructure is essential. Designs should note the impact of lighting from motor vehicles on the highway that may affect wildlife movement at night. Routine monitoring and maintenance is key

- Proposed Road
- Wildlife Crossing
- Protected Area
- ✚ Add. Comment

WLC 3

[Species]

Sarah Chiles - Giraffe, Zebra, Primates, small mammals, reptiles, amphibians

Anonymous – Buffalo, Zebra, Hyena, warthogs, grants gazelle, impalas

Juma – Buffalo, Giraffe, Zebra, Hyena, Gazelles (Impalas, elands, waterbuck, dikdik) and warthogs

Silas Wanjala - Buffalo, Giraffe, Zebra, Hyena, Gazelles/ Antelopes (Impalas, Elands, and Waterbuck), Warthog, and other small mammals,

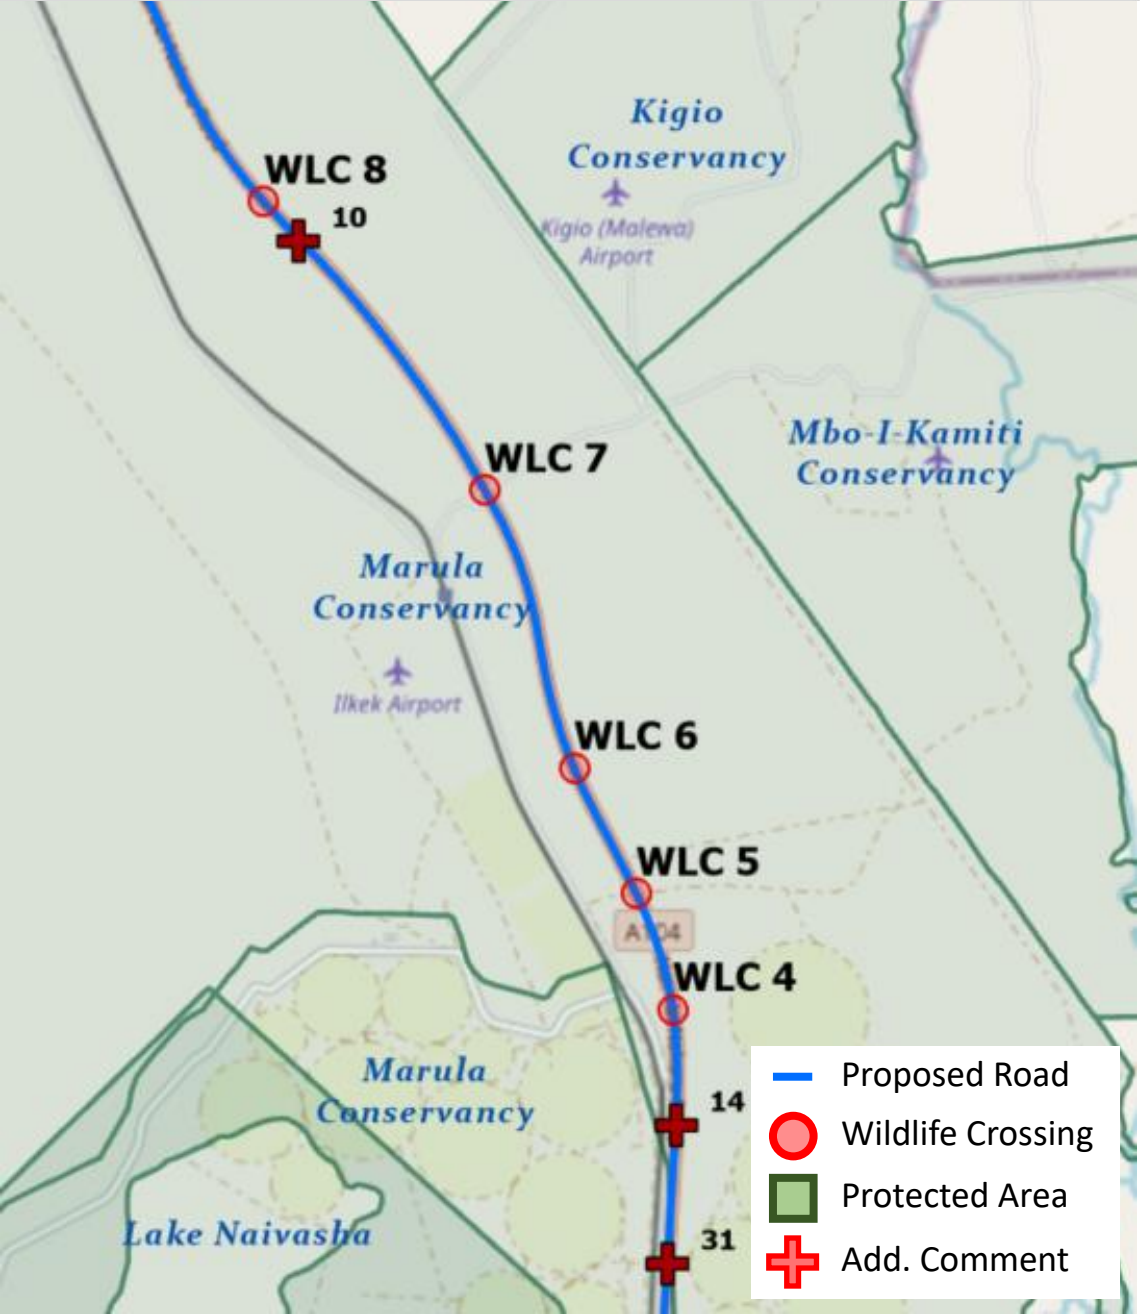

[General Feedback]

Anonymous - the challenge is the two interchange; One to naivasha town and the other to Kinamba that are relatively cross to one another. We recommend the corridor to be suitable for wildlife crossing as well as motorable during the day.

Juma - The location also has an interchange, so critical consideration to secure safe passage of wildlife is essential.

Silas Wanjala - "Proper routine monitoring programs should be put in place to assess the effectiveness of the infrastructure and help address challenges at the operation phase. Proper security measures be put in place to mitigate on poaching that may threatening the targeted fauna."

WLC 4	Underpass	69+235	1 x	Marula	Demolition and reconstruction Underpass for Wildlife and livestock
-------	-----------	--------	-----	--------	--

WLC 4

[Location]

Anonymous - OK. but I recommend consent to be obtained from marula farm managers.

[Design]

Sarah Chiles - I have general concerns about a 5 metre width under 4 lanes of traffic. I feel that it wouldn't have a sufficient openness index for ungulates, including buffalo and zebra.

Annon - OK.

[Management]

Sarah Chiles - There would need to be jump out structures for any ungulates that get stuck between the road and fence line.

Anonymous - Get information from the estate managers on either side of the road

[Species]

Sarah Chiles – Buffalo, Zebra, Hyena, Primates (olive baboon, vervet monkey), small predators (such as black-backed jackal, bat-eared fox, ardwolf, genet, possibly serval), small mammals, Thomson's gazelle, eland, impala

Anonymous – Zebra, Hyena, impalas, warthogs, grants & thompsons gazelle.

WLC 5	Overpass	70+220	1 x 30 (W)	Marula	New Overpass, 30 m width
WLC 6	Underpass	71+340	1 x 5 (W) x 3.5 (H)	Marula	New Underpass

WLC 5

[Location]

Sarah Chiles - This needs to be guided by the data but there are concerns about the farms adjacent, to the west of the road. If this is the only overpass for giraffe across Marula, is this the best site for it? Why put it here and not at WLC 6? (Of course not knowing what Marula have indicated.)

[Design]

Sarah Chiles - As discussed previously, if giraffe are going to use this, there needs to be noise pollution mitigation. Giraffe also like the fever tree forests (*acacia xanthophloea*) and so this species could be planted on the overpass - but would obviously require engineering attention in terms of load.

[Species]

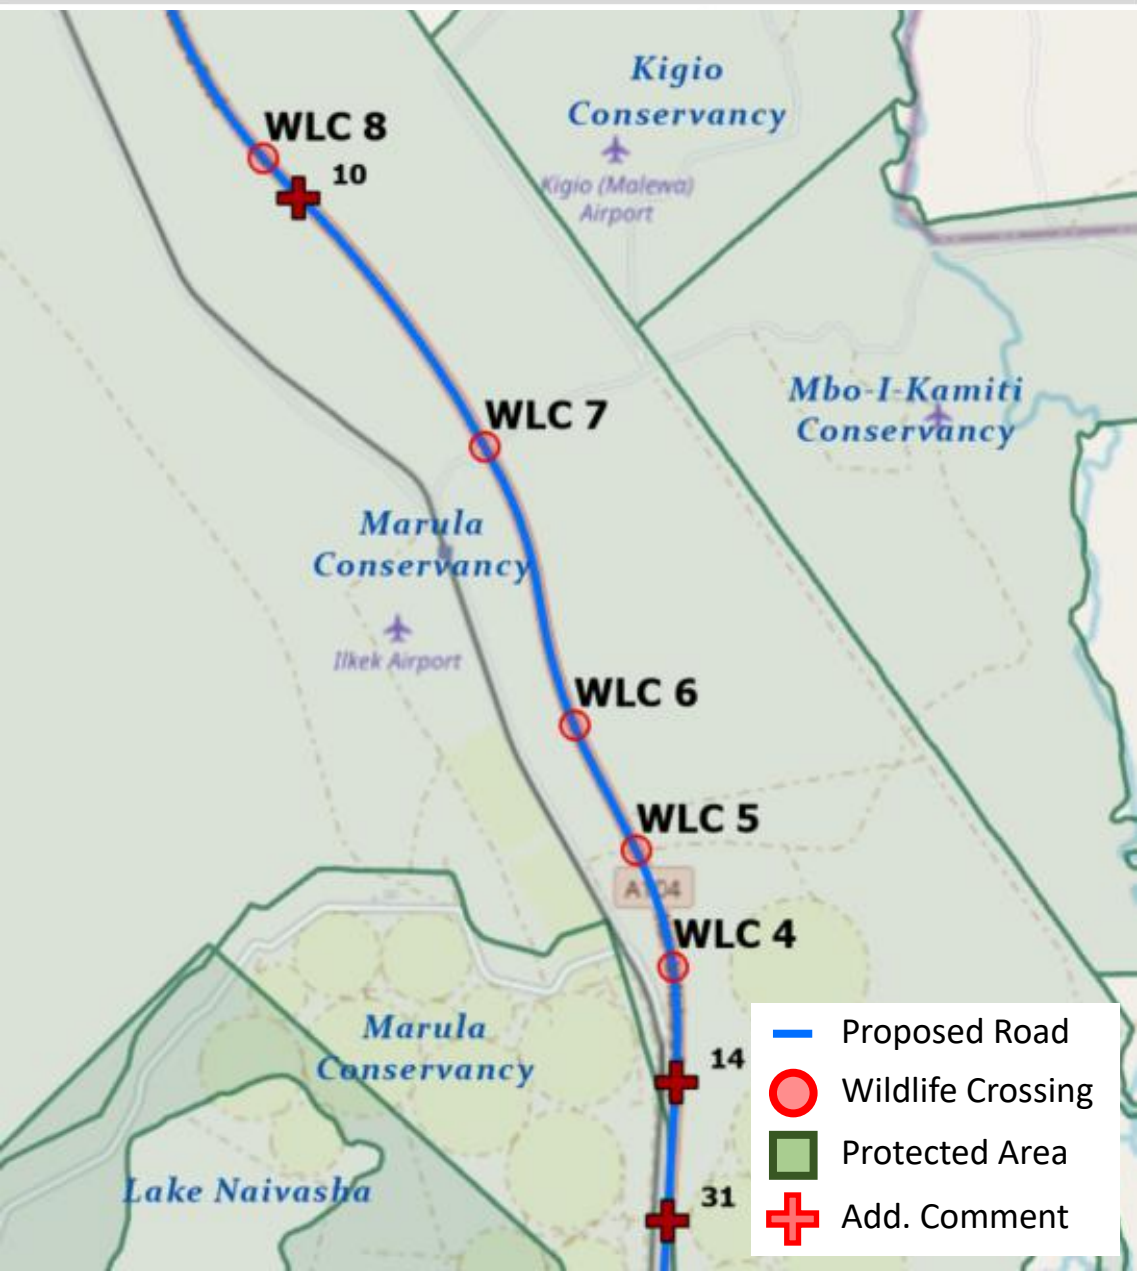

Sarah Chiles – Buffalo, Giraffe, Zebra, Hyena, and Others (unspecified)

WLC 6

[Design]

Sarah Chiles – Same comments apply here as for other underpasses and issues with regards to the openness index for large ungulates.

WLC 7	Underpass	73+705	3 x 5 (W) x 3.5 (H)	Kigio	Demolition & reconstruction Underpass
WLC 8	Underpass	76+640	1 x 7 (W) x 3.5 (H)	Gilgil River	New Underpass

WLC 7

[Location]

Sarah Chiles - I don't think this is the right location. It concerns me that this is would connect an existing dirt road. Wildlife would not likely use this.

[Design]

Sarah Chiles - Same concerns about width apply here.

WLC 8

[Location]

Sarah Chiles - Is this the right location? Gilgil River looks to me to be slightly south of here as per the riparian zone? Or does the Gilgil River descriptor just mean "close to Gilgil River?". If it is a different site, what will the additional retrofitting provisions be for the Gilgil River bridge?

[Design]

Sarah Chiles - 7 metre width is better for ungulates. However, given how prolific ungulates are in this stretch, an overpass should be strongly considered.

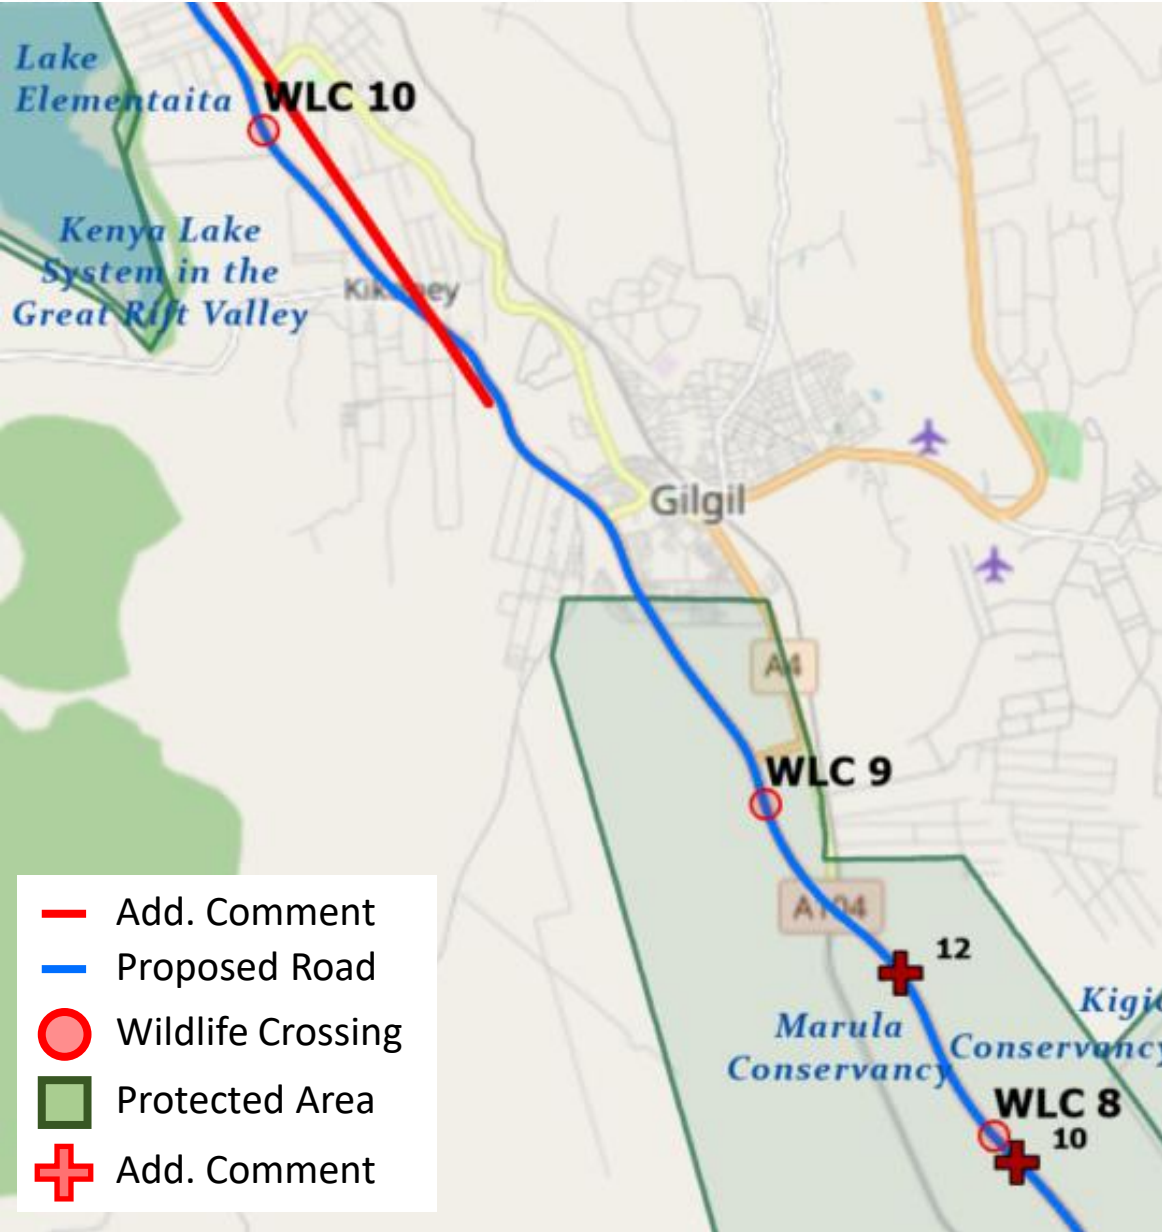

[Management]

Sarah Chiles - Climate change-induced flooding under the bridge over Gilgil River

[Species]

Sarah Chiles – Buffalo, Giraffe, Zebra, Hyena, and Others (All other species as listed on other WLC comments)

WLC 9	Underpass	81+620	1 x 7 (W) x 3.5 (H)	Marula- Near Gilgil Junction	New Underpass
WLC 10	Underpass	92+040	1 x 5 (W) x 3.50 (H)	Elmenteita- Kariandusi	Maintain Multi-use culvert for wildlife and livestock

- Add. Comment
- Proposed Road
- Wildlife Crossing
- Protected Area
- + Add. Comment

WLC 9

[Location]

Sarah Chiles - This needs to be guided by the data. However, I feel the gap between WLC 9 and WLC 8 is too long given there are a lot of ungulates along this stretch of road.

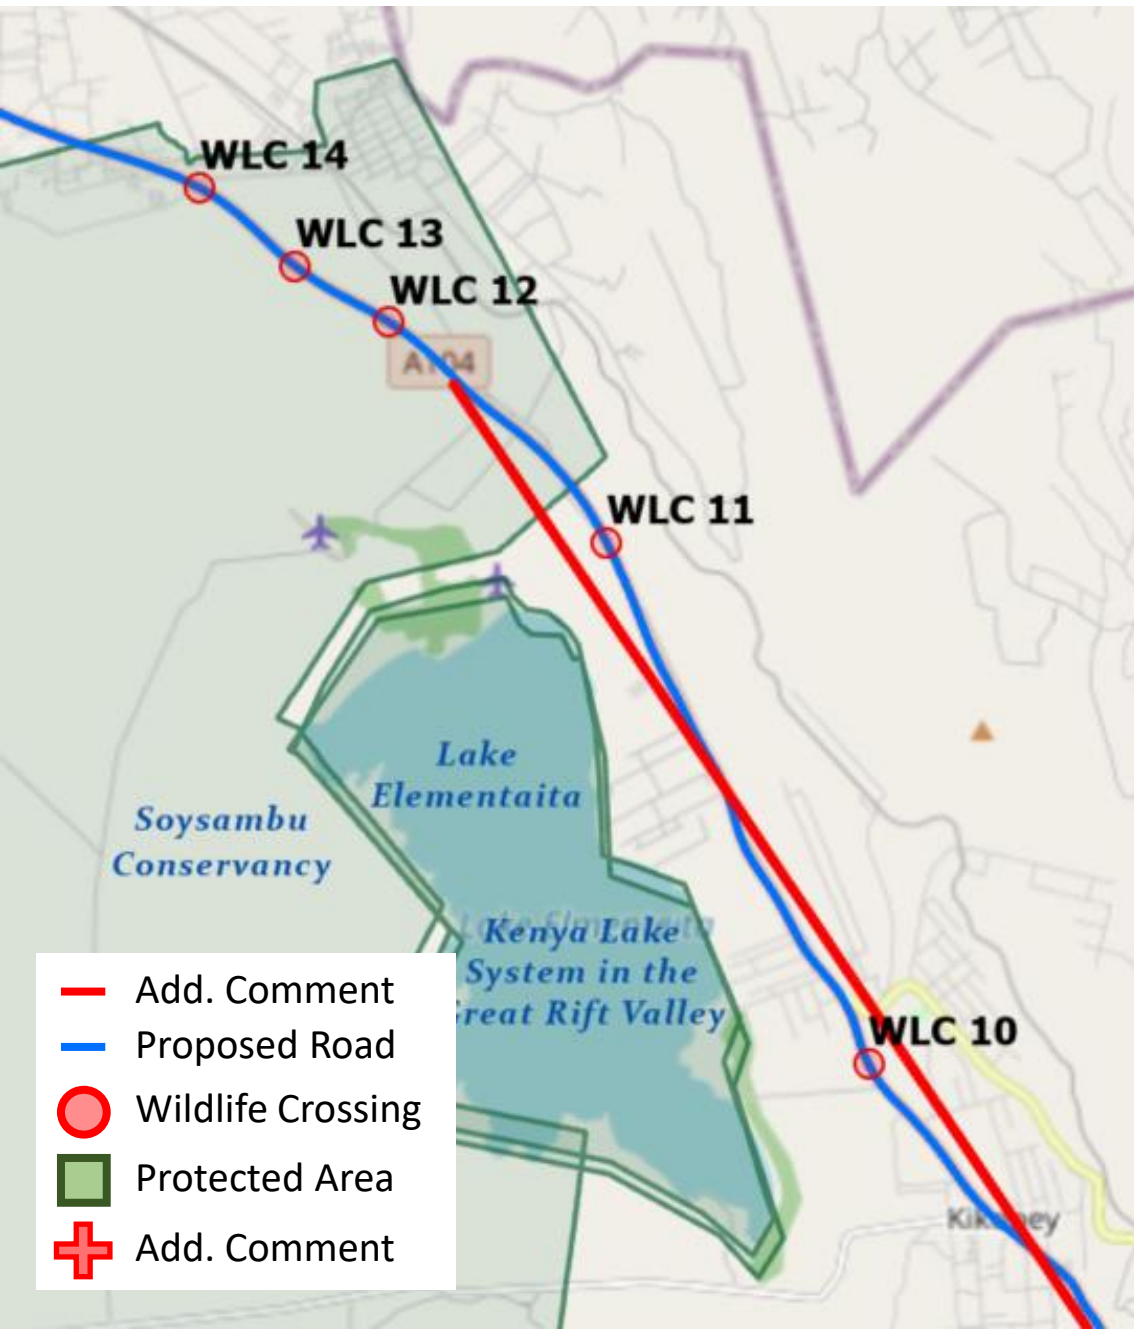

[Design]

Sarah Chiles - 7 metre width is better than 5 metre width.

WLC 10

[Location]

Sarah Chiles - What are the provisions for the bridge over the river just north of this? The riparian area would be an important corridor for primates, amphibians, small mammals and predators.

WLC 11

[Location]

Sarah Chiles - Yes, I think this location is suitable.

[Design]

Sarah Chiles - Given Soysambu has the endangered Rothschild giraffe (behaviourally different to the endangered Masai giraffe - I would say much more sensitive to disturbance), if we want them to cross here and use the habitat on the other side of the road, there will need to be robust provision of noise pollution mitigation etc.

