

Let's make a liquid soap!

[Materials]

- ① Bar soap 200g
- ② Glycerin 2TBS
- ③ Water 3L
- ④ Large pot
- ⑤ Plastic bottle
- ⑥ Grater

① 700Frw

② 1,000Frw

We need to buy these items only!!!!

[Advantages for making liquid soap from bar soap]

- Bar soaps may be dirty because many people touch it directly when they wash hands.

- The total cost for making this liquid soap is cheaper than liquid soap at market.

*From 200g of bar soap, we can make 3L of liquid soap.

If we buy 3L of liquid soap at market, it will cost about 9,000Frw.

- All materials are available in Nyakarambi.

[How to make]

1. Grate bar soap finely.
2. Boil water and turn off the heat.
3. During the water is very hot, add the grated soap into water and stir continuously to dissolve all soap.
4. Once all the soap dissolves, add glycerin to it and mix well.
5. Cover it and leave it for 12 hours.
6. Make a small hole on the top of bottle cap, pour liquid soap we made into the bottle.

Wash our hands!!!
