

Paquet Minimum Axé sur la Qualité

Outils pour exercices de remédiation

Livret Mathématique N° 3 Thèmes 9 - 11

NOM/PRENOM :

**ECOLE
POUR TOUS**

1^{ère} édition
Octobre 2015

Avant-propos :

La principale préoccupation du moment, pour tous les acteurs de l'éducation, est l'amélioration de la qualité des apprentissages des élèves. Le Projet École Pour Tous; Projet d'Appui au Développement de l'Éducation à travers la Participation Communautaire de l'Agence Japonaise de Coopération Internationale (EPT/JICA), qui accompagne les communautés, dans la réalisation de l'objectif d'une éducation de qualité pour tous, depuis plus d'une décennie, ne s'exclut pas de cette préoccupation. Dans cette optique, il oriente de plus en plus ses activités vers l'amélioration des performances des élèves. Dans ce cadre il a conçu et expérimenté un Paquet Minimum Axé sur la Qualité (PMAQ) basé sur l'utilisation de livret d'exercices de remédiation pertinents.

Ce livret d'exercices, a été conçu en collaboration avec le Ministère de l'Enseignement Primaire, de l'Alphabétisation, de la Promotion des Langues Nationales et de l'Education Civique, pour appuyer les Comités de Gestion Décentralisée des Établissements Scolaires (CGDES) qui désirent organiser des activités d'accompagnement à la scolarité des élèves en vue d'améliorer leurs performances fondamentales de base en calcul.

Loin de se substituer aux manuels et les livres d'exercices du programme officiel, il ambitionne de renforcer les apprentissages, en stimulant une meilleure utilisation du temps supplémentaire consacré par les CGDES aux activités parascolaires d'une part et en accélérant l'installation des compétences mathématiques de base d'autre part.

Dans sa progression, le livret adopte une démarche inductive allant du connu à l'inconnu, des anciennes connaissances aux nouvelles acquisitions. Aussi une infographie riche, variée et adaptée au vécu des enfants, illustre les concepts. Ceci, dans le souci de doter les communautés et les enseignants d'outils efficaces tenant compte du caractère souvent analphabète de l'environnement.

Ce livret est la propriété exclusive de la JICA. Par conséquent toute utilisation doit faire l'objet d'une autorisation du propriétaire sauf pour le Ministère en charge de l'éducation du Niger.

Le chef du Projet EPT/JICA

HARA Masahiro

Sommaire

Addition/Soustraction III

T9 Addition (suite)

T10 Soustraction (suite)

Notion des nombres

T11 Nombres 21 – 79

a 12 oignons.

Ce nombre est plus grand que 10.

lui a donné 3 oignons.  a combien d'oignons maintenant?

ajoute

Bien!

ajoute

12

+

3

=

15

Faisons une addition avec un nombre plus grand que 10.

$$13 + 4$$

13 est un nombre qui unit 10 et 3, n'est ce pas?

$$13 + 4$$

On peut ajouter
4 au 3 de 13 !

Bien!

$$13 + 4 = 17$$

$3 + 4 = 7$; Quand on met ensemble,
10 et 7. ça fait 17.

Cette fois, le nombre plus grand se situe après.

$$5 + 12$$

Il convient d'ajouter le nombre plus petit au nombre plus grand.

$$5 + 12$$

On peut ajouter 5
au 2 de 12 !

Bien!

$$5 + 12 = 17$$

$$5 + 2 = 7$$

Mets ensemble 10 et 7. ça fait 17.

Exemple

Ecris le nombre qui convient dans le .

$$\boxed{13} + \boxed{4} = \boxed{17}$$

Bien!

Exercices

Ecris le nombre qui convient dans le .