Mairo Dunn - Consider Colobus monkeys who use this path

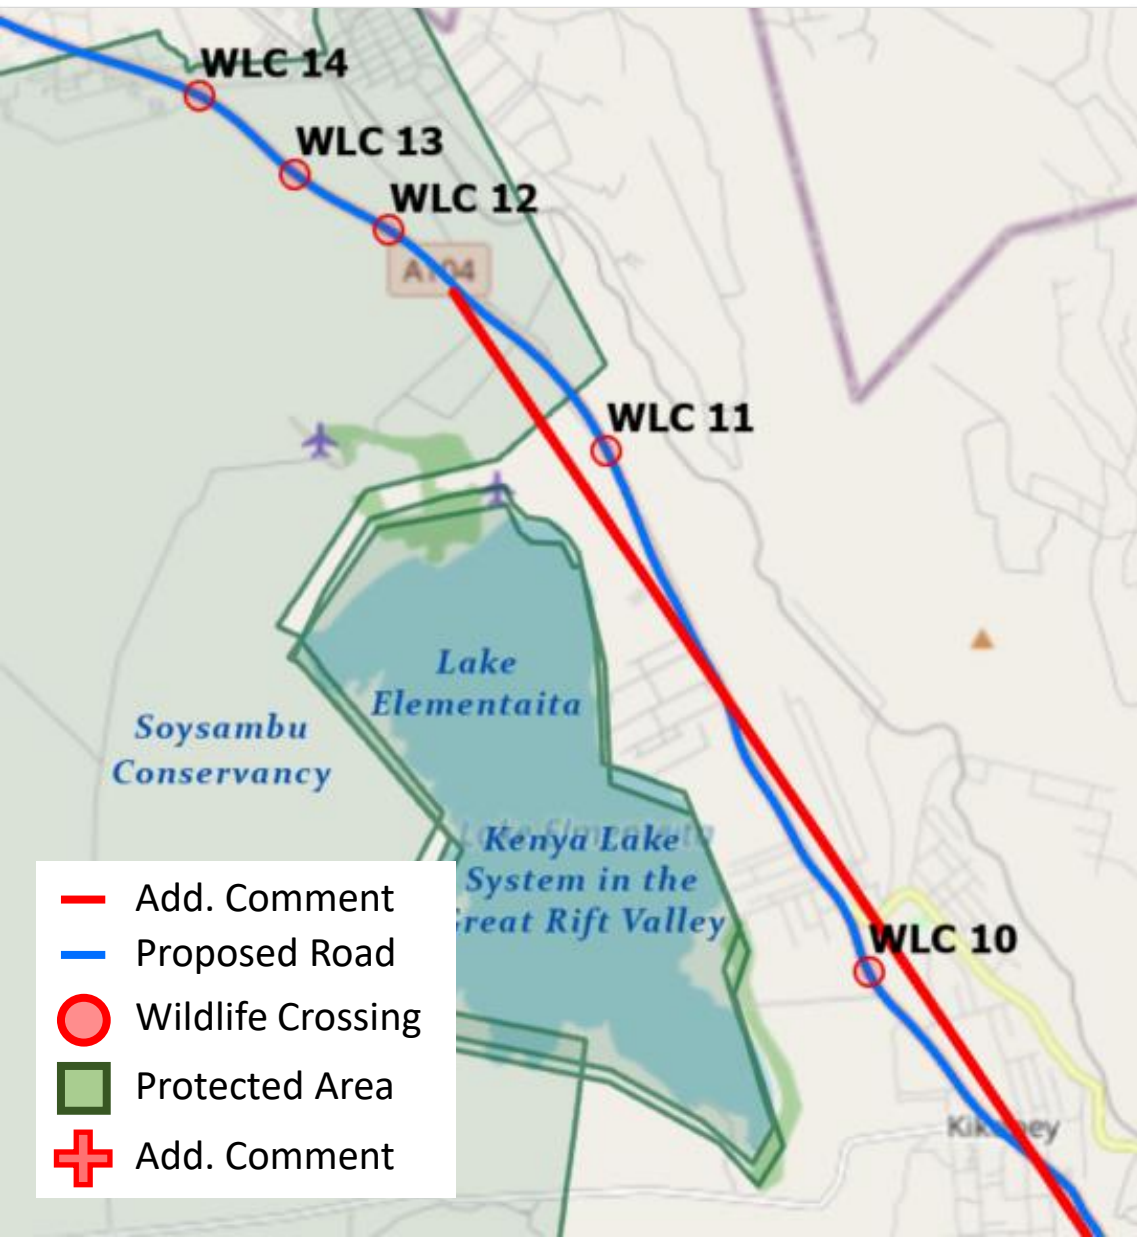

[Management]

Sarah Chiles - I think assurances are needed from Soysambu that this would only be used for wildlife and not for moving cattle to the eastern side of the road. Their ranch plan/conservancy plan should be assessed.

[Species]

Sarah Chiles – Buffalo, Giraffe, Zebra, Hyena, and Others (Leopard, potentially lion (if Soysambu wants them on that side), waterbuck, eland, impala, thomson's gazelle, jackal, bat-eared fox, primates (colobus, baboon, vervet, Syke's) etc.)

WLC 12	Underpass	103+285	1 x 5 (W) x 3.5 (H)	Maendeleo- Soysambu	Demolition & reconstruction of a new underpass
WLC 13	Underpass	104+665	1 x 5 (W) x 3.5 (H)	Soysambu	Demolition and reconstruction of a new underpass

WLC 12

[Location]

Sarah Chiles - Does this connect a dirt road? If so, I would be concerned about whether we would get optimum wildlife use here. These dirt roads in Soysambu are used a lot by vehicles and boda boda (motorcycle taxis) that are driven fairly fast.

[Design]

Sarah Chiles - I have concerns about 5 m width.

WLC 13

[Location]

Sarah Chiles - This appears to connect a dirt road instead of connecting the centre of the riparian zone? Again, I would have concerns about wildlife use when there is a road going through the underpass.

[Design]

Sarah Chiles - Same concerns apply regarding width.

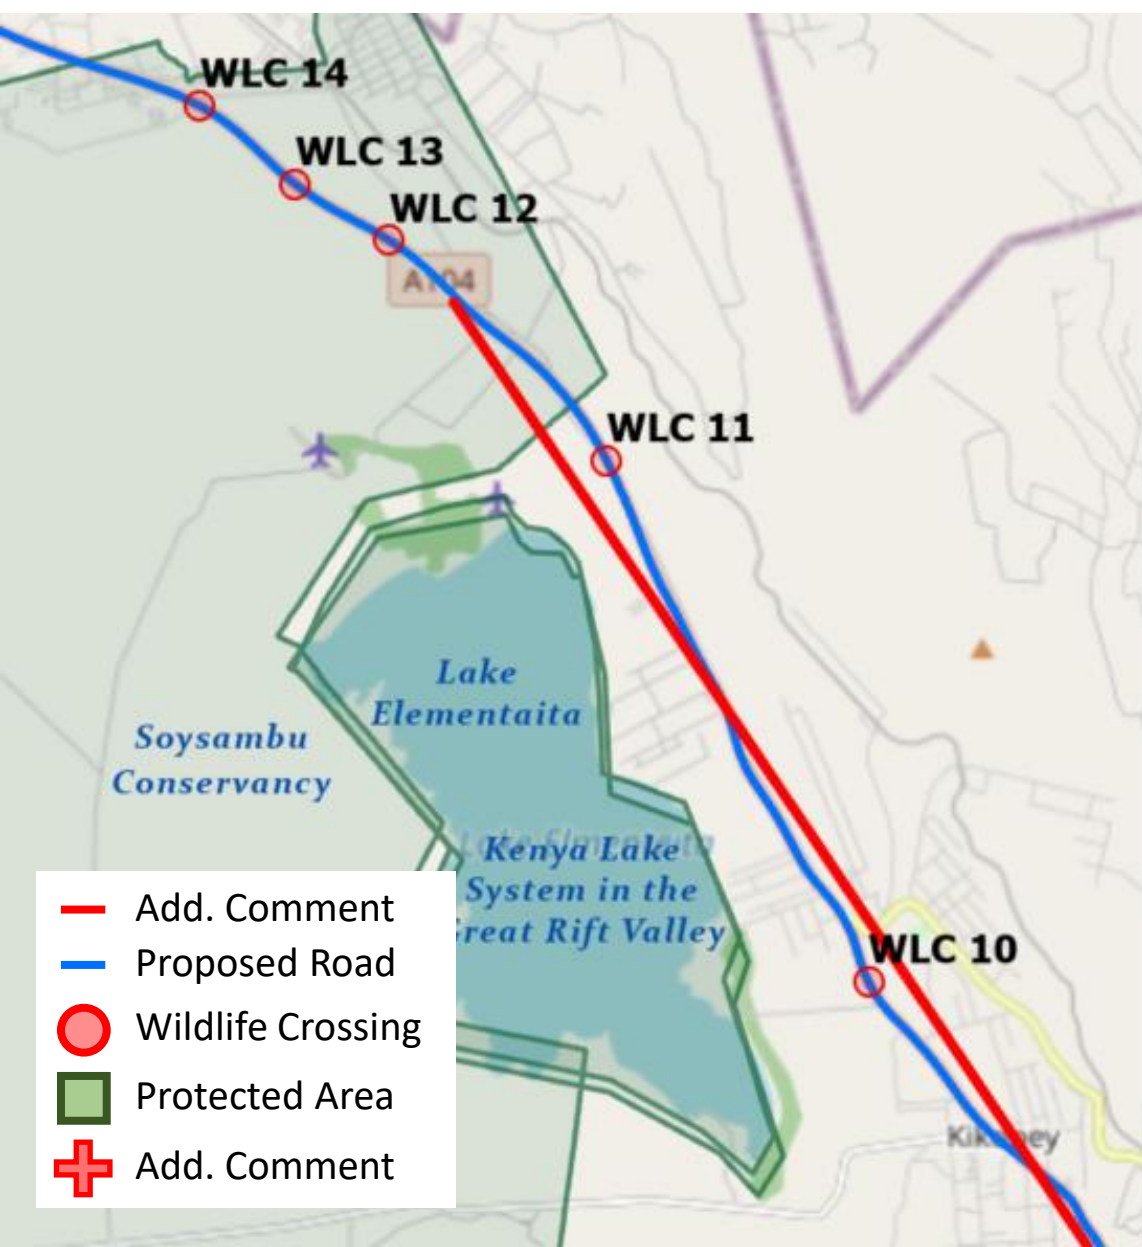

[Management]

Sarah Chiles - See previous comments on Soysambu planned use of eastern side of road. A clear management plan is needed.

[Species]

Sarah Chiles – Buffalo, Zebra, Hyena, and Others (Primates (special importance given riparian habitat), and all other species listed previously.)

WLC 14	Underpass	106+215	1 x 5 (W) x 3.5 (H)	Mbaruk - Soysambu	Maintain existing underpass
WLC 15	Underpass	164+370	1 x 7 (W) x 4.5 (H)	Koibatek Forest - Near Itare Dam	New Underpass for wildlife and livestock

WLC 14

[Location]

Sarah Chiles - Again, this appears to connect a road. If it was simply a livestock path, that would be different, but I don't feel that a road crossing would provide for optimum wildlife crossing.

[Design]

Sarah Chiles - Same issues with regards to width apply.

WLC 15

[Location]

Sarah Chiles - I am not very familiar with the area so cannot comment on location.

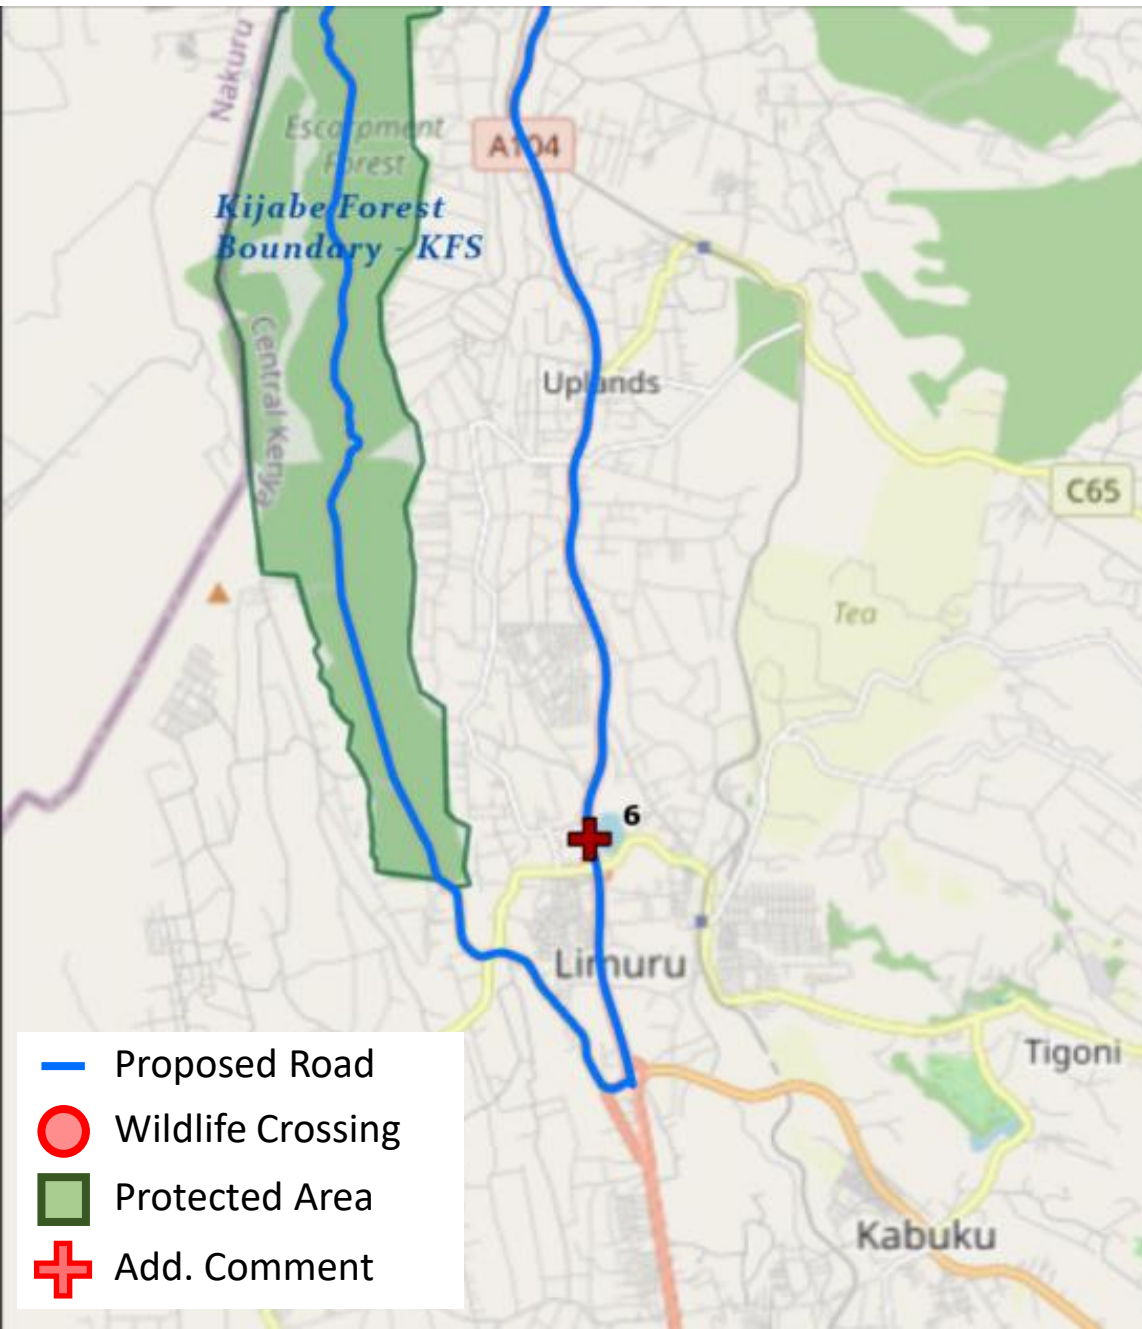

[Design]

Sarah Chiles - 7m width and 4.5 m high would provide the best value for openness index out of all the underpasses. Why is this one higher than the others? Can the others not be this high?

[Species]

Sarah Chiles – Buffalo, Hyena, and Others (Primates, small predators and mammals would be critical here.

Section 2. Additional Comment - Points

(6) Sarah Chiles - The wetland to the east is a really important area for livestock and wildlife (birds of course in particular). A livestock crossing needs to be considered here, which could also be used by small mammals.

Section 2. Additional Comment - Points

(8) Sarah Chiles - See previous comment.

(7) Sarah Chiles - What are the provisions for small mammals etc. for this riparian zone crossing?

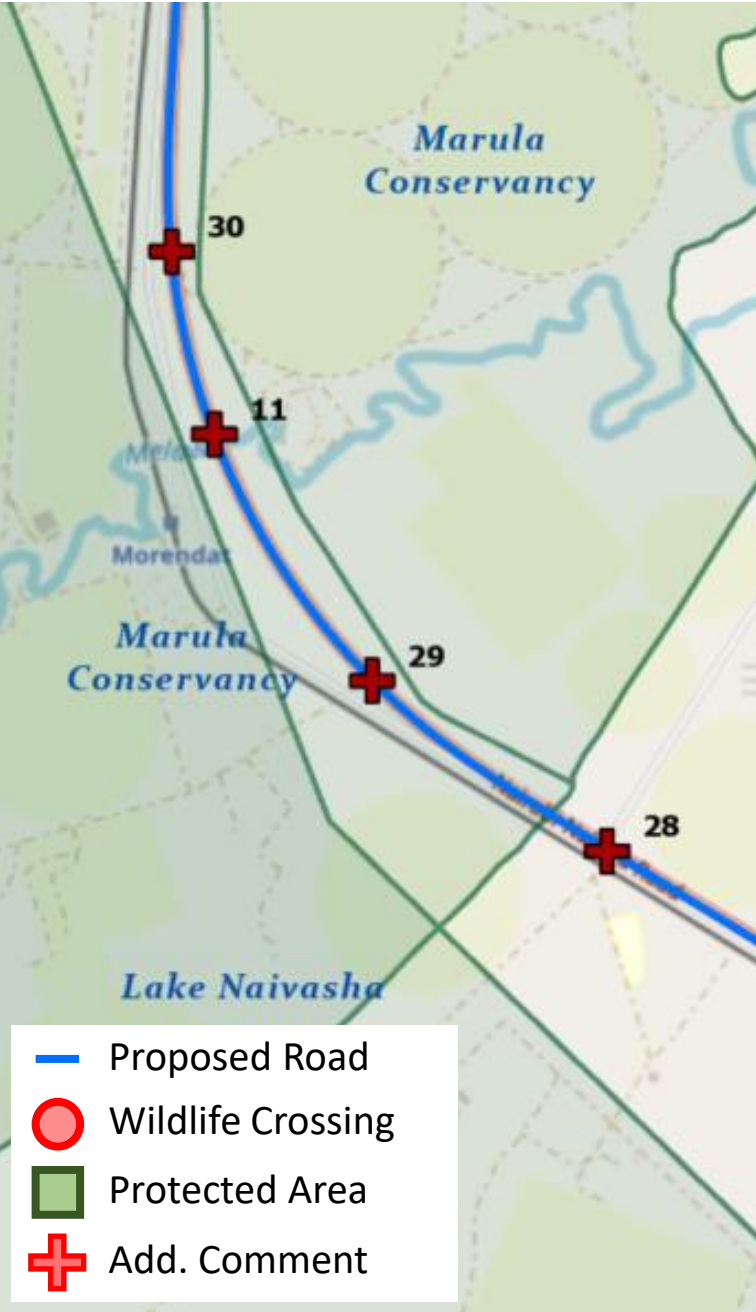

Section 2. Additional Comment - Points

(14) Sarah Chiles - Primate crossings should be considered for anywhere where there are significant stands of acacia xanthophloea (fever tree).

(31) Alex (Lake Naivasha Riparian Association)- new livestock/wildlife overpass to accommodate giraffes

Section 2. Additional Comment - Points

(30) Alex (Lake Naivasha Riparian Association)- new livestock/wildlife underpass

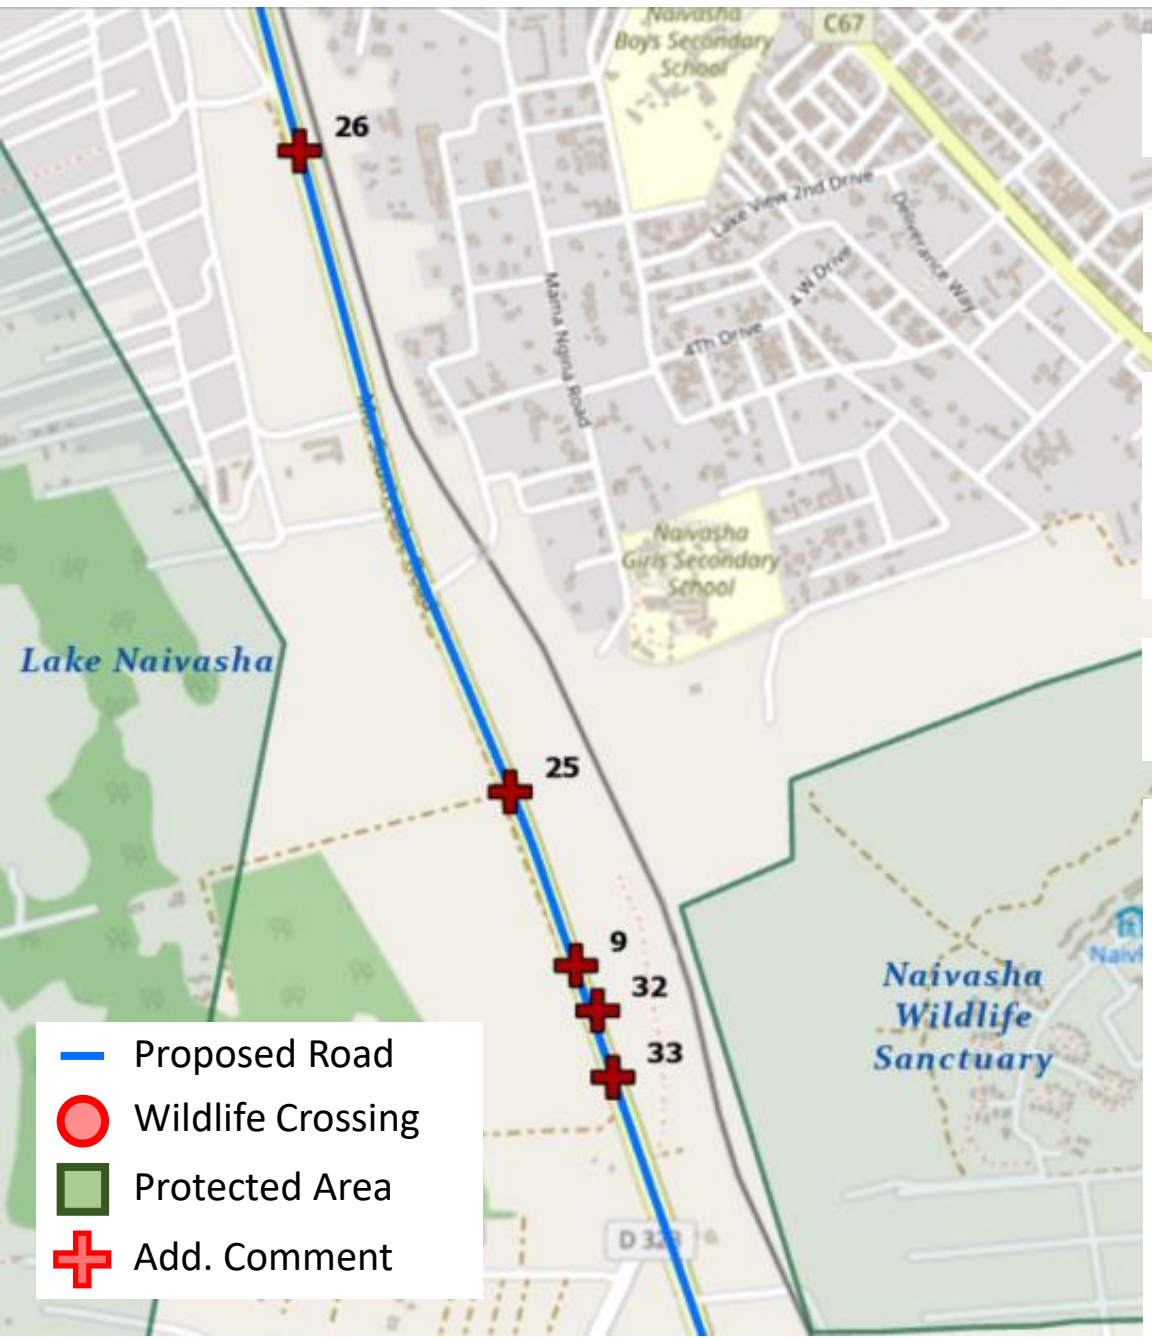

(11) Sarah Chiles - The Melewa River is the lifeblood of Lake Naivasha. FYI, there is a proposed dam planned for east of the road which is being opposed by many stakeholders. This river has risen almost to the point of the bridge (given very heavy, climate-induced rains, and deforestation upstream). There needs to be provision for wildlife to cross under this bridge, which takes into consideration year-round river levels.

(29) Alex (Lake Naivasha Riparian Association)- new livestock/wildlife overpass to accommodate giraffes

(28) Alex (Lake Naivasha Riparian Association)- new ilife/livestock underpass

(27) Alex (Lake Naivasha Riparian Association)- new wildlife/livestock underpass

Section 2. Additional Comment - Points

(26) Alex (Lake Naivasha Riparian Association)- new wildlife/livestock underpass

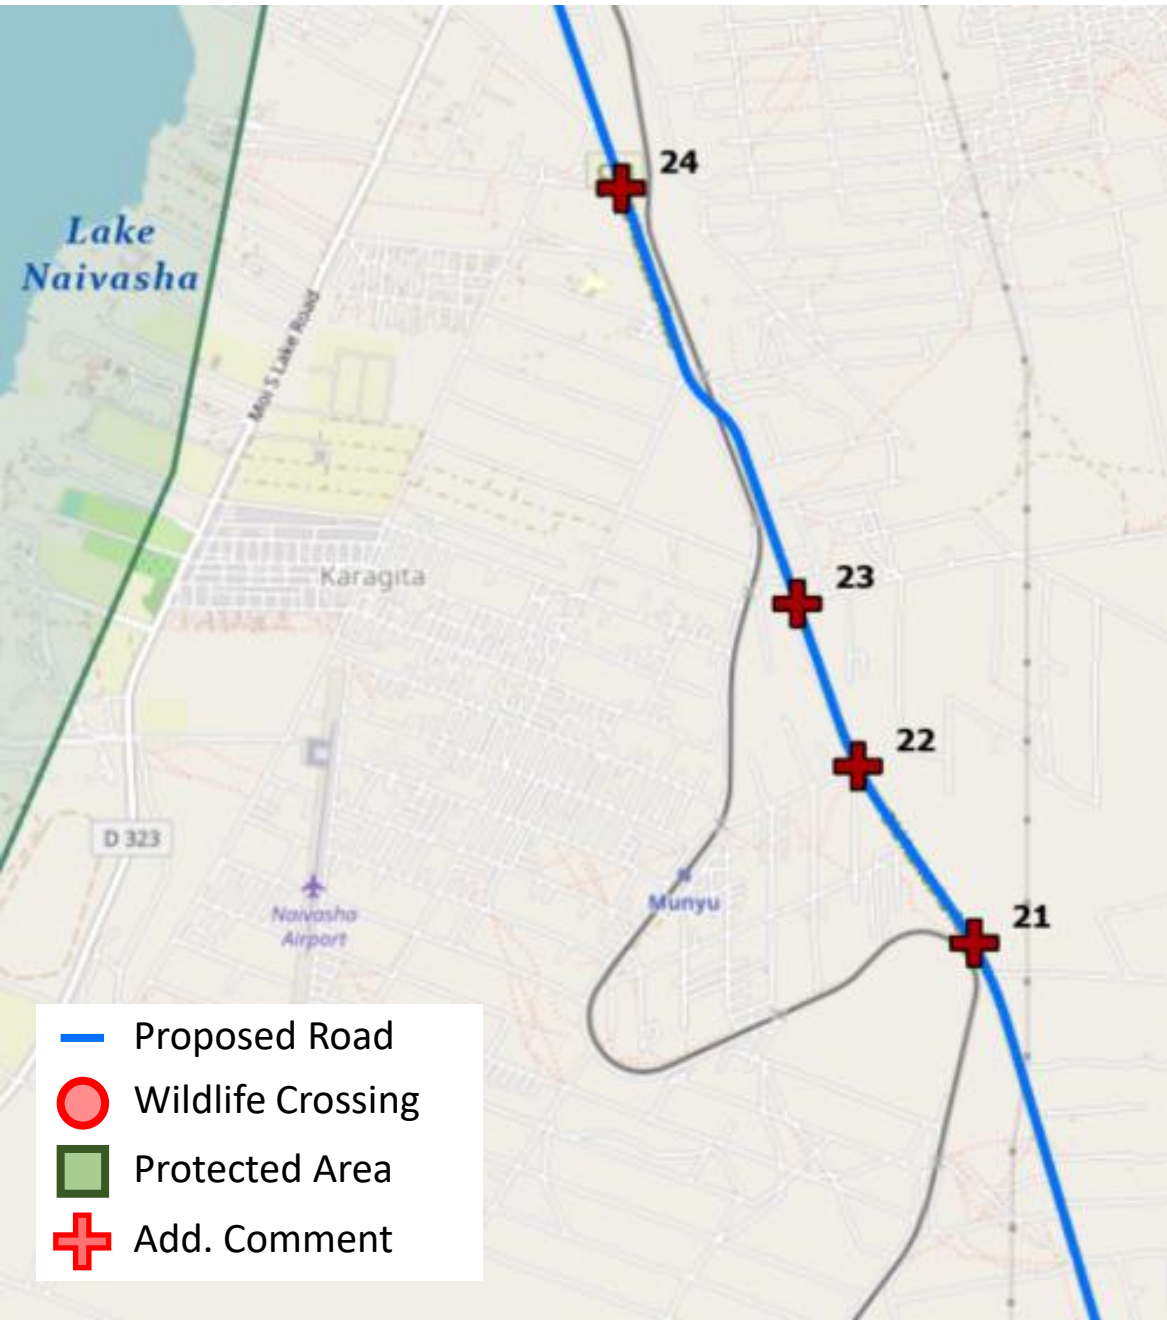

(25) Alex (Lake Naivasha Riparian Association)- new wildlife/livestock overpass to accommodate giraffes

(9) Sarah Chiles - There needs to be a crossing structure here for consistency with WLC 3 i.e. to connect the lake and the riparian zone with the habitat to the east. Please also note my comments on provision for giraffe in this area. Underpasses won't be suitable for them.

