This training program aims to strengthen participants’ capacities for improving the irrigation management system in respective country and area, through making them understand the experiences and know-how of the successful participatory irrigation management system and the roles and functions of Land Improvement District (water user’s association) in Hokkaido, Japan.

### Objective/Outcome

**Objective**

- Participants’ organizations officially examine or implement a plan for improving/strengthening irrigation management system in respective country and area, based on the "Action Plan" proposed by the participants.

**Outcome**

1. To analyze current situation and problems on irrigation management system in respective country and area.
2. To understand the Participatory Irrigation Management (PIM) system and the functions and roles of Land Improvement District (LID) in Japan.
3. To understand the relationship between LID and the other relevant organizations (e.g. agricultural cooperative, Federation of Land Improvement Association)
4. To propose a plan for improving and strengthening participatory irrigation management system in respective country and area as an "Action Plan".
