**Objective**

To understand the practice of “School-Based Learning Improvement” (from grasping the level of pupils’ understanding to improving lessons and pupils’ learning), and the “Support from Educational Administration” toward that practice in Japan, and to develop applicable plans at respective countries based on that understanding.

**Outcome**

Module 1: To clarify the current conditions and challenges in respective countries regarding how to grasp the level of pupils’ understanding (in particular “formative (continuous) assessment”) and take measures to improve pupils’ understanding (including in-service training).

Module 2: To understand how to grasp the level of pupils’ understanding (in particular “formative (continuous) assessment”) in Japan.

Module 3: To understand how to improve the level of pupils’ understanding (through school-based in-service training and support from education administration) in Japan.

Module 4: To share and discuss what participants learned through the training program in Japan.

**Target Organization / Group**

Education Offices (district level) and primary or lower secondary schools from the same district as the above-mentioned Education offices.

One participant should be education administrators from district education offices and another one should be head teacher from primary or lower secondary schools from the same district as the above-mentioned education administrators. For 2018, strongly recommend to participation from head officer of district education office.

**Contents**

**Core Phase in Japan**

- Workshop: Enhancement of identification and awareness on issues/challenges of each country.
- Lecture, Visit, Discussion: Outline of educational system in Japan, Role of School Principal in Japan’s school, Formative (continuous) assessment, school visit.
- Practical work: Design a final Report for improving the issues/challenges.

**Objective/Outcome**
