

School Health 学校保健		Updated	
<b>Target Countries :</b>		12 participants	
<b>Course No. :</b> J1704166		<b>No. :</b> 1784456	
<b>Sector :</b> Health/Other Health Issues			
<b>Sub-Sector :</b> Education/Primary Education			
<b>Language :</b> English			
<b>Outline</b>			
This training course aims at establishing or strengthening of a school health system which is best suited to each training participant's country. Concrete school health activities are planned based on school health policy, system, and activities in Japan, its improved learning environment and students' health maintenance, which lead to better school enrollment rate and school dropout prevention.			
Objective/Outcome		Target Organization / Group	
<b>【Objective】</b> Action Plan for promoting school health system in each country will be approved by relevant stakeholders and implemented.		<b>【Target Organization】</b> Department in charge of planning school health promotion in the central or local government. (Ministry of Education or Ministry of Health)	
<b>【Outcome】</b> 1. To understand and analyze the current situation and problems of school health in area of responsibility. 2. To understand the school health policy/system and its history/experiences in Japan. 3. To understand the school health activities/measures in Japan, and to consider the possibility of adaptation to each country. 4. To formulate Action plan on school health in each country, considering the collaboration between the government (Ministry of Education/Ministry of Health), school and local community, and clarifying each role.		<b>【Target Group】</b> Officer in charge of planning and implementing school health, or of promoting community health based in school. At least 5years' experience in the relevant field. (*If 2 participants are allocated for one country, it is one each for MOE and MOH.)
