Objective/Outcome

This course aims to help the participants implement more effective policies and practices for nosocomial healthcare-associated infection control in their own hospitals.

Outcome

1. To understand principles of healthcare-associated infection control
2. To understand actual practices of healthcare-associated infection control
3. To identify major challenges of the participant’s organization, and formulate a report describing necessary steps to solve these challenges.

Contents

1. Acquire basic knowledge regarding healthcare-associated infection control, in particular organization and function of Infection Control Team (ICT) and roles of Infection management nurses
2. Acquire practical skill regarding healthcare-associated infection control, in particular standard preventive measures, basic behavior, environment management, sterilization, surveillance and control system within the hospital.
3. Identify major challenges faced by the participant’s organization, and formulate a plan describing necessary step to solve these challenges, in particular through lecture on “5S-KAIZEN-TQM” approach, discussion with fellow participants, and case studies.

*This program incorporates “Active Learning” for Knowledge Co-creation (KCCP).
