Program for the Specialist of Healthcare-Associated Infection Control and Prevention 医療関連感染管理指導者養成研修	Updated

24　participants

Target Countries : Countries in high-risk of infectious diseases and/or planning countermeasures

Course No. : (A)J1704214/(B)J1704215	No. : (A)1784434/(B)1784435

Sector : Health/Other infectious diseases

Sub-Sector :

Language : (A)English/(B)English

Outline

Participants shall have opportunities to understand the key components of Healthcare associated infection control measures which are "principles and practices", "Establishment of the system" and "Behavioral modification of health care workers" through a series of lectures, workshops and site visits. It is expected that their experiences will impact positively and strengthen a more resilient health system.

Objective/Outcome	Target Organization / Group
【Objective】 This course aims to help the participants implement more effective policies and practices for nosocomial healthcare-associated infection control in their own hospitals. 【Outcome】 1. To understand principles of healthcare-associated infection control 2. To understand actual practices of healthcare-associated infection control 3. To identify major challenges of the participant's organization, and formulate a report describing necessary steps to solve these challenges.	【Target Organization】 Core hospitals at national or regional levels having an infection control committee(ICC/ICT) or an equivalent 【Target Group】 Two participants from the same hospital with ICT: one from top management and one in charge of health care associated infection. The latter participant should be a medical doctor or para-madical with a minimum of 5 years of clinical experience.

Contents		
(1) Acquire basic knowledge regarding healthcare-associated infection control, in particular organization and function of Infection Control Team (ICT) and roles of Infection management nurses (2) Acquire practical skill regarding healthcare-associated infection control, in particular standard preventive measures, basic behavior, environment management, sterilization, surveillance and control system within the hospital. (3) Identify major challenges faced by the participant's organization and formulate a plan describing necessary step to solve these challenges, in particular through lecture on "5S-KAIZEN-TQM" approach, discussion with fellow participants, and case studies. 2.Finalization Phase (activities in home country)	**Course Period**	(A)2017/08/15〜2017/09/09 (B)2017/10/24〜2017/11/18
	Department in Charge	Human Development Department
	JICA Center	(A)JICA Tokyo(Human Dev.)/(B)JICA Tokyo(Human Dev.)
	Cooperation Period	2017〜2019