① $\boxed{11} + \boxed{5} = \boxed{}$

② $\boxed{14} + \boxed{2} = \boxed{}$

③ $\boxed{12} + \boxed{1} = \boxed{}$

④ $\boxed{13} + \boxed{2} = \boxed{}$

⑤ $\boxed{15} + \boxed{4} = \boxed{}$

⑥ $\boxed{16} + \boxed{3} = \boxed{}$

1ère Correction 2ème Correction

⑦ $18 + 1 = \square$

⑧ $12 + 3 = \square$

⑨ $15 + 2 = \square$

⑩ $14 + 5 = \square$

⑪ $4 + 11 = \square$

⑫ $1 + 16 = \square$

⑬ $2 + 17 = \square$

⑭ $3 + 13 = \square$

⑮ $2 + 16 = \square$

⑯ $1 + 12 = \square$

 a 3 oignons,  a 4 oignons et  a 2 oignons.

Quand on met ensemble les oignons de 3 personnes, ça fait combien, en tout ?

Bien!

9

9 oignons!!

Je représente cette figure par la forme d' « addition ».

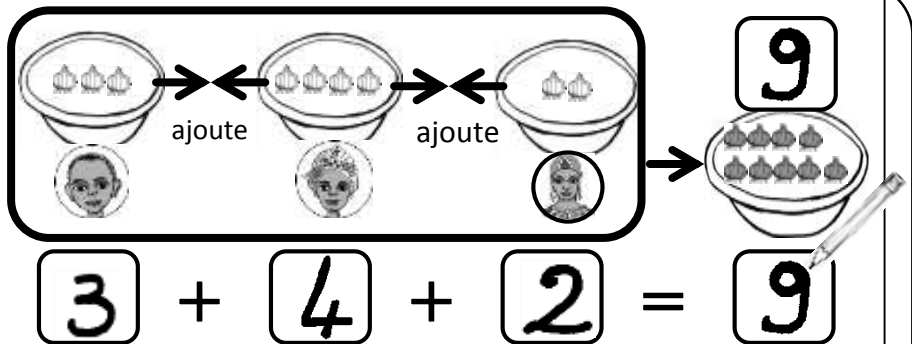

Ecris le nombre d'oignon dans le .

$$\square + \square + \square = \square$$

Bien!

On peut écrire l' « addition », même avec 3 nombres.

Faisons l'addition de 3 nombres.

$$\begin{array}{|c|} \hline \square\square \\ \hline 2 \\ \hline \end{array} + \begin{array}{|c|} \hline \square\square\square \\ \hline 3 \\ \hline \end{array} + \begin{array}{|c|} \hline \square\square\square\square \\ \hline 4 \\ \hline \end{array}$$

On ajoute les nombres un à un.

$$\begin{array}{|c|} \hline \square\square \\ \hline 2 \\ \hline \end{array} + \begin{array}{|c|} \hline \square\square\square \\ \hline 3 \\ \hline \end{array} + \begin{array}{|c|} \hline \square\square\square\square \\ \hline 4 \\ \hline \end{array}$$

Tout d'abord, on ajoute 2 à 3 pour obtenir 5.

$$\begin{array}{|c|} \hline 2 + 3 \\ \hline \end{array} + \begin{array}{|c|} \hline 4 \\ \hline \end{array}$$

$$\begin{array}{|c|} \hline 5 \\ \hline \end{array} + \begin{array}{|c|} \hline 4 \\ \hline \end{array}$$

Puis, on ajoute 4 au 5.

$$\begin{array}{|c|} \hline 5 \\ \hline \end{array} + \begin{array}{|c|} \hline 4 \\ \hline \end{array} = \begin{array}{|c|} \hline 9 \\ \hline \end{array}$$

Bien!

Je peux résoudre
l'addition de 2 nombres.

Exemple

Ecris le nombre qui convient dans le .

$$\begin{array}{|c|} \hline \square \square \\ \hline 2 \\ \hline \end{array} + \begin{array}{|c|} \hline \square \square \square \\ \hline 3 \\ \hline \end{array} + \begin{array}{|c|} \hline \square \square \square \square \\ \hline 4 \\ \hline \end{array}$$

$$\begin{array}{|c|c|c|} \hline 2 & + & 3 \\ \hline \end{array} + \begin{array}{|c|} \hline 4 \\ \hline \end{array}$$

$$\begin{array}{|c|} \hline 5 \\ \hline \end{array} + \begin{array}{|c|} \hline 4 \\ \hline \end{array} = \begin{array}{|c|} \hline 9 \\ \hline \end{array}$$

Bien!

