Objective
The participants enhance their capability for planning and implementation of the action plan to improve sustainability and profitability of the small-scale fisheries in their countries.

Outcome
1) Small-scale fisheries and its characteristics, constraints and potentials are analyzed
2) Japanese experiences of small-scale fisheries development are analyzed
3) Necessary measures for small-scale fisheries development can be planned, implemented and evaluated.

Outline
The contributions of small-scale fisheries to poverty alleviation and food and nutrition security are being increasingly recognized and Voluntary Guidelines for Securing Sustainable Small-scale Fisheries has been developed by FAO. The coastal fisheries in Japan, which is multispecies resources and multi-gear fisheries dominated by smaller vessels, shares similarities with those of developing countries and the experiences of the Japanese fisheries development can be applied to design the action plan for the participants' countries.
