Attachment-5 Environmental Monitoring Form/ Social Monitoring Form

A. Environmental Monitoring Form

Environmental Monitoring will be commenced from the construction stage.

B. Social Monitoring Form

Social monitoring form in November 2019 (from December 2018 to November 2019) is referred to the following pages.

Some of the activities undertaken during the environment and social monitoring are indicated in the findings below;

Activity 1:

Activity

Identification and quality assurance of findings of the valuation report of the Project Affected Persons (PAPs) during the resettlement action plan for Atari irrigation scheme

Activity Date 2.

29th July 2019

Location

The Proposed Atari irrigation scheme is found in Bulambuli and Kween Districts separated by the Atari River

Background of the activity

MAAIF undertook this activity so as to quality assure the findings of the RAP study before the PAPs can be compensated. A sample of the PAPs from the PAPs register is taken for purposes of carrying out this exercise.

5. Objectives of the • Activity

- To update the project beneficiaries on the present progress of the project
- To identify and verify the project affected persons and their valued property.
- To clarify on any issues regarding the Resettlement Action Plan and the project in general
- 6. Expected outputs
- PACCs, PDCCs, district and local leaders informed about the progress of the project
- Participants educated about the RAP process and requirement for compensation
- PAPs identified and verified

7. Team

MA	AIF STAFF	
1.	May Almongo Agains	Senior Engineer
2.	Affin Assurance Affiner	Engineer
3.	4000 Edwingeres quelentique	Engineering Trainee

Activity

8. Description of the The following activities were carried out by the MAAIF team during the implementation of the activity:

> The team made a courtesy call to the Bulambuli Chief Administrative Officer (CAO), and held a meeting with the district technical teams i.e. District

Production Officers, District Agricultural Officers, Agricultural Officer and Agricultural Engineer to brief them about the purpose of the activity.

- A general meeting was held to update the participants about the project and discuss the resettlement action plan, and finally report on the details of pertinent key technical, institutional, socioeconomic and environmental issues that will have to be taken into consideration in understanding the project and selected options. In attendance were the PDCC representatives from Kween and Bulambuli, PACCs, Sub-county leadership and Local Council leaders.
- The team undertook the task to identify and verify a representative sample of Project Affected Persons from the PAP register and their valued property prepared during the Resettlement Action Plan study. The team visited the PAPs from both Bulambuli and Kween were visited and had interactions with them to assess their level of readiness to receive compensation and be resettled.

Proceedings of the • Meetings

- The participants were reminded that this was grant aid from the Government of Japan to Uganda and the people of Bulambuli-Kween.
- The participants were willing and ready to have the project and are very grateful to JICA and GOU for the development. Farmers have always been asking their leaders about the progress of the project, therefore this meeting was timely
- The stakeholders were informed that the detailed design of the irrigation scheme was about to be concluded by the consultant, the tender documents were under preparation and would be completed in a months' time.
- Beatrice, Bulambuli DAE was introduced to the PACC and PDCC as very instrumental in the Operation of the irrigation scheme and handling technical issues after completion as she will be on ground.
- There shall be geotechnical investigations carried on in the next week thus the chairpersons PACCs should be prepared. The investigations shall be done in 3 locations, therefore the leaders were called upon to make the farmers aware and offer all necessary assistance to the consultants. The investigations shall be non-destructive and the soils shall be replaced after pitting.
- MAAIF is in the final stages of acquiring the RAP implementation consultant. There are still pending issues such as some PAPs missing on the register, some names were not rightly captured, the emerging issues shall be handled by the consultant. The RAP implementation consultant will have an office in the project area to handle all the issues of resettlement. The leaders were called upon to play their role in preparing the people for the compensation and the project.
- The team also guided the members on the requirements for one to receive their compensation and these included, forms. National ID and a Bank account
- The PAPs were encouraged to acquire National IDs as it shall be mandatory to have one during compensation. Government pays through bank accounts therefore PAPs should also get bank accounts as early as possible. They will be required to present their

bank statements to prove ownership of accounts. Regarding opening bank accounts, the MAAIF team said they will liaise with some banks to extend services closer to the people.

10. Discussions

- The district committees need to have sub county leaders who can identify the rightful owners of land and property.
- PAPs are not are of Bank operations, they requested that banks come close, on ground to register farmers
- There are cases of exchanges of land where some PAPs have sold land and hence there maybe need for transfer of ownership.
- Funds are going to be channeled through banks. for PAPs who shall
 receive little money, mechanism needs to be put in place for them to
 receive their compensation on ground so as not to incur bank
 charges and transport to Mbale
- Shall PAPs wait for all issues and grievances to be handled before payment or PAPs without complaints shall be paid as grievances are being handled. The former is likely to cause delays.

