Communicable disease is still severe disease burden and need to address by whole of the world. Especially in developing countries, it is not only the threat for each individual but also severe burden of socio and economic development of the country. By learning the experiences from Japan, participants are expected to acquire and utilize the necessary knowledge and skills related to CDC.

**Objective/Outcome**

**Objective**
From the prospective of prevention, risk management and health education in communicable disease, participants are expected to recognize current issues, and an Action plan will be formulated.

The issues will be shared and improvement plan will be approved in your organization.

1. To clarify challenges in your country related to Communicable Diseases Control (CDC), and share the other participants through the job report preparation.
2. To understand historical background, policy and measures, administrative system and current situation for CDC in Japan.
3. To clarify the issues of emerging and re-emerging infectious disease and Neglected Tropical Diseases (NTDs) in your country.
4. To consider an improvement plan by utilizing the knowledge and techniques obtained during the training.

**Outcome**

1. To clarify challenges in your country related to Communicable Diseases Control (CDC), and share the other participants through the job report preparation.
2. To understand historical background, policy and measures, administrative system and current situation for CDC in Japan.
3. To clarify the issues of emerging and re-emerging infectious disease and Neglected Tropical Diseases (NTDs) in your country.
4. To consider an improvement plan by utilizing the knowledge and techniques obtained during the training.

**Contents**
