The rapid progress of industrialization in developing countries has been leading to economic development whereas negative aspects such as industrial accidents have been emerging. According to International Labor Organization (ILO), the number of victims of industrial/occupational accidents and diseases has exceeded two millions, annually in the world. Therefore, it is urgently required to formulate and implement appropriate policies of Occupational Safety and Health (OSH) in many countries. The main purpose of this program is to introduce the history and policy of OSH in Japan, especially to those facing rapid industrialization and contribute to the improvement of policies of OSH of participating countries.

<b>Objective/Outcome</b>	<b>Target Organization / Group</b>	
<p><b>【Objective】</b> To understand Japanese advanced occupational safety and health (OSH) measures for improving management of safety, working environment, workers' health, and in addition, measures for preventing mental health problems and occupational traffic accidents. Formulate action plans contributing to the advancement of OSH in their countries and introduction of OSHMS.</p> <p><b>【Outcome】</b> 1. To acquire better understanding on the issues of OSH measures in their own countries. 2. To understand policies and organizations of OSH in Japan. 3. To observe the measures for OSH introduced in the private companies in Japan. 4. To understand the validity of Occupational Safety and Health Management System (OSHMS) of Japan. 5. To examine the content bringing back to their own duties with the overview of the above-mentioned 1 to 4.</p>	<p><b>【Target Organization】</b> Relevant Ministries on Occupational Safety and Health enforcing government Occupational Safety and Health policies in developing countries.</p> <p><b>【Target Group】</b> Those who are engaged in OSH at Ministry of Labour, Ministry of Human Resources, Ministry of Social Welfare, or relevant governmental organizations and agencies, OSH associations, and employers' associations</p>	
<p><b>Contents</b></p> <p>1. To acquire better understanding on the issues of OSH measures in their own countries. Formulation and presentation of Country Report (Situation Analysis Report).</p> <p>2. To understand policies and organizations of OSH in Japan. OSH Law/Labor Inspection System in Japan, Roles of the Ministry in charge, Labor Safety and Health Organization, Labor Standards Inspection Office, Development of Industrial Safety and Health Measures and the outline of its contents in Japan, Industrial/Occupational Accident Statistics, Worker's Accident Compensation Insurance, Outline of OSH Measures in Japan, Safety and Health Education in Japan, Working environment measures of Hazardous materials and check-up measurement, Foreman training, General OSH education, Health Management Plan, etc.</p> <p>3. To observe the measures for OSH introduced in the private companies in Japan. Support of improvement for SME's OSH environment, Machineries safety management, Management of Chemical Materials, Zero-Accident campaign and Hazard Prediction Training (KYT), Personal Protective Equipment (PPE), Total Health Promotion Plan (THP), Green Cross Exhibition, National Industrial Safety and Health Convention.</p> <p>4. To understand the validity of Occupational Safety and Health Management System (OSHMS) and Risk Assessment of Japan.</p> <p>5. To examine the content bringing back to their own duties with the overview of the above-mentioned 1 to 4. Discussion for the improvement of OSH in respective country/region, Formulation and presentation of the Action Plan. *This program incorporates "Active Learning" for Knowledge Co-creation (KCCP).</p>	<b>Course Period</b>	2019/10~2019/11
