

13-1

Shapes of Boxes

Let's Make Boxes (1)

Instruction Characteristics of boxes.

Type A

Formed only by squares

Type B

Formed by squares and rectangles

Type C

Formed only by rectangles

- Flat surfaces of a box are called face.
- The line between two faces is called side.
- The point where three sides meet is called vertex.

Example 1 Classify the following boxes into the three types. Which types are these?

Type A is (b) Type B is (c) Type C is (a)

1 Classify the following boxes into the three types.

(d)

(e)

(f)

Type A are

Type B are

Type C are

Example 2 Investigate the following box.

1 Count the number of sides, faces and vertexes.

	Vertexes	Sides	Faces
	8	12	6

2 Write down the shapes of faces and the lengths of sides.

	Faces	Sides
	Squares with the same size	All the lengths are the same

2 Investigate the following box.

1 Count the number of sides, faces and vertexes.

	Vertexes	Sides	Faces

You can find a box and count the vertexes, sides, and faces.

2 Write down the shapes of faces and the lengths of sides.

	Faces	Sides

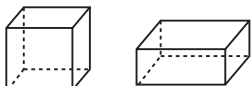

13 - 2

Shapes of Boxes

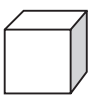

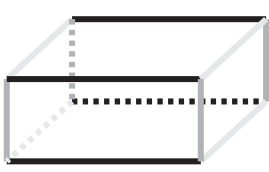

Let's Make Boxes (2)

Instruction Summary of characteristics of boxes.

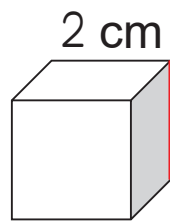

1 The number of sides, faces and vertexes.

	Vertexes	Sides	Faces
	8	12	6

2 Write down the shapes of faces and the lengths of sides.

	Faces	Sides
	Squares with the same size	All the lengths are the same
	Opposite faces are the same shape and size.	3 kinds of lengths are described in 3 kinds of color

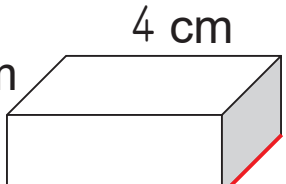

Example Find the length of the side marked in red.

1   cm.

2   cm.

1 Find the length of the side marked in red.

1   cm.

2   cm.

Shapes of Boxes

Review

1 Investigate the following box.

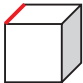

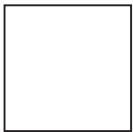

1 Count the number of sides, faces and vertexes.

	Vertexes	Sides	Faces
			

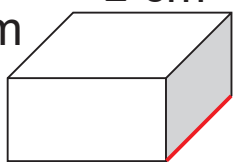

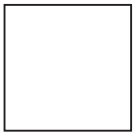

2 Write down the shapes of faces and the lengths of sides.

	Faces	Sides
		

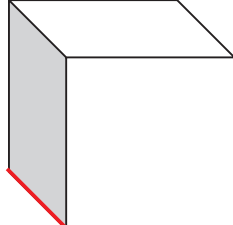

2 Find the length of the side marked in red.

1  1 cm  cm.

2  3 cm  cm.

3  2 cm 2 cm  cm.

4  2 cm 5 cm  cm.

5  4 cm  cm.

6  2 cm 1 cm  cm.

7

8

2 When you tape together to make a box, which one will you make, (a), (b), or (c)?