(32) Alex (Lake Naivasha Riparian Association)- Provision for wildlife crossing is needed - consider an overpass to link with WLC3

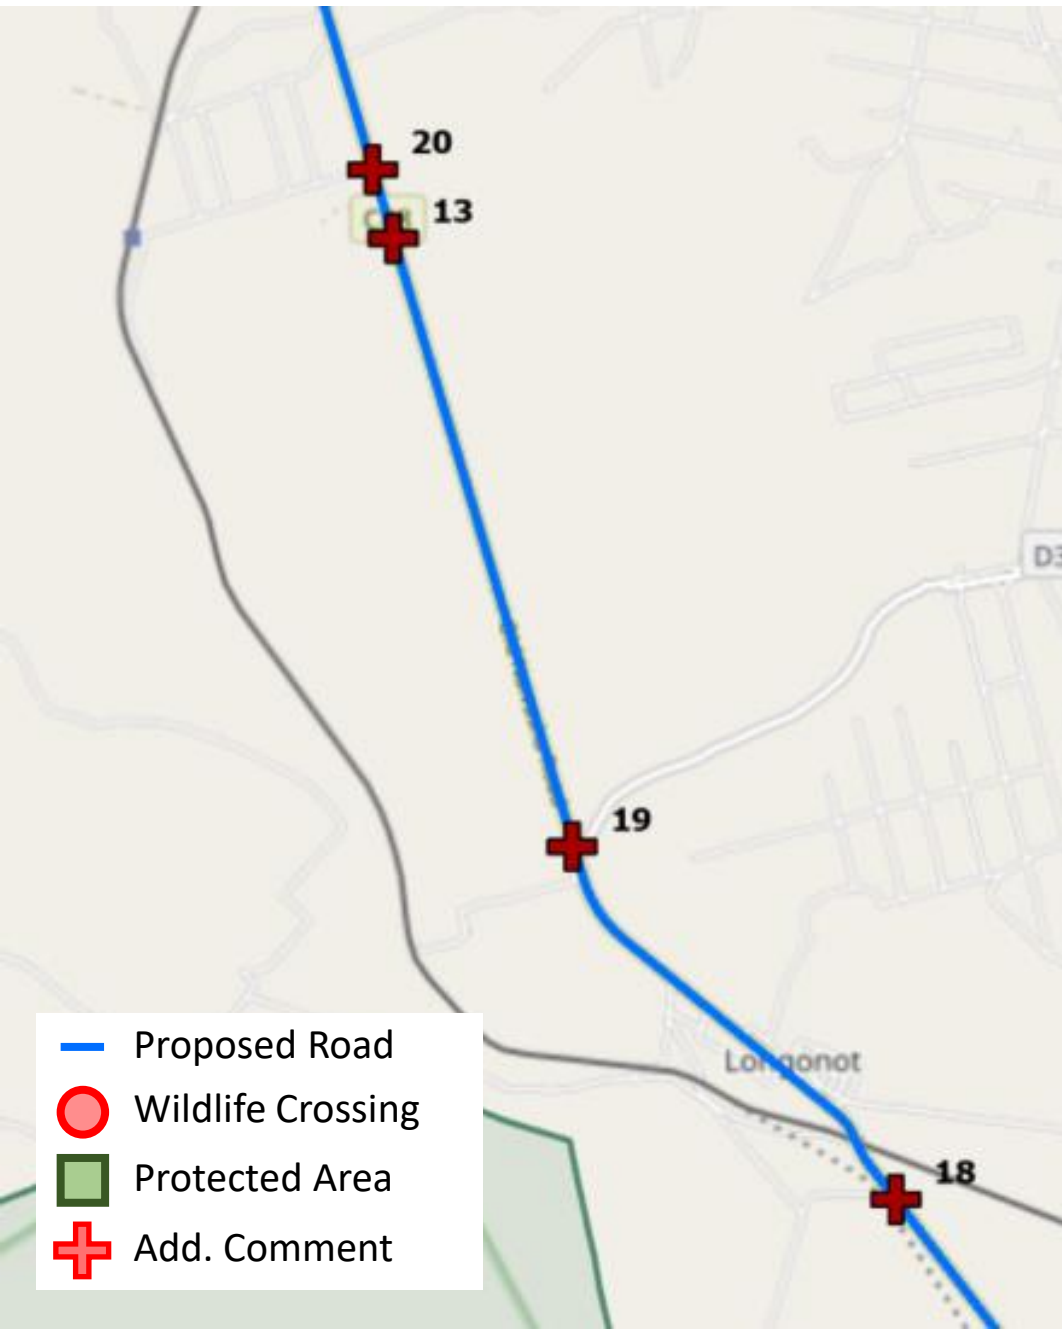

(33) Silas - Consider putting up one overpass and one underpass at this point. Wildlife access to water is key. This is one of the active wildlife crossing areas that connects the KWSTI Main campus sanctuary to the KWSTI Hippo Camp sanctuary and the lake. The two sanctuaries host critical wildlife populations including giraffes, buffaloes, elands, hippos, zebras, warthogs, gazelles and many other small mammals that need to cross from one end to the other to access pasture and water. This point is just in between the Moi South lake road turn and the seasonal River Maraigucu bridge (on the Maai Mahiu highway) just before Kihoto settlement. This is a critical location that needs your consideration.

Section 2. Additional Comment - Points

(21-24) Alex - new wildlife/livestock underpass

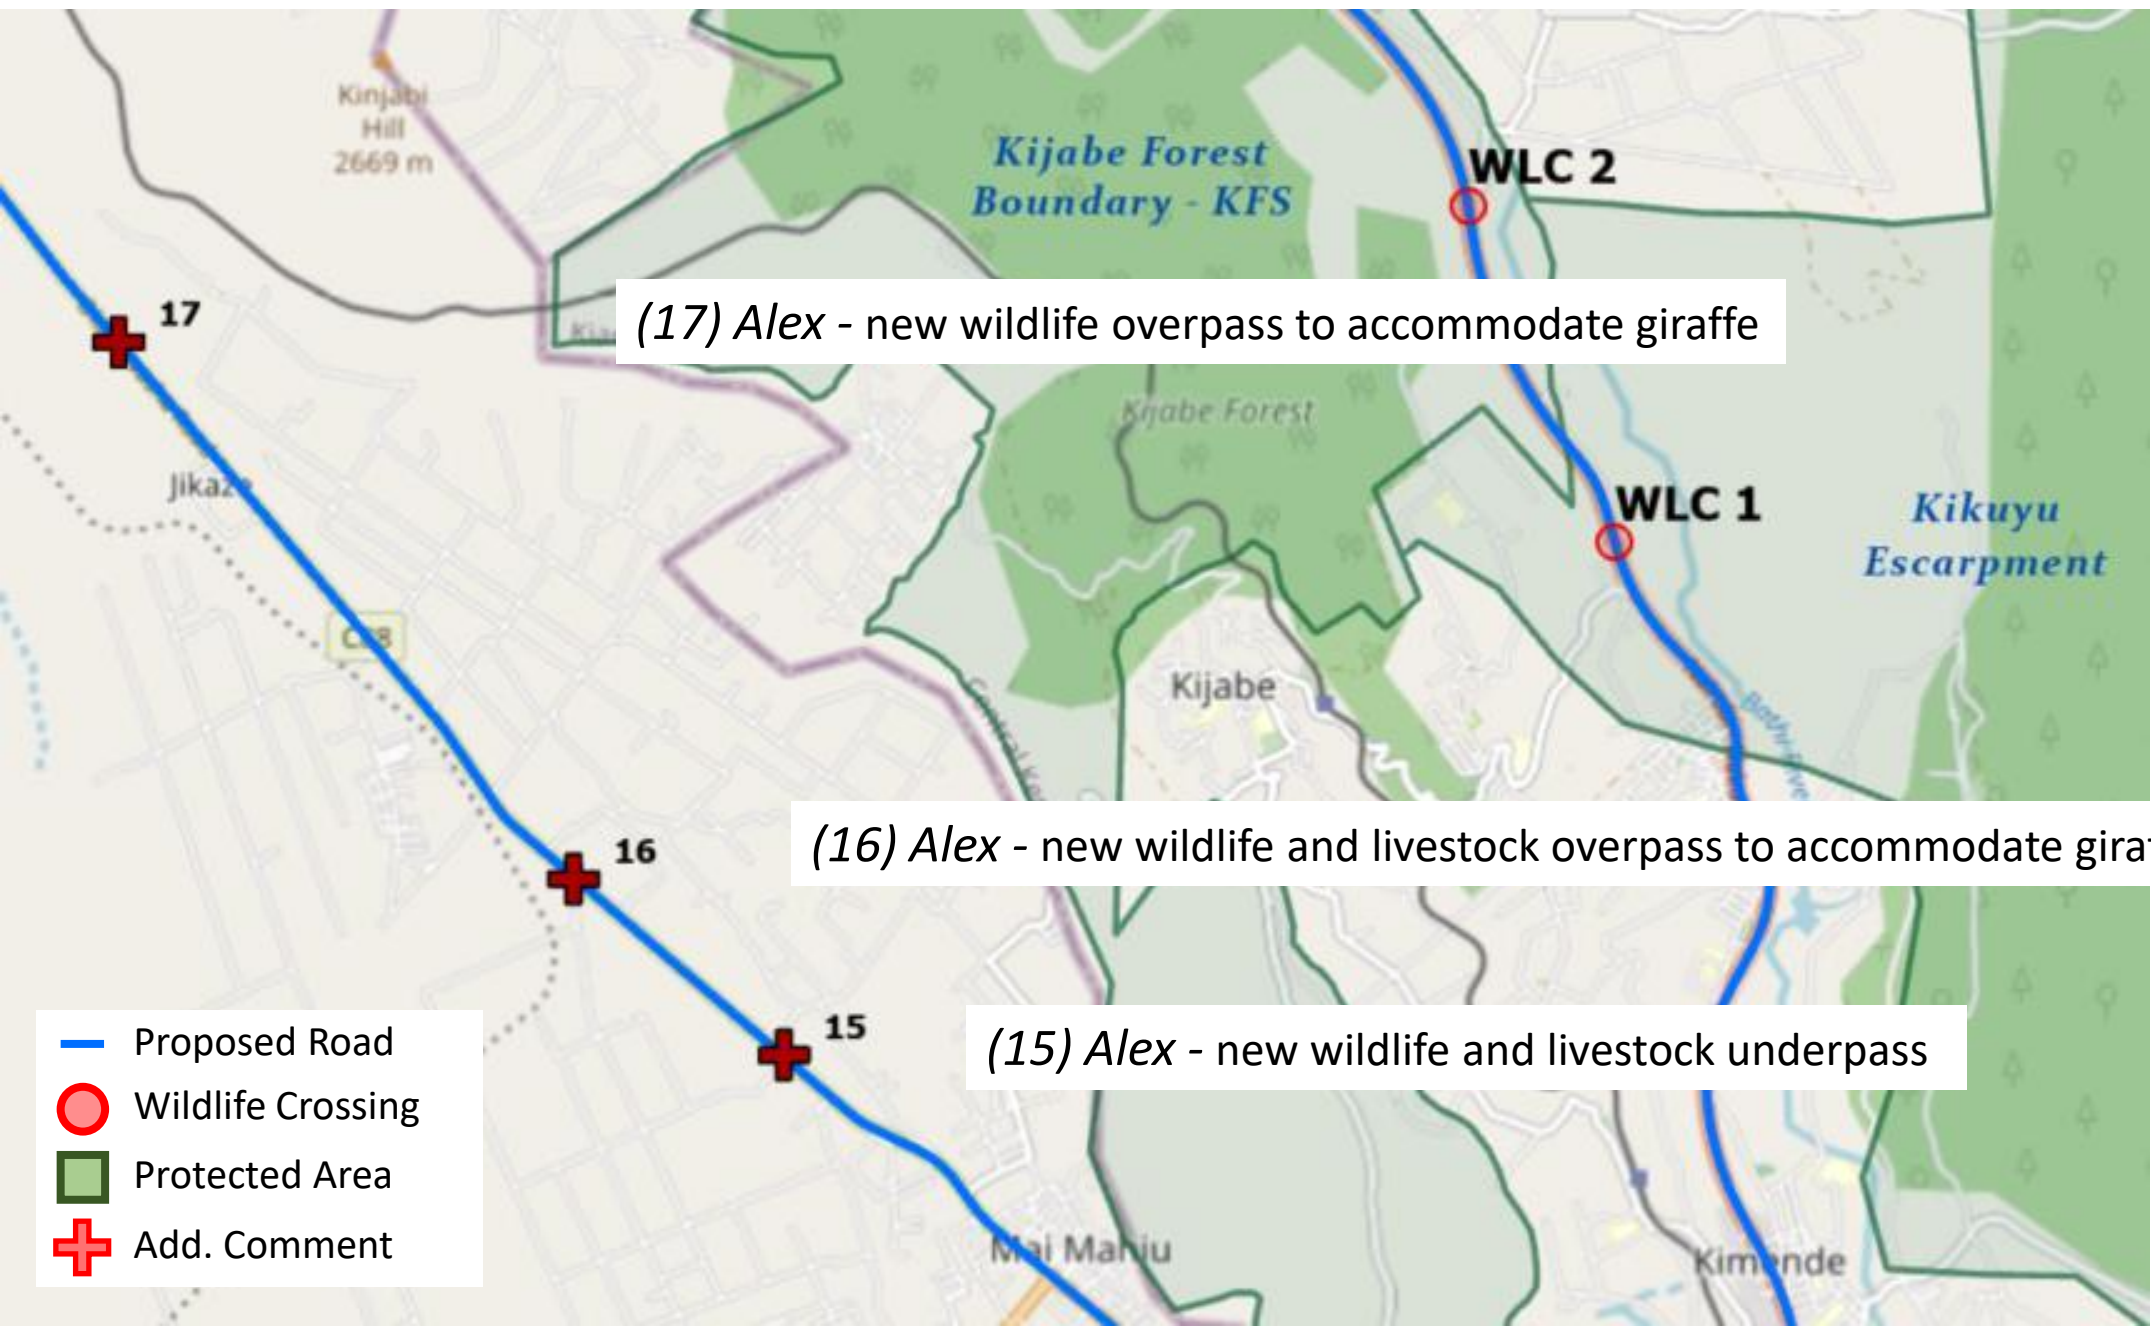

Section 2. Additional Comment - Points

(18-20) Alex - new wildlife/livestock overpass to accommodate giraffe

(13) Sarah Chiles - Others, e.g. Alex Bell, are best suited to comment on mitigation for the lower road.

