This program is designed for engineering officers engaged in waste management. In particular, it focuses on treatment processes of sanitary landfill and 3R rather than collection and transportation as an advanced course. Participants will be able to learn about relevant techniques such as an innovative project of Eco-town, semi aerobic landfill, composting, industrial waste treatment and so forth.

<tbody>
<tr>
<td><strong>Objective</strong></td>
<td>Governmental organization engaged in waste management</td>
</tr>
<tr>
<td><strong>Outcome</strong></td>
<td>1. Engineering officers in charge of waste treatment processes on collection, transportation, intermediate treatment and final disposal</td>
</tr>
<tr>
<td></td>
<td>2. Occupational experience of more than three (3) years in relevant field</td>
</tr>
</tbody>
</table>

**Contents**

Participants will learn the followings through lectures, site visits, practices and discussions.

1. Waste management administration and planning of Kitakyushu City, Establishment of sound material cycle society, Eco-town project, Life cycle assessment of waste, Overview of solid waste management in developing countries and Japanese assistance
2. Separate collection, Incineration technology, Recycling technology (Eco-town), Composting technique, Biogass recovery, Refuse Derived Fuel (RDF), Structure and maintenance of semi aerobic landfill site, Leachate treatment, Composition analysis of refuse
3. Industrial waste administration, Countermeasures against illegal dumping, Treatment and recycling technologies for sludge, waste oil and plastic refuse
4. Job report presentation, Issue analysis workshop, Group review discussion, Instruction of action plan
