

Target Countries :Mainly Asia and the Pacific region. Possible to accept from other regions.

Course No. :J1704346

No. :1784511

Sector :Governance/Statistics

Sub-Sector :

Language :English

Outline

The program aims to strengthen the capacity of national statistical systems of developing countries to analyze socioeconomic disparities among different sub-populations through conducting an analytical research and applying appropriate statistical techniques on micro-data from household surveys to analyze disparities across sub-populations in dimensions such as health, employment, income and education.

Objective/Outcome	Target Organization / Group	
<p>【Objective】 The capacity of government statisticians is to be strengthened in order to produce SDG indicators and relevant social and economic statistics that facilitate the analysis of disparities and monitoring of impacts of inclusive development policies.</p> <p>【Outcome】 1. To increase understanding of conceptual frameworks relating to inclusive development and analysis of social disparities in the view of the Sustainable Development Goals 2. To deepen knowledge of survey design parameters and improve skills on statistical methods, tools and techniques for measurement of disaggregated SDG indicators and the statistical analysis of economic and social disparities 3. To demonstrate ability to prepare and analyze household survey data through appropriate application of methods and tools for disparity analysis, and to write and present a technical paper on the results of the analyses focusing on SDG indicators 4. To prepare Action Plan</p>	<p>【Target Organization】 National statistical offices, statistical research and training institutions and government agencies that are part of the national statistical systems</p> <p>【Target Group】 Middle-level government statisticians who contribute substantively in the design of household surveys, and production and analyses of official statistics and indicators from household surveys in support of socio-economic disparity analyses</p>	
<p>Contents</p> <p>1. Guiding frameworks for analysis and measurement of economic and social disparities in light of the Sustainable Development Goals 2. Understanding and preparing data from complex surveys for use in statistical analysis and measurement of economic and social disparities 3. Statistical tools and methods for production and analysis of disparity statistics 4. Individual Project: Producing an analytical paper on social and economic disparities based on household survey data 5. Action planning</p>	<p>Course Period</p>	<p>2017/05/10~2017/07/08</p>
	<p>Department in Charge</p>	<p>Industrial Development and Public Policy Department</p>
	<p>JICA Center</p>	<p>JICA Tokyo (Industry&Public)</p>
	<p>Cooperation Period</p>	<p>2017~2019</p>
<p>Implementing Partner</p>	<p>UN Statistical Institute for Asia and the Pacific</p>	
<p>Remarks and Website</p>	<p>The training program is conducted jointly by SIAP and JICA (URL) http://www.unsiap.or.jp/</p>