Section 2. Additional Comment - Points

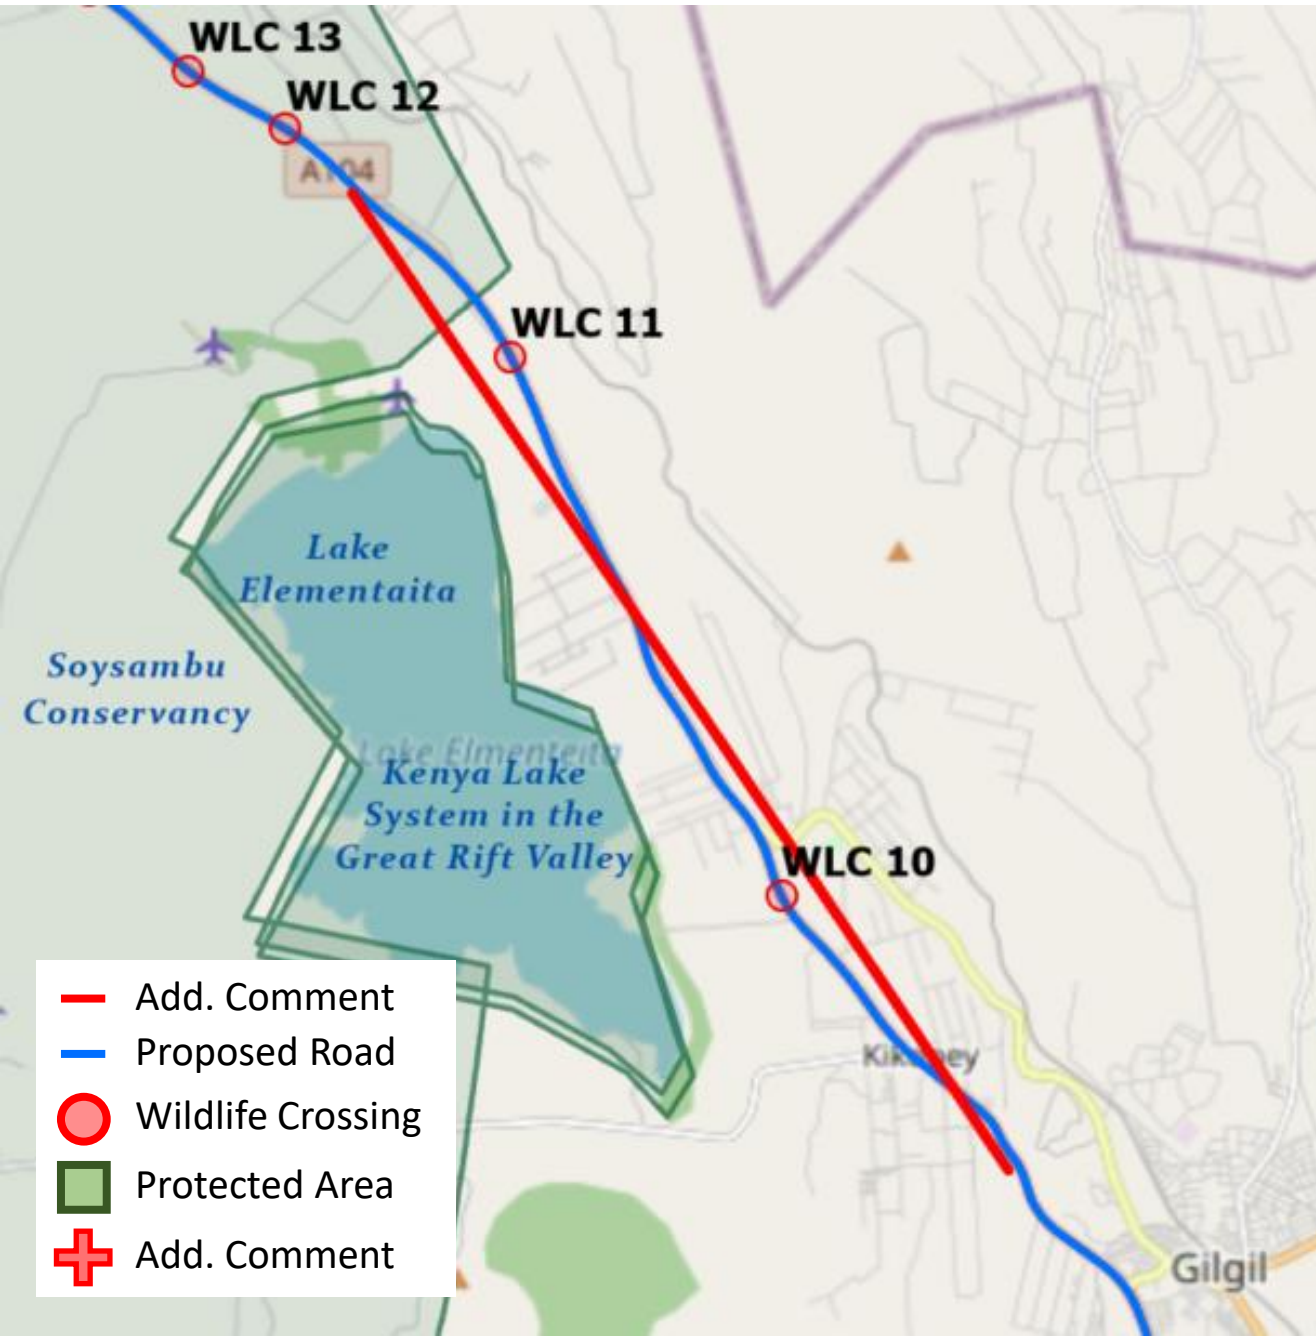

(17) Alex - new wildlife overpass to accommodate giraffe

(16) Alex - new wildlife and livestock overpass to accommodate giraffe

(15) Alex - new wildlife and livestock underpass

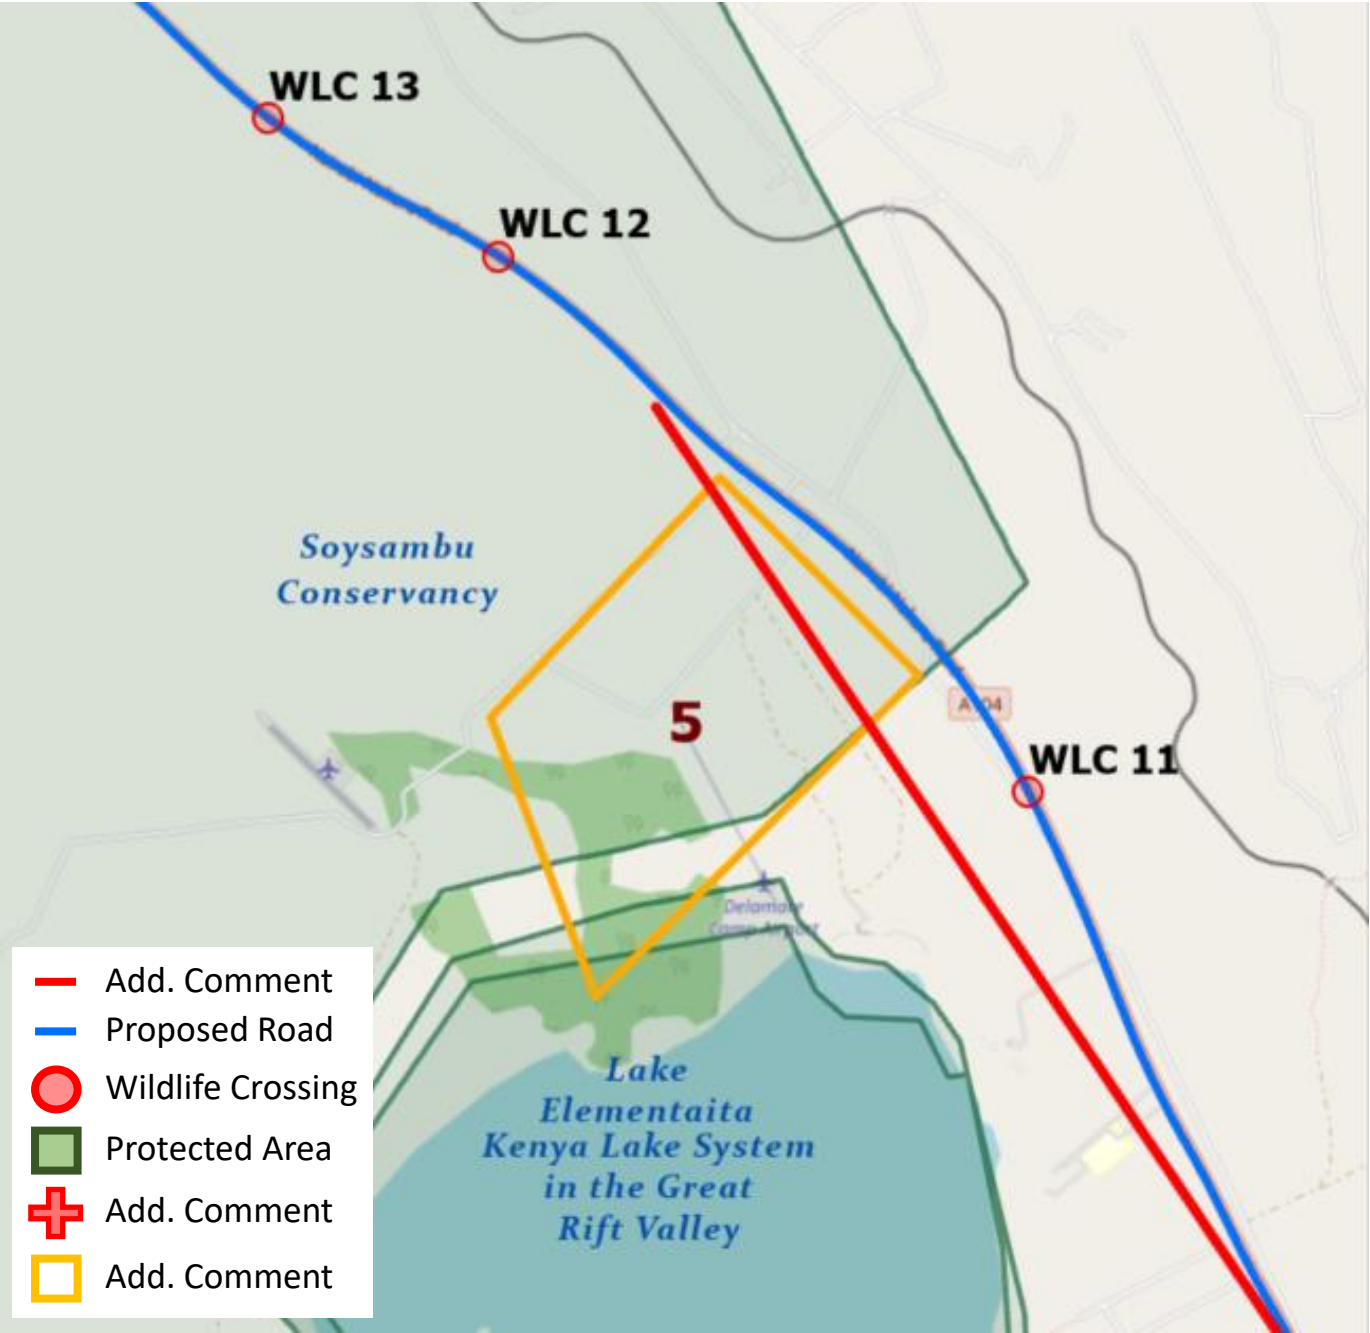

- Proposed Road
- Wildlife Crossing
- Protected Area
- ⊕ Add. Comment

Section 3. Additional Comment - Line

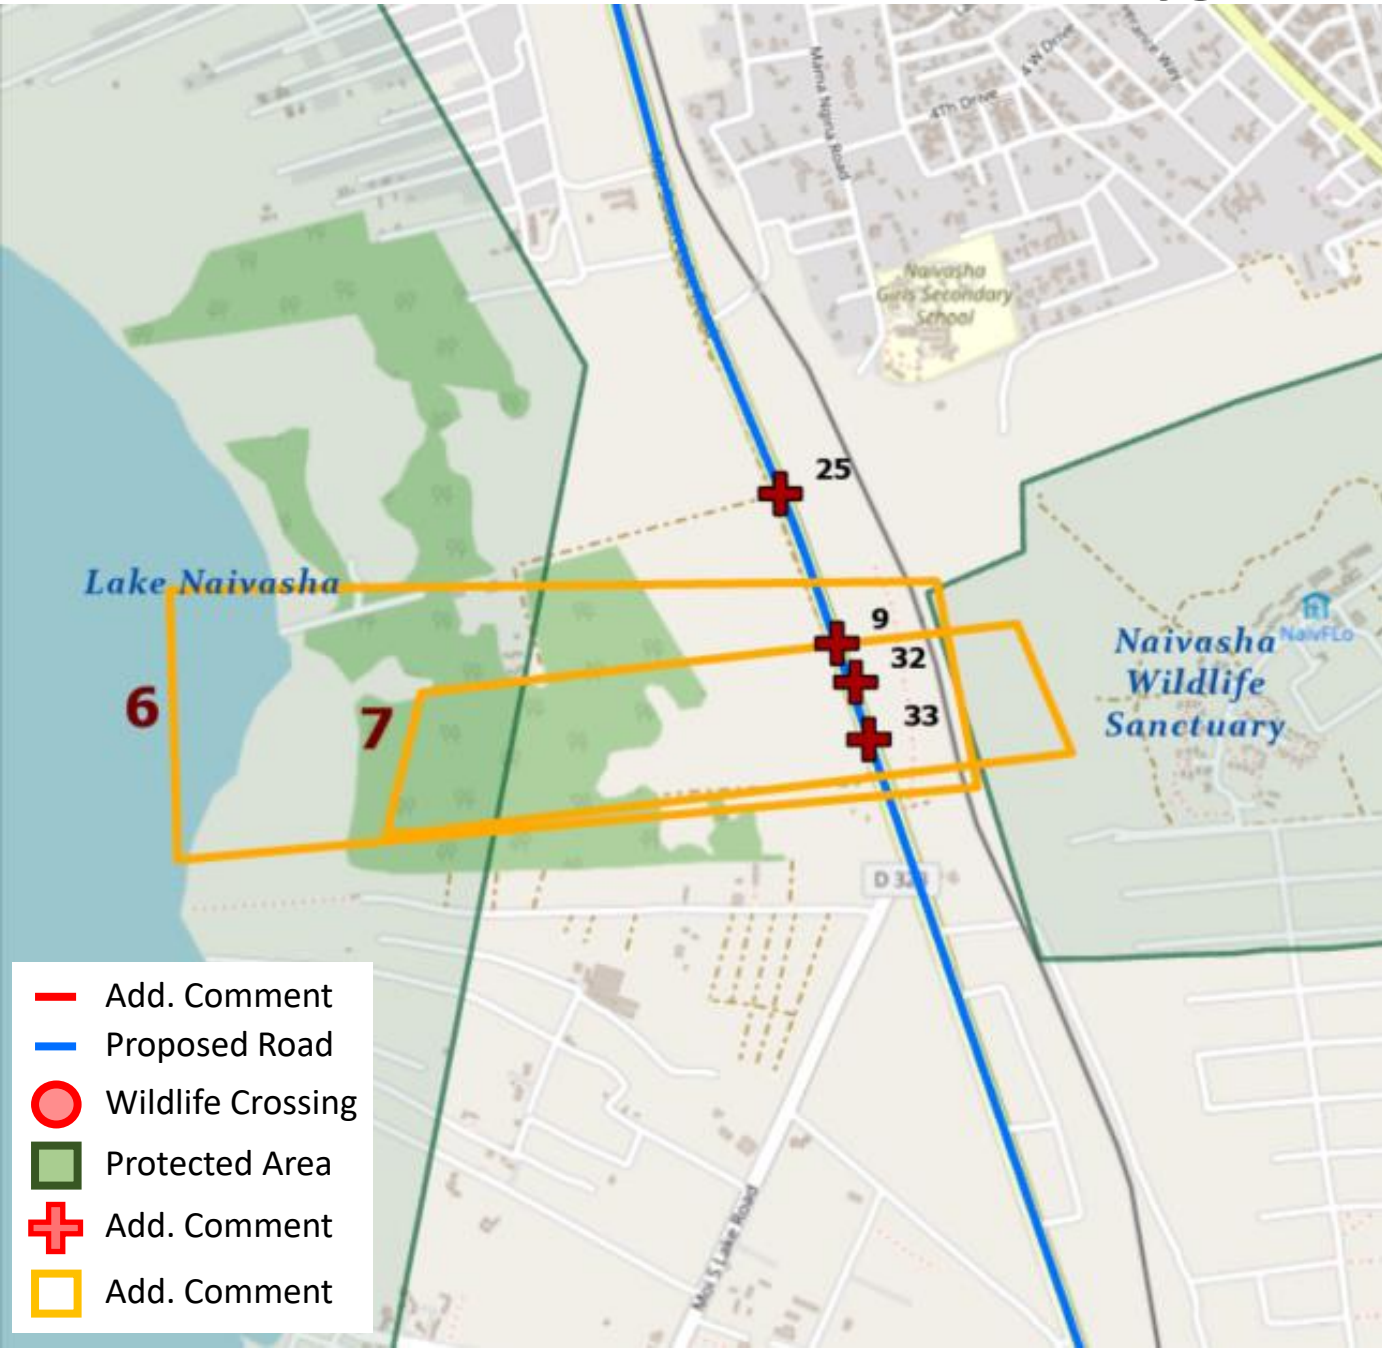

(15) Sarah - Starting from the escarpment just north of Gilgil down and all along Lake Elementaita, noise pollution (and light pollution) is a significant threat to the World Heritage status of the lake and its breeding bird population, as well as to other sensitive/endangered species like Rothschild giraffe. I cannot stress the noise issue enough. Having spent a lot of time in Soysambu, the traffic noise level is very high, even deep into the conservancy. Dualling the highway will obviously make this problem significantly worse. I am flagging this here because I believe there should be sound barriers all along this stretch. This is a really important opportunity to mitigate this issue and would go a long way to protect this World Heritage Site. (There are course should never have been a major highway this close to a lake of international biodiversity importance.) However, sound barriers obviously complicate connectivity/WLC planning. I am happy to chat to you about this further.

Section 4. Additional Comment - Polygon

(5) Sarah - Colobus monkeys were reintroduced into this section of fever tree (acacia xanthophloea) forest approximately two years ago. They are an entirely arboreal species and if they needed to cross the highway, they would need ladders (this has been well studied in Diani, Kenya). There are also Sykes monkeys that cross the road on the ground here and they have been hit by cars. Again, primate-specific mitigation would need to be considered.

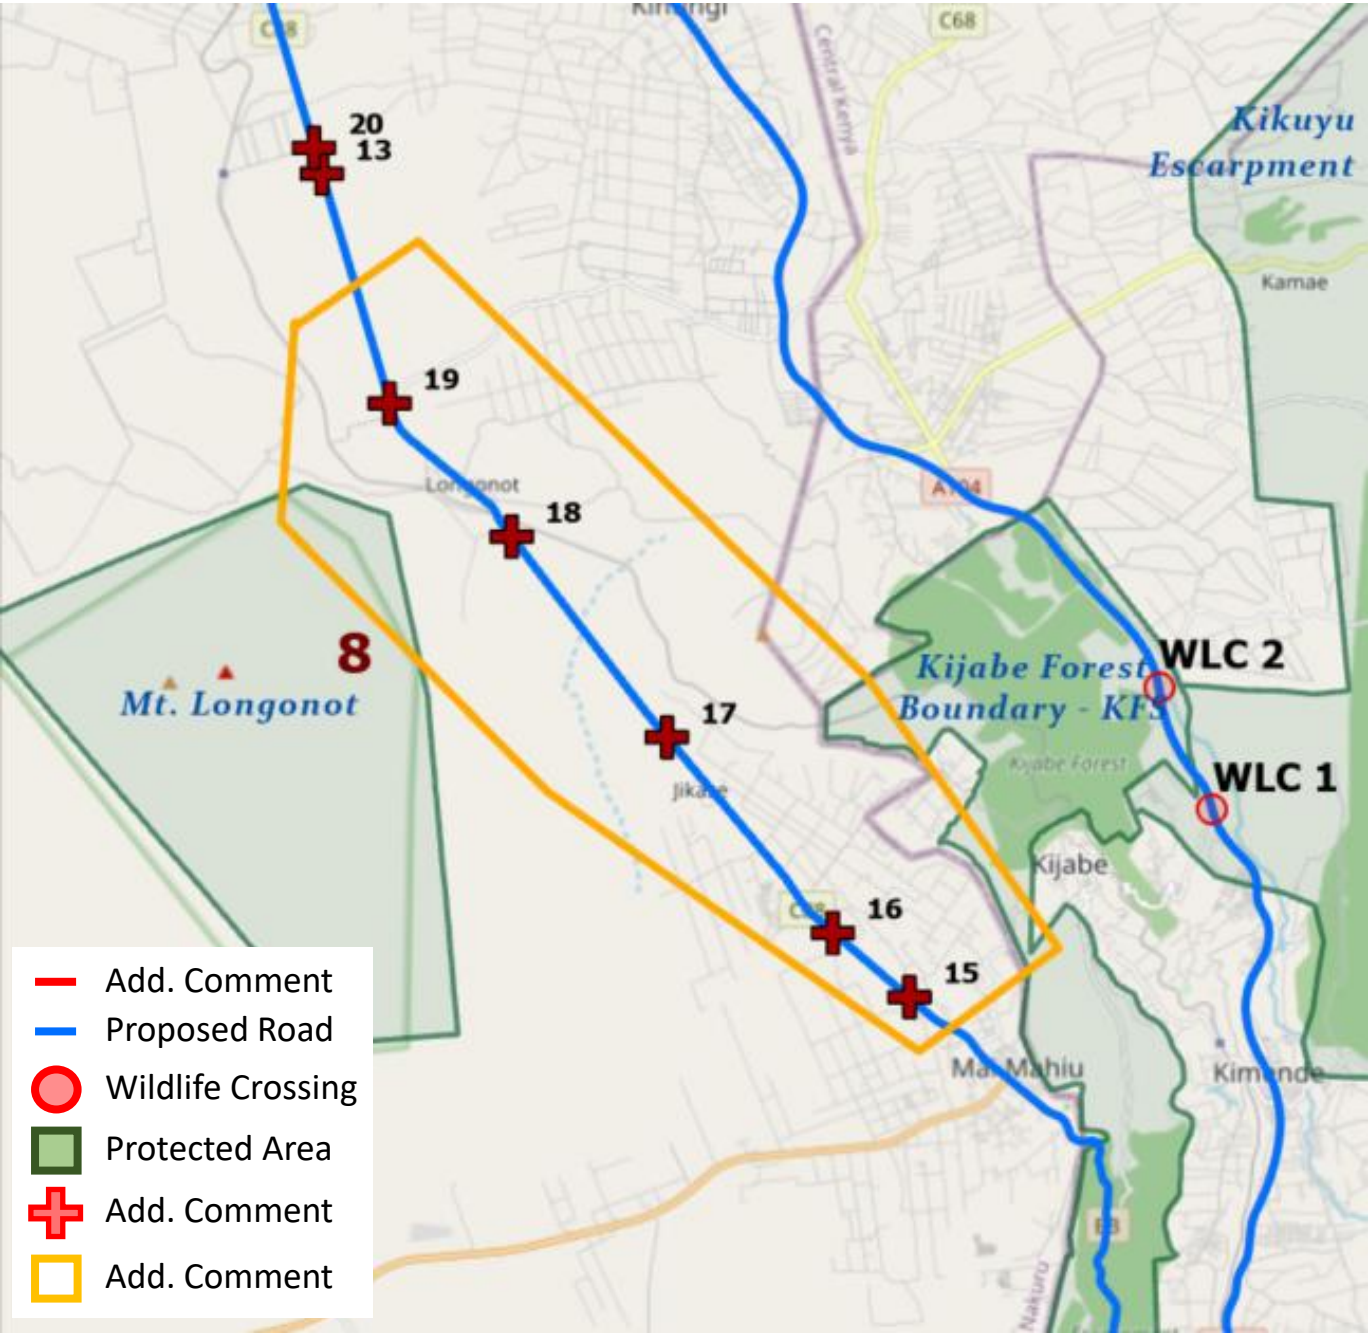

Section 4. Additional Comment - Polygon

(6) *Juma* - This is presently an active wildlife corridor that ought to be considered by the design team, there needs to be a wildlife overpass on this area

(7) *Silas Wanjala* - This is an active wildlife dispersal corridor that connects the lake to the KWSTI Main Campus. Numerous road kills have been recorded along the highway within this area especially at night. There is need for critical consideration of putting up an overpass within this area and securing the area from the threats of road kills. I recommend one overpass (to cater for giraffes, buffaloes, elands, zebras, hippos, and other big mammals) and one underpass to cater for small mammals.

Section 4. Additional Comment - Polygon

(5) *Silas Wanjala* - Consider putting a number of underpasses in various points along this longonot area (between Longonot and Maai Mahiu). It is presently used by wildlife especially zebras, antelopes and gazelles. You can obtain data and additional information on this area from the KWS Hell's Gate National Park Resident scientists.

Section 5. General Feedback and Comments

In general, I think the width should be greater - we don't have much to go on, but from the limited research we have undertaken with wildlife movement on one highway in RSA, the 'herd' species seem to prefer wider underpasses; this is in comparison to smaller mammals (obviously), and solitary species.

We have had for example, leopard using pipe culverts.

- Wendy Collinson (Endangered Wildlife Trust)

¹ Presenters

SUBJECTS RAISED

1 INTRODUCTION

Introduction of presenters Maya Brennan Jacot, Biodiversity Specialist, WSP; Dr Rodney van der Ree. Round Table for attendees to present themselves.

2 PRESENTATION OF PROJECT BACKGROUND AND WILDLIFE MOVEMENT STUDY RESULTS AND OUTCOMES

- Presentation of the results of the Wildlife Movement Study
 - Wildlife Study Process
 - Camera trap picture analysis
 - Ecological Connectivity Modelling
- Discuss project goals regarding wildlife
- Presentation of outcomes for planned wildlife crossings
 - Assessment and prioritisation of proposed WCS
 - Constraints and opportunities
 - Presentation of selected WCS per road section (Location, design, fencing, etc.)
 - Conclusion and next steps.

3 Q&A ON WILDLIFE MOVEMENT STUDY RESULTS AND OUTCOMES.

Walter Nyatwanga (KenHA)

- Size of crossings in Southern side of the project seems small. The design issue the dimension 5 m x 3.5 or 5 m x 4.5 m
- Response Rodney (WSP): In this location in the Forest Reserve, the species that are present are smaller species. This is not targeted for giraffe. That's why the crossings are smaller than others such as the giraffe underpass.

Mairo Dunn (Lake Naivasha Riparian Association)

- Why are there no canopy bridge planned in Soysambu given that there are monkeys in that area crossing from one side of the road to the other?
- Response Rodney (WSP): The main reason is that one side of the road is being developed and we don't want to encourage wildlife moving into the residential area to be developed, which will also have roads and other threats for these species.

Bernard Agwanda (National Museum of Kenya):

- There are some restricted range species in the project area. The presentation today focused heavily on large mammals. The issue of small mammals and their consideration in the study was raised during the

first wildlife workshop, notably primates and some rodents. In particular, we have the orange-toothed mole rat (also called the Naivasha African mole-rat (*Tachyoryctes naivashae*)) within the project area. We are dealing with some species that are not well defined. Some are distinct some are indistinct. In the previous workshop, we also mentioned that we have some roadkill records at the NMK, animals that were recovered on the current road infrastructure. Concern about how the new road will affect them. Perhaps it has been considered in the study, and if not, call upon the project leadership to take that into consideration.

- There also is an endemic species confined in the forests and gallery forests between Salga and Mau Summit. Perhaps there is no effect of the road on this species.
- Finally, there is two endemic subspecies of primates in the rironi area. Probably won't be affected by the infrastructure. Not clear what activities and be relevant to the primates.
- The study should state if there is no impact on these species and if there is, detail the mitigation measures.
- Response Maya (WSP) – The presentation today was focussed on the work done for large mammals in regard to the connectivity modelling. Yes, we have received some small mammal roadkill data from the NMK that was considered in the wildlife report and also, small mammals are covered in more detail in the ESIA. There were some baseline surveys done for small mammals and also amphibians and reptiles. These revealed there are in fact some endemic and restricted range species. When placing the WLC that we discussed today, we focused a lot on large mammals, but the habitats and other species present were also considered. An overall view of habitats in the area and of species present was considered.

Peter Njeru (Nature Kenya)

- Did not factor impact of location of quarries / borrow pits in presentation, where construction material will be sources. Are the impacts of these location on the wildlife species factored in the report?
- Response Rodney/ Maya (WSP): The location of source material is considered in the report, we did not go into it in the presentation because we were looking at the road itself. Some quarry and sourcing sites are identified but not all temporary construction sites are determined yet. Based on the surveys, all habitats in the project area have been mapped, including modified habitats, natural habitats, and critical habitats. So, when detailed design is available, we will have all this information to help avoid/minimize impacts of those sites. The information gathered in the ESAI will help guide decisions on the locations.
- Response Sophie (RVH): A dedicated ESIA for each site will be submitted to NEMA to get approval.

Thabo Hlatshwayo (Endangered Wildlife Trust):

- In the presentation, it is stated that both fencing and crossing structures were used to encourage the use of structures by wildlife. I would like to know how high the fence was and ask about the nature of the fence (was it a wire fence, or a mesh fence etc.).
- Smaller animals can pass through if the design is wire fence.
- Response Rodney (WSP): The fencing varies based on the location and the existing fencing. Existing fence will be assessed. If it needs to be upgraded, it will be. Exact design of fence to be installed will come at detailed design. These will be connected tightly to the WCS so that the animals can't squeeze between the edged of the crossing structure and the fence.
- Response Rodney (WSP): The fencing design will be adapted to the target species. If in an area with important small mammals, or amphibians and reptiles populations, the bottom of the fence will be a smaller mesh, compared to the top of the fence. These parameters will be identified in the detailed design.

Walter Nyatwangav (KenHA):

- We have reviewed the full ESIA report and will submit full comments on this to RVH. Today I wanted to commend consultants for work well done, very thorough specialist studies. Looking forward to seeing state of the art canopy bridges and crossing structures that we will showcase.

ITEMS DISCUSSED	
1	Thankful for the project and glad that the resettlement and compensation issue is being addressed by the National Land Commission. The Land acquisition is a big challenge and a continuous concern.
2	The road is long overdue and should have been constructed many years ago. It's a long stretch and a very important transport corridor.
3	When will the construction begin?
4	There are many benefits to the project, and we are very happy that RVHL will remain for the next 30 years.
5	The stakeholder engagement and participation are very important.
6	Keep weight bridges away from the main carriage way because it slows down the flow of traffic.
7	There are too many trucks on the road.
8	What is the cost implication of the project for road users? Will the road be tolled?
9	Concerned about the delays at the toll stations, as they slow down traffic flow.

MINUTES OF MEETING PREPARED BY:

Christine Abdel-Malek, Stakeholders Engagement Specialist, WSP Canada Inc.

Julius Ngundo, Senior Social Safeguard Expert, Norken International Limited

Loise Kioko, Associate Environmentalist, Norken International Limited

MINUTES OF MEETING REVIEWED BY:

WSP	Ghyslain Pothier, Project Director		March 23 2021

These minutes are considered to be an accurate recording of all items discussed. Written notices of discrepancies, errors or omissions must be given within seven (7) days, otherwise the minutes will be accepted as written.

Minutes of meeting

Project	Nairobi-Nakuru-Mau Summit Highway		
Project Number	201-10312-00	Date	January 25, 2021
Time	11h30am	Venue	Full Gospel Church of Kenya, Nyambari Compound, Lari-Kirenga, Kiambu
Subject	First Round of Consultation – Lari Sub County Community		
Participants	Please refer to the Appendix for the attendance list (147 participants)		

SUBJECT RAISED

1	WELCOMING REMARKS - DD - KENHA
	<p>The meeting was officially opened at 11h30am by Agnes Karoki, DCC-Lari Sub county who welcomed all the community representatives and the team to the meeting. She later invited the DD-KeNHA to speak to the congregation.</p> <p>Mr. Walter Nyatwanga of KeNHA gave a brief on why the project was of importance and stated that the Nairobi-Nakuru-Mau Summit Highway project will be of great benefit to the communities along the project and Kenya as a whole. He stated that the winning bidder was a consortium of Vinci & Meridiam working in partnership. He later welcomed the Vinci & Meridiam team to take over the meeting.</p>
2	MERIDIAM & VINCI
	<p>Mrs. Sophie Debost, from Vinci, introduced the Vinci and Meridiam team and informed everyone at the meeting that this was an official commencement of the 2nd public participation into this project. She stated that the project is being developed following an international bidding process; contract term is 30 years with construction over 3,5 years but with some sections completed earlier. Vinci and Meridiam would design, construct and maintain the road for twenty-six and a half years under the Public Private Partnership Model.</p> <p>The project would be done in sections for both the A8 Rironi-Mau Summit and A8 South Rironi-Mai Mahiu and would incorporate service lanes in urban centres and underpasses for farmers to avoid accidents.</p>
4	ESIA TEAM- WSP & NORKEN
	<p>Christine Abdel-Malek from WSP Canada introduced her team and gave a brief into the ESIA study. The study would mainly focus on:</p> <ul style="list-style-type: none">- The biological component- The physical component- The social component

	<p>She reiterated that this project would be a long-term relation and that the project cycle would be about thirty years. 2021 would be a preparatory phase mainly for the ESIA studies as well as the detailed design of the project. The project would kick off in 2022 and go on for three and a half years.</p> <p>She informed the community representatives that social sample surveys would be carried out in two weeks' time and urged all to participate, as the collected data would be analysed, and feedback given. She then invited Julius Ngundo from Norken to facilitate the question and answer period and translate to Swahili when required. He took 3 to 4 interventions at a time before inviting the adequate project team members and sponsors to give more information and answer the questions raised. Special attention was given to invite representatives from vulnerable groups to participate.</p>
<p>5</p>	<p>COMMENTS, QUESTIONS AND OBSERVATIONS</p>
	<p>Overall the project is welcomed, and participants are supportive of the project. The main comments and observations made during the exchanges that followed the presentations are:</p> <ol style="list-style-type: none"> a. From the Member of Parliament for Lari Constituency (MP) –Mr. Jonah Mburu: <ul style="list-style-type: none"> - The employment issue is very important, we need a commitment for local employments; - A dispute/resolution committee should be created; - An interchange in Lari is needed, also trucks might shift from the A8 South, so we need to plan an important increase in the amount of trucks using the new A8 Highway; - Important to make sure the project is joining with other major roads of the area; - Mau Mau road project is undergoing, it would be important for the team of the Nairobi-Nakuru-Mau Summit Highway to sit with the Mau Mau Road Project and make sure they are well integrated; - Timelines should be respected as much as possible, it would be beneficial to have a main Contractor on the project to follow. b. From the Member of County Assembly (MCA) – Lari-Kirenga Ward – Mr. Kirichu: <ul style="list-style-type: none"> - Thankful for the project. We are all together and will work together; - It's important to create employment to the local population and offer them a good salary; - Connecting the new highway to the existing road network is important. The County of Kiambu and its administration would be happy to help and share information about where is the road local road network. c. From Mr Kariuki (Assistant chief Nyambari): <ul style="list-style-type: none"> - What projects will the proponent implement as part as the Social Corporate Responsibility? - Will the project offer employment for our local community? d. From Mr Lucas Kinyua (community leader): <ul style="list-style-type: none"> - Attention should be paid to Gitumba sub location fauna and flora as it is close to the project area. e. From Pastor James Kimani: <ul style="list-style-type: none"> - Due to the high level of road users in the community of Lari, it is recommended to provide interchange lanes and footbridges for pedestrians; - Sanitary pads are greatly needed in the community. It would be very appreciated if as part of a social corporate responsibility or community development plan, the project buys sanitary pads for girls of the community. We have about 3 schools for a total of 300 girls (James: 07 24 56 39 34, Josphat 07 20 76 01 60). f. From Ms Margaret Muthoni (Women leader): <ul style="list-style-type: none"> - Afraid that the project might create some social ills such as sexual abuse and gender-based violence. g. From Ms Mercy Kamau (youth leader): <ul style="list-style-type: none"> - Skilled and unskilled labour should be considered. The youth need employments. - Noise, water, fauna, flora, air pollution and health issues are important to be considered and mitigated h. From Ms Jane Waweru (vulnerable group representative): <ul style="list-style-type: none"> - Please give single mothers work to help their situation. i. From Mrs Grace Gitau: <ul style="list-style-type: none"> - What will happen to the human activities around the road? - What is the livelihood restoration plan for businesses trading next to the road? - There are many viewpoints, and these are important economical sites. - What will happen to the structures in place?

