To increase the capability of national statistical systems to produce the statistical data requirements for monitoring the post-2015 sustainable development goals and related measurements of national development.

As a result of the course, participating organizations are expected to have statistical staff with:
1. Increased knowledge and understanding of the internationally recommended standards, frameworks and good practices applied in the production and analysis of core sets of population, social, economic and environmental official statistics.
2. Knowledge and understanding of goals, targets and indicators of the post-2015 development agenda.
3. Improved skills in applying basic statistical theory and methods in the production of quality data and basic statistics.
4. Demonstrated ability to conduct a sample survey and produce and analyze development indicators from sample survey data.
5. Improved communication and presentation skills as applied to effectively presenting and explaining statistical results.
