<th>Objective/Outcome</th>
<th>Target Organization / Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>To be certified International Accredited Category B after acquiring the hydrographic survey technique, and understand the utilization of hydrographic data.</td>
<td>Authorities responsible for hydrographic survey or nautical chart (hydrographic office, port authority, maritime bureau)</td>
</tr>
<tr>
<td>1. To understand the theoretical concept, surveying and drafting technique for hydrography.</td>
<td>1) Employed in a target organization</td>
</tr>
<tr>
<td>2. To be able to collect the necessary data from the field surveying for hydrography.</td>
<td>2) At least two years of occupational experience in hydrographic survey</td>
</tr>
<tr>
<td>3. To be able to draft the smooth sheet based on the collected data.</td>
<td>3) Have obtained credits for mathematics and physics at least on the level of Technical College or equivalent educational institution</td>
</tr>
<tr>
<td>4. To understand the utilization of hydrographic chart through using the tool such as GIS.</td>
<td></td>
</tr>
</tbody>

### Contents

The curriculum is consist of lectures and field exercise described in below to acquire International Accredited Category B for Hydrographic Survey

#### Lecture
1) Lecture on theoretical concept for hydrography (geodesy, tide, marine meteorology, underwater acoustics, statistics, etc.)
2) Lecture on practical technique for hydrography (electronic navigation chart, control point survey, GPS survey, photogrammetry and satellite image, sounding, map projection, cartography, tidal current, etc.)
3) Lecture on utilization of hydrographic chart (GIS, law of the sea, ocean policy, navigation, maritime affairs, maritime boundary delimitation, etc.)

#### Field Exercise
1) On board exercise in the port to collect necessary data for hydrography
2) Drafting exercise of a smooth sheet based on the data from the on board exercise
3) GIS exercise to utilize hydrographic and nautical information

### Target Countries
Coastal countries and countries faced on an international rivers

### Course Period
2017/06/26 ～ 2017/12/15

### Implementing Partner
Japan Coast Guard, Japan Hydrographic Association

### Cooperation Period
2017～2019

### Remarks and Website

Hydrographic chart is important infrastructure to secure the marine traffic for economic prosperity and to formulate the ocean policy. This course aims to enhance the capacity of hydrographic survey technique and utilization of hydrographic data. After completion this course, all participants are certified Internationally Accredited Category B designated by FIG/IHO/ICA.