Minutes of Meeting

	<ul style="list-style-type: none"> - How will the road crossing be designed for agricultural farmers of the area? There are many tea farmers that need to cross the road to deliver tea to collection senders. Where will they cross and pass once the highway is built? <p>j. From other participants (unidentified):</p> <ul style="list-style-type: none"> - Concerns about the road runoff water that might pollute the quality of the existing water sources. - Drainage at Karagira should be considered to avoid flooding. - What is planned to ensure that the local community benefit from the project? It is important to think about the youth. We have skilled people also in the community that would benefit from working on the project. We would like to also have some training to provide specific skills to locals of when construction will be completed. - Will there be a program to help the community such as a Community Development Program?
--	---

6 GENERAL INFORMATION GIVEN TO MAIN TOPICS

Topic	Information
Employment	Local community members will be considered for job opportunities in the respective project sections where feasible. The Project Company and Contractor welcome the suggestions made by the various Stakeholders that Community Members seeking jobs to register at the relevant county or constituency offices to facilitate identification of required skills.
Drainage	Geotechnical and hydrological surveys were conducted to assess the conditions of the various sections along the Project Road. These would inform the design specifications and ensure that sufficient drainage facilities are provided. The Project Company and Contractor welcome contributions from the Community Members and various Stakeholders on proposed long-term solutions for areas with periodic drainage challenges.
Corporate Social Responsibility	The proponent will take into consideration the recommendations given by the community members, guided by local administration and county government. This will also be informed by the overall county and constituency development plans in the respective county governments and constituencies and will consider the Project contract period of 30 years
Access	Access will be provided putting into consideration the recommendations of the community. Factors such as proximity to schools, market centres, churches and residences as well financial/economic feasibility shall be considered. People living with physical disabilities will also be considered. Access will be provided in form of underpasses, footbridges, service lanes among others.
Site specific inquiries	The participants were advised to write the recommendations and comments down and hand them over to the proponent team for their record, consideration and further action.

31/06/2018

THE DIRECTOR GENERAL

KENYA NATIONAL HIGHWAYS AUTHORITY

P.O BOX 49712-00100,

NAIROBI.

**RE: CONSTRUCTION OF UPLANDS- GITUNGURI RUIRU ROAD (Currently in
progress)**

I want to register my observations and sincere concerns with you on the above mentioned major road (a sub-trunk route) which is currently in progress from Nyambari Town, off the Nairobi -- Nakuru Highway (Route A 104).

In my opinion, the initial civil works for subsequent tarmac pavement and final carpeting is wanting Bio-degradable materials/matter if not thoroughly cleared will result in crack and pot holes after a short while. Besides excess axle weights, this and poor drainage systems are what is ailing Kenyans roads most.

Let me site the drainage (road sides works) going on presently between the Highway and where the road crosses Nbi-Limuru Naivasha old Railway line at Uplands Railway Station/Upland Bacon Factory.

These channels will collect a lot of water during heavy storms which needs to be diverted through side concrete/masonry lined channels at short intervals to reduce high volumes and velocities to safe disposal areas.

This runoff should not cause problems to farms and dwellings or schools including farm feeder tracks. Concrete lined channels existed on the old road and you need to locate their positions. I hope planners factored new ones too in the road costing and budgeting.

My other concern is the section between the Lari Dairies Alliance Factory and the Railway Station. There is a sharp right turn bend, and then a sharp left bend and finally a very sharp right bend after crossing the railway. (Sharp corners) These are dangerous spots when coming from Nairobi – Nakuru Highway for new drivers to the road and careless ones. Incidentally this road will greatly reduce traffic jams for vehicles coming from Northern and Western Kenya going to Nairobi or Eastern Kenya, especially over weekends and holidays.

The road needs to be safe for motor vehicle travelers and pedestrians. We need to be pro-active in ensuring this. This is a highly populated area with many public institutions (Primary and Secondary Schools, Health Facilities, Churches and Trade and Business premises). These will need sidewalks but the road reserves seem to have been encroached on by the farm owners forcing human traffic to walk along the tarmac road shoulders. These are day school where pupils commute daily and they are at risk from motor vehicles and motor bikes and donkey carts felling transporting manure and farm produce to Nyambari Town Roadside markets.

From the aforesaid on this section of the road, the GoK needs to review its position on acquisition of portions of land touching the road reserve and some plots at uplands trading centre i.e some portion of the private land between the junction at Nairobi – Nakuru Highway and where the contractors have sited their depot, to construct pedestrians' sidewalks. UPLANDS TRADING CENTRE

The GOK needs to carry out an edit and audit of the social cost in terms of loss of human life and injuries which are eminent if the status quo remains vis-a-vis the cost of acquiring the private land to mitigate the risks and dangers envisaged. It needs to make sure farms/land and real estates are not overpriced making it very costly to acquire these portions. It would be cost effective and efficient for government to exchange the three bend section of the road at Uplands Trading Centre with plots which will be acquired.

NB/

The state/government and individuals citizen have in the past incurred heavy/hefty costs resulting from allotment of/or sanctioning of construction on public utility lands by the then Powerful Provincial Administration Personnel and former local Government Councilors without respect to the law government such lands. This is a problem which should be addressed once and for all so that individuals or counties do not encroach on National Government land for temporary or permanent development. Public land should remain fallow until put in the intended use by the Government Department concerned or there is a land-use change sanctioned by the cabinet. The government and the Attorney General should enact stringent laws and through parliament to curb encroachment. Farming and planting trees or putting up any structures

including open markets should be totally disallowed to eradicate conflicts. When the government wants to put its land in use, encroachers backed by politicians ask for compensation.

The current National Constitution gives citizens a say on development through community participation. This therefore necessitates socio-marketing to the communities along the construction routes to brief them about the programme and learn their concerns about the project implementation. This is the time you inform the beneficiaries about their individual and collective responsibilities and obligations and their rights. Learn Lessons from the Standard Gauge Railway under construction from Mombasa to Naivasha. Take the opportunity to sensitize them about the stealing of construction materials including cement, sand, ballast and tar and metals among others which amount to corruption which is the most deadly rot in this nation and every citizen ought/have to participate in its kit-out and total eradication. Alley fears and makes them friendly to the project by unveiling the benefits. This creates acceptance and ownership of projects by communities and society at large.

It is very unfortunate that National government Technical Supervisors (for this case Road Engineers) are conspicuously absent when work is in progress and only come to give certificates of completion at the end of the project. This is the same with Counties Public Service Personnel. The contractors' roles are parallel to those of GoK engineers but to the same destiny. Engineers should therefore carry ^{out} their oversight duties independently and effectively.

The sub-trunk route is a P.S.V road which will require properly designated and marked roadside stops to avoid road obstruction by Matatus. The section between Nyambari Town and Uplands Railway Station is a busy residential area and will require street/road lighting.

Looking forward for your response at the earliest sincere convenience.

WITH SENTIMENTS OF RESPECT AND GOODWILL,

VERY CONCERNED LOCAL CITIZENS.

JOHN MARK NJOROGE,

10	Christine Abdel-Malek	WSP Canada	+15142500052	christine.a.malek@wsp.com

ITEMS DISCUSSED	
1	Is there any need to acquire land for the project?
2	KeNHA and Kiambu County had conflicts over water overflows during the construction of James Gichuru-Rironi Road. This should not happen again for the A8 Highway Project. Please make sure this issue is addressed.
3	The road will be a game changer for this section.
4	Make sure that there is minimal ambiguity of the project by consulting stakeholders. It's important not to affect the town with this new project of highway: <i>It's important to design WITH US and not FOR US!</i>
5	Make sure there is minimal interruption for the compensation process. It's important to make this process very quick and efficient, and people are not affected for a long period of time.
6	There are many roads in Kiambu. It's important to make sure they are all properly connected.
7	The road will not only be used for carrying passengers but also for transporting farm produce. The road should also operate as an agricultural corridor as Kiambu is an important source of agricultural products, such as cabbage, potatoes, carrots and kale.
8	Important to construct the road with minimal disruption to road users.
9	Share the design with Kiambu Administration as it evolves, so they are able to provide input.
10	Make sure that the roads don't collapse and are using high quality material.
11	At Soko Mjinga, consider having a market for agricultural shopping.
12	Even for small roads, consider putting the same standard of tarmac (asphalt), such as Acre Ithano road. This road is missing tarmac on 0.8 km when connecting to the main A8 highway.
13	Concerned about the delays at the toll stations, as they slow down the traffic flow.

Minutes of meeting

Project	Nairobi-Nakuru-Mau Summit Highway		
Project Number	201-10312-00	Date	January 26, 2021
Time	9h30	Venue	PCEA Church, Limuru Compound, Kiambu
Subject	First Round of Consultation - Limuru Sub County Community		
Participants	Please refer to the Appendix for the attendance list (167 participants)		

SUBJECT RAISED

1	WELCOMING REMARKS - DCC
	<p>The meeting was officially opened at 10:27am by DCC-Limuru Sub county Mr. Charles Mukele who invited Pastor Joseph to lead in a word of prayer. The DCC later welcomed all the community representatives from Bibirioni and Limuru as well as the KeNHA and Vinci teams to the meeting. He explained to the meeting attendants that the project was particularly important in addressing traffic issues. He reiterated that the road project would bring about many benefits to the community and that farmers will particularly be able to transport their produce to the market with ease. Furthermore, the project will open up the education and employment opportunities. He later invited DD-KeNHA to introduce his team.</p>
2	DD - KENHA
	<p>Mr. Walter Nyatwanga of KeNHA gave a brief on why the project was of importance and stated that the Nairobi-Nakuru-Mau Summit Highway project will be of a great benefit to the communities along the project and Kenya as a whole. He stated that the winning bidder in 2017 was consortium composed of Vinci & Meridiam working in partnership. He later welcomed the Vinci & Meridiam team to take over the meeting.</p>
3	MERIDIAM & VINCI
	<p>Mrs. Sophie Debost, from Vinci, introduced the Vinci and Meridiam team and informed everyone at the meeting that this was an official commencement of the 2nd public participation into this project. She stated that the project is being developed following an international bidding process; contract term is 30 years with construction over 3,5 years but with some sections completed earlier. Vinci and Meridiam would design, construct and maintain the road for twenty-six and a half years under the Public Private Partnership Model.</p> <p>The project would be done in sections for both the A8 Rironi-Mau Summit and A8 South Rironi-Mai Mahiu and would incorporate service lanes in urban centres and underpasses for farmers to avoid accidents.</p>
4	ESIA TEAM- WSP & NORKEN

Ms Christine Abdel-Malek from WSP Canada introduced her team and gave a brief into the ESIA study. The study would mainly focus on:

- The biological component
- The physical component
- The social component

She reiterated that this project would be a long-term relation and that the project cycle would be about thirty years.

2021 would be a preparatory phase mainly for the ESIA studies as well as the detailed design of the project. Mitigation measures would then be captured in the ESMP to be used as a guiding principle for the project. The project would kick off in 2022 and go on for three and a half years.

She informed the community representatives that social sample surveys would be carried out in two weeks' time and urged all to participate as the collected data would be analysed and timely feedback given. She then invited Julius Ngundo from Norken to facilitate the question and answer period and translate to Swahili when required. He took 3 to 4 interventions at a time before inviting the adequate project team members and sponsors to give more information and answer the questions raised. Special attention was given to invite representatives from vulnerable groups to participate.

5 COMMENTS, QUESTIONS AND OBSERVATIONS

Overall the project is welcomed, and participants are supportive of the project. The main comments and observations made during the exchanges that followed the presentations are:

- a. From Deputy County Commissioner:
 - Community involvement is an important aspect for appropriate design of the highway
 - The information given to the stakeholders will be disseminated to the rest of the community
 - There are a lot of accidents on the A8, every week we have about 3 deaths and 15 accidents at Manguo section
 - There are a lot of traffic jams on the A8 road, it can take up to 5 hours for a stretch of 155km to Nakuru
 - Please ensure people will be able to access their home residences by providing designated crossing points
 - Very important road for transportation of farming products to markets
 - Essential to give employment opportunities to locals
- b. From the representative of the Member of Parliament for Limuru Constituency (MP) – Mister Muchai:
 - Please provide employment along the corridor for Limuru local population;
 - Ensure a continuous involvement of the population into the project;
 - Ensure that the design provides for continuous movements for the Mai Mahiu road which is clogged in case of accidents.
- c. From Chief Bibirioni:
 - Surveys have been completed for kiosks along the road, what happened to the data?
 - What is the compensation for the vendors?
- d. From John Mucheru (Farmer):
 - The Bibirioni Community Water Project has a waterpipe system along the highway. Will the new highway project interfere with our waterpipe system and in the positive, what is the mitigation plan?
 - The width of the ROW should be easier to identify. Between road marks, it's difficult to know where it ends, is there a possibility to put a fence, in that way it would be easier to follow up on compensation.
- e. From vulnerable groups:
 - Provide passage for wheelchairs and physically challenged persons
- f. From Women leader:
 - Thank you for inviting us, lets continue the collaboration and participation among stakeholders
 - Please provide jobs equally for boys and girls
- g. From Mr. Lawrence Muchiri:
 - A lot of people are still waiting for their compensation. This process should be closed before construction. We don't need a project from France if it's going to create more problems to the community or if it's taking our land. Everyone should be compensated before going forward with this project. We had many compensation issues with the Gatundu Dam.
- h. From Donald Nganga:
 - Concerned for people who have invested in rental houses through loans and the possibility that they may not be able to repay their loan on time if compensations delay. Tenants might vacate because of the demolition that will result in a problem for the owner to pay its loan amount.

- i. From Mary Wairimu:
 - Concerned about potential cracks on her house caused by the construction activities of the highway. Afraid that it might create damage or even the collapse of her house.
- j. From Juliet Murathe:
 - Please provide a clear map of where the road is passing and give this information to the chief so that we can refer to him to validate it if our land is impacted or not. Land affected from the project should not only be compensated for their value, but also for the fact that owners cannot sell, develop nor take a loan on that land due to the future project. This is causing a lot of prejudice to owners.
- k. From Kimani Munyaka:
 - Please protect the wetland, what is the mitigation measures for Mangua Wetland?
- l. From Sarah Njugu:
 - There are many churches in our village (Kuambira) and many kids are crossing the road. It's very dangerous, please make sure it becomes safe for our children to cross and reach the churches.
- m. From Jane Wanjiku:
 - The project should consider the transport needs for agricultural products;
 - We have a lot of swamps in the area that might affect the road and make it collapse. The design and the construction of the road should be good enough to withstand the natural conditions;
 - Public participation should continue also during construction.
- n. From other participants (unidentified):
 - What is the employment procedure during construction? The process should be transparent and clear.
 - It would be important to be informed in advance before starting the construction in order for the population to salvage material of structures along the highway.
 - There are many major projects in the area and as a result, storm water is an issue. This affects families because the drainage system isn't appropriate.
 - There is a need of interchange at the junction between class A and B roads at Mutarakwa region – corresponding to section 5 of the Nairobi-Nakuru-Mau Summit Highway.
 - A lot of people are still waiting for their compensation. It was supposed to be given in August 2020, but we are still waiting.
 - We would like to have more information about the planned road diversions.
 - Please provide a footbridge at Kamandura Primary School
 - James Gichuru Rironi Project promised a footbridge for one of our schools, but it was never built. It's important to comply with promises.
 - Important to offer landscape contracts to locals.
 - What percentage of the employment is reserved to the locals?
 - I have been following up on the compensation for 3 years but it was never addressed. I have attended the KeNHA office many times with no success.
 - Are you involved in Mau Mau Project?
 - What is the distance between the road and the properties? It's important to compensate before building.

KeNHA invited all stakeholders with compensation issues to provide their contacts and grievances to the KeNHA Team present at the meeting.

6 GENERAL INFORMATION GIVEN TO MAIN TOPICS

Topic	Information
Employment	Local community members will be considered for job opportunities in the respective project sections where feasible. The Project Company and Contractor welcome the suggestions made by the various Stakeholders that Community Members seeking jobs to register at the relevant county or constituency offices to facilitate identification of required skills.
Accidents/Road safety	Improved road safety is one of the key objectives in the implementation of the Project. The Project Road will have several safety measures in place such as: <ul style="list-style-type: none"> - A response team with an ambulance and towing services - Improved road alignment and road markings - Road signs - Street lighting in urban areas

Minutes of Meeting

Land acquisition	The project will be constructed along the already existing right of way, thus there will be no further acquisition of land apart specific sections identified by KeNHA for purposes of building interchanges
Compensation	In accordance with Kenyan Laws, the National Land Commission (NLC) is responsible for compensation with respect to the acquisition of land in addition to the existing Right of Way. So far, some landowners had already been compensated and that the process is still underway. Any Community Members with pending issues with respect to compensation were requested to see Mr. Walter Nyatwanga and the KeNHA Team present after the Public Meetings and present their concerns issues.
Drainage	Geotechnical and hydrological surveys were conducted to assess the conditions of the various sections along the Project Road. These would inform the design specifications and ensure that sufficient drainage facilities are provided. The Project Company and Contractor welcome contributions from the Community Members and various Stakeholders on proposed long-term solutions for areas with periodic drainage challenges.
Other ongoing projects such as James Gichuru project and Mau Mau Road	Other ongoing projects such as James Gichuru project and Mau Mau Road
Access	Access will be provided putting into consideration the recommendations of the community. Factors such as proximity to schools, market centres, churches and residences as well financial/economic feasibility shall be considered. People living with physical disabilities will also be considered. Access will be provided in form of underpasses, footbridges, service lanes among others.
Site specific inquiries	The participants were advised to write the recommendations and comments down and hand them over to the proponent team for their record, consideration and further action.

ITEMS DISCUSSED	
1	The County welcomes the Project. It will improve safety and reduce traffic.
2	The location of interchanges is important.
3	Let's work together as a team.
4	Important not to delay the ESIA
5	We will publicize the consultation activities to make sure everyone is participating.

ITEMS DISCUSSED	
1	When does construction begin?
2	Please consider the Urban Development Plan of Nyandarua County into your project. Many plans were already submitted to keNHA, and we would appreciate if they could be considered into the design of the Rironi-Nakuru-Mau Summit Highway project. It's important to also consider the physical plan of Magumu Area.
3	We will create a committee comprised of 3 ministers (Trade, Planning/ architecture, Transport) to assist on the project and share information.
4	What is the Corporate Social Responsibility (CSR) program? Please consider the market and the proposed Logistic Center for our area.
5	The section of the highway passing though Nyandarua is only 5 km long. We would like to work on the design and help the ESIA. As well, we would like a remarkable design for the interchange as it is the key entry point of Nyandarua County. A unique piece of architecture that the population could identify with, would be ideal.
6	Considering there is a dryport in Mai Mahiu, Kijabi Road, this must be improved to help transport farm products.
7	We have many young engineers who we would like to be involved with the project to gain experience and benefit from a knowledgeable transfer. They would also be interested in working voluntarily to learn.
8	We request additional acceleration and deceleration lanes near the Market of Soko Mjingo.
9	Please involve County Government in all steps.
10	The Nyandarua County Government Office will prepare a letter to keNHA to list what the County needs and requests to make sure those are considered during this highway project design phase: <ul style="list-style-type: none"> - access culverts - Gilgil-Nyahururu: need to access center and improve drainage system - Lay-bays for truck and heavy vehicles - Easy access to market for the population - Acceleration lane along the Olkalou stadium
11	Minutes of meeting will be prepared and sent to you as well.

MINUTES OF MEETING PREPARED BY:

WSP	Ghyslain Pothier, Project Director		March 23 2021

These minutes are considered to be an accurate recording of all items discussed. Written notices of discrepancies, errors or omissions must be given within seven (7) days, otherwise the minutes will be accepted as written.

Minutes of meeting

Project	Nairobi-Nakuru-Mau Summit Highway		
Project Number	201-10312-00	Date	January 27, 2021
Time	1h00pm	Venue	Magumu DO's office, Magumu, Nyandarua
Subject	First Round of Consultation - Kinangop Sub County Community		
Participants	Please refer to the Appendix for the attendance list (110 participants)		

SUBJECT RAISED

1	WELCOMING REMARKS
	<p>The meeting was scheduled for 1h00pm, although KeNHA and implementing partners' team arrived late. The meeting host was Mr John Njuguna - Magumu Chief and the ACC – Mr Njihia.</p>
2	DD - KENHA
	<p>Mr. Walter Nyatwanga of KeNHA introduced the team from KeNHA and the implementing partners. He then gave a brief insight into the project, the Public Private Partnership Concept.</p>
3	MERIDIAM & VINCI
	<p>Mr. Allan Munyua, from Meridiam, introduced his team and informed everyone in the meeting that this was an official commencement of the 2nd public participation into this project. He stated that the project is being developed following an international bidding process; contract term is 30 years with construction over 3,5 years but with some sections completed earlier. Vinci and Meridiam would design, construct and maintain the road for twenty-six and a half years under the Public Private Partnership Concept.</p> <p>The project would be completed in sections for both the A8 Rironi-Mau Summit and A8 South Rironi-Mai Mahiu and would incorporate service lanes in urban centres and underpasses for farmers to avoid accidents.</p> <p>He stressed that safety is their top priority for all road users and the communities around. Separated U-turn facilities, bus shades and improved lighting along the project road will be given priority.</p>
4	ESIA TEAM- WSP & NORKEN
	<p>Ms. Christine Abdel-Malek from WSP Canada introduced her team and gave a brief into the ESIA study. The study would mainly focus on:</p> <ul style="list-style-type: none">- The biological component

16e étage

wsp.com

	<ul style="list-style-type: none"> - The physical component - The social component <p>She reiterated that this project would be a long-term relation and that the project cycle would be about thirty years.</p> <p>2021 would be a preparatory phase mainly for the ESIA studies as well as the detailed design of the project. Mitigation measures would then be captured in the ESMP to be used as a guiding principle for the project in the 2nd round of the public consultation. The project would kick off in 2022 and go on for three and a half years.</p> <p>She informed members that social sample surveys would be carried out in two weeks' time and the collected data analysed and timely feedback given. She requested the locals to cooperate with the team conducting the surveys. She then invited Julius Ngundo from Norken to facilitate the question and answer period and translate to Swahili when required. He took 3 to 4 interventions at a time before inviting the adequate project team members and sponsors to give more information and answer the questions raised. Special attention was given to invite representatives from vulnerable groups to participate.</p>
--	---

5	COMMENTS, QUESTIONS AND OBSERVATIONS
----------	---

	<p>Overall the project is welcomed, and participants are supportive of the project. The main comments and observations made during the exchanges that followed the presentations are:</p> <ol style="list-style-type: none"> a. From the Land Minister Eng Lawrence Mukundi: <ul style="list-style-type: none"> - Land planning in Magumu area has been identified as a commercial hub in the last three years (with UNHABITAT): important to design correlation between the project and the development plan that is already in place; - The project design should factor in population increase and expanded urbanization including Non- Motorized Transport (NMT). He committed to share the development plan for the Magumu area the County Government had been working on for it to be incorporated into the proposed project. b. From the ACC Mr. Njihia: <ul style="list-style-type: none"> - The investors should give subcontracts to the local companies to give residents employment and business opportunities; - Wellbeing of the community is important; - He highlighted that the project may have negative impacts that are short term. However, the benefits are long term and will be for the future generations: “We might plant trees, and never benefit from the shade.” c. From other participants (unidentified): <ul style="list-style-type: none"> - How do we ensure that road furniture including signposts are maintained and not vandalized? - What parameters shall be used for compensation? - Shall the developer own the highway? - Please provide adequate notice for the construction works to enable business plan for any interruptions. - What tolling rates will be applied and how will this affect local residents - Request for service lanes to service flyover at Soko Mpya. Also need service lanes to decongest the highway as people stop to shop at the Soko Mpya and Soko Mjinga - It was reported that there are accidents at Soko Mjinga where there are many schools. Thus, it was recommended that pedestrian crossings are provided in the design of the road at Soko Mjinga area to ensure safety. - The towns have been divided in two by the road. Provide proper access to each side of the road by constructing service lanes. Motorbike users (boda boda) won't be able to use the highway, thus the need to provide service lanes. - The participants requested to be furnished with the project design so that they can understand the concepts to better comment and participate in the engagement process. - How many bridges, crossings and overpasses are planned in the design? - Some highways do not serve the community. The main objective of the highway is to serve the community. Thus, it is important to add service lanes to access the markets i.e Soko Mjinga and Soko Mpya Markets. - The participants requested proper design of storm drainages to prevent flooding and damage of property e.g. homesteads and farms. The water from the storm drains should be channelled to natural water courses like rivers. - Provide details of the road connecting to the dry port at Mai Mahiu (Standard Gauge Railway-SGR). - The residents living in close proximity to the project road and are not sure if they are affected or not by the project were advised to see KeNHA representatives after the meeting.
--	--

- Enhance dust mitigation best practice measures such as watering dusty surfaces.
- Where will construction materials be sourced from? Can the materials be supplied by the local community?
- Footpaths and service Lanes along Soko Mjinga and Soko Mpya are important and their design should be presented during the second round of consultations.
- The participants requested the list of CSR projects that will accompany the project – former MCA.
- The distance between bus stops is an important element of the design. When it is too far apart, it becomes unsafe for users especially women and children to walk from the bus bays to their homes at night. Therefore, bus bays should be located at strategic points close to crossings and residences to enhance safety.
- The safety of children during construction is a priority. Training on safety should be given to Public Service Drivers and truck drivers.
- Have a plan in place for noise mitigation where there are sensitive receptors such as schools and health centres during construction phase. Give notices in advance when there are scheduled noise generating activities.
- The CSR program should consider helping Magumu as the community has vulnerable people including orphans, sick people and the aged.

