

Seminar on Aviation Security 航空保安セミナー		Continuing	
Target Countries : All countries			
Course No. : J1804258		No. : 1884551	
Sector : Transportation/International/Inter-regional Transportation			
Sub-Sector :			
Language : English			
Outline			
Since 9.11 attack in 2001, unlawful acts against the civil aviation have been increasing and diversifying. ICAO and international community have been requiring States to establish security measures in accordance with common Standards and Recommended Practices. This program provides practical knowledge on ICAO regulations as well as aviation security regulations, systems, programs, and measures in Japan.			
Objective/Outcome		Target Organization / Group	
【Objective】 Draft Action Plan on enhancing aviation security will be formulated by the participants, and will be shared with the stakeholders in respective countries.		【Target Organization】 Governmental bodies on aviation security and management of airport.	
【Outcome】 1. To deepen understanding of the importance of international aviation security by studying the Japanese and other states' systems and experiences. 2. To acquire basic knowledge of aviation security and security control systems conducted in Japan and other international partners. . 3. To deepen basic knowledge of security equipment. 4. To identify aviation security problems in each participant' s country, and seek the effective measures for them.		【Target Group】 1. Administrative officers in charge of aviation security and airport management with more than 5 years experiences, and are able to contribute to the country' s aviation security work over a long period of time after completing the program. 2. Graduates degree or the equivalents with an academic background in civil aviation. 3. Have a sufficient command of English.
