Course No. : 201984566-J002

No. : 201984566

Sector : Transportation/CapacityDevelopment for Transport Sector

Sub-Sector :

Language : English

Outline

This program provides lectures regarding development and planning of "ports and the waterfront area including industrial location" ranging from the basics of civil engineering to the outcomes of leading-edge research. In addition, a session of case study of ports and the waterfront area including industrial location in which the participants will create action plans after lectures and an inspection and will then make presentations of and discuss such action plans.

Objective/Outcome	Target Organization / Group	
<p>【Objective】 Based on issues related to port development and maintenance, a feasible action plan will be formulated by participants. (In order for the most effective measures to be worked out, the presented action plans will be discussed among the participants and many private corporations.)</p> <p>【Outcome】 1.The issues related to the port development of respective countries are organized as Inception Report with draft action plan. 2.Participants acquire and become able to explain about basic technical knowledge necessary for port improvement. 3.Participants learn about development / planning methodology of ports and the waterfront area including industrial location and draft preliminary plans. 4.Participants gain an understanding and become able to explain the situation at ports around the world. 5.Participants understand a port construction technology of the Japanese company. 6.Participants formulate action plans that cover port-related global issues and sustainable initiatives.</p>	<p>【Target Organization】 Port Development and planning section of national government organizations, Port management authorities.</p> <p>【Target Group】 Young port engineers practicing business for at least 3 years responsible for solving problem of global issues (e.g.maintenance, environment, disaster management, etc.)and their sustainable measures. University graduates from department of engineering with good command of English.</p>	
<p>Contents</p> <p>1.Preliminary Phase in a participant' s home country:Creation of Inception Reports. 2.Lecture/experiment(hands-on training)in basic techniques relating to:(1)Marine/water engineering technologies, (2)Foundation/structure, technologies, (3)Execution/control technologies. 3.Development/planning: (1)Lecture on port policies, (2)Lecture/hands-on training on port planning/designing and formulation of plans and designs, (3)Lecture on and inspection of examples of the port infor-matization, (4)Lecture on and inspection of methodology of port development/management integrated with business establishment in waterfront areas. 4.Circumstances surrounding ports in the world: (1)Globalization, (2)International treaties pertaining to ports. 5.Maintenance and management, the environ-ment, disaster prevention, etc.:(1)Examples of the maintenance and management as well as the effective use of port facilities., (2)Examples of environmental conservation and environ-mental impacts assessment, (3)Lecture on effortsts to prevent disasters of port facilities. 6.Preparation and Presentation of Action Plan.</p>	<p>Course Period</p>	<p>2019/6/11~2019/8/10</p>
	<p>Department in Charge</p>	<p>Infrastructure and Peacebuilding Department</p>
	<p>JICA Center</p>	<p>JICA Yokohama</p>
	<p>Cooperation Period</p>	<p>2019~2021</p>