6 GENERAL INFORMATION GIVEN TO MAIN TOPICS

Topic	Information
Employment	Local community members will be considered for job opportunities in the respective project sections where feasible. The Project Company and Contractor welcome the suggestions made by the various Stakeholders that Community Members seeking jobs to register at the relevant county or constituency offices to facilitate identification of required skills.
Corporate Social Responsibility	The proponent will take into consideration the recommendations given by the community members, guided by local administration and county government. This will also be informed by the overall county and constituency development plans in the respective county governments and constituencies and will consider the Project contract period of 30 years
Accidents/Road safety	Improved road safety is one of the key objectives in the implementation of the Project. The Project Road will have several safety measures in place such as: <ul style="list-style-type: none"> - A response team with an ambulance and towing services - Improved road alignment and road markings - Road signs - Street lighting in urban areas
Compensation	In accordance with Kenyan Laws, the National Land Commission (NLC) is responsible for compensation with respect to the acquisition of land in addition to the existing Right of Way. So far, some landowners had already been compensated and that the process is still underway. Any Community Members with pending issues with respect to compensation were requested to see Mr. Walter Nyatwanga and the KeNHA Team present after the Public Meetings and present their concerns issues.
Drainage	Geotechnical and hydrological surveys were conducted to assess the conditions of the various sections along the Project Road. These would inform the design specifications and ensure that sufficient drainage facilities are provided. The Project Company and Contractor welcome contributions from the Community Members and various Stakeholders on proposed long-term solutions for areas with periodic drainage challenges.
Access	Access will be provided putting into consideration the recommendations of the community. Factors such as proximity to schools, market centres, churches and residences as well financial/economic feasibility shall be considered. People living with physical disabilities will also be considered. Access will be provided in form of underpasses, footbridges, service lanes among others.
Site specific inquiries	The participants were advised to write the recommendations and comments down and hand them over to the proponent team for their record, consideration and further action.

ITEMS DISCUSSED

- 1 Thankful for this big project as it is very important.
- 2 What about the tolling system? It would be the right time to discuss this issue with the population, thus we should form a committee.
- 3 The issue of SESS must be discussed. This topic should be discussed with the regional engineers.

ITEMS DISCUSSED	
1	How many interchanges are planned and where are they located? Please share this information. Wherever there is an intersection, an interchange should be planned.
2	Limuru area should be accessed through slip roads.
3	The entrance to the area of Naivasha suffers from a lot of traffic; this project will hopefully allow access into Naivasha more easily. Near the police stop, an interchange is needed.
4	The town of Gilgil can be reached by two entrances. The second one, coming from Nairobi, is often congested and it is difficult to access the city from that entrance. An interchange is also needed at this location.
5	There are many communities living across the future highway, a lot of children and churches. How is the project going to keep communities together and avoid separating them? This issue is very important. Accidents can be avoided with increased safety. The section of Salgaa is very unsafe (14km).
6	With concerns to the tolling system, if someone uses the highway for a short distance (1 or 2 km), what will be the cost? Are there special measures for local traffic?
7	There is a big problem related to truck parking areas. It will be important to make sure parking areas for trucks are included into the project, as well as social infrastructure facilities for truck drivers, such as places to sleep and eat.
8	The social component of the project needs to be reinforced. The project should ensure creating small jobs and a clear recruitment mechanism. A well-structured organization is important for employment as it opens up opportunities to the population.
9	It will be important to plan the future urban development around the new highway. The road to Tikka did not plan for future development, and now there are a lot of problems created by the apparition of shops and businesses along the route. This route became an urban boulevard filled with shopping centers and lost its initial functionality. How will the Rironi-Nakuru-Mau Summit Highway take into account the urban development generated by the project? Some shopping areas should be included so that businesses do not appear at any location along the highway.
10	Can you please share more information about the future viaduct planned for Nakuru? Development of bypasses and alternatives routes will be important. The proposed bypass through Lake Nakuru National Park should be studied. We would like to know where the potential diversions are located. It will also be important to avoid pollution on local roads.
11	How long will the construction phase be? Can you let us know your approach for construction? Is it by section? Please share this information with us. Perhaps it would be beneficial to start building many sections at the same time, so it is faster?
12	During work for the rehabilitation and strengthening of the A8 South, it will be important to make sure the circulation on that road stays fluid. That road is used by tourists to reach Maasai Mara. The shoulders should be increased, and adequate provision should be provided in the event of vehicle breakdown.
13	When will this project start? It's important to put required resources to ensure it is progressing as quickly as possible. The more time it takes, the more the territory will change, and studies will become outdated. Also, the population doesn't have a good view of PPP, as most of PPP projects take too much time. Let's prove the contrary.
14	Will the roundabout be maintained? Is it supposed to be a separated grid?
15	The County of Nakuru agrees to create a Committee to follow and help on this project. It will be created through Eng. Maritim.
16	Is there going to be tolling before the end of construction (3-5 years)? What will be the cost to travel from Nakuru to Nairobi?
17	Minutes of meeting should be approved and shared with the County. You can send them to Faith Milkah.

Minutes of meeting

Project	Nairobi-Nakuru-Mau Summit Highway		
Project Number	201-10312-00	Date	January 28, 2021
Time	11h30am	Venue	County Commissioner's Office Compound, Biashara, Nakuru
Subject	First Round of Consultation - Nakuru West and Nakuru East Sub Counties Community		
Participants	Please refer to the Appendix for the attendance list (96 participants)		

SUBJECT RAISED

1	WELCOMING REMARKS
	The meeting officially began at 11:37am presided over by ACC Madam Mary W Mwangi with an introduction of all the community representatives from various locations and sub locations along the project road.
2	DD - KENHA
	The Eng Kefa Seda from KeNHA introduced the team from KeNHA and the implementing partners giving a brief insight into the Rironi-Nakuru-Mau Summit project under the Public Private Partnership Concept.
3	MERIDIAM & VINCI (RVH)
	<p>Mr. Allan Munyua, from Meridiam, introduced his team and informed everyone in the meeting that this was an official commencement of the 2nd public participation into this project. He stated that the project is being developed following an international bidding process; contract term is 30 years with construction over 3,5 years but with some sections completed earlier. Vinci and Meridiam would design, construct and maintain the road for twenty-six and a half years under the Public Private Partnership Concept.</p> <p>The project would be completed in sections for both the A8 Rironi-Mau Summit and A8 South Rironi-Mai Mahiu and would incorporate service lanes in urban centres and underpasses for farmers to avoid accidents.</p> <p>He stressed that safety is their top priority for all road users and the communities around. Separated U-turn facilities, bus shades and improved lighting along the project road will be given priority.</p>
4	ESIA TEAM— WSP & NORKEN
	<p>Ms. Christine Abdel-Malek, from WSP Canada, introduced her team and gave a brief into the ESIA study. The study would mainly focus on:</p> <ul style="list-style-type: none">- The biological component;- The physical component;

16e étage

wsp.com

- The social component.

She reiterated that this project would be a long-term relation and that the project cycle would be about thirty years. 2021 would be a preparatory phase mainly for the ESIA studies as well as the detailed design of the project. Mitigation measures would then be captured in the ESMP to be used as a guiding principle for the project in the 2nd round of the public consultation. The project would kick off in 2022 and go on for three and a half years.

She informed members that social sample surveys would be carried out in two weeks' time and the collected data analysed and timely feedback given. She requested the locals to cooperate with the team conducting the surveys. She then invited Julius Ngundo from Norken to facilitate the question and answer period and translate to Swahili when required. He took 3 to 4 interventions at a time before inviting the adequate project team members and sponsors to give more information and answer the questions raised. Special attention was given to invite representatives from vulnerable groups to participate.

5 COMMENTS, QUESTIONS AND OBSERVATIONS

Overall the project is welcomed, and participants are supportive of the project. The main comments and observations made during the exchanges that followed the presentations are:

- a. From a representative of the Member of Parliament (MP)—Mr. Akibah:
 - Concerned that there would be an occurrence of social ills. He gave an example of children being left fatherless when laborers finish their work.
- b. From a matatu leader (Francis Kimani):
 - How Nakuru residents will benefit from the proposed overpass?
 - Proposed a bypass in place of the overpass so that residents would benefit more. Using a bypass would allow motorists to stop over Nakuru town as opposed to driving through.
- c. From a representative of landowners near the road Right of Way (Andrew Yatich):
 - Grateful to KeNHA/RVHL consortium for the proposed project;
 - Interested in the design and questioned whether the road project scope includes land acquisition along the right of way. Are private farms affected by the project?
 - If acquisition was going to be done, he advised that sensitization should be done, and early notice given to the affected people. He noted that compensation delays project progress;
 - How the investors would recover their investment from the project. Is it through tolling, and how much will be the charges?
- d. From Mr. Joseph (representing business community):
 - Roadside traders frequently cross the road to purchase stock for their business. Will the road design allow access from one side to the other, to ensure that such businesses do not collapse?
- e. From a representative of people living with disabilities (PLWD)—Fredrick Owako:
 - Consider giving the children of people living with disabilities job opportunities so that they can earn an income to support their households. A key contact was given to help during social surveys (to interview people living with disabilities)—0722572632 and 0722572362.
- f. From a representative of youth—Ms. Maimuna (Youth Bila Noma):
 - Youth should be considered for job opportunities. Village elders would be very resourceful when sourcing for labor, as they know, individual qualifications of residents;
 - The road drainage system should be well designed and constructed for the need;
 - A sign language interpreter should be part of the facilitation team to ensure that people with hearing impairment can participate in the stakeholder engagement meeting and so that they can be included in job opportunities.
- g. From vulnerable groups representative: Children Officer:
 - Possibility of occurrence of social ills such as sexual violence owing to the presence of non-local laborers, important to mitigate.
- h. From women groups representative: The Chairman of the National Women Steering Committee (Irene Wambui):
 - Women should be offered job opportunities and gender-based violence should be mitigated.
- i. From Fredrick Mbuthia — (Teacher in Free Area):
 - Borrow pits and quarries should be rehabilitated as they would otherwise pose a fall risk;
 - Dumping sites should be cleared.
- j. From Reverend Richard Magodi:
 - A foot bridge should be erected at Free Area;
 - Check poor drainage condition within the area and unclog existing drainage systems;
 - There are many schools within Free Area, thus there is a need to provide foot bridges at school areas.
- k. From a church representative (Mike Brown):

- Include a nice design to ensure road structures are aesthetically pleasing and revegetation should be done where trees have been cleared;
- Thankful that the project team is committing to stay on for thirty years, which gives the project company a chance to solve problems related to the road as they arise.
- l. From Mr. Ibrahim:
 - Request for the youth to be considered for job opportunities.
- m. From Mr. Kinyua:
 - Previously, Nakuru West Primary School pupils were victims of road accidents (while crossing to Bangladesh). Speed bumps have since been constructed but proposes that footbridges should be erected near schools to ensure that children do not walk more than 800 m.
- n. From other participants (unidentified):
 - Make sure the social survey covers all categories of the affected people.
 - Previously, some contractors/companies have been known to exploit their employees/laborers. The project contractor was implored to follow the labor laws of Kenya to ensure that there are structures and procedures for employment.
 - Give job opportunities to local residents living within the project area and not based on nepotism/corruption.
 - As part of CSR, it was proposed that schools in slums should be given priority.

6 GENERAL INFORMATION GIVEN TO MAIN TOPICS

Topic	Information
Employment	Local community members will be considered for job opportunities in the respective project sections where feasible. The Project Company and Contractor welcome the suggestions made by the various Stakeholders that Community Members seeking jobs to register at the relevant county or constituency offices to facilitate identification of required skills.
Land acquisition	The project will be constructed along the already existing right of way, thus there will be no further acquisition of land apart specific sections identified by KeNHA for purposes of building interchanges
Corporate Social Responsibility	The proponent will take into consideration the recommendations given by the community members, guided by local administration and county government. This will also be informed by the overall county and constituency development plans in the respective county governments and constituencies and will consider the Project contract period of 30 years
Accidents/Road safety	Improved road safety is one of the key objectives in the implementation of the Project. The Project Road will have several safety measures in place such as: <ul style="list-style-type: none"> - A response team with an ambulance and towing services - Improved road alignment and road markings - Road signs - Street lighting in urban areas
Tolling	It was confirmed that it is the intention of the Government that the Project Road shall be Tolloed and that road users would pay a toll fee to use the road. The Government intends to engage a Toll Operator to collect tolls on the Project Road and will establish the toll rates to be paid.
Drainage	Geotechnical and hydrological surveys were conducted to assess the conditions of the various sections along the Project Road. These would inform the design specifications and ensure that sufficient drainage facilities are provided. The Project Company and Contractor welcome contributions from the Community Members and various Stakeholders on proposed long-term solutions for areas with periodic drainage challenges.
Access	Access will be provided putting into consideration the recommendations of the community. Factors such as proximity to schools, market centres, churches and residences as well financial/economic feasibility shall be considered. People living with physical disabilities will also be considered. Access will be provided in form of underpasses, footbridges, service lanes among others.
Site specific inquiries	The participants were advised to write the recommendations and comments down and hand them over to the proponent team for their record, consideration and further action.

SUBJECT RAISED

1	
	This is a good project to alleviate the traffic on A8 road. However, it must be well planned as it will have some impacts.
2	
	Only 5km of the A8 highway will pass on Baringo territory and along the forest. It will be important to make sure that all trees that will be cut, will be replanted elsewhere. According to the UN, every country needs a minimum of 10% of tree cover, but here in Kenya, the tree cover is only at 7.2%. Consequently, it is essential to plant more trees and avoid lowering that percentage.
3	
	Forest cover will be removed during that project, as there are a lot of trees within the ROW at the moment.
4	
	The drainage system should be well managed where no problems are caused on the sanitary level. The population is using the Molo River that is close to the project. Siltation to that river should be verified.
5	
	It's important to take care of small trees to make sure they don't die during construction activities. Dust can be fatal to small trees as it affects their photosynthetic process. Please ensure appropriate mitigation measures are taken to avoid losing small trees located near the project.
6	
	It would be very beneficial to include a nice landscape into the project: grass, beautiful trees, flowers or other vegetation. This highway should not only bring you from point A to point B, but people should also enjoy their journey.
7	
	Please take into account the small village of Kibunja (around 2000 to 3000 inhabitants). This village is located near the project. Labour movement can create unwanted pregnancy and be harmful for the population.
8	
	If you take some source materials from the forest and quarries, please rehabilitate the sites after usage. Many projects are left open pit and never rehabilitated. It's important to comply with all mitigation measures included into the contract.
9	
	In order to be able to cut trees, you must ask for a permit from KFS. The first step is to request an inventory of all trees included in the ROW in order to value them and calculate the tree cover volume. You then have to pay 5% of the amount of the valuation. The permit is free of charge, but you need to pay 5% of the valuation volume of the trees you want to cut.
10	
	Concerning the revegetation. KFS would be happy to partner with the project team to provide trees from its nursery. We can help choose the right trees for the right type of soil. We also can offer a competitive price.

Minutes of Meeting

11	
	It's important to value the trees only when you are ready to begin the construction as the valuation is only good for a period of 6 months. Trees grow and every 6 months a new valuation is needed.
12	
	We have an important mapping department with digitalized maps that can be shared with your team. Please contact Mr. Kigonde from the KFS Karura Office.
13	
	Please share the timelines of the project with us so we will be ready and know when the inventory and valuation required to avoid delays for the permit issuance.
14	
	The following questions must be kept in mind for next consultation rounds as they will require answer: How much will it cost the KFS department to circulate as well as residents? Can KFS still circulate for free on the highway? We don't need a highway for our activities, so can we continue using the highway for free? Will there be an alternative road for those who don't want to pay?
15	
	The population is already paying very expensive taxes, they would not feel comfortable to pay again for the road.
16	
	Stealing of material is an important issue to consider. Can the project use a kind of material that will not be interesting for thieves, such as unusable materials to avoid crime? (to be considered)

Special attention was given to invite representatives from vulnerable groups to participate.</p>
5	COMMENTS, QUESTIONS AND OBSERVATIONS
	<p>Overall the project is welcomed, and participants are supportive of the project. The main comments and observations made during the exchanges that followed the presentations are:</p> <ol style="list-style-type: none"> a. From the representative of the Member of County Assembly (MCA): <ul style="list-style-type: none"> - Pedestrian crossing should be provided for at Kibunja to Nyanja to Kamara area; - There are many accidents at Total Centre (Mau Interchange): emergency measures should be put in place to prevent accidents in this area; - There are many schools on both sides of the road, and kids are dying while crossing. At the present moment, a little boy is being buried and too many children are dying trying to cross the road. b. From the Officer Commanding Police Division (OCPD): <ul style="list-style-type: none"> - There are many accidents, but instead of helping, the residents come and rob the victims; - Robberies are also happening, on the climbing lanes, while trucks are going slow, thieves take advantage to steal goods, by cutting the canvas covering the merchandise (katahema). c. From Bernard Kemei (school chairperson): <ul style="list-style-type: none"> - How the road would benefit the community? The proposed road design should provide service roads, access for schoolchildren i.e. footpath, livestock/cattle (animal crossing) and feeder roads to be culverted and improved. Access roads should be provided to the main highway. d. From the Head Teacher at Molo Highway Secondary School (Alice): <ul style="list-style-type: none"> - Add an interchange at the junction between Kibunja and the road going to Molo; - As part of CSR, the project company should consider constructing classrooms or laboratories at Molo Highway Secondary School. e. From Pastor Richard Kamara: <ul style="list-style-type: none"> - Accidents at Salgaa have reduced greatly thanks to the construction of a wall barrier between the two-way traffic carriageway; - Bumps should be constructed at black spot areas and signs erected appropriately along the highway. f. From Engineer Koech: <ul style="list-style-type: none"> - Why the name of the road being referred to as A8 as opposed to A104? - The existing road does not provide access to Kericho-Eldoret Road, it should be added to the project. That road should be widened and provide adequate access e.g. footbridges, flyovers, and speed bumps and rumbles to enhance safety in risky areas; - Is the new highway going to be joining with road B1? - Important to prepare for potential conflicts between Meridiam and VINCI during project construction phase. - Please consider persons living with disabilities in the design. g. From women representatives: <ul style="list-style-type: none"> - Provide toilets along the highway for road users; - The section from GSU approaching Mau Summit is narrow and therefore prone to accidents with pedestrians and motorcycles. It was recommended that a pedestrian walkway should be provided along this section; - KeNHA team should organize a forum with roadside traders in order to listen to their grievances; - What is the criteria for compensating for cemeteries? h. From a business community representative:

- A committee was formed during the construction of the existing road. This committee should be consulted during the construction of the proposed road for their views.;
 - An interchange should be added at the junction between A8 and the road to Molo;
 - Access to businesses is important and they should be included into the project, make sure it's possible to reach the villages as well.
- i. From Mr. Kennedy Kemei:
- Ensure that air quality, water quality and soil conditions are considered in the EIA. How will the noise concerns be addressed in this new highway Project?
 - Social ills will probably arise from the influx of workers to the project areas such as theft, important to mitigate;
 - The road project design should ensure that residents have access to water points as they are prone to accidents while crossing the road to fetch water from the nearby spring/river;
 - Consider that trade/market is the main economic activity of the local residents, therefore it's important to construct stalls/market for us to lower crime rates. If the population has a source of income, crime rates will reduce;
 - Ensure that locals especially youth are engaged for both skilled and unskilled labor. Do not import labor.
- j. From Mr. Paul Ndungu:
- Bus bays provided at Kibunja have been occupied by trucks, they should instead be used by Public Service Vehicles in order to avoid accidents;
 - The project should provide open communication avenues with all stakeholders especially members of the public.
- k. From Mrs. Linah Tanui:
- Compensation should be done for owners of structures along the right of way.
- l. From Mr. Ngeno:
- As part of CSR, the Mau Summit Police Station should be refurbished by construction with modern materials such as concrete. Currently, it is constructed with timber which poses a fire hazard.
- m. From Mr. James Kiptoo:
- Please help with provision of bursaries: toilets and footbridges should be added along the road.
- n. From other participants (unidentified or not fully identified):
- Observed that there is no provision for livestock/animal and schoolchildren crossings. Additionally, he recommended for provision of parking and bus stops. For CSR projects, Evans suggested that a market should be constructed for women to sell vegetables (Evans).
 - Many incidences of vandalism of streetlights on the existing road, it's important to find a way to ensure security and a good lighting system of the highway.
 - Ensure equality in gender when considering employment opportunities.
 - Employ youth at every road section (Pastor).
 - Social issues – What is the faith and culture of construction labourers? Could their culture and faith create a conflict with the locals? (Geoffrey)
 - An underground passage and parking area should be added at Kamara location (David).
 - Livelihoods of the residents near the proposed project areas should not be affected by the highway. Every week the community is losing 3 persons on the road. (Hillary).
 - Very grateful for the promptness of the traffic police in emergency response along the highway.
 - A rapid response centre should be set up at the section along Total area and speed limit set at Sogea and Total areas.
 - The contractor staff should consist of a community liaison person through whom communication would be coordinated to the stakeholders.
 - The project should plan for a small market (infrastructures, etc.) and make sure the road design allows for market expansion. (Nophat)

6 GENERAL INFORMATION GIVEN TO MAIN TOPICS

Topic	Information
Employment	Local community members will be considered for job opportunities in the respective project sections where feasible. The Project Company and Contractor welcome the suggestions made by the various Stakeholders that Community Members seeking jobs to register at the relevant county or constituency offices to facilitate identification of required skills.
Corporate Social Responsibility	The proponent will take into consideration the recommendations given by the community members, guided by local administration and county government. This will also be informed by

Minutes of Meeting

	the overall county and constituency development plans in the respective county governments and constituencies and will consider the Project contract period of 30 years
Accidents/Road safety	Improved road safety is one of the key objectives in the implementation of the Project. The Project Road will have several safety measures in place such as: <ul style="list-style-type: none"> - A response team with an ambulance and towing services - Improved road alignment and road markings - Road signs - Street lighting in urban areas
Compensation	In accordance with Kenyan Laws, the National Land Commission (NLC) is responsible for compensation with respect to the acquisition of land in addition to the existing Right of Way. So far, some landowners had already been compensated and that the process is still underway. Any Community Members with pending issues with respect to compensation were requested to see Mr. Walter Nyatwanga and the KeNHA Team present after the Public Meetings and present their concerns issues.
Access	Access will be provided putting into consideration the recommendations of the community. Factors such as proximity to schools, market centres, churches and residences as well financial/economic feasibility shall be considered. People living with physical disabilities will also be considered. Access will be provided in form of underpasses, footbridges, service lanes among others.
Site specific inquiries	The participants were advised to write the recommendations and comments down and hand them over to the proponent team for their record, consideration and further action.

24/08/2020

TO

KENHA

P.O BOX NAKURU

Dear Sir/Madam,

RE: ERRECTION OF BUMPS ON RD A104 & RD B1.

We the community of Mau-summit (Total area) are mourning the deaths of many people whom we have lost in the couple of years since the road was constructed due to accident. We are humble requesting your good office to assist in erecting the speed humps, & rumbles between the black spot in areas identified;-

- Between Rosoga Sawmill and Jogoo centre.
- Kericho-Total road (B1)
- Fly over between TTI & Pele primary
- Foot bridge between Mau summit Academy and interchange towards flyover
- Pedestrian walk from Rosoga Sawmill to Jogoo centre on both roads A104 & B1
- Streets lights from Rosoga Sawmill to Jogoo centre on both roads A104 & B1 hence the ones which are there are not serviceable.
- We need a road about the same as the one at (Sachaangwan)
- We need well planned stage for the motorist going to Kericho, Eldoret , Nakuru with sanitization places e.g. Urinal place and place for washing hands.
- Motor cycle shades
- Culverts where you deem it necessary for installations.

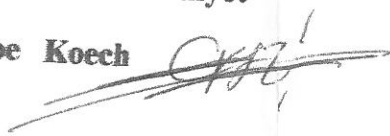

Yours,

Community

~~QUESTIONS~~ KAMARA LOCATION ISSUE (Bump)

- From Ntania to Kwa Hamu area we have a lot of Road accidents happening. We've demonstrated mostly, but we don't have get solutions from KENHA, we are losing children and properties. Please see a way of erecting bumps so as to curb the speeding M/Vehicles.

We have schools on both sides of the highway, and we are worried on daily basis ~~at~~ about the safety of our children.

LIYAH TORU

0714999050

- (1) Consider putting underpass or overpass in Total Centre.
- (2) Consider road from Melaitich to ~~Tabain~~ Chemobel to Tabain Primary School and via Tabain AGC as a service lane.
- (3) What is the expected time of construction of the Lorry Park whose land was set aside opposite the Police Station.

MEMORANDUM FROM KAMARA LOCATION

KAMARA LOCATION

→ Kamara residents who are living along the highway are always affected by the road in different aspects which affect the livelihood in the long run. Our proposals are follows:

1. Kamara Centre needs construction of underground paths since we have

the shopping centres on both sides of the road and a school just few metres from the road in Kamara Centre.

a. Construction of parking to avoid congestion of trucks along the road which sometime are causes of accidents.

b. Construction of sheds with the centre and do construct a good separate sheds for those people doing business along Kamara Centre.

c. Also there is a busy crossing along Kwa Hanu area or centres and there should also be we do request also construction of underground paths.

→

to straighten this point is that
the community along Kwa Harun Centres
in Kamara location demonstrated on November
last year due to high number of
accidents and they wrote a letter to
Mania requesting for bumps and underground
paths to ensure small children are
safe while crossing the highway.

