Course No. : 201984527-J002

No. : 201984527

Sector : Health/Health System

Sub-Sector :

Language : English

Outline

While Japan established UHC system in 1961, hard and continuous efforts such as the creation of insurance premium collection system to achieve and maintain UHC have been made. While the situations in respective countries may differ, the UHC policy responses made in Japan in the process of economic growth and maturity can give guidance to countries facing similar problems.

Objective/Outcome	Target Organization / Group	
<p>【Objective】 Through sharing Japan's experiences and analyzing health policy issues in each participating country, the participants will gain knowledge for the development and administration of health system to provide UHC through health insurance.</p> <p>【Outcome】 1. Understand the basic concept of UHC and learn methods, strategies and necessary conditions to achieve it. 2. Describe and analyze the health care provision and social health protection system of the participant's country and share the understanding with other participants. 3. Understand the social, economic, political and administrative conditions which made it possible for Japan to achieve UHC. 4. Understand difficulties and challenges for sustaining UHC and measures to tackle them. 5. Understand characteristics of health care provision/financing of selected countries and their similarities/differences with Japan and participating countries. 6. Compile a report (discussion note) summarizing the policy agenda and how to address it in each country.</p>	<p>【Target Organization】 Government agencies which are responsible for the policy formulation & management in the field of health insurance, health care provision</p> <p>【Target Group】 1. Director level central government officials & government agencies who are responsible for the policy formulation & management on health insurance, healthcare provision. 2.