Ecris le nombre qui convient dans le

$$\textcircled{1} \boxed{3} + \boxed{1} + \boxed{5} = \boxed{} \quad \textcircled{2} \boxed{7} + \boxed{1} + \boxed{1} = \boxed{}$$

$$\textcircled{3} \boxed{4} + \boxed{2} + \boxed{2} = \boxed{} \quad \textcircled{4} \boxed{6} + \boxed{2} + \boxed{1} = \boxed{}$$

$$\textcircled{5} \boxed{5} + \boxed{1} + \boxed{4} = \boxed{} \quad \textcircled{6} \boxed{2} + \boxed{3} + \boxed{2} = \boxed{}$$

$$\textcircled{7} \boxed{3} + \boxed{1} + \boxed{4} = \boxed{} \quad \textcircled{8} \boxed{3} + \boxed{5} + \boxed{1} = \boxed{}$$

$$\textcircled{9} \boxed{2} + \boxed{4} + \boxed{3} = \boxed{} \quad \textcircled{10} \boxed{5} + \boxed{1} + \boxed{2} = \boxed{}$$

$$\textcircled{11} \boxed{1} + \boxed{5} + \boxed{4} = \boxed{} \quad \textcircled{12} \boxed{3} + \boxed{2} + \boxed{3} = \boxed{}$$

$$\textcircled{13} \boxed{2} + \boxed{1} + \boxed{3} = \boxed{} \quad \textcircled{14} \boxed{5} + \boxed{1} + \boxed{2} = \boxed{}$$

$$\textcircled{15} \boxed{1} + \boxed{2} + \boxed{3} = \boxed{} \quad \textcircled{16} \boxed{1} + \boxed{4} + \boxed{5} = \boxed{}$$

$$\textcircled{17} \boxed{4} + \boxed{3} + \boxed{2} = \boxed{} \quad \textcircled{18} \boxed{2} + \boxed{4} + \boxed{1} = \boxed{}$$

Faisons l'addition de 3 nombres.

$$\begin{array}{|c|} \hline \square \\ \hline 2 \\ \hline \end{array} + \begin{array}{|c|} \hline \square \square \square \square \\ \hline 8 \\ \hline \end{array} + \begin{array}{|c|} \hline \square \square \square \\ \hline 4 \\ \hline \end{array}$$

On ajoute les nombres un à un.

$$\begin{array}{|c|} \hline \square \square \\ \hline 2 \\ \hline \end{array} + \begin{array}{|c|} \hline \square \square \square \square \\ \hline 8 \\ \hline \end{array} + \begin{array}{|c|} \hline \square \square \square \\ \hline 4 \\ \hline \end{array}$$

Tout d'abord, on ajoute 2 à 8 pour obtenir 10.

$$\begin{array}{|c|} \hline 2 + 8 \\ \hline \end{array} + \begin{array}{|c|} \hline 4 \\ \hline \end{array}$$

↓

$$\begin{array}{|c|} \hline 10 \\ \hline \end{array} + \begin{array}{|c|} \hline 4 \\ \hline \end{array}$$

On ajoute ces 2 nombres. Ça fait 10!

Puis, on ajoute 4 au 10.

$$\begin{array}{|c|} \hline 10 \\ \hline \end{array} + \begin{array}{|c|} \hline 4 \\ \hline \end{array} = \begin{array}{|c|} \hline 14 \\ \hline \end{array}$$

Bien!

10 et 4 font 14 !

Exemple

Ecris le nombre qui convient dans le .

$$\begin{array}{|c|} \hline \square\square \\ \hline 2 \\ \hline \end{array} + \begin{array}{|c|} \hline \square\square\square\square \\ \hline 8 \\ \hline \end{array} + \begin{array}{|c|} \hline \square\square\square \\ \hline 4 \\ \hline \end{array}$$

$$2 + 8 + 4$$

$$10 + 4 = 14$$

Faisons l'addition des 3 nombres. Un nombre parmi eux est plus grand que 10.

$$14 + 2 + 3$$

On ajoute les nombres un à un.

$$14 + 2 + 3$$

Tout d'abord, on ajoute 2 à 14 pour obtenir 16.

$$14 + 2 = 16$$

On ajoute 2 au 4 de 14, n'est ce pas?