5. Request the construction of cattle
crossing betw Kamara Centre and
Kamara primary schools.

Secretary DAVID @11 - Kamara resident
0721 977682

* Emergency Responce towards / on the issue
of rapid road accidents from Mania to
Kwa Harun to Makutano on bumps

MEETING NOTES

CLIENT: Rift Valley Consortium

PROJECT: Rironi-Nakuru-Mau Summit Highway **WSP Ref.:** 201-10312-00

SUBJECT: Courtesy Visit: First Round of Consultation **DATE:** January 29, 2021

VENUE: Deputy County Commissioner Office, Ravine, Baringo **TIME:** 1 h 45 pm

ATTENDEES – 11 PARTICIPANTS

ITEMS DISCUSSED	
1	There are too many accidents on the A8 road. We support the project to increase safety.
2	It's important to make sure there is enough security in the planning of the project. We can provide the necessary security you might need because the area is heavily forested. An official letter was to be addressed to the Officer Commanding Police Department (OCPD) Koibatek informing him of the activity.
3	As for Baringo County, we will help in everything you need, but there are no major issues as the project is staying on the ROW. However, it is important to keep the communication with the forestry office.
4	There is no local residing in this area along the project.
5	The focal point for the Baringo County is the DCC. It is also possible to communicate with the ACC Keziah Njoronge at 0727510190 or the chief Hassan of Molo 0721481912.

MINUTES OF MEETING PREPARED BY:

Christine Abdel-Malek, Stakeholders Engagement Specialist, WSP Canada Inc.

Julius Ngundo, Senior Social Safeguard Expert, Norcken International Limited

MINUTES OF MEETING REVIEWED BY:

REPRESENTATIVE OF	NAME AND TITLE	SIGNATURE	DATE

WSP	Ghyslain Pothier, Project Director		March 23 2021

These minutes are considered to be an accurate recording of all items discussed. Written notices of discrepancies, errors or omissions must be given within seven (7) days, otherwise the minutes will be accepted as written.

Minutes of meeting

Project	Nairobi-Nakuru-Mau Summit Highway		
Project Number	201-10312-00	Date	February 1, 2021
Time	10h15am	Venue	ACK Rongai Church, Visoi, Nakuru
Subject	First Round of Consultation – Rongai Sub County Community		
Participants	Please refer to the Appendix for the attendance list (106 participants)		

SUBJECT RAISED

1	WELCOMING REMARKS- ASSISTANT COUNTY COMMISSIONER
	The meeting officially began at 10h15am with prayer from Rev. Nganga presided over by the ACC Rongai, Mr. Daniel M. Mutemi.
2	KENHA REPRESENTATIVE
	Ms. Tipape Sylvia from KeNHA introduced the team from KeNHA and the implementing partners. She then gave a brief insight into the project; Rironi-Nakuru-Mau Summit under the Public Private Partnership Concept.
3	MERIDIAM & VINCI
	<p>Mr. Allan Munyua, from Meridiam, introduced his team and informed everyone in the meeting that this was an official commencement of the 2nd public participation into this project. He stated that the project is being developed following an international bidding process; contract term is 30 years with construction over 3,5 years but with some sections completed earlier. Vinci and Meridiam would design, construct and maintain the road for twenty-six and a half years under the Public Private Partnership Concept.</p> <p>The project would be completed in sections for both the A8 Rironi-Mau Summit and A8 South Rironi-Mai Mahiu and would incorporate service lanes in urban centres and underpasses for farmers to avoid accidents.</p> <p>He stressed that safety is their top priority for all road users and the communities around. Separated U-turn facilities, bus shades and improved lighting along the project road will be given priority.</p>

<p>4</p>	<p>ESIA TEAM- WSP & NORKEN</p>
	<p>Ms. Christine Abdel-Malek from WSP Canada introduced her team and gave a brief into the ESIA study stating that the project has already acquired NEMA License. The study would mainly focus on:</p> <ul style="list-style-type: none"> - The biological component; - The physical component; - The social component. <p>She reiterated that this project would be a long-term relation and that the project cycle would be about thirty years.</p> <p>2021 would be a preparatory phase mainly for the ESIA studies as well as the detailed design of the project. Mitigation measures would then be captured in the ESMP to be used as a guiding principle for the project in the 2nd round of the public consultation. The project would kick off in 2022 and go on for three and a half years.</p> <p>She informed members that social sample surveys would be carried out in two weeks' time and the collected data analysed and timely feedback given. She requested the locals to cooperate with the team conducting the surveys. She then invited Julius Ngundo from Norken to facilitate the question and answer period and translate to Swahili when required. He took 3 to 4 interventions at a time before inviting the adequate project team members and sponsors to give more information and answer the questions raised. Special attention was given to invite representatives from vulnerable groups to participate.</p>
<p>5</p>	<p>COMMENTS, QUESTIONS AND OBSERVATIONS</p>
	<p>Overall the project is welcomed, and participants are supportive of the project. The main comments and observations made during the exchanges that followed the presentations are:</p> <ol style="list-style-type: none"> a. From the Member of County Assembly (MCA): <ul style="list-style-type: none"> - Grateful for the engagement process and welcomes the project. There has been loss of lives with the road and this highway could finally be a solution to that; - The stakeholder engagement process should ensure that the project will be done with the views of stakeholders incorporated. The PPP is welcomed and embraced, as it will involve residents in stakeholder engagements; - There are many businesses along the highway; - There are many trucks that use the highway; therefore, a parking bay is needed. b. From EPC Chairman, Samuel Mambo: <ul style="list-style-type: none"> - Runs a farm wherein there are many activities close to the road: interest in understanding the project design i.e. where will the interchanges, flyovers, crossings be placed? - Businessmen/residents did not want the parking bay to be placed within Sobea Center; - There are many trees within the Right of Way: it's important to replant loss trees. c. From Jared Ngandi (Principal Kirobon Boys High School - represents the parents, students and teachers): <ul style="list-style-type: none"> - The Kirobon Boys High School is located next to Sobea Centre alongside the main Highway but there is no access to school from the road and vice versa: a direct access to the school or crossing should be added to the project; - For CSR, it is recommended that a landmark be erected for the school as it is done in other projects; - Diversions during the construction phase will generate dust: appropriate mitigation measures should be put in place to ensure that the school is not affected. d. From Agnes Chepkurui Maiyo (Deputy Headteacher Leldet Primary School): <ul style="list-style-type: none"> - Thankful for the tunnel that was constructed at the school; - The Leldet Primary School is located past Salga area, next to the bridge. The addition of a tunnel/underpass at the other side of the road or a flyover to mitigate against accidents is needed; - Important to add barrier on both sides at the bridge at diversions, so that children don't fall into the river. Potholes should also be refilled/repared for the safety of children. e. From Philip Ngok – Youth Leader, Business Leader, Arvist Landlord Association: <ul style="list-style-type: none"> - The Ngata Arvist Stretch is a unique section because there is a proposed railway here; there is a gate to RVIST college with a population of 10,000 people; there are over 16 schools on both sides of the road (there are many people crossing the road from 5p.m. including school buses turning) and there is a bend. In addition, there is a population increase in this area; - Ensure that drainage is properly designed; - The design of the road needs the input of both residents and technical team. f. From Simon Rotich, representative of people living with disabilities:

- Provide access for people living with disabilities (PLWD);
 - Zebra crossings to be added;
 - Consider PLWD for job opportunities arising from the project;
 - PLWD are susceptible to accidents when crossing the road because they take a long time to cross and sometimes need to be helped.
- g. From Livingstone Sawe – Chairman Salgaa Business Community:
- There is an existing truck parking in Salgaa. He proposed a stop over as opposed to truck parking;
 - There is an existing land (6 acres) available;
 - Requests a stop over from the petrol station to bridge;
 - The road section from Salgaa to Sachangwan was dualled. Since dualing, traffic volume has increased;
 - Now that the project is taking 30 years, construct a place to handle emergency;
 - Ensure that the dualing does not affect business, and add access the town;
 - People are migrating to Salgaa from Nakuru so population is increasing.
- h. From Vanessa Evans – MD Rongai Transport:
- Salgaa town is designed as an industrial area and the junction has challenges. An interchange at this site is recommended;
 - The road is congested and during previous construction diversions and signage provided were very poor;
 - There have been many accidents and as a result many deaths at Molo Hill;
 - On drainage in Salgaa area: storm water needs to be channeled to drain beyond the road. On the southern side of the road, drainage orientation needs to be well understood;
 - Has been victim to flooding: her land had been flooded twice;
 - Parking needs to be properly planned: truck parking sites should be carefully selected;
 - Ensure that communication is well done;
 - Can give advises on road safety as she has 35 years of experience in this field.
- i. From Dorcas Nyaundi – Ngata village elder near the Bridge:
- Add a footbridge or tunnel at Ngata Bridge area;
 - Drainage points should be placed on both sides of the road.
- j. From Pastor Winga:
- The area near Ngata Primary School is very dangerous, add speed bump;
 - Provide a foot bridge and a U-turn at Sobea;
 - Place bumps at the bridge near Sobea and Soi Junction;
 - A tunnel may be too dangerous to use during the night.
- k. From Gabriel Rono (Ngata resident):
- Owns a land situated along the road was not invited during compensation process for negotiations/engagements and felt unfairly compensated (he was just told to go and collect his money): Going forward, ensure complete engagement and consultation of landowners along the Right of Way.
- l. From Kamau Ndinu- a resident from Sobea:
- Culverts draining Storm water from the main road at Njiru were constructed in people's plots;
 - When the road is expanded, there will be a challenge with crossing the road. Therefore, consider adding crossing points in Sobea;
 - Consider adding a bypass at the Sobea area.
- m. From Koech- Chairman Nyumba Kumi:
- from Koech- Chairman Nyumba Kumi.
- n. From Mr. Birichi:
- More beacons should be constructed to mark the extent of the Right of Way: the population has difficulty knowing where the exact limit of the ROW is;
 - There are many accidents at the bridge, consider adding a tunnel at the school in this area.
- o. From Mr. Andrew Koros – Boror Nyumba Kumi:
- Salgaa is prone to accidents;
 - There is a 14ha plot of land available for putting up a truck park;
 - Drainage should be well designed;
 - There is no pedestrian crossing at the bridge area (that can be used by 'boda boda' as well - motorcycles);
 - Why streetlights when vehicles have headlights? Streetlights should be used to light dark areas for pedestrians.
- p. From Lucy Keter – Ngata Bridge:

- Requests KeNHA to visit Ngata Bridge area so that residents get a chance to share issues they have about the road.
- q. From the Reverend Ng'ang'a:
 - Consider giving locals employment opportunities.
- r. From Paul Bii (resident of Ngata Bridge):
 - Consider constructing a flyover or a roundabout after the railway bridge;
 - There are many 'matatus' (public service vehicle) to Rift Valley Institute of Science and Technology and also the growing population and vehicles moving to arap chumo Estate.
- s. From Bernard Chump – Rongai resident (mobile number- 0725072411):
 - Appreciates KeNHA for involving stakeholders in planning for the proposed project;
 - Requests the following:
 - Environmental Pollution mitigation;
 - Safety for the residents i.e. building materials;
 - Health sanitation in general: ensure proper disposal of used building materials i.e. refill (septic tanks).
- t. From Mrs. Sammy/Mambo Mukiri - (mobile number- 0723513439) – Samboautogarage@gmail.com:
 - Feeder road due to accidents at Eveready Nakuru and Merovia Ngata (two sides);
 - Magnet farm to Simba cement Salгаа consider feed road due to the population;
 - Flyover to Sobeа and Salгаа Center is very risky;
 - Ensure safe crossing for:
 - Rironi Primary School;
 - Belbar Primary School;
 - Ngata Primary School;
 - Cattle Crossing area - issue of grazing.

6 GENERAL INFORMATION GIVEN TO MAIN TOPICS

Topic	Information
Employment	Local community members will be considered for job opportunities in the respective project sections where feasible. The Project Company and Contractor welcome the suggestions made by the various Stakeholders that Community Members seeking jobs to register at the relevant county or constituency offices to facilitate identification of required skills.
Corporate Social Responsibility	The proponent will take into consideration the recommendations given by the community members, guided by local administration and county government. This will also be informed by the overall county and constituency development plans in the respective county governments and constituencies and will consider the Project contract period of 30 years
Accidents/Road safety	Improved road safety is one of the key objectives in the implementation of the Project. The Project Road will have several safety measures in place such as: <ul style="list-style-type: none"> - A response team with an ambulance and towing services - Improved road alignment and road markings - Road signs - Street lighting in urban areas
Land acquisition	The project will be constructed along the already existing right of way, thus there will be no further acquisition of land apart specific sections identified by KeNHA for purposes of building interchanges
Compensation	In accordance with Kenyan Laws, the National Land Commission (NLC) is responsible for compensation with respect to the acquisition of land in addition to the existing Right of Way. So far, some landowners had already been compensated and that the process is still underway. Any Community Members with pending issues with respect to compensation were requested to see Ms. Tipape Sylvia and the KeNHA Team present after the Public Meetings and present their concerns issues.
Drainage	Geotechnical and hydrological surveys were conducted to assess the conditions of the various sections along the Project Road. These would inform the design specifications and ensure that sufficient drainage facilities are provided. The Project Company and Contractor welcome contributions from the Community Members and various Stakeholders on proposed long-term solutions for areas with periodic drainage challenges.

Minutes of Meeting

Access	Access will be provided putting into consideration the recommendations of the community. Factors such as proximity to schools, market centres, churches and residences as well financial/economic feasibility shall be considered. People living with physical disabilities will also be considered. Access will be provided in form of underpasses, footbridges, service lanes among others.
Site specific inquiries	The participants were advised to write the recommendations and comments down and hand them over to the proponent team for their record, consideration and further action.

MINUTES OF MEETING PREPARED BY:

Christine Abdel-Malek, Stakeholders Engagement Specialist, WSP Canada Inc.

Loise Kioko, Associate Environmentalist, Norken International Limited

MINUTES OF MEETINGS REVIEWED BY:

REPRESENTATIVE OF	NAME AND TITLE	SIGNATURE	DATE
Rongai Subcounty	Daniel M. Mutemi, ACC		
RVH	Allan Munyua, Senior Investment Director		
WSP	Ghyslain Pothier, Project Director		23 March 2021

These minutes are considered to be an accurate recording of all items discussed. Written notices of discrepancies, errors or omissions must be given within seven (7) days, otherwise the minutes will be accepted as written.

Paul Bin resident of
Ngata Bridge.

Consider constructing a flyover
or a round about after
a railway bridge.

There are many matters heading
to Rift Valley Institute of
Science and Technology,
and also the growing population
and vehicles moving to snap chum
Estate.

Rongai - 10th 5th

Am Bernard Chumo from Rongai
A city within Rongai &
Kandutis in VISIT Location

I would like to appreciate
the KATHA for coming forward
to plan for DW Road.

My concern is to kindly
request u to look into consideration
for the following -

- ① Environmental Pollution
- ② Safety for the Resident
ie Building Materials
- ③ Health Sanitation ie
General - Proper Disposal
of used Building Materials
ie Refuse (Septic)

4. Duvonin Primary School
5. Bilbur Primary School.
6. Dikata Primary School
7. Cattle Crossing. Area. 15km of Grazing.

Minutes of meeting

Project	Nairobi-Nakuru-Mau Summit Highway		
Project Number	201-10312-00	Date	February 1, 2021
Time	2h30pm	Venue	Constituency Development Fund (CDF) Ground, Gilgil, Nakuru
Subject	First Round of Consultation – Gilgil Sub County Communities		
Participants	Please refer to the Appendix for the attendance list (172 participants)		

SUBJECT RAISED

1	WELCOMING REMARKS- ASSISTANT COUNTY COMMISSIONER
	The meeting officially began at 2:30pm with prayer from Pastor Kibucho presided over by the DCC Madam Rebecca Muturi.
2	KENHA REPRESENTATIVE
	Ms. Tipape Sylvia introduced the team from KeNHA and the implementing partners. She then gave a brief insight into the project; Rironi-Nakuru-Mau Summit under the Public Private Partnership Concept.
3	MERIDIAM & VINCI
	<p>Mr. Allan Munyua, from Meridiam, introduced his team and informed everyone in the meeting that this was an official commencement of the 2nd public participation into this project. He stated that the project is being developed following an international bidding process; contract term is 30 years with construction over 3,5 years but with some sections completed earlier. Vinci and Meridiam would design, construct and maintain the road for twenty-six and a half years under the Public Private Partnership Concept.</p> <p>The project would be completed in sections for both the A8 Rironi-Mau Summit and A8 South Rironi-Mai Mahiu and would incorporate service lanes in urban centres and underpasses for farmers to avoid accidents.</p> <p>He stressed that safety is their top priority for all road users and the communities around. Separated U-turn facilities, bus shades and improved lighting along the project road will be given priority.</p>
4	ESIA TEAM- WSP & NORKEN
	<p>Ms. Christine Abdel-Malek, from WSP Canada, introduced her team and gave a brief into the ESIA study. The study would mainly focus on:</p> <ul style="list-style-type: none">- The biological component;- The physical component;

- The social component.

She reiterated that this project would be a long-term relation and that the project cycle would be about thirty years. 2021 would be a preparatory phase mainly for the ESIA studies as well as the detailed design of the project. Mitigation measures would then be captured in the ESMP to be used as a guiding principle for the project in the 2nd round of the public consultation. The project would kick off in 2022 and go on for three and a half years.

She informed members that social sample surveys would be carried out in two weeks' time and the collected data analysed and timely feedback given. She requested the locals to cooperate with the team conducting the surveys. She then invited Julius Ngundo from Norken to facilitate the question and answer period and translate to Swahili when required. He took 3 to 4 interventions at a time before inviting the adequate project team members and sponsors to give more information and answer the questions raised. Special attention was given to invite representatives from vulnerable groups to participate.

5 COMMENTS, QUESTIONS AND OBSERVATIONS

Overall the project is welcomed, and participants are supportive of the project. The main comments and observations made during the exchanges that followed the presentations are:

- a. From the representative of the Member of Parliament for Gilgil Constituency (MP) – Daniel Njoroge:
 - Grateful for the project: prepared a letter will every requested:
 - Elaborate exit from the highway and C717 road (Ebburu road);
 - Pedestrian Footbridges;
 - Rehabilitation of boreholes on at Kekopey Catholic Church, Kasambara and doing one at Kambi Somali preferably Gilgil Highway Secondary School;
 - Consideration of the local people in jobs, both casual and semi-skilled;
 - Ensuring that sub-contracts for supply of materials and services are locally sourced;
 - Washrooms along the way for long distance buses at Kasambara and Marula area with canteen areas;
 - Considerations of the drainage for storm water in Gilgil town and Kekopey area;
 - Proper modern parking areas in Gilgil, Kikopey and Barnabas for trailers and trucks;
 - Elaborate interchanges at both junctions to and from Gilgil to enable free flow of traffic;
 - Consider special groups, cyclists and motor cyclists;
 - More consultation and continuous public participation in the future.
- b. From the Member of County Assembly (MCA) of Monrendat:
 - Offer employment opportunities for Gilgil residents: from the toll stations to Mbaruku;
 - CSR: Water sources, there are public lands available in Monrendat to sink boreholes;
 - During construction, provide adequate parking;
 - Provide U-Turns.
- c. From the Member of County Assembly (MCA) of Elementaita:
 - In Baranabas, there are many trucks collecting fuel from Kenya Pipeline Company, please provide parking for trucks;
 - Add interchange at the section between Mau, Elementaita and Kikopey;
 - Construct a church in Elementaita and provide a place to pray for Muslim (CSR);
 - Employment: consider youth and women.
- d. From the MCA of Gilgil:
 - Disagree with keNHA's decision of evicting hawkers;
 - Appreciative of bumps previously added in Gilgil;
 - Poor drainage in sight, this should be improved by putting a water channel;
 - Build a road in Gilgil as part of CSR;
 - Consider planning a parking on one site, we have lots of land next to the market;
 - Nakuru County has budget to construct 2 public toilets along the road, however a suitable site is yet to be found (land);
 - Consider youth for employment, internship and knowledge transfer.
- e. From SMR Chief (Mbaruk Location) – 0720388736:
 - Add crossing points (over bridges/underpasses) at:
 - Banabas (over bridge);
 - Greemsted (over bridge or underpass);

- Shimmers boys (over bridge or underpass);
 - Laikipia Campus (over bridge or underpass);
 - Soysambu (underpass).
- f. From the director of Nakuru Water and Sewage Company: Kenneth Mbaria:
- Rehabilitation of Kekopey boreholes;
 - Involve Nakuru Water and Sewage company because some waterpipes are crossing the highway;
 - There are existing challenges in Gilgil of destruction of waterpipes while doing construction.
- g. From Sub County administrator (Wachira Mwangi):
- Requests for exits and entry points in areas with many hotels around Kaungwa;
 - CSR: Flooding at Kikopey, help to find solution; Kikopey is a busy center, help with drainage as water will increase.
- h. From John Tsoma (Secretary of Gilgil Juakali Corporative):
- Compensation of commercial or industrial structures should be given to the committee and not to individuals.
- i. From Bishop Hiram Ngenga, the chairman of the Interreligious Council of Gilgil:
- Locals should be employed during works done on Gilgil territory;
 - What can the project offer to the community: Can you provide for 10km or so of local roads inside our community; parking space, footbridge for safe human traffic; runaway ramp (sand) to stop the speed;
 - Widening of the road to more lanes in the urban market;
 - Provide a parking for trucks in Gilgil.
- j. From Joseph Mougo, leader of Ebburu area:
- Storm water should not be directed to the residential area or access roads;
 - Is there a charge to use the road?
 - Ebburu is a class D road, yet it has no access to the main road (A8);
 - Provide well designed services lanes in urban areas.
- k. From people living with disabilities (blind) (Isaac):
- Consider people with disabilities by planning a footbridge;
 - Kasambara road passes through a conservancy: consider animal access;
 - Provide a flyover at Hell's Gate;
 - Consider providing boreholes at Kasambara;
 - Provide public toilet for people living with disabilities.
- l. From youth groups (Joseph Muchendo):
- Consider locals to operate toll system;
 - Give local investors subcontracts to supply materials;
 - Conservation of wildlife is important. Families should not be separated. Make sure the wildlife can cross and have access to territories on both sides of the highway.
- m. From vulnerable groups (people living with disabilities- PLWD):
- The road design should provide access for persons with disabilities to be able to cross the road safely, some people have to pay up to 20 shillings to get help crossing;
 - It's important to consider all types of disabilities (Simon Muchangi).
- n. From the MCA:
- Distances between exits should be reasonable to avoid driving too far to access localities.
- o. From the DCC:
- Discourage negative political comments.
- p. From the Ogieks – Patrick Olekuroi:
- Highway is far from the Ogieks;
 - Thanks for invitation;
 - Consider youth and persons with disabilities for job opportunities.
- q. From the Masaai – Saikoki:
- Thankful for the invitation;
 - All stakeholders should be included and invited.
- r. From Moses Gitonga:

- Thank you for bringing the highway we have been waiting for a long time;
 - We have a lot of water issues in the community, can you help bringing water to the community;
 - Sogea Satom did the road project in 2004. During construction Sogea did two boreholes: one at Kikopey and one at Marula. Can you please in the same way that it was done by Sogea, hand over to the community the boreholes that will be used for the new highway;
 - The catholic diocese of Nakuru sunk a borehole in Kikopey, but it was not provided with electricity. Can you please revive it and hand it over to the community?
 - Make sure the compensation is done on time to avoid delays. Also, it's important to make sure everyone has been compensated before starting construction;
 - Gilgil has 2 entrances, both should have interchanges as Gilgil is a growing town;
 - In 2004, the physical planning department produced a plan for Gilgil town. We would like KeNHA to make a master plan for drainage because the city is flat and prone to flooding (storm water);
 - Make sure, there are services lanes to access the community;
 - Ensure that all access roads to the main highway have tarmac;
 - Give opportunity to the youth for non- technical needs.
- s. From Kasambara Sub locations residents in Mbaruk Location (Gilgil):
- Appreciate the idea of a dual carriage road new highway to help reduce accidents;
 - Provide employment to youth;
 - Make sure all compensations are given to affected people before relocating them;
 - Please consider health issues during construction and drill a borehole for water use to help reducing dust (Kasambara sublocation can offer a place for the borehole);
 - Add a crossing at St-Mary Gospital;
 - Consider adding a wider road area, parking bay and stop over for trucks and buses at Soysambu area, including essential services and toilets – Soysambu is highly contaminated because people are defecating in the open air, adding toilet is important;
 - Joseph Gathurumbira: 0720812167;
 - Isaac Njuguna Kariuki: 0725076891.
- t. From Joseph Mugo Gatimu (Eburru Professionals) – jamugo@gmail.com – 0728433336:
- Add an access to Gilgil Eburru road from the project (Gilgil-Jaika-Kiambogo-Elementaita road is class D and currently no access to the 104);
 - Storm water problem in Gema Area: current road is directing the water to existing feed roads causing flooding and road erosion. Please consider directing the water together with Kikopey water to the Lake;
 - Ensure there is a service lane touching both Gilgil and Kikopey.
- u. From D.M. Kibe (0722605890):
- Consider constructing an underpass to enable vehicles coming from Nakuru to access parking at plot no. Gilgil/Gilgil Blk 1 / 13183 (the owner has expressed interest in constructing a roadside station, the Northern Corridor Office is already aware about the parking.
- v. From the Imam:
- Are structure compensations going to be given before or after removal?
- w. From Mwaruniu Nguro:
- Interchange should be monumental to give an identity to Gilgil;
 - Gilgil is a very dusty area, to avoid the dust to go everywhere, watering is essential. Can you provide boreholes or a dam and help tarmac feeder roads? It would have a very positive impact on the community.
- x. From Mr. Stephen Gatimu:
- It's important to have a global view of the development over the next 15 years, users of the dry port at Mai Mahiu will camp in Gilgil, a modern rest stop should be provided inside the project, including washrooms, a modern parking for trucks, food and snacks, etc. This development would help creating jobs especially for hawkers that have been chased from the area;
 - The population of Gilgil is prone to increase in the coming year;
 - Is the design final or preliminary?
 - Incorporate wildlife tunnels.
- y. From MC Janckin:
- A truck park should be built at Kikopey;

- Drainage culverts should be extended some meters away from the main road. There is a flooding problem when it's raining.
- z. From other participants (unidentified):
 - During and after construction, provide containers where red cross first aiders can operate from;
 - The list of hawkers evicted from Gilgil way bridge is available. They should be given priority for the future stalls;
 - During the construction will we have access to the old road? If they are using it, it should be rehabilitated;
 - We have a public toilet managed by disabled people. It should be taken into account in case of removal of this toilet;
 - Trees cut during construction should be replanted with KeNHA support;
 - Provide runaway for cyclists and motorbikes, etc.;
 - A big challenge is the mud when it is raining, please consider helping at putting tarmac on roads;
 - Appreciative of bumps previously added in Gilgil;
 - Poor drainage in sight, this should be improved by putting a water channel;
 - Build a road in Gilgil as part of CSR;
 - Build a roundabout to enter Gilgil town and add signs to indicate clearly the location;
 - Filled dams after use to avoid danger for children;
 - Maintain properly the water catchment of the road to avoid dust;
 - Consider diversions at Kasarani through Eburru, Jaika, Elementaita town can serve as well;
 - Consider diversion to Kekopey to Elementaita as a feeder road;
 - Offer Gilgil unskilled workers some job opportunities.

