

Practice Book for Mathematics Grade 2

Practice Book for Mathematics

Grade 2

Japan International Cooperation Agency

Practice Book for Mathematics was developed by the Japan International Cooperation Agency (JICA) for providing educators with mathematics practice questions, which can be used for developing mathematics learning materials such as textbooks. This book is also intended for students' individual learning.

This book covers all of the contents taught at elementary school in Japan and is based on the Japanese mathematics curriculum.

It is JICA's hope that this book will improve the quality of mathematics education all around the world.

* This book was developed under the supervision of Hiroshi Tanaka (Founder of “Class / People <jyugyou / hito>” School < a school focused on the further development of teachers >, Former Vice Principal of Elementary School attached to University of Tsukuba, Former Chairperson of National Mathematics Lesson Study Association).