Puis, on ajoute 3 au 16.

Bien!

$$16 + 3 = 19$$

On ajoute 3 au 6 de 16, n'est ce pas?

Exemple

Ecris le nombre qui convient dans le

$$14 + 2 + 3$$

$$14 + 2 = 16$$

Bien!

$$16 + 3 = 19$$

3

=

11

Faisons une soustraction avec un nombre plus grand que 10!

$$18 - 5$$

18 est un nombre qui unit 10 et 8, n'est ce pas?

$$18 - 5$$

On peut enlever 5 au 8 de 18 !

Bien!

$$18 - 5 = 13$$

$8 - 5 = 3$. On met ensemble 10 et 3, ça fait 13.

Exemple Ecris le nombre qui convient dans le .

$$18 - 5 = 13$$

a 8 tomates  .

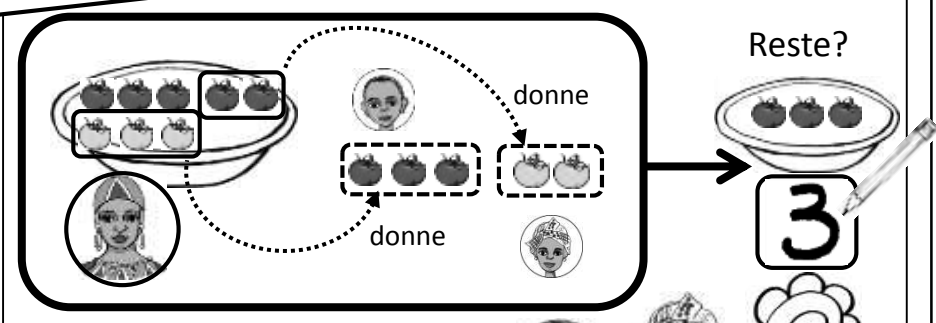

Elle a donné 3 tomates  à  .

3 tomates sont prises. ça reste 5 !

Elle a donné aussi 2 tomates  à  . Ça reste combien?

C'est 3 !

je représente cette figure par la forme de « soustraction ».

Ça reste?

3

Ecris le nombre des tomates dans le .

Ça reste?

3

$$\square - \square - \square = \square$$

Bien!

Ça reste?

3

$$8 - 3 - 2 = 3$$

On peut écrire la « soustraction », même avec 3 nombres .

Faisons la soustraction de 3 nombres.

8

-

3

-

4

On enlève le nombre un à un.

8

-

3

-

4

Tout d'abord, on enlève 3 de 8 pour obtenir 5.

8

-

3

=

5

Puis, on enlève 4 du 5.

Bien!

5

-

4

=

1

Je peux résoudre la soustraction de 2 nombres.

Exemple

Ecris le nombre qui convient dans le .

1ère Correction 2ème Correction

a 10 tomates  .

Elle a donné 4 tomates  à  .

On enlève 4 de 10.
ça fait 6 !

a pris 3 tomates  de  .  a combien de tomates,
en tout?

C'est 9 !

Bien!

je représente cette figure par la chaîne d'opération.

Ça fait combien?

Ecris le nombre des tomates dans le .

Ça fait combien?

$$\square - \square + \square = \square$$

Bien!

Ça fait combien?

$$10 - 4 + 3 = 9$$

Il y a la soustraction et l'addition dans une formule !

Faisons le calcul ayant la soustraction et l'addition ensemble dans une chaîne d'opération.

$$15 - 2 + 4$$

On fait le calcul un à un à partir de la 1^{ère} opération.

$$15 - 2 + 4$$

Tout d'abord, on enlève 2 de 15 pour obtenir 13.

$$15 - 2 = 13$$

On enlève
2 au 5 de
15 !

Puis, on ajoute 4 au 13.