11. Findings from the • Activity

- The Resettlement Action Plan was successfully implemented and the PAPs appreciate the participatory process and transparency that demonstrated during the RAP.
- Verification of the valuation of property and land showed that the information was accurate and reliable.
- The PAPs need to be prepared to receive their compensation to avoid misuse and wastage.

12. Conclusion and Recommendations

The activity was successful undertaken with a lot of lessons learned by the PAPs concerning RAP. The meeting proceedings went on well and members were well pleased with how far the RAP process has gone. Continued monitoring and information sharing among the PDCCs, PACCs, and PAPs should be done so as to deliver positive results.

Activity 2:

Activity

Sensitization on the Grievance Redress Mechanism for Atari irrigation scheme

Activity Date

29th July 2019

Location

The Proposed Atari irrigation scheme is found in Bulambuli and Kween Districts separated by the Atari River

Background of the activity

MAAIF is ready to undertake the RAP implementation. However, before the implementation can be done, a Grievance Redress Mechanism (GRM) needs to be in place with clear structures and composition of members to the established structures. These members however need to be informed of their key roles and procedure to be followed while addressing grievance related issues. The GRM committee shall help sort out some of the complaints raised by the PAPs before they are escalated. As such, PACC and PDCC members were sensitized on this committee and its importance.

Objectives of the • Activity

- To update the project beneficiaries on the present progress of the project
- To discuss the grievance redress mechanism with the PACCs, PDCCs, Local Council leaders and District technical staff.

Expected outputs

- PACCs, PDCCs, district and local leaders informed about the progress of the project
- Participants educated about the grievance redress mechanism and composition of the grievance redress committees

: Team

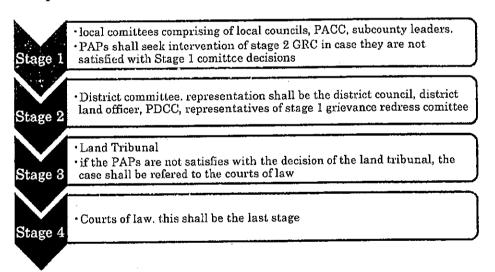

MA	AIF STAFF	
4.	Manufacture 10000	Senior Engineer
5.	Aller distribution of the second	Engineer
6.	Aller - Carrier Street, Charles in the	Engineering Trainee

Activity

Description of the The following activities were carried out by the MAAIF team during the implementation of the activity:

- The team made a courtesy call to the Bulambuli Chief Administrative Officer (CAO), and held a meeting with the district technical teams i.e. District Production Officers, District Agricultural Officers, Agricultural Officer and Agricultural Engineer to brief them about the purpose of the activity.
- A general meeting was held to update the participants about the project and discuss the grievance redress mechanism for the project and the formation and composition of the grievance redress committees. In attendance were the PDCC representatives from Kween and Bulambuli, PACCs, Sub-county leadership and Local Council leaders.
- Proceedings of the Meetings
- The participants were willing and ready to have the project and are very grateful to JICA and GOU for the development. Farmers have always been asking their leaders about the progress of the project, therefore this meeting was timely

- The participants were reminded that this was grant aid from the Government of Japan to Uganda and the people of Bulambuli-Kween.
- The stakeholders were informed that the detailed design of the irrigation scheme was about to be concluded by the consultant, the tender documents were under preparation and would be completed in a months' time.
- The stages of the Grievance Redress mechanism were presented to the members. The leaders were urged to be prepared for dispute resolution in a fast manner.
- The RAP implementation consultant shall identify the PAPs and crosscheck their details on the valuation and confirm consent for the valuation of the property. PAPs, District and sub-county leaders shall form local committees to handle any grievances, and refer those above them to the next level. The RAP implementation consultant shall set up an office on site to handle the grievances.
- Disputes expected to be handled include boundary disputes, PAPs identification and disputes among family members.
- The leaders informed to be ready to address the grievances in time so as not to affect subsequent activities, the leaders need to oversee the processes of the grievance redress.
- There will be four stages on the grievance redress mechanism and each stage will give a detailed overview well documented to the next and will be represented.

! Discussions

- The district committees need to have sub county leaders who can identify the rightful owners of land and property.
- There are cases of exchanges of land where some PAPs have sold land and hence there maybe need for transfer of ownership.
- Shall PAPs wait for all issues and grievances to be handled before payment or PAPs without complaints shall be paid as grievances are being handled. The former is likely to cause delays.
- : Findings from the Activity
- Discussions with the leaders show that there are still some cases and grievances that need to be ironed by the RAP implementation consultant. These grievances shall be addressed together with the grievance redress committees in the different stages

Conclusion and Recommendations

The activity was successful undertaken with a lot of lessons learned by the PAPs concerning GRM. The meeting proceedings went on well and members were well pleased with the progress. Continued monitoring and information sharing among the PDCCs, PACCs, and PAPs should be done so as to deliver positive results.
