This course is added to monitoring activities after a series of program in Japan. Participants will understand the bridge maintenance system carried out in Japan and the bridge maintenance skills of will be improved by means of the practical training program for inspection, evaluation, and repair of various types of bridges. The monitoring activities and feedback system after the training will improve the quality of the training program.

### Objective/Outcome

**Objective**
Action plans for bridge maintenance management will be formulated and implemented by the organization which trainees belong to.

**Outcome**
1. To be able to acquire and explain the essential points of Bridge Maintenance Management and make plans for Bridge Maintenance Management.
2. To be able to explain the basic work and concept of inspection, evaluation of various types of bridges (concrete bridges and steel bridges).
3. To be able to explain the basic work and concept of maintenance reinforcement/repair of various types of bridges (concrete bridges and steel bridges).
4. To make an action plan for Bridge Maintenance Management in participants’ countries.

### Target Organization / Group

**Target Organization**
Competent government agencies or governmental organizations responsible for bridge engineering (design, construction, maintenance, repair of bridges)

**Target Group**
Engineer currently engaged in bridge engineering (design, construction/construction supervision, maintenance and repair of bridges).

Preferably with 5 - 15 years of work experience (3 years or more in bridge engineering desirable).

### Contents

**Preliminary Phase in Participants’ home countries**
Formulation and submission of Country Report
Collection of data and preparation for report presentation

**Core Phase in Japan**
Lectures, practices, site visits and discussion on the following subjects
1. Introduction to Bridge Maintenance Management in Japan
2. Maintenance and Management of Steel Bridges
3. Maintenance and Management of Concrete Bridges
4. Maintenance and Management of Bridge Deck Pavement / Floor Slab Waterproof System
5. Maintenance and Management of Bridge Accessories
6. Bridge Inspection and Evaluation
7. Bridge Maintenance Reinforcement/Repair
8. Bridge Management System (BMS)
9. Preparation and presentation of Training Reports

**Finalization phase in a participant’s home country**
Participants and their organizations revise and implement the action plan for bridge maintenance.

### Implementation Partner

Joint venture: National University Corporation, Nagasaki University, International Development Center of Japan Incorporated