On fait toujours le calcul un à un à partir de la 1^{ère} opération, même s'il y a la soustraction et l'addition ensemble dans le calcul.

$$13 + 4 = 17$$

Bien!

On peut ajouter 4 au 3 de 13.

Maintenant, à l'inverse de la page précédente, on commence par l'addition et fini par une soustraction.

$$14 + 3 - 2$$

Comme la page précédente, on fait le calcul un à un à partir de la 1^{ère} opération.

$$14 + 3 - 2$$

Tout d'abord, on ajoute 3 à 14 pour obtenir 17.

$$14 + 3 = 17$$

On ajoute
3 au 4 de
14 !

Puis, on enlève 2 du 17.

$$17 - 2 = 15$$

Fait le calcul en regardant bien si c'est l'addition ou la soustraction!!

Bien!

On peut enlever 2 au 7 de 17!

Exemple

Ecris le nombre qui convient dans le .

$$\boxed{15} - \boxed{2} + \boxed{4}$$

Ecris les nombres 1 à 10 par ordre !

0 1 2 3 4 5 6 7 8 9 10

Bien!

On appelle la ligne sur laquelle on écrit les nombres par ordre, « ligne du nombre »

0 1 2 3 4 5 6 7 8 9 10

Le nombre augmente un par un.

Le nombre à droite est toujours le nombre plus grand.
4 est à droite de 3, donc il est plus grand que 0, 1, 2, 3 !

Ecris le nombre qui convient dans le .

11 12 13 14 15 16 17 18 19 20

Il y a la ligne du nombre qui commence par le nombre à mi-chemin comme 11.

Bien!

Quand on regarde la ligne du nombre, on peut savoir que 17 est plus grand que 14 de 3 pas, n'est ce pas?

15 est le nombre plus grand que 13 de 2 pas !

15 est le nombre plus petit que 19 de 4 pas !

Ecrivons la ligne du nombre !

On écrit la ligne du nombre 0 à 10.

① on tire une ligne de flèche.

② on trace un trait vertical au bout de gauche et un trait un peu à droite. La longueur entre ces 2 traits est un pas.

③ on écrit 0 et 1 sur les 2 traits verticaux.

④ on trace les 9 traits en gardant la même longueur que le pas entre 0 et 1.

⑤ on écrit 2, 3, 4 sur les traits verticaux.

Plus le nombre se situe à droite, plus le nombre devient grand.

⑥ ensuite, on écrit 5, 6, 7, 8, 9. Et la ligne du nombre est achevée!!

Bien!

⑧ 6 est plus petit que 13 de pas.

⑨ 5 est plus petit que 12 de pas.

⑩ 3 est plus petit que 15 de pas.

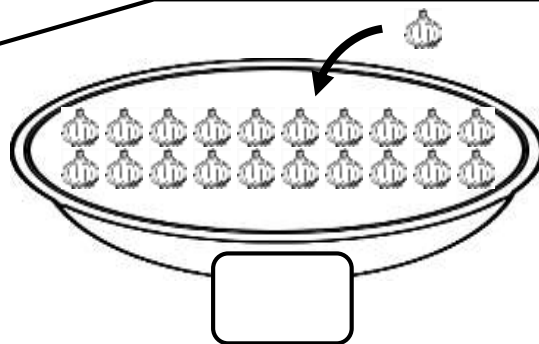

Il y a combien des oignons?

20 oignons !

Quand je mets 1 autre oignon, ça fait combien, en tout?

Bien!

Quand on ajoute 1 à 10, ça fait 11. Donc, quand on ajoute 1 à 20, ça fait 21, non ?

Voyons comment on peut représenter les nombres plus grand que 20!

1 pièce de est rentrée dans le cadre de de 20, donc, ça devient 21, n'est ce pas !

Même si les nombres augmentent, on représente ces nombres de la même façon.

Quand la pièce dans le cadre de augmente un à un, le nombre change comme 2, 3, 4, 5, 6, 7, 8 !

Exemple Ecris le nombre représenté par la figure.

Bien!

21

Exercices Ecris le nombre représenté par la figure.