6 GENERAL INFORMATION GIVEN TO MAIN TOPICS

Topic	Information
Employment	Local community members will be considered for job opportunities in the respective project sections where feasible. The Project Company and Contractor welcome the suggestions made by the various Stakeholders that Community Members seeking jobs to register at the relevant county or constituency offices to facilitate identification of required skills.
Corporate Social Responsibility	The proponent will take into consideration the recommendations given by the community members, guided by local administration and county government. This will also be informed by the overall county and constituency development plans in the respective county governments and constituencies and will consider the Project contract period of 30 years
Accidents/Road safety	Improved road safety is one of the key objectives in the implementation of the Project. The Project Road will have several safety measures in place such as: <ul style="list-style-type: none"> - A response team with an ambulance and towing services - Improved road alignment and road markings - Road signs - Street lighting in urban areas
Compensation	In accordance with Kenyan Laws, the National Land Commission (NLC) is responsible for compensation with respect to the acquisition of land in addition to the existing Right of Way. So far, some landowners had already been compensated and that the process is still underway. Any Community Members with pending issues with respect to compensation were requested to see Ms. Tipape Sylvia and the KeNHA Team present after the Public Meetings and present their concerns issues.
Drainage	Geotechnical and hydrological surveys were conducted to assess the conditions of the various sections along the Project Road. These would inform the design specifications and ensure that sufficient drainage facilities are provided. The Project Company and Contractor welcome contributions from the Community Members and various Stakeholders on proposed long-term solutions for areas with periodic drainage challenges.
Access	Access will be provided putting into consideration the recommendations of the community. Factors such as proximity to schools, market centres, churches and residences as well financial/economic feasibility shall be considered. People living with physical disabilities will also be considered. Access will be provided in form of underpasses, footbridges, service lanes among others.
Site specific inquiries	The participants were advised to write the recommendations and comments down and hand them over to the proponent team for their record, consideration and further action.

KASUKU

KASAMBARA SUB-LOCATION

STAKE HOLDERS

30TH JANUARY, 2021

Kasambara Sub-location in Mbaruk Location, Gilgil SubCounty, Nakuru County.

Soyambu Conservancy is within Kasambara Sub location jurisdiction.

As residents, we would like to bring the following request to your attention.

We do appreciate the idea of having a dual Carriage Road in the highway. Number of accidents will be reduced etc.

- This will create employment to our Youth.
- Those who will be affected by road, be compensated, possibly before they are asked to move.
- On ROAD SAFETY - Please consider HEALTH. much DUST will be there. We humbly request you to DRILL a bore hole - for water use that will assist to reduce dust.

At Kasambara, we are ready to offer a place for this Borehole.

- After St. Mary Hospital, we are proposing a crossing level, or Fly over.
- At Soyambu area, we are proposing a wide road and a parking bay to be a stop over for lorries and buses etc.
- Please, include TOILETS as essential services.

We hope that you will consider our request as you continue doing this Good work.

THANK YOU

JOSEPH GATHURUMBIRA - 0720812167

LAAC NJUGUNA KARIUKI - 0715076891

1st February, 2021

**THE DIRECTOR GENERAL,
KENYA NATIONAL HIGHWAYS AUTHORITY
NAIROBI**

Dear Sir,

**RE: REQUEST FOR A PARKING LOT FOR TRANSIT TRUCKS AT
KIKOPEY AND GILGIL TOWN.**

Gilgil section is one of the busiest sections of the A104 road that connects Kenya to other countries in the region. The section is a preferred stop over center by truckers using the route, and this is a factor that has accelerated growth hitherto centers such as Kikopey, Barnabas, Mbaruk, and Pipeline.

It is a shared and well-considered view of the residents and business Community within Gilgil that you consider establishing off the road parking lots for trucks on either sides of the road in your ongoing re-designing of the highway at Kikopey area and at the section between the 2 junctions that link Gilgil town with the Nairobi Nakuru Highway.

This will boost trade and commerce in the area and attract more investments to the benefit of everyone. It is worth noting that over 90% of the businesses in this area are reliant on transit customers be they truckers or other categories of The Highway users.

Closure of businesses in these sections will ultimately lead to massive job losses and loss of investments. This loss will affect the local economy, not forgetting it will also undermine in a big way The President's pledge to the people of Kenya on job creation and protection of local investments.

It is the humble prayer of the people, through my office, that you factor this request in your new road design for this section.

Yours Sincerely,

Hon. Martha Wangari, MP.
GILGIL CONSTITUENCY

GILGIL CONSTITUENCY – KeNHA PUBLIC PARTICIPATION (ADDENDUM)

1. Elaborate exit from the Highway and C717 road (Ebburu road)
2. Pedestrian Footbridges
3. Rehabilitation of the boreholes on at Kekopey Catholic Church, Kasambara and doing one at Kambi Somali preferably Gilgil Highway Secondary School.
4. Consideration of the local people in jobs, both casual and semi-skilled.
5. Ensuring that sub-contracts for supply of materials and services are locally sourced.
6. Washrooms along the way for long distance buses at Kasambara and Marula area with canteen areas.
7. Consideration of the drainage for storm water in Gilgil town and Kekopey area.
8. Proper modern parking areas in Gilgil, Kikopey and Barnabas for trailers and Trucks
9. Elaborate interchanges at both junctions to and from Gilgil to enable free flow of traffic.
10. Consider special groups, cyclists and motor cyclists

Hon. Martha Wangari – MP Gilgil Constituency.

Minutes of meeting

Project	Nairobi-Nakuru-Mau Summit Highway		
Project Number	201-10312-00	Date	February 2, 2021
Time	10h30am	Venue	Longonot Town Chief's Office, Mai Mahiu, Nakuru
Subject	First Round of Consultation – Naivasha Sub County Community		
Participants	Please refer to the Appendix for the attendance list (97 participants)		

SUBJECT RAISED

1	WELCOMING REMARKS- DEPUTY COUNTY COMMISSIONER
	The meeting officially began at 10h30am by remarks from the host chief, followed by prayer from a volunteer, presided over by DCC Naivasha Mr. Kisilu Mutua.
2	KENHA REPRESENTATIVE
	Ms. Patricia Agula introduced the team from KeNHA and the implementing partners. She then gave a brief insight into the project; Rironi-Nakuru-Mau Summit under the Public Private Partnership Concept.
3	MERIDIAM & VINCI
	<p>Mr. Allan Munyua, from Meridiam, introduced his team and informed everyone in the meeting that this was an official commencement of the 2nd public participation into this project. He stated that the project is being developed following an international bidding process; contract term is 30 years with construction over 3,5 years but with some sections completed earlier. Vinci and Meridiam would design, construct and maintain the road for twenty-six and a half years under the Public Private Partnership Concept.</p> <p>The project would be completed in sections for both the A8 Rironi-Mau Summit and A8 South Rironi-Mai Mahiu and would incorporate service lanes in urban centres and underpasses for farmers to avoid accidents.</p> <p>He stressed that safety is their top priority for all road users and the communities around. Separated U-turn facilities, bus shades and improved lighting along the project road will be given priority.</p>

4	<p>ESIA TEAM- WSP & NORKEN</p> <p>Ms. Christine Abdel-Malek, from WSP Canada, introduced her team and gave a brief into the ESIA study. The study would mainly focus on:</p> <ul style="list-style-type: none"> - The biological component; - The physical component; - The social component. <p>She reiterated that this project would be a long-term relation and that the project cycle would be about thirty years.</p> <p>2021 would be a preparatory phase mainly for the ESIA studies as well as the detailed design of the project. Mitigation measures would then be captured in the ESMP to be used as a guiding principle for the project in the 2nd round of the public consultation. The project would kick off in 2022 and go on for three and a half years.</p> <p>She informed members that social sample surveys would be carried out in two weeks' time and the collected data analysed and timely feedback given. She requested the locals to cooperate with the team conducting the surveys. She then invited Julius Ngundo from Norken to facilitate the question and answer period and translate to Swahili when required. He took 3 to 4 interventions at a time before inviting the adequate project team members and sponsors to give more information and answer the questions raised. Special attention was given to invite representatives from vulnerable groups to participate.</p>
5	<p>COMMENTS, QUESTIONS AND OBSERVATIONS</p> <p>Overall the project is welcomed, and participants are supportive of the project. The main comments and observations made during the exchanges that followed the presentations are:</p> <ol style="list-style-type: none"> a. From the Deputy County Commissioner: <ul style="list-style-type: none"> - The hilly part of the road is prone to accidents and appropriate design should be thought through; - In case of jam, crime is rampant in the hilly areas and this should be addressed; - The employment procedures should be strategic. b. From Hells Gate Chief (James Nganga – 0728559286): <ul style="list-style-type: none"> - What could be done to help the communities near Jaguar Petro Station; - There is not enough water for the communities, important to consider water issues, as the density will increase in the future; - Roads to Mirera and Rubiri Primary and Secondary Schools are very bad; - Opposite to Oasis School, the water has formed an under tunnel. It's dangerous that houses start sinking down; - Please plant trees after completion of the highway. c. From Mai-Mahiu Community Based Organization: <ul style="list-style-type: none"> - Important to take care of the beautification of the road. Mai-Mahiu Community Based Organization have project of tree nursery and could give a support to plant trees along the new highway; - Community request to be given water tender and soil. Chairman John Kiliko:0722340286 Secretary Rose Wanjiry: 0726447441 d. From The chairman of Mai Mahiu market: <ul style="list-style-type: none"> - The hilly section of the road running to over 15kms has long traffic jam all weekends: the road in this area should be built of at least three lanes; - At specific areas, dusts to pass water pipes should be provided; - The truck park at Mai Mahiu should be expanded. e. From David Kaviki, Assistant Chief Mirera 0720563560: <ul style="list-style-type: none"> - Requests for crossing bridges: <ul style="list-style-type: none"> ▪ At Chechinear, to connect to Mountain View village to Mirera Primary School (with over 3000 pupils); ▪ High Peak Area where there are 2 primary schools: High Peak Primary School and Long Chest Primary School. f. From Peris Wanjiku (community leader from Matheleli village): <ul style="list-style-type: none"> - Pedestrian crossings should be provided for schools neighbouring the road; - The local persons especially women should be employed in the project; - There is a lack of electricity in the village.

- g. From Mr. Njoroge (Mai Mahiu):
 - In urban centers, the road should be at level with the market to ensure that vehicles park and purchase goods from the area.
- h. From Mr. Benson Kamau:
 - The road should provide sanitation facilities to avoid rampant pollution of bushes by travelers.
- i. From Mrs Lucy Muthoni:
 - Quarry materials in plenty are present in the area, please contractor fetch his requirements from there.
- j. From Elizabeth Wanjiru (Kihoto area residents- Naivasha – lake view ward):
 - Storm water in Kihoto area should be addressed: Flood and storm water is an important issue: Kihoto area in Lakeview ward receive flood water from upper Nyandarua part to the Lake Naivasha: Please ensure to divert the water at Kabati Area towards KCC Malewa River or construct Dykes/dams;
 - Ensure dust mitigation, and tree planting where the project generated a loss of vegetation: trees in Kihoto should be maintained or replanted;
 - The vulnerable, notably the PLWDs, should be provided with access to the road: Please consider social inclusion when designing crossing points: people living with disabilities, elders and children cannot climb up if the footbridge is elevated, make sure all crossing points are accessible to all;
 - Communities should be sensitized on possible infectious diseases that may affect them during construction;
 - Foot bridges should be provided near schools as the road will be too wide;
 - Employ both skilled and unskilled local labour;
 - Lakeview primary school fence neighbours the road and may be affected. She recommended that the fence should be restored.
- k. From Elders groups (Mr. George Mwangi, the elder from Menegai village):
 - The project area suffers from perennial water problems and as such, the project should provide water sources and thereafter hand over the facilities to the community;
 - The area is dusty and appropriate mitigation measures will have to be put in place during road construction;
 - There is need to do at least a CSR project for the community;
 - Provide road crossing structures for pedestrians and animals;
 - KeNHA evicted roadside traders from Longonot market and listed them. It would be important to inform the affected what happened with the list and how they will be redressed.
- l. From David Thome (Kabati area, Naivasha):
 - There should be no labour importation, but locals should be employed during project construction.
- m. From Mr. George Kamau:
 - The access road to Eleri village (8kms) from the project road is poor, yet the market hosts a school, health center and police post: please consider improving this road as part of CSR.
- n. From Mr. Daniel Korir:
 - The road will improve the economy of the area. He reminded the contractor of what the community and himself had agreed at Naivasha during his last engagement on the road should be accomplished including: providing cabro pavings for the lorry park;
 - Culverts were left directing water to buildings, creating flooding;
 - Access to Longonot market should be provided.
- o. From Mr. Anthony Muigai:
 - Rift valley viewpoints where kiosks have been constructed should be concreted to enhances businesses there;
 - Toll price charged should be affordable to the locals.
- p. From Mr. John M. Kimani – 0726015639:

Diversion of Kamuyu Primary from Mai Mahiu Naivasha main road: need of an inlet road to avoid accidents (2km from Longonot Center, near a factory that makes concrete posts – red roof).

6 GENERAL INFORMATION GIVEN TO MAIN TOPICS	
Topic	Information
Employment	Local community members will be considered for job opportunities in the respective project sections where feasible. The Project Company and Contractor welcome the suggestions made by the various Stakeholders that Community Members seeking jobs to register at the relevant county or constituency offices to facilitate identification of required skills.
Corporate Social Responsibility	The proponent will take into consideration the recommendations given by the community members, guided by local administration and county government. This will also be informed by the overall county and constituency development plans in the respective county governments and constituencies and will consider the Project contract period of 30 years
Accidents/Road safety	Improved road safety is one of the key objectives in the implementation of the Project. The Project Road will have several safety measures in place such as: <ul style="list-style-type: none"> - A response team with an ambulance and towing services - Improved road alignment and road markings - Road signs - Street lighting in urban areas
Drainage	Geotechnical and hydrological surveys were conducted to assess the conditions of the various sections along the Project Road. These would inform the design specifications and ensure that sufficient drainage facilities are provided. The Project Company and Contractor welcome contributions from the Community Members and various Stakeholders on proposed long-term solutions for areas with periodic drainage challenges.
Access	Access will be provided putting into consideration the recommendations of the community. Factors such as proximity to schools, market centres, churches and residences as well financial/economic feasibility shall be considered. People living with physical disabilities will also be considered. Access will be provided in form of underpasses, footbridges, service lanes among others.
Site specific inquiries	The participants were advised to write the recommendations and comments down and hand them over to the proponent team for their record, consideration and further action.

MINUTES OF MEETING PREPARED BY:

Minutes of meeting

Project	Nairobi-Nakuru-Mau Summit Highway		
Project Number	201-10312-00	Date	February 2, 2021
Time	2h00pm	Venue	Kinungi Chief's Camp, Naivasha East, Naivasha
Subject	First Round of Consultation – Naivasha Sub County Community: Kinungi, Naivasha Town, Hell's Gate, Lake View Locations		
Participants	Please refer to the Appendix for the attendance list (125 participants)		

SUBJECT RAISED

1	WELCOMING REMARKS- CHIEF
	The meeting officially began at 2h15pm with prayer from Pastor Kamau. Host chief Simon Nganga welcomed all and invited the team to take over.
2	KENHA REPRESENTATIVE
	Ms. Patricia Agula introduced the team from KeNHA and the implementing partners. She then gave a brief insight into the project; Rironi-Nakuru-Mau Summit under the Public Private Partnership Concept.
3	MERIDIAM & VINCI
	<p>Mr. Allan Munyua, from Meridiam, introduced his team and informed everyone in the meeting that this was an official commencement of the 2nd public participation into this project. He stated that the project is being developed following an international bidding process; contract term is 30 years with construction over 3,5 years but with some sections completed earlier. Vinci and Meridiam would design, construct and maintain the road for twenty-six and a half years under the Public Private Partnership Concept.</p> <p>The project would be completed in sections for both the A8 Rironi-Mau Summit and A8 South Rironi-Mai Mahiu and would incorporate service lanes in urban centres and underpasses for farmers to avoid accidents.</p> <p>He stressed that safety is their top priority for all road users and the communities around. Separated U-turn facilities, bus shades and improved lighting along the project road will be given priority.</p>
4	ESIA TEAM- WSP & NORKEN
	Ms. Christine Abdel-Malek, from WSP Canada, introduced her team and gave a brief into the ESIA study. The study would mainly focus on:

- The biological component;
- The physical component;
- The social component.

She reiterated that this project would be a long-term relation and that the project cycle would be about thirty years.

2021 would be a preparatory phase mainly for the ESIA studies as well as the detailed design of the project. Mitigation measures would then be captured in the ESMP to be used as a guiding principle for the project in the 2nd round of the public consultation. The project would kick off in 2022 and go on for three and a half years.

She informed members that social sample surveys would be carried out in two weeks' time and the collected data analysed and timely feedback given. She requested the locals to cooperate with the team conducting the surveys. She then invited Julius Ngundo from Norken to facilitate the question and answer period and translate to Swahili when required. He took 3 to 4 interventions at a time before inviting the adequate project team members and sponsors to give more information and answer the questions raised. Special attention was given to invite representatives from vulnerable groups to participate.

5 COMMENTS, QUESTIONS AND OBSERVATIONS

Overall the project is welcomed, and participants are supportive of the project. The main comments and observations made during the exchanges that followed the presentations are:

- a. From the Assistant County Commissioner:
 - He urged residents that they should give their recommendations by 15th February;
 - Consider giving employment opportunities to locals.
- b. From the Ward Admin – Lakeview:
 - Invite residents to welcome the project as it is part of development
- c. From the Chief of Kinungi:
 - Naivasha, especially Kinangop area requires an interchange;
 - In Mithuri area, bridge and underpasses are needed because:
 - there are flower farms in the area with many workers using the road every day;
 - there is an informal settlement where flower farm workers work;
 - there is an intersection between roads C67, D393;
 - There has been human wildlife conflict recently, he recommended that a wild animal crossing is provided especially at Delemare farm and Kigio Conservancy;
 - The previous contractor for the existing road had not factored in human-wildlife conflicts and therefore animal crossings were not provided.
- d. From the Pastor of Naivasha (Pastor Kitoe):
 - Churches and schools should be considered when providing access;
 - Prison – GK Prisons Primary School children come from Site area, Kabati Kanju, and they don't have access to flyover. In addition, there is no access to flyover;
 - The electric cables powering streetlights are underground, making them susceptible to vandalism. Ensure that this is considered when providing lighting.
- e. From a representative of PLWD (Keziah Wanjiru):
 - Consider people living with disabilities (PLWD) when constructing road;
 - Consider a ground level crossing e.g. tunnel rather than footbridge.
- f. From a representative of Youth (Ramadhan – Youth Leader):
 - Congratulates Sogea for previous work in Naivasha, but highlighted that drainage was not properly done;
 - Consider youth for employment opportunities;
 - Ensure that locals are considered in employment;
 - Consider constructing the project in a period of two years rather than 3 years;
 - Job centre.
- g. From Mayor Samson:
 - During the previous construction, trees were replanted but they did not survive because they were not properly taken care of;
 - Usually, access across the road is not allowed during construction. Provide access to businesses;
 - He noted that there is no parking provided in Naivasha Town;

- At the toll station there is no toilet or chemist;
 - Provide underpass and interchanges;
 - Its hard to access Gilgil town;
 - Provide drainage and sewage across the road channelling the stormwater to Lake Naivasha;
 - The road should favour businesses and not 'kill them.
- h. From a representative from the elder's groups:
- There is an existing issue on drainage in the area, it is prone to flooding;
 - Because drainage was not properly done, water ponds at the junction. Ensure that road runoff is properly managed and finally channeled to drain into River Karati;
 - Ensure that locals are engaged in job opportunities.
- i. From Quarry Peter Njoroge (representing the Chief Hell's Gate):
- Drainage should be properly managed;
 - Ensure that bus parks are provided for in the design;
 - Is the project including slow lanes on the highway?
- j. From David Chege – BodaBoda (motorcycle) riders Chairman:
- There has been many 'boda boda' rider deaths on the road (motorcycles), Will a separate road be provided for riders?
 - Offer job opportunities to locals through chiefs as they know qualifications and availability of residents for the jobs.
- k. From a first aider (Teresia Muthoni):
- She requested that bumps be placed on the highway to reduce speed of oncoming vehicles;
 - Consider offering job opportunities for both skilled and unskilled labor.
- l. From Amos Mburu – Kinungi Location resident:
- Amos reported that his land has a KeNHA beacon, and details of his property already taken i.e. surveyed.
 - What is procedure for compensation?
- m. From Mr. Peter Kibaki:
- Sometimes during construction, cracks are formed on buildings close to the construction site. How will we handle this in terms of compensation?
- n. From Mr. Joseph Waigwa:
- Socioeconomic surveys were done already, are we starting this process afresh?
 - Communication to Project Affected Persons should be done directly via text message;
 - Important to clearly mark the extent of right of way (RoW). It is difficult to develop land near the road when there are questions of the extent of the RoW;
 - Consider installing lights in the underpasses to ensure security and safety of pedestrian.
- o. From Mr. Estimus Kirumbi:
- Consider local residents for internship and employment opportunities;
 - She proposed construction of classrooms project as part of Corporate Social Responsibility to give back to the community.
- p. From Mr. David Mwangi:
- There are many accidents at 'hotel ya Ng'ang'a' area, he requested that bumps be placed here to slow down speed of oncoming vehicles.
- q. From Mwangi Kimonwe:
- Provide crossings points at:
 - Karai (underpass);
 - Kinungi Secondary School;
 - Ihendu Market and Primary School;
 - Kinungi Market;
 - Nyakairo.
 - Thankful that the community was engaged for the proposed project.
- r. From other participants (unidentified):
- Provide crossing for the school in Kayple situated between Keroche and Junction;
 - Proposal to add two bridges (crossing points):

- Panda Flowers;
- Gatamaiyu;
- Presence of mining Quarries;
- Kinungi-Naivasha – motorcycles riders frequently use this road. Consider adding a passage for these particular users;
- Provide a cottage clinic between Naivasha-Gilgil towns and between Gilgil and Elementaiata Towns;
- Consider providing an animal crossing at Kinangop junction as there is an upcoming reserve within this area;
- Consider providing streetlights at Kinangop-Kinungi section, Delemare-Naivasha section and Kayole-Buffalo Mall;

Residents were not pleased with the contractor who is constructing Mau Mau Road.

6 GENERAL INFORMATION GIVEN TO MAIN TOPICS

Topic	Information
Employment	Local community members will be considered for job opportunities in the respective project sections where feasible. The Project Company and Contractor welcome the suggestions made by the various Stakeholders that Community Members seeking jobs to register at the relevant county or constituency offices to facilitate identification of required skills.
Corporate Social Responsibility	The proponent will take into consideration the recommendations given by the community members, guided by local administration and county government. This will also be informed by the overall county and constituency development plans in the respective county governments and constituencies and will consider the Project contract period of 30 years
Compensation	In accordance with Kenyan Laws, the National Land Commission (NLC) is responsible for compensation with respect to the acquisition of land in addition to the existing Right of Way. So far, some landowners had already been compensated and that the process is still underway. Any Community Members with pending issues with respect to compensation were requested to see Mr. Walter Nyatwanga and the KeNHA Team present after the Public Meetings and present their concerns issues.
Accidents/Road safety	Improved road safety is one of the key objectives in the implementation of the Project. The Project Road will have several safety measures in place such as: <ul style="list-style-type: none"> - A response team with an ambulance and towing services - Improved road alignment and road markings - Road signs - Street lighting in urban areas
Drainage	Geotechnical and hydrological surveys were conducted to assess the conditions of the various sections along the Project Road. These would inform the design specifications and ensure that sufficient drainage facilities are provided. The Project Company and Contractor welcome contributions from the Community Members and various Stakeholders on proposed long-term solutions for areas with periodic drainage challenges.
Access	Access will be provided putting into consideration the recommendations of the community. Factors such as proximity to schools, market centres, churches and residences as well financial/economic feasibility shall be considered. People living with physical disabilities will also be considered. Access will be provided in form of underpasses, footbridges, service lanes among others.
Other ongoing projects such as James Gichuru project and Mau Mau Road	It was clarified that the proposed project was entirely different and independent from the other two project. The issues from these projects would be/were being addressed separately.
Site specific inquiries	The participants were advised to write the recommendations and comments down and hand them over to the proponent team for their record, consideration and further action.

Ombi la kifukio (~~tender~~ ^{sana} ya chini
Juu ya PLWD sana kwa junction
also kuna wenye wamesoma na
wakipewa kazi watafulahi.

consider them please, some has
registered group they can given tenders.

Kazi wanjiru PLWD.

Dear KEMHA,

My name is Regina Mzanga. I would like to emphasize on overpasses and underpasses. Kindly ~~at~~ at Keyhole ~~&~~ near Senei Hotel many accidents happen there. My husband is a victim of accident that happened on 18th Dec 2020, while closing the road. If there was an overpass or an underpass the accident could not happen. Since, he hasn't recovered and he doesn't go to job due to injuries that he got. Kindly let us have enough overpasses and underpasses, to avoid and minimize accidents in future. I hope my request will be considered.
